MICROFILMED - 1980

8-21-79
Vol. 44 No. 163
Pages 48949-49234

federal register

Tuesday
August 21, 1979

Highlights

- 48949 Oil Decontrol** Executive order
- 48955 Food and Nutrition Programs** USDA/FNS adopts rules on distribution and utilization of State administrative expense funds
- 48975 Small Business Energy Loans** SBA proposes rules to clarify when loans would be approved under certain programs; comments by 9-20-79
- 49166 Housing** HUD/FHC establishes general prototype costs for one-to-four family dwelling units for each market area of the country; effective 8-21-79 (Part II)
- 49188 Air Carriers** CAB establishes program for gradual elimination of domestic operating certificate restrictions excluding those applicable to intra-Alaska and intra-Hawaii markets; effective 8-21-79 (Part III of this issue)
- 49037 Steel Mill Products** Treasury/Sec'y announces trigger prices for the fourth quarter of 1979
- 48971 State or Local Fair Employment Practices Agencies** EEOC amends regulations on designation of certain agencies to authorize handling of employment discrimination charges within jurisdictions; effective 6-26-79

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Area Code 202-523-5240

Highlights

- 48987 State or Local Fair Employment Practices Agencies** EEOC proposes revising procedural regulations governing designation as deferral agencies; comments by 10-22-79
- 49010 Personnel Boards, Merit boards, and Civil Service Systems** EEOC states policy reasons for recognition as 706 agencies
- 49087 Veterans Home Loan Program** VA proposes policies and procedures governing participation of appraisers and compliance inspectors; comments by 9-20-79
- 49090 Veterans Exposed to Ionizing Radiation** VA issues program guide to be used in development and disposition of claims
- 49222 Air Pollution Control** EPA identifies major source categories for which performance standards for new stationary sources are to be promulgated; effective 8-21-79 (Part V of this issue)
- 48967 Food Additives** HEW/FDA provides for use of styrene-maleic anhydride copolymer, amidated, ammonium sodium salt in paper and paperboard intended for food-contact use; effective 8-21-79; objections by 9-20-79
- 48964 Color Additives** HEW/FDA amends temporary tolerances for certain provisionally listed additives used in ingested cosmetics and drugs; effective 11-19-79; objections by 9-20-79
- 48979, 48983 Drugs For Human or Animal Use** HEW/FDA proposes rules regarding separation of functions in withdrawal proceedings involving imminent hazard determinations and establishes imminent hazard criteria and procedure; comments by 10-22-79 (2 documents)
- 48968 Drugs for Human Use** HEW/FDA changes requirements for requesting certification of insulin products; effective 9-20-79
- 48959 Meat Inspection** USDA/FSQS amends regulations regarding nitrates and nitrites in food products and labeling and selling of foods no longer preserved with such chemicals; effective 9-20-79
- 49116 Sunshine Act Meetings**
- Separate Parts of This Issue**
- 49166 Part II, HUD**
49188 Part III, CAB
49218 Part IV, Interior/FWS
49222 Part V, EPA
49228 Part VI, OMB

Presidential Documents

Title 3—

The President

Executive Order 12153 of August 17, 1979

Decontrol of Heavy Oil

By the authority vested in me as President by the Constitution and statutes of the United States of America, including the Emergency Petroleum Allocation Act of 1973, as amended (15 U.S.C. 701 *et seq.*), and notwithstanding the delegations to the Secretary of Energy in Executive Order No. 11790; as amended by Executive Order No. 12038, it is hereby ordered as follows:

1-101. Effective August 17, 1979, prices charged in the first sale of heavy crude oil are exempted from price controls adopted pursuant to the Emergency Petroleum Allocation Act of 1973, as amended. For purposes of this section, the term "heavy crude oil" means all crude oil produced from a property, but only if, during the last month prior to July 1979 in which crude oil was produced and sold from that property, such crude oil had a weighted average gravity of 16.0° API or less, corrected to 60° Fahrenheit.

1-102. The Secretary of Energy, or his delegate, shall expeditiously conduct a public inquiry as to what other types of heavy crude oil, if any, should be exempted from price controls adopted pursuant to the Emergency Petroleum Allocation Act of 1973, as amended, in order to maintain or increase production of such crude oil. Upon completion of that inquiry, the Secretary shall make a recommendation to the President as to what other types of heavy crude oil, if any, should be exempt from price controls.

1-103. The Secretary of Energy may pursuant to Executive Order 11790, as amended by Executive Order 12038, adopt such regulations as he deems necessary to implement this Order.

THE WHITE HOUSE,
August 17, 1979.

Rules and Regulations

Federal Register
Vol. 44, No. 163
Tuesday, August 21, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 151, 300, 302, 315, 330, 351, 352, 353, 531, 550, 731, 733, 754, and 930

Deletion of Procedural Regulations

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: This document deletes from the Office's regulations the procedures for investigating and prosecuting alleged improper political activity and procedures for governing employee appeals which are obsolete as a result of the reorganization and issuance of Merit Systems Protection Board regulations.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT:

Part	Name	Telephone
151,733	Thomas F. Moyer	(202) 632-2992
300, 302, 315, 330, 351, 352, 353, 731	Morton I. Horvitz	(202) 632-6817
531, 550	James N. Woodruff	(202) 632-6553
754	Wilma Lehman	(202) 632-5623
930	Joseph A. Norris	(202) 632-4638

SUPPLEMENTARY INFORMATION:

Reorganization Plan No. 2 of 1978 (43 FR 36067) abolished the Civil Service Commission and transferred its functions to the Office of Personnel Management and the Merit Systems Protection Board.

Among those functions transferred from the Commission to the Board are:

(1) the authority to investigate and prosecute alleged improper political activity; (2) the authority to decide employee appeals; and (3) the authority to issue regulations on these matters. Interim regulations were published by the Board on January 19, 1979 (44 FR 3946). Final regulations governing appeals were published on June 29, 1979 (44 FR 38342 et seq.).

The following are corrections to Chapter 1, 5 CFR, Parts 151, 300, 302, 315, 330, 351, 352, 353, 531, 550, 731, 733, 754, and 930, resulting from the implementation of Reorganization Plan No. 2 of 1978 and the Civil Service Reform Act of 1978 (Pub. L. 95-454). Part 772 of the Office's regulations was deleted at 44 FR 46249, published on August 7, 1979.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

PART 151—POLITICAL ACTIVITY OF STATE OR LOCAL OFFICERS OR EMPLOYEES

Accordingly, 5 CFR chapter 1 is amended as follows:

§§ 151.131-151.138 [Deleted]

(1) In Part 151, §§ 151.131, 151.132, 151.133, 151.134, 151.135, 151.136, 151.137 and 151.138 are deleted.

PART 300—EMPLOYMENT (GENERAL)

(2) In § 300.104, paragraphs (a)(2) and (3) are deleted, and §§ 300.104(a)(1), 104(b) and 104(c)(2) are revised to read as follows:

§ 300.104 Appeals, grievances and complaints.

(a) *Employment practices.* A candidate who believes that an employment practice which was applied to him or her by the Office of Personnel Management violates a basic requirement in section 300.103 is entitled to appeal to the Merit Systems Protection Board under the provisions of its regulations.

(b) *Examination ratings.* A candidate may file an appeal with the Office from his examination rating or the rejection of his application, except that, where the Office has delegated examining authority to an agency, the candidate should appeal directly to that agency. The appeal shall be filed and processed in accordance with instructions in chapter 337 of the Federal Personnel Manual.

(c) * * *

(2) Except as provided in paragraph (c)(1) of this section, an employee may file a grievance with an agency when he or she believes that an employment practice which was applied to him or her and which is administered or required by the agency violates a basic requirement in § 300.103. The grievance

shall be filed and processed under the agency grievance system established in accordance with Part 771 of this chapter, or a negotiated grievance system.

PART 302—EMPLOYMENT IN THE EXCEPTED SERVICE

§§ 302.502 and 302.503 [Deleted]

(3) Subpart E of Part 302 is amended by deleting §§ 302.502 and 302.503 and revising § 302.501 to read as follows:

§ 302.501 Entitlement.

An individual who is covered by 5 U.S.C. 8101(1) and is entitled to priority consideration under this Part (see § 302.103) may appeal a violation of his/her restoration rights to the Merit Systems Protection Board under the provisions of the Board's regulations by presenting factual information that he or she was denied restoration rights because of the employment of another person.

PART 315—CAREER AND CAREER-CONDITIONAL EMPLOYMENT

(4) Subpart H of the table of contents at the beginning of Part 315 is amended to read as follows:

Subpart H—Probation on Initial Appointment to a Competitive Position

Sec.

315.801 Probationary period; when required.
315.802 Length of probationary period.

315.803 Agency action during probationary period (general).

315.804 Termination of probationers for unsatisfactory performance or conduct.

315.805 Termination of probationers for conditions arising before appointment.

315.806 Appeal rights to the Merit Systems Protection Board.

§ 315.807 [Deleted]

(5) Subpart H of Part 315 is amended by deleting §§ 315.807, 315.808(b)(1) and 315.806(e); and by revising §§ 315.806(b)(2) and 315.806(d) to read as follows:

§ 315.806 Appeal rights to the Merit Systems Protection Board.

* * *

(b) *On discrimination.* An employee may appeal under this subparagraph a termination not required by statute which he or she alleges was based on

partisan political reasons or marital status.

(d) An employee may appeal to the Board under this section a termination which the employee alleges was based on discrimination because of race, color, religion, sex, or national origin; or age, provided that at the time of the alleged discriminatory action the employee was at least 40 years of age; or physical handicap, only if such discrimination is raised in addition to one of the issues stated in paragraphs (b) or (c) of this section.

PART 330—RECRUITMENT, SELECTION, AND PLACEMENT (GENERAL)

(6) Subpart B of the table of contents at the beginning of Part 330 is amended to read as follows:

Subpart B—Appointment From Reemployment Priority List

Sec.

330.201 Priority in filling vacancies.

330.202 Reemployment priority list appeals.

§§ 330.203 and 330.204 [Deleted]

(7) Subpart B of Part 330 is amended by deleting §§ 330.203 and 330.204 and revising § 330.202 to read as follows:

§ 330.202 Reemployment priority list appeals.

An employee or former employee who thinks his or her reemployment priority rights under this subpart have been violated is entitled to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations by presenting factual information that he or she was denied restoration rights because of the employment of another person.

PART 351—REDUCTION IN FORCE

(8) Subpart I of the table of contents at the beginning of Part 351 is amended to read as follows:

Subpart I—Appeals and Corrective Action

Sec.

351.901 Appeal.

351.902 Correction by agency.

(9) Subpart H of Part 351 is amended by revising §§ 351.802 and 351.807 as follows:

§ 351.802 Content of notice.

Except as provided in § 351.803, the notice required by § 351.801 shall state specifically the action to be taken and its effective date; the employee's competitive area, competitive level, subgroup, and service date; the place where the employee may inspect the regulations and records pertinent to this case; the reasons for retaining a lower-standing employee in the same competitive level under § 351.607; the reasons for retaining a lower-standing employee in the same competitive level for more than 30 days under § 351.608; and the employee's right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of section 1201.21 of this title.

§ 351.807 Status during notice period.

When possible, the agency shall retain the employee on active duty during the notice period, but it may place him/her on annual leave with or without his/her consent, on leave without pay with his/her consent, or in a nonpay status without his/her consent when in an emergency the agency lacks work or funds for all or part of the notice period.

(9a) Subpart I of Part 351 is amended by deleting §§ 351.902 and 351.901(b) through (d) and is further amended by revising § 351.901 and redesignating § 351.903 as § 351.902 to read as follows:

§ 351.901 Appeal.

An employee who has been affected by a reduction in force action and who believes this part has not been correctly applied may appeal to the Merit Systems Protection Board under the provisions of the Board's regulations.

§ 351.902 Correction by agency. [Redesignated from § 351.903]

§ 351.903 [Redesignated as § 351.902]

PART 352—REEMPLOYMENT RIGHTS

§§ 352.313, 352.508, 352.607, 352.707 [Amended]

(10) Part 352 is amended by deleting §§ 352.313 (d)-(f), 352.508 (b)-(e), 352.607 (b) and (c), and 352.707 (b) and (c). Part 352 is also amended by revising §§ 352.209; 352.313 (a), (b) and (c); 352.508(a) (1), (2) and (3); 352.607; and 352.707(a) (1), (2), and (3) to read as follows:

§ 352.209 Employee appeals to the Merit Systems Protection Board.

When an agency denies reemployment to a person claiming reemployment rights under this subpart, the agency shall inform him or her of that denial by a written notice. In the same notice, the agency shall inform him/her of his/her right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title.

§ 352.313 Failure to reemploy and right of appeal.

(a) When an agency fails to reemploy an employee within 30 days of his/her application, it shall notify him/her in writing of the reasons and of his/her right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title.

(b) If the agency fails to reach and issue a decision to the employee within 30 days from his/her application for reemployment, the employee is entitled to appeal the failure of the agency to the Merit Systems Protection Board under the provisions of the Board's regulations.

(c) An appeal alleging that the agency has failed to comply with any of the other provisions of sections 3343 and 3581-3584 of title 5, United States Code, or of this Part may be submitted to the Merit Systems Protection Board under the provisions of the Board's regulations.

§ 352.508 Appeals to the Merit Systems Protection Board.

(a) If an agency determines that an employee who has applied for reinstatement is not eligible for reinstatement, it shall notify the employee as promptly as possible of its decision, of the basis therefor, and of the employee's appeal rights under this subpart. The employee is entitled to appeal the decision to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title.

(b) If an agency fails to reinstate an employee within the time limits specified in § 352.507, the employee is entitled to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations.

(c) If an employee considers that his reinstatement is not in accordance with the act and this subpart, he or she is entitled to appeal to the Merit Systems

Protection Board under the provisions of the Board's regulations.

§ 352.607 Appeals to the Merit Systems Protection Board.

If an employee considers that he/she has been improperly reemployed or has been improperly denied reemployment to which the employee considers he/she is entitled under this subpart, the employee may appeal to the Merit Systems Protection Board under the provisions of the Board's regulations.

§ 352.707 Employee appeals to the Merit Systems Protection Board.

(a) If an agency denies reemployment to a person claiming reemployment rights under this subpart, the agency shall inform the individual of that denial and of the reasons therefor by a written notice. In the same notice, the agency shall inform the employee of the right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title.

(b) If an employee considers reemployment to be not in accordance with this subpart, the employee is entitled to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations.

(c) Refusal of a tribe to hire a Federal employee is not appealable to the Merit Systems Protection Board.

PART 353—RESTORATION TO DUTY

(11) Subpart D of the table of contents at the beginning of Part 353 is amended to read as follows:

Subpart D—Appeals

Sec.

353.401 Appeals.

§§ 353.402-353.405 [Deleted]

(12) Part 353 is amended by deleting §§ 353.402, 353.403, 353.404, and 353.405. This Part is also amended by revising §§ 353.308 (a) and (b), 353.401(a)(1) (i)-(iv), and 353.401(b); and redesignating § 353.401(a)(1)(v) as § 353.401(c) to read as follows:

§ 353.308 Notice of right of appeal.

(a) When an agency refuses to restore, or determines that it is not feasible to restore an employee under the provisions of law and this Part, it shall notify the employee in writing of the

reasons for its decision and of his or her right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title and shall forward a copy of the notice to the Board.

(b) When an agency restores an employee it shall notify the employee that he or she is being restored in accordance with the requirements of § 353.303. The agency shall also inform the employee that he or she is entitled to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of § 1201.21 of this title.

§ 353.401 Appeals.

(a) *

(1) *

(i) *Failure of restoration.* If, after proper notification by the employee of his/her desire to exercise his/her restoration rights, the agency concerned fails to restore the employee within the time limits specified by law and in this Part, the employee may appeal to the Board under the provisions of the Board's regulations.

(ii) *Not feasible to restore.* If the agency concerned decides that it is not feasible to restore an employee, he or she may appeal this decision to the Board under the provisions of the Board's regulations.

(iii) *Refusal of restoration.* If the agency concerned refuses to restore an employee, the employee may appeal to the Board under the provisions of the Board's regulations.

(iv) *Improper restoration.* If an employee considers that he or she has been improperly restored, the employee may appeal to the Board under the provisions of the Board's regulations.

(b) Other employees. An employee of another branch who is entitled by law to appeal to the Merit Systems Protection Board may do so under the provisions of the Board's regulations.

(c) *Former agency abolished.* If the Executive branch or District of Columbia agency in which an employee was employed when he or she left for military duty or was injured is abolished and its functions are not transferred to another agency, the employee is entitled to request that the Office find him or her employment.

PART 531—PAY UNDER THE GENERAL SCHEDULE

(13) Part 531 is amended by deleting §§ 531.407(e) (2)-(4) and by revising §§ 531.407 (d)(3) and (e) to read as follows:

§ 531.407 Work of an acceptable level of competence.

(d) *

(3) When the decision on the employee's request for reconsideration sustains the original negative determination, the notice of decision shall inform the employee of his or her right to appeal that decision to the Merit Systems Protection Board under the provisions of the Board's regulations. The agency shall comply with the provisions of section 1201.21 of this title.

(e) *Appeal to the Merit Systems Protection Board.* An employee may appeal to the Merit Systems Protection Board under the provisions of the Board's regulations the decision by his or her agency sustaining the negative determination.

(14) Subpart E of Part 531 is amended by revising § 531.517 to read as follows:

§ 531.517 Appeals to the Merit Systems Protection Board.¹

(a) *General.* An employee who is reduced in grade or pay, or reassigned during his or her salary retention period, may appeal to the Merit Systems Protection Board from a decision of the agency that (1) he or she is not entitled to salary retention, or (2) will terminate or adversely affect the salary retention he or she is currently receiving. This right of appeal does not in any way restrict an employee's entitlement to appeal to the Board under another part of this chapter or under statute.

(b) *Agency notification to employee.* When an employee is reduced in grade or pay, or reassigned during a salary retention period, the agency shall inform him or her in writing whether or not he or she is entitled to salary retention, or whether the salary retention he or she is currently receiving will be terminated or adversely affected. When an agency decides that (1) an employee is not

¹ The provisions of this section apply only to: (1) determinations of entitlement under 5 U.S.C. 5337; and (2) agency decisions to terminate or adversely affect the retained rate received under 5 U.S.C. 5337. 5 U.S.C. 5337 was repealed by the Civil Service Reform Act of 1978 (Pub. L. 95-454) effective on the first day of the first pay period beginning on or after January 11, 1979. For information concerning entitlement to pay retention in actions which occurred after the effective date of the CSRA, see Part 536 of this chapter.

entitled to salary retention, or (2) the salary retention an employee is currently receiving will be terminated, the agency shall inform him or her in writing of his or her right to appeal to the Board under the provisions of the Board's regulations. The agency shall comply with the provisions of section 1201.21 of this title.

PART 550—PAY ADMINISTRATION (GENERAL)

(15) In part 550, §§ 550.803 (c) and (d) are revised to read as follows:

§ 550.803 Determining entitlement.

(c) The requirement for a "timely appeal" referred to in section 5596 of title 5, United States Code, is met when an employee or personal representative initiates a claim to the Comptroller General for settlement of his or her claim against the Government, or an appeal or grievance under an appeal or grievance system including appeal procedures included in a collective bargaining agreement, and that claim is accepted as timely filed by the Comptroller General, or that appeal or grievance is accepted as timely filed by the Government authority administering the appeal or grievance system, or is found to be timely filed by an appropriate authority, e.g., an arbitrator, or a court having jurisdiction.

(d) The "appropriate authority" referred to in section 5596 of title 5, United States Code, is (1) a court having jurisdiction; (2) the Comptroller General; (3) the Office of Personnel Management; (4) a grievance board established by section 692 of the Foreign Service Act of 1946; (5) the head of the employing agency or an agency official to whom corrective action authority is delegated; (6) an arbitrator or the Federal Labor Relations Authority in decisions under chapter 71 of title 5, United States Code; (7) the Merit Systems Protection Board, including the Special Counsel; or (8) the Equal Employment Opportunity Commission.

PART 731—SUITABILITY

(16) Subpart D of the table of contents at the beginning of Part 731 is amended to read as follows:

Subpart D—Appeal to the Merit Systems Protection Board

Sec.
731.401 Right to appeal.

§ 731.401 [Amended] § 731.402 [Deleted]

(17) Part 731 is amended by deleting §§ 731.401(c) and 731.402. Part 731 is also amended by revising §§ 731.302(d) and 731.401 to read as follows:

§ 731.302 Actions against employees by the Office.

(d) When the Office instructs an agency to remove an appointee under this Part it shall notify the agency and the appointee of its decision in writing, giving reasons for the decision, and informing the agency and the appointee of the right to appeal to the Merit Systems Protection Board under the provisions of the Board's regulations. The Office shall comply with the provisions of section 1201.21 of this title.

§ 731.401 Right to appeal.

(a) Any applicant or eligible who is disqualified from examination or appointment by the Office for any reason named in § 731.202 may appeal to the Merit Systems Protection Board under the Board's regulations.

(b) An appointee who is disqualified by the Office for any reason named in § 731.202 or his or her employing agency may appeal to the Board under the Board's regulations.

PART 733—POLITICAL ACTIVITY OF FEDERAL EMPLOYEES

(18) The table of contents of Part 733 is amended to read as follows:

Subpart A—The Competitive Service

General Provisions

Sec.
733.101 Definitions.

Permissible Activities

733.111 Permissible activities.

Prohibited Activities

733.121 Use of official authority; prohibition.

733.122 Political management and political campaigning; prohibitions.

733.123 Prohibited activity; exception of certain employees.

733.124 Political management and political campaigning; exception of certain elections.

Subpart B—The Excepted Service

733.201 Jurisdiction.

Subpart C—The U.S. Postal Service

733.301 Jurisdiction.

§§ 733.131-733.137, §§ 733.202-733.302 and 733.402 [Deleted]

§ 733.401 [Redesignated as § 733.301]

(19) Part 733 is amended by deleting §§ 733.131 through 733.137, 733.202 through 733.302, and 733.402; by redesignating § 733.401 as 733.301; and by revising §§ 733.124(b) and 733.401 to read as follows:

§ 733.124 Political management and political campaigning; exception of certain elections.

(b) For the purpose of paragraph (a)(2) of this section, the Office may designate a municipality or political subdivision in Maryland or Virginia in the immediate vicinity of the District of Columbia or a municipality in which the majority of voters are employed by the Government of the United States, when the Office determines that, because of special or unusual circumstances, it is in the domestic interest of employees to participate in local elections. Information as to the documentation required to support a request for designation is furnished by the Office on request. The following municipalities and political subdivisions have been designated, effective on the date specified:

Subpart C—The U.S. Postal Service

§ 733.301 Jurisdiction.

Sections 733.101 (c), (d), (e), and (f) through 733.124 apply to an employee of the U.S. Postal Service.

PART 754—ADVERSE ACTIONS BY THE COMMISSION

(20) Part 754 is amended by revising §§ 754.104 and 754.105 to read as follows:

§ 754.104 Decision.

The Associate Director shall notify the employee and the agency of his or her decision and inform the employee of his or her appeal rights. The decision shall be in writing, be dated, and inform the employee of the reasons for the decision. The Office shall comply with the provisions of § 1201.21 of this title.

§ 754.105 Appeal rights.

(a) An employee may appeal an adverse decision of the Associate Director to the Merit Systems Protection Board under the provisions of the Board's regulations.

(b) An employee who appeals under this section is entitled to be retained in an active duty status until action on his/

her appeal is completed under Part 1201 of this title.

PART 772—APPEALS TO THE COMMISSION [DELETED]

(21) Part 772 was deleted in its entirety by document 44 FR 48249 published on August 7, 1979.

PART 930—PROGRAMS FOR SPECIFIC POSITIONS AND EXAMINATIONS (MISCELLANEOUS)

§§ 930.221-930.234 [Deleted]

(22) Subpart B of Part 930 is amended by deleting §§ 930.221, 930.222, 930.223, 930.224, 930.225, 930.226, 930.227, 930.228, 930.229, 930.230, 930.231, 930.232, 930.233, and 930.234. This subpart is also amended by revising §§ 930.202(f) and 930.214 to read as follows:

§ 930.202 Definitions.

(f) "Removal" means an involuntary change in the status of an administrative law judge, including discharge, suspension, reduction in grade, reduction in pay, and a furlough of 30 days or less from the position of administrative law judge and demotion, reassignment, and promotion to a position other than that of administrative law judge.

§ 930.214 Separation.

(a) *Removal.* An agency may remove an administrative law judge only for good cause, established and determined by the Merit Systems Protection Board on the record and after opportunity for hearing before the Board as provided in §§ 1201.131 through 1201.136 of this title.

(b) *Status during removal proceedings.* In exceptional cases when there are circumstances by reason of which the retention of an administrative law judge in his/her position, pending adjudication of the existence of good cause for his/her removal, would be detrimental to the interests of the Government, the agency shall either assign the administrative law judge to duties in which these conditions would not exist, or place him/her on annual leave for the period that will be covered by the annual leave to his/her credit. An agency may take action under this paragraph only with the prior approval of the Board.

(5 U.S.C. 7701 et seq.)

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 235

[Amdt. 2]

State Administrative Expense Funds; Final Rule

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation is issued to (1) finalize the rulemaking process initiated by interim State administrative expense (SAE) fund regulations promulgated on August 22, 1978 (43 FR 37170) and (2) implement in final regulatory form certain nondiscretionary provisions of Pub. L. 95-627 which was enacted on November 10, 1978. The Department intends that this rulemaking serve as the authority for and the guidelines under which SAE funds will be distributed and utilized.

DATES: Effective upon signature.

FOR FURTHER INFORMATION, CONTACT: Margaret O.K. Glavin, Director, School Programs Division, USDA, FNS, Washington, D.C. 20250, (202)447-8130. **SUPPLEMENTARY INFORMATION:** Pub. L. 95-166, enacted November 10, 1977, brought about a number of changes in the structure of the SAE funding process. They included a change in the allocation formula; the availability of start-up assistance for State agencies assuming program administration, a carryover provision covering funds allocated in fiscal year 1978, authorization for the use of SAE funds in the administration of the Food Distribution Program, a State-level maintenance of effort requirement and mandatory annual submission by State agencies of a plan for the use of SAE funds.

All of the preceding provisions were incorporated into the above-referenced interim rulemaking. They were issued on an interim basis because it was determined that they were nondiscretionary in nature and that the child nutrition programs would be best served if they were in effect prior to the 1978-79 school year. However, a public comment period, extending through October 6, 1978, was provided for.

Public Comments

A total of five (5) comments on the interim regulations were received, all from State Departments of Education. The following describes the substance of the comments and the FNS reaction to them.

Use of "Discretionary" Funds—Two commenters suggested that the establishment of a basic SAE payment to each State of one-percent of the funds expended during the second previous year was inconsistent with the intent of Pub. L. 95-166 (i.e., that payments up to one and one-half percent could and should be provided for). FNS believes that the one-percent payment was intended to be the minimum State entitlement (except where a State would earn less than \$75,000 or the amount it earned in fiscal year 1977) and that it has a discretionary authority to provide additional funding to States within appropriated amounts based on the needs of State agencies. This is reinforced by the fact that the Appropriations Act for fiscal year 1979, the first year under this formula, provided for an amount equal to one percent (\$21 million), with an additional amount (\$4 million) for dealing with State-level problems in the administration of child nutrition programs.

With regard to these discretionary funds, the preamble to the interim regulations states, in part, that "the Department has determined that this issue (i.e., the use of the funds above the one percent level) would be appropriately addressed in a proposed format (regulation) in order that the public's comments may be taken into consideration . . .". In the interval, increasing concern has been raised about alleged problems related to program administration. The amount of concern has caused FNS to devise a plan for determining the extent of and dealing with such problems. As mentioned above, \$4 million has been appropriated for such activity. Regulations dealing with the plan are currently being developed by FNS.

Amounts of SAE Allocated—Two comments reflected the concern that, since the allocation formulae are based on program size in the second preceding fiscal year, the SAE allocation to a State agency which assumed administration of a program in the interval would not include funds for that program. Similarly, a State agency which relinquished administration, would receive an allocation based, in part, on a program which it is no longer administering. FNS believes that the intention was to tie the allocations to (1) whether or not a given program, in whole or in part, is currently being administered by the State agency and (2) the amount of program funds expended in a program in the applicable year, regardless of which agency was administering it. This position is

reflected in the language of this final regulation.

Negotiated Start-up Assistance—The interim regulation provides that, when a State agency assumes administration of a program or programs in nonprofit private schools and child care institutions from FNS an appropriate adjustment in the form of start-up cost assistance from \$10,000 to \$100,000 will be paid by FNS to the State agency. One commenter asked that clarification be provided as to whether or not this would be a one year payment or would be repeated during the second year of administration. Since this is "start-up assistance", it is a one-year payment, provided to a State agency to assist in meeting administrative expenses inherent in assuming program administration. During the first year, and in each subsequent year, SAE funds, as provided for in the applicable formulae, will also be made available.

In the same area, a second commenter suggested that the provision requiring payment of the start-up cost assistance "not later than the succeeding fiscal year" could cause a delay in such payment far beyond the time by which it was needed. FNS agrees that these funds are most appropriately payable at the earliest possible time, certainly during the first full year of the State agency's administration of a program, and that the referenced language, extracted from Pub. L. 95-166, serves only as a final deadline for such payments.

Use of SAE in the Food Distribution Program—One commenter stated that the interim regulation appeared to be too restrictive in describing the uses for which SAE funds may be used in the Food Distribution Program. FNS did not intend that the use of these funds be as limited as a literal reading of the interim regulations might suggest and has changed this paragraph in the final regulations to make the costs allowable under the commodity program consistent with those in effect for the other programs. The use of SAE funds is, of course, limited to the administration of the Food Distribution Program in schools and institutions which participate in the child nutrition programs.

SAE and State Planning—Several comments pointed out the fact that some State agencies must know with some certainty the amounts of money which will be available to them under SAE. This is related to the fact that in some States, agency budgets must be approved by legislatures, and to amend such budgets during the year, based on anticipated receipt of additional funds,

can be a difficult process. FNS understands this problem but feels that the one-percent formula for schools and the Child Care Food Program (CCFP) formula (the combined total of which represents nearly 80 percent of available SAE funds) gives the States a firm basis upon which to plan. As suggested previously, the funds remaining after the required allocations will be made available to States based on an assessment of individual State needs. In taking any such action, FNS will do whatever it can to accommodate the situations in which State agencies find themselves.

FNSRO Approval of State Administrative Expenses—The interim regulation includes a provision for FNSRO approval of amounts of SAE funds for "general administrative expenses" including travel and related expenses. Since the approval of SAE expenditures is part of the overall Regional Office approval of the State's Plan of Child Nutrition Operations, the specific reference to FNSRO approval discussed above has been removed from this final regulation so as not to suggest the need for an approval process in addition to that established for State plans.

Final Regulations

As stated previously, Pub. L. 95-627 made several changes in the allocation and use of SAE funds. These changes, which are incorporated in these final regulations, are discussed below. They are issued in final regulatory form in order to implement statutory mandates. For this reason, they are being issued without the benefit of public comment. Furthermore, since they are mandatory, FNS would not be able to alter them based on unfavorable public comment.

Allocation Formula—Section 7 of Pub. L. 95-627 sets out specific formulae for allocation of SAE funds for school feeding programs (i.e., the National School Lunch, School Breakfast, Special Milk and Food Service Equipment Assistance Programs) and the Child Care Food Program. In addition, as provided for in Pub. L. 95-166, SAE funds may be used in the administration of the Food Distribution Program.

The school program allocation to each State will be one percent of the school program funds expended within the State during the second preceding year. States which would earn less than \$100,000 under this formula will receive a minimum grant of \$100,000, or the amount of SAE funds which the State was allocated in the fiscal year 1978, if that amount is more than \$100,000. As suggested above, States will be

allocated SAE funds based on the school feeding programs they are administering during the year that the funds are allocable, not those they administered two years ago, and the expenditures to which the formula is applied are the total expenditures in the State on a program-by-program basis. Thus, for example, a State agency which assumed administration of private schools from FNS in fiscal year 1978 would, in fiscal year 1979, be allocated, in part, SAE funds on the basis of one percent of applicable program funds paid by FNSRO to private schools in 1977.

Prior to Pub. L. 95-627, SAE funds for the Child Care Food Program were included in the one percent school program allocation. Now a separate formula for Child Care Food Program SAE funds is provided for and is to be applied in a manner similar to that for the school programs. However, in the case of Child Care Food Program SAE funds, there is no minimum allocation and the law permits FNS the discretionary authority to increase or decrease the allocation to a State, depending on the current size of the program within the State. Thus, as example, if the Child Care Food Program in a State has grown substantially over the prior two year period, FNS may increase the SAE allocation to that State if it determines that the level allocable under the formula is inadequate to administer the larger program.

Under Pub. L. 95-627, FNS has the authority to allocate the remaining funds to States in amounts determined necessary for the effective administration of the programs (the law provides for an annual overall SAE appropriation of one and one-half percent of school program and CCFP program funds expended during the second preceding fiscal year). FNS is developing a plan for implementing this provision which will be issued in proposed rulemaking.

Fund Transfers, Limitations and Recordkeeping—Section 7(a)(5) of Pub. L. 95-627 requires funds be used for the costs related to administering the program for which each allocation is made. It also provides that States have the authority to transfer SAE funds among the amounts allocated for school feeding programs, the CCFP and the Summer Food Service Program for Children (a separate SAE allocation is provided for the administration of summer programs under Section 13 of the National School Lunch Act, as amended, and 7 CFR Part 225). The amounts of the transfers are limited to ten percent of any one fund allocation.

In addition, prior to the enactment of Pub. L. 95-627 and the initiation of separate fund allocations, State agencies were required to keep records on total SAE expenditures which were in conformance with the information required in their State plans. Since the law now contains requirements that SAE funds be spent in specific programs and that transfers be limited to ten percent, States would be responsible for the use of SAE funds in light of the separate program fund allocations. These regulations contain the ten percent limitation on transfers.

FNS is concerned that the immediate implementation of the transfer limitation provision could be disruptive and create a hardship for some States. In some cases, it would force them to reorder priorities established in State Plans or withdraw fiscal commitments to one or more programs, thus eliminating administrative services. Therefore, FNS will be providing detailed guidance to States to enable them to implement this provision with as little disruption in the administration of the programs as possible.

In addition, the Department has proposed legislation which would remove this transfer limitation and allow the use of SAE funds for all programs rather than only programs designated in allocations. A bill containing this provision has already been reported out of the House Committee on Education and Labor and is pending in the Senate. It now seems extremely likely that this program will be enacted by the Congress, and that the 10 percent limitation will be removed from the law.

Fund Reallocation—Pub. L. 95-166 requires that for fiscal years 1979 and 1980, each State agency must submit a plan for disbursement of SAE funds and that, based on an evaluation of the information provided and other information available to FNS such as that found in State Plans, the results of audits and management evaluations, etc., FNS will recall and reallocate funds which will not be used by the State to which they were allocated. These regulations require that State agencies provide the necessary information by March 1 and again by June 1. The information will be similar to that developed by the State agency for inclusion in its State Plan of Child Nutrition Operations.

Prior to the enactment of Pub. L. 95-166, FNS surveyed State agencies during the third quarter of each fiscal year in an attempt to ascertain whether the amounts of SAE funds provided were adequate to meet the needs of the

individual States. To the extent possible, excess funds were recalled from States and made available where need existed. Under the allocation formula in existence at that time, this procedure was satisfactory. Section 14 of Pub. L. 95-166, however, formalized the requirement for recall and reallocation; these regulations implement the requirement. FNS envisions this requirement as nothing more than a submission of data which will indicate the relationship between that needed by a State and that available to it under the allocation formulae. The March and June submission dates have been chosen to make the process as timely as possible and at the same time provide the maximum amount of flexibility.

Start-up Assistance—Based on a provision contained in Section 14 of Pub. L. 95-166, interim regulations established a start-up assistance rate for State agencies which assume program administration of at least \$10,000, but not more than \$100,000. These final regulations retain the start-up assistance rate but add a provision for recovering an appropriate amount of SAE in States which terminate program administration. In most cases, such a recovery would occur when administration is surrendered during a fiscal year. It is not intended to be a punitive action but rather is based on the assumption that the State's administrative burden has been lessened.

FNS State-level Administration—Section 7 of Pub. L. 95-627 and these regulations allow for the use by FNS of SAE funds in those States in which it administers the child nutrition programs.

Availability of Funds—While this regulation establishes guaranteed formulae and other provisions for allocation of SAE funds, the availability of SAE funds is dependent upon appropriations of such funds by Congress.

Additional Provisions—Several sections in the interim regulations have not been changed and are included in the final regulation.

Accordingly, 7 CFR Part 235 is amended to read as follows:

1. Section 235.1, paragraphs 235.2 (b), (k), (l), and (p-1) and paragraph 235.3(a) are issued in final form as they appeared in the interim regulations as follows:

§ 235.1 General purpose and scope.

This part announces the policies and prescribes the regulations necessary to carry out the provisions of section 7 of the Child Nutrition Act of 1966, as amended. It prescribes the methods for

making payments of funds to State agencies for use for administrative expenses incurred in supervising and giving technical assistance in connection with activities undertaken by them under the National School Lunch Program (7 CFR Part 210), the Special Milk Program (7 CFR Part 215), the School Breakfast Program (7 CFR Part 220), the Child Care Food Program (7 CFR Part 226), and the Food Service Equipment Assistance Program (7 CFR Part 230).

§ 235.2 Definitions.

(b) "CCSPD" means the Child Care and Summer Programs Division of the Food and Nutrition Service of the U.S. Department of Agriculture.

(k) [Reserved].

(l) "OIG" means the Office of the Inspector General of the Department.

(p-1) "SPD" means the School Programs Division of the Food and Nutrition Service of the U.S. Department of Agriculture.

§ 235.3 Administration.

(a) Within the Department, FNS shall act on behalf of the Department in the administration of the program for payment to States of State administrative expense funds covered by this part. Within FNS, SPD shall be responsible for administration of the program.

2. Section 235.4 is amended to read as follows:

§ 235.4 Allocation of funds to States.

(a) For the fiscal year ending September 30, 1979, and for each succeeding fiscal year, FNS shall allocate to each State agency an amount equal to one percent of the funds expended within the State under sections 4 and 11 of the National School Lunch Act, as amended, and sections 3, 4 and 5 of the Child Nutrition Act of 1966, as amended, during the second preceding fiscal year. *Provided, however,* That the amount of the allocation to any State shall not be less than the greater of \$100,000 or the amount allocated to the State in the fiscal year ending September 30, 1978.

(b) For the fiscal year ending September 30, 1979, and for each succeeding fiscal year, FNS shall, in addition, allocate to each State agency an amount equal to the sum of (1) twenty percent of the first \$50,000, (2)

ten percent of the next \$100,000, (3) five percent of the next \$250,000, and (4) two and one-half percent of any remaining funds expended within the State under section 17 of the National School Lunch Act, as amended, during the second preceding fiscal year. FNS may adjust the amount of any such allocation in accordance with changes in the size of the Child Care Food Program in a State.

(c) Funds allocated under paragraphs (a) and (b) of this section and 7 CFR Part 225 shall be used by the State agency for administrative costs incurred by it in connection with the programs governed by Parts 210, 215, 220, 225, 226, and 230 of this title. In addition, funds allocated under paragraphs (a) and (b) of this section may be used for the Food Distribution Program, as provided for in § 235.6(c). Funds shall be used by the State agency for the program(s) for which allocated, except that the State agency may transfer up to ten percent of the funds allocated for any program(s) to other eligible programs.

(d) As part of its State Plan of Child Nutrition Operations, required by § 210.4a of this title, each State agency shall submit a plan for the use of State administrative expense funds in the school nutrition programs and in the Child Care Food Program, including a staff formula for State personnel, system level supervisory personnel and operating personnel, and school level personnel.

(e) For the fiscal year ending September 30, 1979, and each succeeding fiscal year, each State agency shall, by March 1 and June 1, submit to FNS data on the use of State administrative expense funds provided under this part for the fiscal year in which the plan is submitted. Based on a review of the data, FNS may recall and reallocate such State administrative expense funds which it determines cannot or will not be expended by the State agency to which they were allocated. Funds reallocated under this provision shall be disbursed on the basis of State agency needs. Notwithstanding the above, each State shall release to FNS any Federal funds made available to it under this part which are unexpended or unobligated at the end of each fiscal year. Release of funds by the State agency shall be made as soon as practicable, but in any event not later than 30 days following demand by FNSRO, and shall be reflected in a related adjustment on the State agency's letter of credit.

(f) For any State agency which agrees to assume responsibility for the administration of food service programs in nonprofit private schools or child care

institutions that were previously administered by FNS, an appropriate adjustment in the administrative funds paid under this part to the State shall be made by FNS not later than the succeeding fiscal year. Such an adjustment shall consist of an amount of start-up cost assistance, negotiated with the State agency, of no less than \$10,000 and not exceeding \$100,000, per State.

(g) For any State agency which terminates its administration of any food service program for which State administrative expense funds are provided under this part, a reduction in the amount of such funds, negotiated with the State agency, shall be made by FNS.

(h) FNS shall have available to it the applicable amounts provided for in paragraphs (a) and (b) of this section, and Part 225 of this title, when it is responsible for the administration of a program or programs within a State.

3. Section 235.5 is amended to read as follows:

§ 235.5 Payments to States.

State administrative expense funds allocated to any State shall be made available by means of letters of credit issued by FNS in favor of the State agency. Funds shall not be made available before approval of the State Plan of Child Nutrition Operations provided for under 7 CFR 210.4a and 7 CFR 226.7.

4. In § 235.6, paragraphs (b) and (f) are issued in final form as they appeared in interim regulations and paragraphs (a) and (c) are revised to read as follows:

§ 235.6 Use of funds.

(a) State administrative expense funds paid to any State may be used by State agencies to pay salaries, including employee benefits and travel expenses for administrative and supervisory personnel, for support services, for office equipment, and for staff development, particularly for monitoring and training of food service personnel at the local level in areas such as food purchasing and merchandizing. Such funds shall be used to employ additional personnel, as approved in the applicable State plan to supervise, improve management, and give technical assistance to school food authorities and to institutions in their initiation, expansion, and conduct of any programs for which the funds are made available. State agencies may also use these funds for their general administrative expenses in connection with any such programs, including travel and related expenses. Additional personnel or part-time personnel hired are expected to

meet professional qualifications and to be paid at salary scales of positions of comparable difficulty and responsibility under the State agency. Personnel may be used on a staff year equivalent basis, thus permitting new personnel and existing staff to be cross-utilized for most effective and economical operation under existing and new programs.

(b) State administrative expense funds shall be used consistent with the cost principles and constraints on allowable and unallowable costs and indirect cost rates as prescribed in Federal Management Circular 74-4 (32 CFR Part 255).

(c) State administrative expense funds may be used to assist in the administration of the Food Distribution Program when such program is administered within the State agency and may also be used to pay administrative expenses of a distributing agency, when such agency is other than the State agency. Expenditures of State administrative expense funds in the Food Distribution Program shall be consistent with the guidelines set forth in paragraph (a) of this section.

(f) [Reserved].

5. In § 235.7 the first sentence of paragraph (a) is amended by substituting the following three sentences to read as follows:

§ 235.7 Records and reports.

(a) Each State agency shall keep records on the expenditure of State administrative expense funds provided under this part and Part 225 of this title. Such records shall conform with the applicable State plan for use of State administrative expense funds. The State agency shall make such records available, upon a reasonable request, to FNS, OIG, or the U.S. Comptroller General and shall maintain current accounting records of State administrative expense funds which shall adequately identify fund authorizations, obligations, unobligated balances, assets, liabilities, outlays and income.

6. In § 235.11, paragraph (a) is amended to read as follows:

§ 325.11 Other provisions.

(a) *State funds.* Expenditures of funds from State sources in any fiscal year for the administration of the National School Lunch Program, School Breakfast Program, Special Milk Program, Child Care Food Program, and Food Service Equipment Assistance Program shall not be less than that expended or obligated

in fiscal year 1977. Failure of a State to maintain this level of funding shall result in the total withdrawal of SAE funds.

(Sec. 14, Pub. L. 95-166, 91 Stat. 1338 (42 U.S.C. 1776); Sec. 7, Pub. L. 95-627, 92 Stat. 3821 (42 U.S.C. 1776))

Note.—This final rule has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations." A determination has been made that this action should not be classified "significant" under those criteria. A Final Impact Statement has been prepared and is available at the Office of the Director, School Programs Division, USDA-FNS, Washington, D.C. 20250 during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday).

Note.—The reporting and/or recording keeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

(Catalog of Federal Domestic Assistance Program No. 10.560, National Archives Reference Services.)

Dated: August 18, 1979.

Carol Tucker Foreman,
Assistant Secretary for Food and Consumer Services.

BILLING CODE 3410-30-M

Food Safety and Quality Service

9 CFR Parts 317, 318, 319

Nitrates and Nitrites

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the Federal meat inspection regulations to permit meat food products traditionally preserved with nitrates and/or nitrites to be prepared without nitrates or nitrites and be labeled and sold under the same name as that preserved with nitrates and/or nitrites, except that the term "Uncured" must precede such name and be part of the product name. Certain cautionary information would also be required to be included on the labeling of such products. Further, this document amends the regulations to prohibit the use of nitrates or nitrites in baby, junior, and toddler meat food products. These amendments are necessary to inform consumers of the nature of such products prepared without nitrates or nitrites, to insure that such products prepared without nitrates or nitrites are safely handled, and to reflect the findings that nitrates and nitrites serve no useful purpose in baby, junior, and toddler meat food products.

EFFECTIVE DATE: September 20, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Irwin Fried, Acting Director, Meat and Poultry Standards and Labeling Division, Compliance, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION:

Background

On April 28, 1978, in response to petitions by consumer groups and manufacturers, a document was published in the *Federal Register* (43 FR 18193-18195) proposing to permit the preparation and sale of meat food products under traditional names, such as bacon, corned beef, and frankfurters, even though such products, which have been traditionally cured with nitrite and/or nitrate, would be prepared without nitrite and/or nitrate or with reduced levels of nitrite and/or nitrate. The document also proposed to require certain cautionary information on the labeling of such products. Further, the document proposed to prohibit the use of nitrates or nitrites in baby, junior, and toddler foods.

Comments

Most of the 365 comments received were from individual consumers, industries, and organizations. The majority of the comments involved labeling of the products, health concerns, and handling practices. Comments postmarked after the June 28, 1978, closing date were not considered.

The proposal provided that any product having a common or usual name, descriptive name, or standard name and permitted or required to be prepared with nitrates or nitrites, or both, may be prepared without nitrates or nitrites and labeled with such name if prepared with some added substance or substances, and found by the Administrator to have a similar flavor and consistency to such product preserved with nitrates or nitrites, or both.

Some commenters indicated that the name for products cured with nitrates or nitrites should be distinguishable from the name of such products prepared without nitrates or nitrites in order to avoid confusion between product names. The proposal distinguished these products which were not otherwise preserved by requiring the qualifying statement "No Nitrate or Nitrite Added" (in addition to the statement "Not Preserved, Must Be Refrigerated Below 40° F. At All Times") adjacent to the product name for those products

prepared without nitrates or nitrites and not preserved. The final rule requires all such products prepared without nitrates or nitrites to bear the qualifying statement "No Nitrate or Nitrite Added" in order to help inform consumers that these substances are absent from such products traditionally prepared with nitrates or nitrites. In addition, the Administrator has determined, based on the comments, that the use of nitrates and nitrites is of such importance in products preserved by these substances, that products prepared without such substances should have different names from those prepared with nitrates or nitrites in order to more clearly distinguish such products. Under these circumstances, it has been determined that such products prepared without nitrates or nitrites may bear the traditional name, but that the traditional name must be preceded by the term "Uncured."

The term "Uncured" in the labeling of a meat food product is commonly understood to mean that the product does not contain nitrates or nitrites, and that the product was not preserved with salt. Therefore although salt cured products were within the scope of that section of the proposal relating to the product name, they are not subject to this "Uncured" labeling requirement of the final rule. Accordingly, products cured with salt and prepared without nitrates or nitrites may bear common or usual names, descriptive names, or standard names, as appropriate.

The term "Uncured" would be required to be in the same size and style of lettering as the product name since it would be part of the product name.

It was also proposed to require such products prepared without nitrates or nitrites, to bear adjacent to the product name in letters of easily readable style at least one-half the size of the product name, the statement "Not Preserved, Must Be Refrigerated Below 40° F. At All Times" (in addition to the statement "No Nitrate or Nitrite Added") unless such products were preserved by one of the specified methods.

Many commenters, including 13 of the 14 members of the House Committee on Agriculture, expressed concern whether such labeling provisions would be adequate to protect against botulism with respect to those unpreserved products. In this connection, some commenters questioned whether products would always be handled in accordance with the warnings on the labeling and be kept below 40° F.

Some commenters indicated that abuses could occur because of improperly operating home refrigerators;

careless food handlers; refrigerator breakdowns in storage facilities, transportation vehicles and retail stores; and food taken on picnics, to work, and to school.

A few commenters indicated that 40° F. was inadequate protection for such products prepared without nitrates or nitrites, and that the product should be kept frozen. On the other hand, a few commenters indicated the present practice of freezing "no nitrite added" products is unnecessary.

The Administrator has carefully considered these comments. He is aware that products requiring such special handling such as pork sausage, bratwurst and bockwurst have presented no apparent health hazards even though prepared without nitrates or nitrites and marketed unfrozen. He concludes that consumers have demonstrated a knowledge of the handling practices necessary for any of such products prepared without nitrates or nitrites and that the prescribed labeling for such products, i.e., "Not Preserved—Keep Refrigerated Below 40° F. At All Times," will adequately inform the consumer of how to maintain such products in a wholesome condition until consumed.

Some commenters opposed the provisions relating to labeling products "Keep Refrigerated Below 40° F. At All Times" on the basis that the 40° F. requirement is too stringent because many refrigeration units used in stores and homes do not maintain a temperature of 40° F. or below. One comment indicated that stipulating that products should be "kept at 40° F." will increase costs 15 to 25 percent. The Administrator has determined that the "below 40° F." requirement should be retained as proposed. This temperature appears to be the normal operating temperature of most refrigerating units and even with the known variability of such units products would be maintained in a wholesome condition during normal and usual shelf life.

It was also proposed that such products prepared without nitrates or nitrites be required to have similar flavor and consistency to those products preserved with nitrates or nitrites in order to be eligible for this special labeling. The purpose of these requirements was to be able to offer to consumers such products prepared without nitrates and nitrites with similar characteristics to those products preserved by nitrates or nitrites. In accordance with this purpose, the final rule also requires such products prepared without nitrates or nitrites to be similar in size and general

appearance to such products prepared with nitrates or nitrites.

It was also proposed that such products prepared without nitrates or nitrites be required to be prepared with "some added substance or substances." This reference to "some added, substance or substances" was included as part of the criteria relating to whether such products would be similar in flavor or consistency. The important concept is that the product prepared without nitrates or nitrites be similar in flavor and consistency regardless of whether it contains "some added substance or substances." Accordingly, the reference to "some added substance or substances" has been deleted.

It was proposed to ban the use of nitrates or nitrites in baby, junior, and toddler foods. A small number of comments expressed support for a ban on the use of nitrates and nitrites in these foods. There were no comments in opposition to such a ban. The Administrator has decided to adopt the proposal to ban the use of nitrates and nitrites in these foods. Such a step is warranted since there is no need for nitrates and nitrites in these products for preservative purposes because they are thermally processed in hermetically sealed containers at temperatures and for time periods sufficient to destroy spoilage and food poisoning bacteria, including *Clostridium botulinum*. In addition, it appears that babies, infants, and toddlers are less tolerant of nitrates and nitrites than adults. Further, nitrates and nitrites serve no useful purpose in baby, junior, and toddler meat food products.

The proposal contained provisions relating to products prepared with low levels of nitrates or nitrites. It was proposed that products prepared with less than 1320 ppm nitrates or 120 ppm nitrites (or less than 80 ppm nitrite coupled with additional requirements for fermented semi-dry sausage) be required to be labeled "Not Fully Preserved, Must Be Refrigerated Below 40° F. At All Times," unless preserved by one of the specified methods. Question has been raised as to whether, regardless of additional cautionary language, consumers might misuse such products not otherwise preserved, based on a false assurance that the listing of nitrates or nitrites in the ingredients statement would be understood to represent that products could be handled under the same circumstances acceptable for products fully preserved by nitrates or nitrites. Further, with respect to the use of nitrates or nitrites in products at levels less than adequate for preservation, questions have been

raised as to whether additional requirements should be implemented concerning the purposes for which these substances should be permitted to be used. These questions have not been fully resolved. Accordingly, provisions relating to low levels of nitrates and nitrites are not included in the final rule. However, consideration is being given concerning further rulemaking with respect to these matters.

Many of the comments expressed support for reducing the levels of nitrates and nitrites in meat food products or banning the use of these substances in all meat food products. Many other comments argued that nitrates and nitrites should not be banned generally from meat food products. It was proposed to ban nitrates and nitrites in baby, junior, and toddler foods but the subject of a ban on the use of these substances in meat food products generally was not included in the proposal. Studies evaluating the safety and efficacy of nitrates and nitrites are currently underway or under consideration. Actions dealing with their use or disuse on a general basis will be the subject of other proceedings.

Other comments expressed concerns that in themselves are substantive but are not pertinent to the provisions of the proposal. Accordingly, these issues were not considered in connection with determinations relating to the final rule contained in this document. These comments included statements concerning the need for the Government to provide clean air and water; the proposition that Government is regulating too extensively, should reduce payrolls, and stay out of the private sector's business; the economic consequences of removing bacon and other meat food products from the market; the use of salt (which is assumed to be sodium chloride) generally in products; the use of substitutes for nitrates and nitrites such as ascorbic acid or citric acid in meat food products; and cautionary statements on the labels of products containing nitrites.

One commenter indicated that shelf-life dates should be required on packages of products subject to this rulemaking proceeding. This is a general concept that relates to all meat food products and not just to the limited number of products affected by this rulemaking proceeding. The Administrator does view shelf-life dates as helpful labeling information and believes more processors should utilize shelf-life dates on a voluntary basis. Regulations concerning such voluntary dating are contained in § 317.8(b)(32) of

the Federal meat inspection regulations (9 CFR 317.8(b)(32)). Mandatory provisions relating to shelf-life dates were not part of the proposal, but are under separate consideration by the Department and could be the subject of a future rulemaking proceeding.

A few commenters questioned why the recommendations of the Expert Panel on Nitrites and Nitrosamines were not more closely adhered to. The Expert Panel's recommendations did not directly relate to the production and labeling of uncured products. Its primary recommendations related to a reduction in permitted levels of nitrite and nitrate in various products and to the need for further study concerning the use of nitrates and nitrites in products. These issues are currently being considered by the Department.

On July 18, 1979, the National Advisory Committee on Meat and Poultry Inspection was consulted regarding these regulations. Members of the Committee expressed comments both in support of the proposal and in opposition to it. The Committee members did not raise issues outside the scope of the written comments as discussed above, but their views were also considered in the preparation of this final rule.

Editorial changes were made to clarify the language of §§ 317.17(b) and 319.2 and to amend the chart in § 318.7(c)(4) to specify the nitrates and nitrites are not permitted to be added to baby, junior, and toddler meat food products.

On the basis of the foregoing, the Federal meat inspection regulations (9 CFR Parts 317, 318 and 319) are amended as set forth below.

1. The table of contents for Part 317 of the regulations is amended to reflect the heading change for § 317.17 as set forth below; and § 317.17 is amended by changing the section heading, by designating the present text as paragraph (a), and by adding new paragraphs (b) and (c) as follows:

§ 317.17 Interpretation and statement of labeling policy for cured products special labeling requirements concerning nitrate and nitrite.

(a) * * *

(b) Any product, such as bacon and pepperoni, which is required to be labeled by a common or usual name or descriptive name in accordance with § 317.2(c)(1) and to which nitrate or nitrite is permitted or required to be added may be prepared without nitrate or nitrite and labeled with such common or usual name or descriptive name when immediately preceded with the term "Uncured" as part of the product name

in the same size and style of lettering as the product name, provided that the product is found by the Administrator to be similar in size, flavor, consistency, and general appearance to such product as commonly prepared with nitrate or nitrite, or both.

(c)(1) Products described in paragraph (b) of this section or § 319.2 of this subchapter, which contain no nitrate or nitrite shall bear the statement "No Nitrate or Nitrite Added." This statement shall be adjacent to the product name in lettering of easily readable style and at least one-half the size of the product name.

(2) Products described in paragraph (b) of this section and § 319.2 of this subchapter shall bear, adjacent to the product name in lettering of easily readable style and at least one-half the size of the product name, the statement "Not Preserved—Keep Refrigerated Below 40° F. At All Times" unless they have been thermally processed to F₀ 3 or more; they have been fermented or pickled to pH of 4.6 or less; or they have been dried to a water activity of 0.92 or less.

(3) Products described in paragraph (b) of this section and § 319.2 of this subchapter shall not be subject to the labeling requirements of paragraphs (b) and (c) of this section if they contain an amount of salt sufficient to achieve a brine concentration of 10 percent or more.

§ 318.7 [Amended]

2. The first reference to the term "Cured products" in the "Products" column with respect to "Curing agents" in the chart in § 318.7(c)(4) is amended to read "Cured products other than bacon. Nitrates may not be used in baby, junior, and toddler foods." The second reference to the term "Cured products" in the column is amended to read "Cured products. Nitrates may not be used in baby, junior, or toddler foods."

3. The table of contents for Subpart A of Part 319 of the regulations is amended by adding "§ 319.2 Products and nitrites," and a new § 319.2 is added to read:

§ 319.2 Products and nitrates and nitrites.

Any product, such as frankfurters and corned beef; for which there is a standard in this part and to which nitrate or nitrite is permitted or required to be added, may be prepared without nitrate or nitrite and labeled with such standard name when immediately preceded with the term "Uncured" in the same size and style of lettering as the rest of such standard name: *Provided*,

That the product is found by the Administrator to be similar in size, flavor, consistency, and general appearance to such product as commonly prepared with nitrate and nitrite: *And provided further*, That labeling for such product complies with the provisions of § 317.17(c) of this subchapter.

(Sec. 21, 34 Stat. 1264, as amended, 21 U.S.C. 621; 42 FR 35625, 35626, 35631)

Note.—This final rule has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations," and has been designated "significant." An approved Final Impact Statement is available from Mr. Irwin Fried, Acting Director, Meat and Poultry Standards and Labeling Division, Compliance, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C., on August 15, 1979.

Donald L. Houston,
Acting Administrator, Food Safety and Quality Service.

CIVIL AERONAUTICS BOARD

14 CFR Part 385

[Regulation OR-155, Amdt. 88; Docket 34291]

Delegations and Review of Action Under Delegation; Nonhearing Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: For the reasons stated in ER-1139, issued simultaneously, the CAB is delegating authority to the Director of its Bureau of Domestic Aviation to issue revised certificates in accordance with certificate changes made by 14 CFR Part 203.

DATES: Effective: August 15, 1979.
Adopted: August 15, 1979.

FOR FURTHER INFORMATION CONTACT:
Roy Pulsifer, Associate Director, Licensing Programs and Policy Development, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202-673-5448.

The Board amends 14 CFR Part 385 by adding new paragraph (r) to read:

§ 385.13 Delegation to the Director, Bureau of Domestic Aviation.

* * *

(rr) To issue revised certificates of authority to air carriers showing new authority granted by removal of operating restrictions under Part 203 of this chapter.

(Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 49 U.S.C. 1324. Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989, 49 U.S.C. 1324 (note).)

By the Civil Aeronautics Board:

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9068]

Prohibited Trade Practices, and Affirmative Corrective Actions; MacLeod Mobile Homes, Inc., et al.

AGENCY: Federal Trade Commission.
ACTION: Final order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, among other things, requires a Riverhead, N.Y. mobile homes dealer and its affiliates to cease entering into, or enforcing any arrangement or rule which restricts the availability of mobile home sites to only those parties who purchase, lease or rent mobile homes, accessories and services from MacLeod Mobile Homes, Inc. or other designated sources.

DATES: Complaint issued Dec. 19, 1975. Decision issued July 25, 1979.¹

FOR FURTHER INFORMATION CONTACT: Leroy Richie, Director, 8R, New York Regional Office, Federal Trade Commission, 2243-EB Federal Bldg., 28 Federal Plaza, New York, N.Y. 10007. (212) 264-1207.

SUPPLEMENTARY INFORMATION: On Wednesday, March 8, 1978, there was published in the Federal Register, 43 FR 9495, a proposed consent agreement with analysis in the Matter of MacLeod Mobile Homes, Inc., a corporation, and Pashisha, Inc., a corporation, and Myron T. MacLeod, individually and as an officer of said corporations, and John J. Couch, individually and as an officer of said corporations, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

¹ Copies of the Complaint and Decision and Order are filed with the original document.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Coercing and Intimidating: § 13.350 Customers or prospective customers; § 13.355 Customers or prospective customers of competitors. Subpart-Combining or Conspiring: § 13.395 To control marketing practices and conditions; § 13.410 To eliminate competition in conspirators' goods; § 13.470 To restrain or monopolize trade; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart-Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-45 Maintain records. Subpart-Cutting Off Access To Customers or Market: § 13.540 Forcing goods; § 13.605 Withholding supplies or goods from competitors' customers. Subpart-Cutting Off Supplies or Service: § 13.610 Cutting off supplies or service; § 13.655 Threatening disciplinary action or otherwise.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

James A. Tobin,
Secretary.

BILLING CODE 6750-01-M

16 CFR Part 13

[Docket No. C-2346]

Prohibited Trade Practices, and Affirmative Corrective Actions; Norris Industries, Inc.

AGENCY: Federal Trade Commission.

ACTION: Modification of order to cease and desist.

SUMMARY: This order modifies the cease and desist order issued on December 27, 1978, by revising Paragraph "2." of Part II of the original order to require affirmative disclosures and include definitions of "clear and conspicuous" for purposes of print, radio, and television advertising.

DATES: Decision issued Dec. 27, 1978. Modifying order issued July 12, 1979.¹

¹ Copies of the Modifying Order filed with the original document.

FOR FURTHER INFORMATION CONTACT: FTC/P. Albert H. Kramer, Washington, D.C. 20580. (202) 523-3727.

SUPPLEMENTARY INFORMATION: In the Matter of Norris Industries, Inc. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, appearing at 44 FR 6380, remains unchanged.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

The order modifying order to cease and desist is as follows:

Order Modifying Order To Cease And Desist

The Commission on April 25, 1979, issued its Order to Show Cause why this proceeding should not be reopened and its Order of December 27, 1978, modified.

Respondents filed an Answer on May 31, 1979, setting forth objections to the Order to Show Cause, and proposing certain amendments. Commission staff interposed no objections and recommended that the Respondents' amendments be incorporated into the Order.

Now, therefore, it is hereby ordered, That the aforesaid Order to Cease and Desist be, and it hereby is, modified in accordance with the Order to Show Cause and the Respondent's Answer, without necessity of further action by the Commission, as follows:

Order

Part I

It is ordered, That Norris Industries, Inc. (hereinafter referred to as the Respondent), its successors and assigns, either jointly or individually, and its officers, representatives, and agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, distribution or sale of dishwashers in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, that any dishwasher manufactured or sold by Respondent can sterilize or destroy all microorganisms on utensils placed in the dishwasher.

2. Representing, directly or by implication, that the stainless steel parts in any dishwasher manufactured or sold by Respondent are rustproof or will not rust under normal household conditions.

3. Representing, directly or by implication, that the disposal-drain in

any dishwasher manufactured or sold by Respondent will remove all soft food waste from the dishwasher.

4. Representing, directly or by implication, that any dishwasher manufactured or sold by Respondent can completely clean dishes, cookware, and other utensils placed in the dishwasher, without prior scraping, scouring, or rinsing.

5. Representing, directly or by implication, that any dishwasher manufactured or sold by Respondent can be randomly loaded or that there are no special instructions to follow when loading.

Part II

It is further ordered, That Respondent, its successors and assigns, either jointly or individually, and its officers, representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, distribution of sale of major home appliances in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. (a) Making any statements or representations, directly or by implication, concerning the performance of such products unless at the time that the statements or representations are made Respondent possesses and relies on a reasonable basis for such statements or representations, which shall consist of a competent and reliable scientific test, as defined in Paragraph One (b) hereafter.

(b) For purposes of this order a "competent and reliable scientific test" is one in which one or more persons with education, knowledge, and experience in the field conduct a test and evaluate its results in an objective manner using testing, evaluation, and analysis procedures generally accepted in the profession and which best insure valid and reliable results. Moreover, the test results must either accurately predict, or be correlated with, the results that a consumer ordinarily would obtain using the product under normal household conditions.

2. Failing to make a "clear and conspicuous disclosure" that product features, depicted or described in advertising for a product, apply only to the model being advertised or, if applicable, only to certain models. Such disclosure shall identify the model(s) by number(s) (and name(s) if applicable) to which the product features do or, at the Respondent's option, do not apply. This disclosure shall not be required where the advertisement clearly and

conspicuously identifies the model by number (and model name if applicable) to which the product features being advertised apply.

For purposes of this provision:

Television Advertising—clear and conspicuous shall be as set forth in the FTC's Statement of Enforcement Policy of October 21, 1970;

Radio Advertising—the disclosure shall be clear and conspicuous and shall be made with no other sounds including music;

Print Advertising—clear and conspicuous shall mean that the disclosure of the model number and name, if applicable, shall be in no less a type size than that used to describe the product features and shall be in immediate conjunction with the description of the product features.¹

3. Making any statements or representations, directly or by implication, in connection with the advertisement of any such product, which are inconsistent in any material respect with any statements or representations contained, directly or by implication, in post purchase material(s) supplied to the purchaser of such products.

4. For purposes of this Order the term "major home appliances" means the following appliances presently manufactured or sold by the Respondent: automatic dishwashers; garbage disposers; trash compactors; and microwave ovens.

Part III

It is further ordered, That Respondent, its successors and assigns, either jointly or individually, and its officers, representatives, and agents and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, distribution or sale of "major home appliances" in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from failing to maintain the following accurate records which may be inspected by Commission staff members upon reasonable notice:

¹ The provisions of this Order in respect to print advertising will be implemented per the following schedule: (1) Reproducible advertising for use by distributors and retail dealers—when stock in existence on June 1, 1979, is exhausted but in any event no later than January 1, 1980; (2) Advertising for placement by Respondent—promptly upon the effective date of this modification to the final Order; (3) Brochures—when stock in existence on June 1, 1979, is exhausted but in any event no later than January 1, 1980, except Respondent's brochure identified as Exhibit 22 in the Compliance Report dated as of April 12, 1979—promptly upon the effective date of this modification to the final Order.

(a) Documentation in support of and on which Respondent relied in making any claim included in advertising, sales promotional material, or post purchase materials, disseminated by respondent or by any division or subdivision of respondent, or by any advertising agency engaged for such purpose by respondent or by any such division or subsidiary, concerning the performance characteristics of any of Respondent's major home appliances;

(b) Documentation which contradicts, qualifies or calls into serious question any claim included in advertising, sales promotional material or post purchase materials disseminated by respondent or by any division or subdivision of respondent, or by any advertising agency engaged for such purpose by respondent or by any such division or subsidiary, concerning the performance characteristics of any of Respondent's major home appliances.

Such documentation shall be retained by Respondent for a period of three years from the date such advertising, sales promotional or post purchase materials were last disseminated.

Part IV

It is further ordered, That Respondent notify the Commission at least 30 days prior to the effective date of any proposed change in the corporate Respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the Respondent shall forthwith distribute a copy of this Order to each of its officers, agents, representatives or employees of the Respondent's Thermador/Waste King division who are engaged in the preparation, placement, or review of advertisements for the "major home appliances" defined in this order.

It is further ordered, That the Respondent shall, within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

By the Commission.

James A. Tobin,
Acting Secretary.

BILLING CODE 6750-01-M

16 CFR Part 13

[Docket No. 9116]

Prohibited Trade Practices, and Affirmative Corrective Actions; Rhinechem Corporation, et al.**AGENCY:** Federal Trade Commission.**ACTION:** Dismissal order.

SUMMARY: This order dismisses the August 23, 1978 complaint issued against Allegheny Ludlum Industries, Inc. and its subsidiary, Chemetron Corporation, a producer of organic pigments, for alleged violations of Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act. The complaint was dismissed on grounds that changed circumstances which have occurred since issuance of the complaint have provided the Commission with adequate assurances that the challenged matter will not reoccur, and additional relief will not be necessary.

DATES: Complaint issued Aug. 23, 1978. Dismissal order issued July 11, 1979.¹

FOR FURTHER INFORMATION CONTACT: Glenn M. Fellman, Attorney, Chicago Regional Office, 3R, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, Ill. 60603. (312) 353-4423.

SUPPLEMENTARY INFORMATION: In the Matter of Rhinechem Corporation, a wholly owned subsidiary of Bayer A.G., a corporation, and Allegheny Ludlum Industries, Inc., a corporation, and Chemetron Corporation, a wholly owned subsidiary of Allegheny Ludlum Industries, Inc., a corporation.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 48. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

The Dismissal Order is as follows:

Final Order

The Administrative Law Judge filed an Initial Decision in this matter on May 30, 1979, dismissing the complaint against respondents Allegheny Ludlum Industries, Inc. and Chemetron Corporation on the ground that changed circumstances which have occurred since issuance of the complaint have provided the Commission with adequate assurances that the matter which was challenged in the complaint will not reoccur and no additional relief is necessary. No appeal from the Initial Decision was filed.

The Commission having now determined that the matter should not be placed on its own docket for review, and that the Initial Decision should

become effective as provided in § 3.51(a) of the Commission's rules of practice, *It is ordered*, That the Initial Decision and Order contained therein shall become effective on July 12, 1979.

By the Commission,
James A. Tobin,
Acting Secretary.

[Docket No. C-2971]

Fedders Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions**AGENCY:** Federal Trade Commission.**ACTION:** Modifying order.

SUMMARY: The Federal Trade Commission has issued a modifying order amending the final consent order issued in the Matter of Fedders Corporation June 14, 1979, appearing in the Federal Register issue of July 24, 1979, 44 FR 43263. This modification is in response to a petition filed by Fedders Corporation to modify the order and granted by the Commission.

DATE: Decision issued June 14, 1979. Modifying Order issued August 8, 1979.¹

FOR FURTHER INFORMATION CONTACT: FTC/PE, Robert S. Blacher, Washington, D.C. 20580. (202) 724-1507.

SUPPLEMENTARY INFORMATION: The Federal Trade Commission has issued an order modifying the consent order issued June 14, 1979, in the Matter of Fedders Corporation. The modification does not affect the codification under 16 CFR Part 13 appearing at 44 FR 43264. The text of the modifying order is set forth below:

Order

Respondent's petition to modify the consent order is granted. The order is hereby modified as follows:

Add the following paragraph after the first paragraph of Section III:

Provided however, Respondent is not required to place both of the "recall advertisements" set forth in Appendices (F) and (G) of this Order, if it places one advertisement in each of the periodicals listed in Appendix (E) of this Order which advertisement refers to both Fedders and Climatrol, contains language identical to that in the "recall advertisements" set forth in Appendices (F) and (G), except that reference is made to both Fedders and Climatrol

¹ Copies of the modifying order filed with the original document.

heat pumps, and meets all other requirements set forth in Section III, and Appendices (E), (F) and (G) of the Order.

By direction of the Commission dated August 8, 1979.
(Sec. 6, 38 Stat. 721; 15 U.S.C. 48). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45.)

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE**Food and Drug Administration**

[Docket No. 79N-0194]

21 CFR Part 81

General Specifications and General Restrictions for Provisional Color Additives for Use in Foods, Drugs, and Cosmetics; Temporary Tolerances**AGENCY:** Food and Drug Administration.**ACTION:** Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the temporary tolerances for certain provisionally listed color additives that are used in ingested cosmetics and drugs. The revisions in the temporary tolerances are based on toxicological and usage data showing that the current temporary tolerances for certain colors should be reduced. The agency is also revising the regulations to clarify the specific types of drug and cosmetic products covered by the temporary tolerances.

DATES: Effective November 19, 1979; objections by September 20, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerald L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-5740.

SUPPLEMENTARY INFORMATION: In the Federal Register of October 12, 1960 (25 FR 9759), as amended August 16, 1961 (26 FR 7578), and December 30, 1970 (35 FR 19749), FDA established temporary tolerances under § 81.25 (21 CFR 81.25 (formerly § 8.503 (21 CFR 8.503)), before recodification published in the Federal Register of March 22, 1977 (42 FR 15553)) for the use of certain color additives in lipsticks, ingested drugs,

and other products subject to ingestion, such as mouthwashes and dentifrices.

The original temporary tolerance levels for certain color additives were based on preliminary usage information and preliminary toxicological data from tests performed in the 1950's. Later, color additive petitions were submitted that contained data concerning the use of each of the colors, as well as data from chronic feeding studies with each of the colors. Additional data were also obtained from teratology and multigeneration reproduction studies conducted with the colors listed under temporary tolerances, as required by a regulation published in the Federal Register of September 11, 1971 (36 FR 18336) (amended June 12, 1973 (38 FR 15472)). These three sources of data provide a more substantive base for determining appropriate levels of use for the colors requiring temporary tolerances.

Temporary tolerances are being provided for certain color additives while they are provisionally listed. The conditions of provisional listing outlined in § 81.27 (21 CFR 81.27) require new chronic toxicity studies, which are currently underway, for all of these colors. The closing date for provisional listing of all of these color additives is January 31, 1981, at which time permanent, rather than temporary, levels of use will be determined for the colors that are "permanently" listed.

The Cosmetic, Toiletry and Fragrance Association (CTFA), petitioner or copetitioner for the color additives listed in the regulations set forth below, has requested revisions of the temporary tolerances that would: (1) include both lipstick and drug tolerances for related colors; (2) clarify the allowances for mouthwashes and dentifrices; and (3) change the levels of the temporary tolerances to those suggested in the respective petitions, which are generally lower than the levels in § 81.25. The current revision coincides with nearly all of the petitioner's requests.

For ingested drugs, the levels are being reduced for D&C Red Nos. 8, 19, and 37. For lipstick use, the levels are being reduced for D&C Orange No. 17 and D&C Red Nos. 8, 9, 19, 33, and 38. D&C Red No. 38 was added to the temporary tolerances in 1970 at a level of 3 percent pure dye by weight of the lipstick. Through a later publication error in the 1973 edition of the Code of Federal Regulations (CFR), § 81.25(a) now gives the level at 6 percent. This level is being corrected to 3 percent.

For D&C Red No. 33, the petition requests a level of usage in ingested drugs of 5.5 milligrams (mg) in a daily

dose. This is greater than the 0.75 mg currently provided by § 81.25. At the higher level, however, the simultaneous use of cosmetics and drugs containing this color might result in levels of daily usage that exceed the levels that can be supported by available safety data. The manufacturers' survey in the petition did not show any usage at higher levels. Because these are intended to be temporary tolerances until further toxicity data are submitted and evaluated, it would be inappropriate to increase the permitted level of use before all the data are considered and a final action is taken. Accordingly, the temporary tolerance for D&C Red No. 33 is retained at its current level for ingested drugs.

For D&C Orange No. 5, the petition requests no limitation other than good manufacturing practice for lipstick use. Currently, § 81.25 provides a tolerance of 0.75 mg. Again, it would not be appropriate to remove a restriction before complete information is available for final action; therefore, the tolerance is being retained at its current level for lipsticks. However, the revision permits the use of D&C Orange No. 5 in mouthwashes and dentifrices in amounts consistent with good manufacturing practice. The petition does not request drug use for D&C Orange No. 5 other than for mouthwashes and dentifrices, and no ingested drug tolerance is being provided.

For D&C Yellow No. 10, the petition requests its use in ingested drugs and cosmetics with levels of 20 mg in a daily dose of a drug and 1 percent by weight of lipstick or lip cosmetic. The agency agrees that this color should be added to the temporary tolerances and that the data require limitations on the amount of color that may be ingested. However, the safety data on hand support a level of only 10 mg per drug, which is the level now given.

CTFA notes that D&C Red No. 9 was omitted from the list of temporary tolerances for drugs, although a closely related color, D&C Red No. 8, was on the drug list and both were listed for lipstick use. Similarly, D&C Red No. 37 (related to D&C Red No. 19) was omitted from the lipstick list. CTFA requests uniform inclusion of these colors on both lists and the placement of D&C Orange No. 17 on the drug list. The available toxicological data support these inclusions, and the temporary tolerances are revised accordingly.

A previous limitation on the total amount of the colors in a lipstick is changed to limit the combinations of related colors. CTFA also requests the

use of the colors in § 81.25 in cosmetic mouthwashes and dentifrices. A separate paragraph is included in the regulations to clarify this area of usage. For some of the colors, simultaneous use of both cosmetics and drugs containing the same color might give a daily intake approaching the maximum acceptable intake. Thus, temporary tolerances are stated for these colors in mouthwashes and dentifrices.

Six colors previously mentioned in this section are no longer listed. D&C Red Nos. 10, 11, 12, and 13 were prohibited from use on December 13, 1977 (42 FR 62475); and their temporary tolerances were revoked at that time. D&C Yellow Nos. 7 and 8 were permanently listed for external use on November 19, 1976 (41 FR 51003, 51004) and are thus deleted from this section.

On the basis of available toxicological data from multigeneration reproduction studies, tests of teratological potential, and chronic feeding studies, and also on the basis of suggested levels of usage contained in color additive petitions, FDA finds that the temporary tolerances for certain color additives should be revised as set forth below. This revision is considered necessary at this time in view of the extension to January 31, 1981, of the closing date for those colors named. The effective date of the regulations set forth below is delayed 90 days to permit any formulation changes of drugs or cosmetics that may be required by these revisions.

Certificates for the color additives listed in § 81.25 will be limited, on the effective date of these revisions, by the conditions stated in revised § 81.25 detailed below.

Manufacturers of new drugs and new animal drugs (including certifiable antibiotics for animal use) that contain D&C Orange No. 5, D&C Orange No. 17, D&C Red No. 8, D&C Red No. 9, D&C Red No. 19, D&C Red No. 33, D&C Red No. 38, D&C Red No. 37, or D&C Yellow No. 10 may delete the color additive, decrease the amount of color additive, or substitute a different color additive in accordance with the provisions of § 314.8 (d)(3) and (e) (21 CFR 314.8 (d)(3) and (e)) or § 514.8 (d)(3) and (e) (21 CFR 514.8 (d)(3) and (e)), as appropriate. The applicant shall submit data providing the new composition and showing that the change in composition does not interfere with any assay or other control procedures used in manufacturing the drug, or that the assay and control procedures have been revised to make them adequate. The applicant shall also submit data available to establish the stability of the revised formulation or, if the data are too limited to support a

¹ Copies of the Complaint, Initial Decision and Final Order are filed with the original document.

conclusion that the drug will retain its declared potency for a reasonable marketing period, a commitment to test the stability of marketed batches at reasonable intervals, to submit the data as they become available, and to recall from the market any batch found to fall outside the approved specifications for the drug.

The agency has carefully considered the environmental effects of this action and, because the action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. Copies of the environmental impact analysis report and the environmental assessment are on file with the Hearing Clerk, FDA (address above).

Therefore, under the transitional provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86-818, sec. 203(d)(1)(C), 74 Stat. 405 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 81 is amended as follows:

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives*, the table in paragraph (b) is amended by adding to the entry for D&C Yellow No. 10 the restriction "Sec. 81.25."

§ 81.10 [Amended]

2. In § 81.10 *Termination of provisional listings of color additives*, by deleting and reserving paragraph (b).

3. By revising § 81.25 to read as follows:

§ 81.25 Temporary tolerances.

The available data for certain provisionally listed color additives indicate that their usage must be restricted to levels consistent with the toxicological data available for each of the colors listed in this section. The usage levels proposed in the petitions for these color additives have also been considered in establishing temporary tolerances. On the basis of the available toxicological data, the Food and Drug Administration has concluded that it is consistent with the protection of the public health to allow the continued use of these provisionally listed color additives under the conditions set forth in this section pending the completion and evaluation of the further toxicology studies required by § 81.27. A final determination of the status of these colors, including appropriate usage levels, must await completion and evaluation of the required further toxicology studies. The color additives

named in this section may be used in externally applied drugs and cosmetics in amounts consistent with good manufacturing practice.

(a)(1) The color additives named in this paragraph may be used in lipsticks and other cosmetics intended to be applied to the lips, in the amount specified in this paragraph. These temporary tolerances are expressed as percent pure dye by weight of each lipstick or other lip cosmetic.

Color additive:	Percent
D&C Orange No. 5.....	6.0
D&C Orange No. 17.....	5.0
D&C Red No. 8.....	3.0
D&C Red No. 9.....	3.0
D&C Red No. 19.....	1.3
D&C Red No. 33.....	3.0
D&C Red No. 36.....	3.0
D&C Red No. 37.....	1.3
D&C Yellow No. 10.....	1.0

(2) Combinations of the color additives named in paragraph (a)(1) of this section may be used in a lipstick or other lip cosmetic, provided the individual temporary tolerance is not exceeded, except that the combined total of D&C Red Nos. 8 and 9 may not exceed 3.0 percent, and the combined total of D&C Red Nos. 19 and 37 may not exceed 1.3 percent.

(b)(1) Mouthwashes and dentifrices, whether drugs or cosmetics, may contain the following color additives in the amounts specified (the term "mouthwashes" includes breath fresheners):

(i) D&C Orange No. 5, D&C Red No. 33, D&C Red No. 36, and D&C Yellow No. 10 may be used in amounts consistent with good manufacturing practice.

(ii) D&C Orange No. 17, D&C Red No. 8, D&C Red No. 9, D&C Red No. 19, or D&C Red No. 37 individually may be used in a dentifrice at not more than 0.002 percent of the pure dye by weight of the dentifrice or, in a mouthwash, at not more than 0.005 percent of the pure dye by weight of the mouthwash.

(2) Combinations of the color additives named in paragraph (b)(1) of this section may be used, provided the individual temporary tolerance is not exceeded, except that the combined total of D&C Red Nos. 8 and 9 or the combined total of D&C Red Nos. 19 and 37 may not exceed 0.002 percent in a dentifrice or 0.005 percent in a mouthwash, measured as the pure dyes by weight of the product.

(c)(1) The color additives named in this paragraph may be used in drugs subject to ingestion, other than mouthwashes and dentifrices, in the amounts specified in this paragraph. These temporary tolerances are expressed as milligrams of the pure dye in the amount of the product that is

reasonably expected to be ingested in one day.

Color additive:	Amount per day (mg)
D&C Orange No. 17.....	0.2
D&C Red No. 8.....	0.1
D&C Red No. 9.....	0.1
D&C Red No. 19.....	0.25
D&C Red No. 33.....	0.75
D&C Red No. 36.....	1.7
D&C Red No. 37.....	0.25
D&C Yellow No. 10.....	10.0

(2) Combinations of the color additives named in paragraph (c)(1) of this section may be used in a product, provided the individual temporary tolerance is not exceeded, except that the combined total of D&C Red Nos. 8 and 9 may not exceed 0.1 milligram per day, and the combined total of D&C Red Nos. 19 and 37 may not exceed 0.25 milligram per day.

4. By revising § 81.32 to read as follows:

§ 81.32 Limitation of certificates.

Certificates issued for the color additives listed in § 81.25 and for all mixtures containing these color additives are limited to the conditions stated in § 81.25. The use of these color additives in drugs and cosmetics in any other manner will result in adulteration. Each of these color additives shall bear a label statement of the tolerance and use limitations applicable to it.

Notice and public procedure are not necessary prerequisites to the promulgation of this regulation because section 203(d)(2) of Pub. L. 86-618 so provides. Any person who will be adversely affected by the foregoing regulation may at any time on or before September 20, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a

hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Note.—In accordance with Executive Order 12044, the economic effects of this rule have been carefully analyzed and it has been determined that the action does not involve major economic consequences as defined by that order. A copy of the Regulatory Analysis Assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Effective date. This regulation shall be effective November 19, 1979.

(Sec. 203(d)(1)(C), 74 Stat. 405 (21 U.S.C. 376 note).)

Dated: August 14, 1979.

Joseph P. Hile,
Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 176

[Docket No. 78F-0431]

Styrene-Maleic Anhydride Copolymer, Amidated, Ammonium Sodium Salt

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The food additive regulations are amended to provide for the safe use of styrene-maleic anhydride copolymer, amidated, ammonium sodium salt, as a surface size on paper and paperboard intended for food-contact use. This action is being taken in response to a petition filed by American Cyanamid Co.

DATES: Effective August 21, 1979; objections by September 20, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerard L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: A notice published in the Federal Register of February 23, 1979 (44 FR 10789) announced that a food additive petition (FAP 6B3232) was filed by American Cyanamid Co., Wayne, NJ 07470, proposing that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended to provide for the safe use of maleic anhydride polymer with styrene, reaction product with ammonia and sodium hydroxide, as a surface size on paper and paperboard.

The agency has evaluated data in the petition and other relevant material and concludes that § 176.170 should be amended as set forth below. The amendment reflects the agency's

conclusion that the chemical name "styrene-maleic anhydride copolymer, amidated, ammonium sodium salt" is preferable to the name given in the filing notice because it more adequately describes the food additive and is consistent with the name of the regulated food additive "styrene-maleic anhydride copolymer, sodium salt."

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), § 176.170 is amended in paragraph (a)(5) by alphabetically inserting a new item in the list of substances as follows:

§ 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods.*

(a) * * *
(5) * * *

List of substances	Limitations
Styrene-maleic anhydride copolymer, amidated, ammonium sodium salt; For use only as a surface size at a level not to exceed, having, in a 25 percent by weight aqueous solution at pH 8.8, a minimum viscosity of 600 centipoises at 25° C as determined by Brookfield model LVT viscometer using a No. 3 spindle at 60 r.p.m. (g equivalent method).	1 percent by weight of paper or paperboard substrate.

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 20, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing

is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date.—This regulation shall become effective August 21, 1979. (Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

Dated: August 8, 1979.
 William F. Randolph,
 Acting Associate Commissioner for
 Regulatory Affairs.
 [FR Doc. 79-25805 Filed 8-20-79; 8:45 am]
 BILLING CODE 4110-03-M

21 CFR Part 429

[Docket No. 79N-0025]

Drugs Composed Wholly or Partly of Insulin Requirements for Requesting Certification

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the insulin certification regulations to make the submission of samples and test results for certain types of insulin products unnecessary under certain conditions. This action is taken to eliminate unnecessary testing and reduce the number of samples required to be submitted with requests for certification of these insulin products.

EFFECTIVE DATE: September 20, 1979.

FOR FURTHER INFORMATION CONTACT: Ed Farha, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6490.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 31, 1978 (43 FR 13585), FDA proposed to amend § 429.40 (21 CFR 429.40) of the insulin certification regulations to eliminate the requirement for submitting samples and test results of trial mixtures or trial dilutions of certain insulin products. The requirement would be omitted when a sample of a trial mixture or trial dilution of one of these products, prepared from the same materials and containing 40, 80, or 100 U.S.P. units of insulin per milliliter (mL), had been previously approved by the agency. This proposed revision was in response to a petition submitted by an insulin manufacturer. Although the petition requested that the revisions apply to samples and test results of trial mixtures or trial dilutions of all insulin products, the March 31, 1978 proposal was made applicable only to insulin injection, protamine zinc insulin suspension, globin insulin injection, and isophane insulin suspension products.

Interested persons were allowed 60 days in which to submit written comments on the proposal. The only comment received came from the manufacturer who submitted the

petition which led to the proposed amendment.

The comment objected to the continued requirement of testing each concentration (40, 80, or 100 U.S.P. units per mL) of a trial mixture of insulin zinc suspension, insulin zinc suspension prompt, and insulin zinc suspension extended to obtain approval of subsequent batches of the same concentration. The comment argued that the 100 unit per mL trial mixture of any of these insulin products can accurately represent any other concentration of subsequent batches. In support of this position, the comment pointed out that out of 650 batches of these products submitted for certification within the past 6 years by the commentor, no trial mixtures had been rejected due to improper formulation of crystals.

As stated in the preamble to the proposal, due to the precipitation and crystallization process used in manufacturing these three insulin zinc suspension products, agency testing experience with them has demonstrated that the trial mixture can represent the finished product accurately only if it is of the same concentration as the final batch. Although the comment mentioned the firm's record of not having any of these insulin zinc suspension products rejected due to the improper formulation of crystals, FDA believes there are still manufacturing problems generally associated with these products. Further, because this final rule will apply to all firms currently submitting these three insulin zinc suspension products and to all firms which may request certification of these products in the future, one firm's record of the number of trial mixtures rejected cannot be a controlling factor. Therefore, the final rule requires the trial mixtures of each concentration of insulin zinc suspension, insulin zinc suspension prompt, and insulin zinc suspension extended to continue to be tested.

The comment also suggested that certain changes be made in the United States Pharmacopeia (U.S.P.) to make it compatible with the final rule. The changes listed in the comment relate to the Insulin Assay on page 611 of the U.S.P. XIX.

The suggested changes were forwarded to the U.S.P. for its consideration. U.S.P.'s response, which has been placed on file in the office of FDA's Hearing Clerk, advised the agency that there was no incompatibility between U.S.P. requirements and the proposed regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 506,

701(a), 55 Stat. 851, 52 Stat. 1055 (21 U.S.C. 356, 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Drugs (21 CFR 5.73), Part 429 is amended in § 429.40 by revising paragraphs (d) (2), (3), (5), (7), and (g)(1) to read as follows:

§ 429.40 Requests for certification; samples; storage; approvals preliminary to certification.

(2) If the batch is to be insulin injection, a trial mixture made from such master lot or mixture, glycerin, phenol or cresol, and hydrochloric acid, which dilution conforms to the standard of identity, strength, quality, and purity for insulin injection, except that it may contain approximately 40, 80, or 100 units of insulin per milliliter in a quantity containing approximately 5,000 U.S.P. units of insulin.

(3) If the batch is to be protamine zinc insulin suspension, a trial mixture which is intended to be accurately representative of the mixture which will constitute the finished batch; in a quantity containing approximately 10,000 U.S.P. units of insulin.

(5) If the batch is to be globin zinc insulin injection, a trial mixture made from the master lot or mixture referred to in paragraph (d)(1) of this section, globin, zinc chloride, hydrochloric acid, glycerin, and phenol or cresol, which mixture is intended to be accurately representative of the mixture which will constitute the finished batch; in a quantity containing approximately 10,000 U.S.P. units of insulin.

(7) If the batch is to be isophane insulin suspension, a trial mixture which is intended to be accurately representative of the finished batch; in a quantity of approximately 10,000 U.S.P. units of insulin.

(g)(1) No sample referred to in paragraph (d) (1) to (9), inclusive, of this section, and no result referred to in paragraph (c) (1) to (8), inclusive of this section, is required if such sample or result has been submitted in connection with a previous request for certification. Except for paragraph (d) (9), (10), and (e)(9), the samples referred to in paragraph (d) of this section and the results referred to in paragraph (e) of this section for insulin injection, protamine zinc insulin suspension, globin zinc insulin injection, or isophane insulin suspension are not required if

the Commissioner has previously approved a trial mixture containing 40, 80, or 100 units of insulin per milliliter or trial dilution containing approximately 40, 80, or 100 units of insulin per milliliter and the mixture or dilution was prepared from the same materials and in the same manner, except for adjustment of pH of the buffer solution.

Effective date. This regulation is effective September 20, 1979.

Dated: August 14, 1979.
 Jerome A. Halperin,
 Acting Director, Bureau of Drugs.

 BILLING CODE 4110-03-M

21 CFR Part 510

[Docket No. 79N-0189]

New Animal Drugs; Drug Listing No./ Drug Labeler Code; Designation of Sponsor Number

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to provide for a change of designation of the sponsor number from drug listing number to drug labeler code. This change concerns only the descriptive term designating the sponsor number and does not affect any specific sponsor or approval.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Robert S. Brigham, Bureau of Veterinary Medicine (HFV-238), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6243.

SUPPLEMENTARY INFORMATION: Section 512(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(i)) provides that when a new animal drug application (NADA) is approved, the name and address of the applicant and the conditions of use of the new animal drug be published in the Federal Register. The Federal Register publication provides, among other things, for a regulation codifying each approved NADA and identifying the applicant (sponsor). To avoid repeating a firm's complete name and address in each regulation, the agency identifies each firm by the drug labeler code, which is indexed alphabetically by firm name and numerically by code number in § 510.600 (21 CFR 510.600). The current regulations erroneously refer to this number as the drug listing number.

Accordingly, this document changes the term "drug listing number" to read "drug labeler code."

Under the Administrative Procedure Act (5 U.S.C. 553 (b) and (d)), the Commissioner finds that notice, public procedure, and delayed effective date are unnecessary. The action taken concerns change in descriptive term designation only and does not alter the requirements of the regulations.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343-351 (21 U.S.C. 360b, 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 510 is amended in § 510.600 by revising the section heading, paragraphs (b) and (c) introductory text, and the column headings in paragraph (c) (1) and (2) to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

(b) In this section each name and address is identified by a numerical drug labeler code. The labeler codes identify the sponsors of the new animal drug applications associated with the regulations published pursuant to section 512(i) of the act. The codes appear in the appropriate regulations and serve as a reference to the names and addresses listed in this section. The drug labeler code is established pursuant to section 510 of the act.

(c) The names, addresses, and drug labeler codes of sponsors of approved new animal drug applications are as follows:

(1) * * *
 Firm name and address
 Drug Labeler Code

(2) * * *
 Drug Labeler Code
 Firm name and address

In accordance with Executive Order 12044, the economic effects of this action have been carefully analyzed, and it has been determined that the action does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Effective Date: August 21, 1979.

(Sec. 512, 701(a), 52 Stat. 1055, 82 Stat. 343-351 (21 U.S.C. 360b, 371(a)))

Dated: August 13, 1979.

21 CFR Part 524

[Docket No. 79N-0222]

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject to Certification; Neomycin Sulfate, Hydrocortisone Acetate, Tetracaine Hydrochloride Ear Ointment

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: This document amends the animal drug regulations for neomycin sulfate, hydrocortisone acetate, tetracaine hydrochloride ear ointment to indicate those conditions of use for which approvals for identical products need not include certain types of efficacy data. These conditions of use were classified as probably effective as a result of a National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group evaluation of the product. In lieu of certain efficacy data, approval may require submission of bioequivalence or similar data. An earlier Federal Register publication has reflected this product's compliance with the conclusions of the review.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Donald A. Gable, Bureau of Veterinary Medicine (HFV-100), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4313.

SUPPLEMENTARY INFORMATION: The NAS/NRC review of this product was published in the Federal Register of August 22, 1970 (35 FR 13490). In that document, the Academy concluded, and the Food and Drug Administration (FDA) concurred, that the product was probably effective for the treatment of certain ear conditions in domestic animals.

That announcement was issued to inform holders of new animal drug applications (NADA's) of the findings of the Academy and the agency, and to inform all interested persons that such articles could be marketed if they were the subject of approved NADA's and otherwise complied with the requirements of the Federal Food, Drug, and Cosmetic Act.

The Upjohn Co., Kalamazoo, MI 49001, responded to the notice by submitting a supplemental NADA (10-524V) providing current information covering manufacturing and controls and revising the labeling for the safe and effective use of the ointment on dogs and cats. The supplemental application was approved by regulation issued in the Federal Register of October 17, 1972 (37 FR 21905). The regulation reflecting this approval (21 CFR 135a.31, recodified 21 CFR 524.1484d) did not specify those conditions of use that were NAS/NRC approved.

This document amends the regulations to indicate those conditions of use for which approvals for identical products need not include certain types of efficacy data required for approval by § 514.111(a)(5)(vi) of the animal drug regulations. In lieu of those data, approval of such products may be obtained if bioequivalency or similar data are submitted as suggested in the guideline for submitting NADA's for generic drugs reviewed by the NAS/NRC. The guideline is available from the office of the Hearing Clerk (HFA-305), Rm. 4-65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524 is amended in § 524.1484d by adding after paragraph (c) (1), (2) and (3) the footnote reference "1" and by adding at the end of the section the footnote to read as follows:

§ 524.1484d Neomycin sulfate, hydrocortisone acetate, tetracaine hydrochloride ear ointment.

(c) Conditions of use (1) * * * 1
(2) * * * 1
(3) * * * 1

Effective date. This regulation shall be effective August 21, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 13, 1979.

¹ These conditions are NAS/NRC reviewed and deemed effective. Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

21 CFR Part 524

[Docket No. 79N-0223]

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject to Certification; Neomycin Sulfate, Prednisolone Acetate, Tetracaine Hydrochloride Eardrops

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: This document amends the animal drug regulations for neomycin sulfate, prednisolone acetate, tetracaine hydrochloride eardrops to indicate those conditions of use for which approvals for identical products need not include certain types of efficacy data. These conditions of use were classified as probably effective as a result of a National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group evaluation of the product. In lieu of certain efficacy data, approval may require submission of bioequivalence or similar data. An earlier Federal Register publication has reflected this product's compliance with the conclusions of the review.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Donald A. Gable, Bureau of Veterinary Medicine (HFV-100), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4313.

SUPPLEMENTARY INFORMATION: The NAS/NRC review of this product was published in the Federal Register of July 22, 1970 (35 FR 11713). In that document, the Academy concluded, and the Food and Drug Administration (FDA) concurred, that the product was probably effective for the treatment of certain ear conditions in domestic animals.

That announcement was issued to inform holders of new animal drug applications (NADA's) of the findings of the Academy and the agency, and to inform all interested persons that such articles could be marketed if they were the subject of approved NADA's and otherwise complied with the requirements of the Federal Food, Drug, and Cosmetic Act.

The Upjohn Co., Kalamazoo, MI 49001, responded to the notice by submitting a supplemental NADA (11-703V) providing current information covering manufacturing and controls and revising the labeling for the safe and effective use of the product for the treatment of certain ear conditions in dogs and cats. The supplemental application was

approved by regulation issued in the Federal Register of October 28, 1972 (37 FR 23110). The regulation reflecting this approval (21 CFR 135a.32, recodified 21 CFR 524.1484f) did not specify those conditions of use that were NAS/NRC approved.

This document amends the regulations to indicate those conditions of use for which approvals for identical products need not include certain types of efficacy data required for approval by § 514.111(a)(5)(vi) of the animal drug regulations. In lieu of those data, approval of such products may be obtained if bioequivalency or similar data are submitted as suggested in the guideline for submitting NADA's for generic drugs reviewed by the NAS/NRC. The guideline is available from the office of the Hearing Clerk (HFA-305), Rm. 4-65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524, § 524.1484f, is amended by adding after paragraph (c) (1), (2) and (3) the footnote reference "1" and by adding at the end of the section the footnote to read as follows:

§ 524.1484f Neomycin sulfate, prednisolone acetate, tetracaine hydrochloride eardrops.

(c) Conditions of use. (1) * * * 1
(2) * * * 1
(3) * * * 1

Effective date. This regulation shall be effective August 21, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 13, 1979.

An earlier Federal Register publication has reflected this product's compliance with the conclusions of the review.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Donald A. Gable, Bureau of Veterinary Medicine (HFV-100), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4313.

SUPPLEMENTARY INFORMATION: The NAS/NRC review of this product was published in the Federal Register of August 25, 1970 (35 FR 13543). In that document, the Academy concluded, and the Food and Drug Administration (FDA) concurred, that the product was probably effective as an eye and ear ointment. The Academy stated the claim for "deep penetration" must be withdrawn to earn this rating and they recommended that the label carry the steroid warning indicating that the product is contraindicated in the initial treatment of corneal ulcers.

That announcement was issued to inform holders of new animal drug applications (NADA's) of the findings of the Academy and the agency, and to inform all interested persons that such articles could be marketed if they were the subject of approved NADA's and otherwise complied with the requirements of the Federal Food, Drug, and Cosmetic Act.

Schering Corporation, 86 Orange Street, Bloomfield, NJ 07003, responded to the notice by submitting a supplemental NADA (10-471V) providing current information covering manufacturing and controls and revising the labeling for the safe and effective use of the ointment for the treatment of dogs and cats. The supplemental application was approved by regulation issued in the Federal Register of September 13, 1972 (37 FR 18530). The regulation reflecting this approval (21 CFR 135a.27, recodified 21 CFR

524.1881a) did not specify those conditions of use that were NAS/NRC approved.

This document amends the regulations to indicate those conditions of use for which approvals for identical products need not include certain types of efficacy data required for approval by § 514.111(a)(5)(vi) of the animal drug regulations. In lieu of those data, approval of such products may be obtained if bioequivalency or similar data are submitted as suggested in the guideline for submitting NADA's for generic drugs reviewed by the NAS/NRC. The guideline is available from the office of the Hearing Clerk (HFA-305), Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524 is amended in § 524.1881a by adding after paragraph (c) (1), (2), (3), and (4) the footnote reference "1" and by adding at the end of the section the footnote to read as follows:

§ 524.1881a Prednisolone acetate, sodium sulfacetamide, neomycin ointment.

(c) Conditions of use. (1) * * * 1
(2) * * * 1
(3) * * * 1
(4) * * * 1

Effective date: This regulation shall be effective August 21, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 13, 1979.

Lester M. Crawford,
Director, Bureau of Veterinary Medicine.

BILLING CODE 4110-03-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

Procedural Regulations; 706 Designation

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Equal Employment Opportunity Commission amends its regulations on designation of certain

¹ These conditions are NAS/NRC reviewed and deemed effective. Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

State and local fair employment practices agencies so that they may handle employment discrimination charges within their jurisdiction, filed with the Commission.

EFFECTIVE DATE: June 26, 1979.

FOR FURTHER INFORMATION CONTACT: Dorothy D. Howze, telephone 202-634-6040, Equal Employment Opportunity Commission (State and Local), 2401 E Street, N.W., Washington, D.C. 20506.

SUPPLEMENTARY INFORMATION: Publication of this amendment to section 1601.74(a) effectuates the designation of the following as a 706 Agency:

Colorado State Personnel Board

Notice of proposed designation was published in the February 28, 1979 issue of the Federal Register, (44 FR 11240), with notice that written comments must have been filed with the Commission on or before March 15, 1979. The Commission received 31 negative comments from persons and organizations. It was the opinion of the Commission that the objections to designation of this agency were directed more toward a personnel board investigating itself than the legal standing of a personnel board to operate under the 706(c) authority of Title VII of the Civil Rights Act of 1964, as amended.

A statement of policy regarding the reasons for recognizing as 706 agencies some state or local personnel boards, merit boards or civil service commissions, is published elsewhere in today's edition of the Federal Register. With the addition of the above mentioned agency, § 1601.74 (a) and (b) are amended and published as follows:

1601.74 Designated and notice agencies.

(a) The designated 706 Agencies are:

Alaska Commission for Human Rights
Alexandria (Va.) Human Rights Office
Allentown (Pa.) Human Relations Commission
Anchorage (Alaska) Equal Rights Commission
Arizona Civil Rights Division
Augusta/Richmond County (Ga.) Human Relations Commission
Austin (Tex.) Human Relations Commission
Baltimore (Md.) Community Relations Commission
Bloomington (Ind.) Human Rights Commission
Broward County (Fla.) Human Relations Division

¹ The Colorado State Personnel Board has been designated as a 706 Agency for only those charges which relate to appointments, promotions, and other personnel actions that take place in the state personnel system. In addition, it has been designated as a 706 Agency for all of the above mentioned charges except charges which allege a violation of Section 704(a) of Title VII. For this type of charge it shall be deemed a "Notice Agency" pursuant to 29 CFR 1601.71(3).

DEPARTMENT OF LABOR

41 CFR Part 29-70

Public Contracts and Property Management; Federal Standards for Federally Funded Grants and Agreements; Correction.

AGENCY: Department of Labor.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule relating to Department of Labor grant and agreement regulations published at 44 FR 42920, July 20, 1979.

EFFECTIVE DATE: August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. H. B. Patrick, Acting Director, Office of Grants, Procurement and ADP Management Policy, OASAM, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, (202) 523-9174.

SUPPLEMENTARY INFORMATION: In FR Doc. 79-22541 appearing at page 42920 *et seq.* in the issue of July 20, 1979, the following were incorrectly printed and should be changed to read as follows:

1. In the discussion of major comments, on page 42922, in the second column, under the heading, *Provisions, Recipient Contracts and Subcontracts*, the reference at the end of the third paragraph, printed as "§ 29-70.216-8(b)(5)", should read "§ 29-70.216-8(d)(5)".

2. On page 42924, in the first column, in the fourth line under the heading, *Authority*, the reference printed as "11101" should be changed to read "1101".

3. On page 42925, in the first column, the first word of paragraph (g)(3), printed as "the", should be changed to read "The".

4. On page 42928, in the third column, under the definition of "Nonprofit organization," the last word of the third from last line, printed as "government", should be changed to read "governments".

5. On page 42931, in the first column, the last word of line seven of § 29-70.200(a)(1), printed as "state", should be changed to read "State".

6. On page 42931, in the first column, the section reference at the end of § 29-70.200(a)(2), printed as § 29-70.202b, should be changed by inserting a quotation mark before the reference to read, "§ 29-70.202b".

7. On page 42932, in the third column, the next to last word of the second line of the text of § 29-70.202b-3, printed as "Programs", should be changed to read "programs".

8. On page 42935, in the third column, the caption of § 29-70.207-2(e), printed as "Advance Payments.", should be changed to read "Advance payments."

9. On page 42937, in the third column, the second word of the title of SF 271 at line fourteen of § 29-70.208-2(c), printed as "report", should be changed to read "Report".

10. On page 42939, in column two, at the end of line four of § 29-70.210-2(b)(2), captioned *Treasury check*, the reference, printed as "§ 29-70.210(b)(1)", should be changed to read "§ 29-70.210-2(b)(1)".

11. On page 42942, in the first column, in line three of the text of § 29-70.214-

4(a)(1), the word "preapplications" should be changed to read "preapplication".

12. On page 42942, in the second column, the third word in the caption of § 29-70.214-4(c), printed as "federal", should be changed to read "Federal".

13. On page 42942, in the second column, the title of SF 424 at the beginning of the fifth line of § 29-70.214a, printed as "federal assistance", should be changed to read, "FEDERAL ASSISTANCE".

14. On page 42942, in the third column, the second word on line three of § 29-70.214a(a)(5), printed as "activity," should be changed to read, "activity."

15. On page 42944, in the first column, the word on line three of § 29-70.214a(b)(5), printed as "state", should be changed to read "State".

16. On page 42944, in the first column, the word on line four of § 29-70.214a(b)(11), printed as "government", means United States Government and should be changed to read "Government".

17. On page 42945, in the first column, the first word on line two of § 29-70.214a(b)(22), printed as "Anti-Kickback", should be changed to read "Anti-Kickback".

18. On page 42945, in the third column, the last word on line two of § 29-70.215-2(c), printed as "purpose", should be changed to read "purposes".

19. On page 42945, in the third column, line five of the text of § 29-70.215-2(c), printed to begin "from grant officer", should be changed to read "from the grant officer".

20. On page 42949, in the first column, the first word on line three of § 29-70.216-4(a)(1), printed as "supplies", should be changed to read "suppliers".

21. On page 42949, in the third column, the first word on line three of § 29-70.216-5(b)(2)(iii), printed as "preferential", should be changed to read "preferential".

22. On page 42950, in the second column, the first word on line two of § 29-70.216-6(f)(1)(vi), printed as "recieved", should be changed to read "received".

23. On page 42951, in the third column, the first word on line one of paragraph (b)(4) of the *Clean Air and Water* provision in § 29-70.216-8(c), printed as "the", should be changed to read "The".

24. On page 42952, in the first column, the third word on the next to last line of § 29-70.216-8(c)(3), printed as "trainess", should be changed to read "trainees".

25. On page 42954, in the second column, wording on lines fourteen and fifteen of the fourth paragraph of § 29-

70.216-8(d)(5), printed as "recipient of subrecipient", should be changed to read "recipient or subrecipient".

26. On page 42954, in the third column, the first word on line thirteen of § 29-70.216a-1(b), printed as "reasonableness", should be changed to read "reasonableness".

27. On page 42954, in the third column, the last word on next to the last line of § 29-70.216a-1(b), printed as "costs", should be changed to read "cost".

Signed at Washington, D.C. this 14th day of August, 1979.

R. L. Davis,
 Deputy Assistant Secretary for
 Administration and Management.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[9 CFR Part 92]

Importation of Animals; Revision of Certain Requirements

AGENCY: Animal and Plant Health Inspection Services, USDA.

ACTION: Proposed rule.

SUMMARY: The purposes of these proposed amendments are to revise certain requirements pertaining to the importation of horses and other animals. The circumstances which created the need for actions reflected in these amendments are: (1) the need to revise the requirements for the return of animals of United States origin and certain of their offspring born outside of the United States, following their exhibition in Canada; and (2) to provide for the exemption of offspring of certain Canadian mares from certain test requirements. The intended effect of these proposed amendments is to remove unnecessary barriers to the importation of horses and other animals into the United States and to modify certain requirements contained in the current regulations.

DATE: Comments on or before October 22, 1979.

ADDRESSES: Written comments to Deputy Administrator, USDA, APHIS, VS, Room 815, Federal Building, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Federal Building, Room 815, Hyattsville, MD 20782, (301) 436-8170.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to the provisions of Section 2 of the Act of February 22, 1903, as amended and Sections 3, 4, and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 134b, 134c, and 134f,

respectively), the Animal and Plant Health Inspection Service is considering amending Part 92, Title 9, Code of Federal Regulations.

Section 92.25(b) of the regulations presently contains provisions under which exhibition animals from the United States may go into Canada for exhibition and return to the United States without additional Canadian health or test certification. However, paragraph (b) of that section has two subparagraphs (1 and 2) which distinguish between the exhibition animals and the requirements for return to the United States. Specifically, § 92.25(b)(1) pertains to animals, including poultry, from the United States which have been exhibited at the Royal Agricultural Winter Fair at Toronto or other publicly recognized expositions in Canada. Section 92.25(b)(2) concerns ruminants, swine, horses, poultry from the United States used for rodeo, circus or stage exhibitions in Canada. The conditions for such animals to return to the United States without additional Canadian health or test certification are identical except that Section 92.25(b)(1) animals must not have been in Canada for more than 30 days and must return to the United States within 10 days of the close of the exhibition, and Section 92.25(b)(2) animals must not have been out of the United States for a period exceeding 3 months.

The proposed regulations would combine paragraphs (b)(1) and (2) so that all animals attending a public exhibition in Canada would be eligible to return to the United States under prescribed conditions without additional Canadian health or test certification, if such animals had not been out of the United States for more than 90 days. The administrative officials of the Animal and Plant Health Inspection Service (APHIS) believe that there is no significant difference between exhibitions referred to in paragraph (b)(1) and those in (b)(2) and that the longer time period established in (b)(2) has proven to be adequate to prevent the entry of communicable diseases of livestock or poultry by animals returning to the United States under such subparagraph. Such time period also appears to be a reasonable time to permit the owners of the animals to exhibit their animals in Canada without having undue risk of introducing

Federal Register

Vol. 44, No. 163

Tuesday, August 21, 1979

communicable disease into the United States. Further, the Canadian disease control requirements for the movement and participation of animals in rodeos, circuses and other publicly recognized exhibitions are similar to those of the United States. Animals appearing in such exhibitions must meet Canadian health requirements and be certified free of communicable disease. Therefore, it is believed that United States animals returning from Canada that have attended such exhibitions are less likely to have been exposed to communicable disease than similar animals which have been in Canada on farms or places other than publicly recognized exhibitions. Consequently, the Department is proposing to combine paragraph (b) (1) and (2) so that the animals from the United States, attending publicly recognized exhibitions in Canada may return to the United States without Canadian health or test certificates under prescribed conditions, if such animals have not been out of the United States for a period exceeding 90 days from the date of exportation from the United States.

Two additional changes to § 92.25(b) are also contemplated, namely:

1. The official United States health certificate for a returning horse must show that an official test for equine infectious anemia (EIA) with negative results was conducted within 90 days of the date of re-entry into the United States. This would be required because the Department believes that for U.S. horses originally certified for export by the Department EIA test results would be valid for such period. As test results become older the Department believes that they become less reliable, and further retesting would probably be necessary.

2. Offspring of horses returning to the United States from Canada which were born subsequent to the official test dates specified on the dam's official United States health certificate would also be able to enter the United States without additional Canadian health or test certificates. This is being proposed because if the dam tested negative to official tests, the offspring should be negative as well.

The proposed regulations would also revise § 92.24(a) to provide that foals of Canadian mares born after such mares were negative to a test for EIA

administered within 60 days immediately prior to exportation to the United States would be exempt from the test requirement for EIA. This is being proposed because in all likelihood, if the mare tested negative for EIA prior to foaling, the foal should also be negative.

Additionally, in order to avoid confusion between exhibition animals returning to the United States as provided in § 92.25(b) of the regulations, and horses of United States origin which have entered Canada for periods of not more than 72 hours and are returning to the United States as provided in § 92.24(b) of the regulations, § 92.25(b) would be revised to clearly indicate that the provisions of § 92.24(b) would still be in effect. There are less restrictions for horses returning to the United States from Canada after an absence of less than 72 hours than horses which have been in Canada for a greater period of time because the threat to introduce communicable disease should be significantly less because of the horses' short absence from the United States.

Accordingly, Part 92, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. In § 92.24, that portion of paragraph (a) after the second semicolon and before the first proviso would be amended to read:

§ 92.24 Horses from Canada.

(a) * * * Except, that animals accompanying their dams which were foaled after their dam was so tested negative need not be so tested; and shall otherwise be handled as provided in § 92.17: * * *

2. In § 92.25, paragraph (b) would be amended to read:

§ 92.25 Special provisions.

(b) *Exhibition animals.* Except as provided for horses in § 92.24(b), animals, including poultry, from the United States which have been exhibited at the Royal Agricultural Winter Fair at Toronto or other publicly recognized expositions in Canada, including racing, rodeo, circus, or stage exhibitions in Canada, and have not been in that country for more than 90 days are eligible for return to the United States without Canadian health or test certificates, if they are accompanied by copies of the United States health certificate, issued and endorsed in accordance with the export regulations

contained in Part 91 of this chapter for entry into Canada. *Provided*, that in the case of horses for exhibition, including race horses, the certificates shall certify that negative results were obtained from tests for equine infectious anemia which were conducted within 10 days of the date the horses were offered for entry into Canada and such horses are returned to the United States not more than 90 days after the test was conducted and, *provided further* that all the animals offered for re-entry upon examination by the veterinary inspector at the U.S. port of entry, are found by the inspector to be free of communicable diseases and exposure thereto and are determined to be the identical animals covered by said certificates or are the natural increase of such animals born after official test dates certified on the dam's health certificate, or that in the case of poultry, they otherwise qualify for entry into Canada under the Canadian regulations.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, Room 817, 6505 Belcrest Road, Hyattsville, Maryland 20782, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue of the Federal Register.

Note.—This proposed rulemaking has been reviewed under the USDA criteria established to implement E.O. 12044, "Improving Government Regulations." While this action has not been designated "significant" under those criteria, an approved Draft Impact Analysis Statement has been prepared and is available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782, 301-436-8695.

Done at Washington, D.C., this 15th day of August 1979.

M. T. Goff,

Deputy Administrator, Veterinary Services

BILLING CODE 3410-34-M

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 130]

Small Business Energy Loans; Proposed Rule

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: SBA is proposing to revise § 130.8, which states that energy loans will be made under Section 7(1) regardless of whether they might have qualified under Section 7(a) of the Small Business Act, 15 U.S.C. 636. This revision would clarify when energy loans may be approved under other loan programs.

COMMENTS BY: September 20, 1979.

ADDRESSES: Comments, in duplicate, should be addressed to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Everly Cherry, Chief, Special Projects Division, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416, (202) 658-6696.

SUPPLEMENTARY INFORMATION: Part 130 was promulgated to implement Pub. L. 95-315, 92 STAT. 377, approved July 4, 1978, which required the SBA to provide appropriate regulations for the Small Business Energy Loan Program, 44 FR 1369. SBA has determined that § 130.8 ought to be revised. As currently stated in § 130.8, the last sentence could be interpreted to prevent an applicant from obtaining an energy loan under another loan program if for some reason the applicants were found ineligible, or if funds were not available, under section 7(1). Also, it would be legally and administratively improper if a higher loan category (e.g., a deferred guaranty loan) is available to the applicant under another program, to approve a lower category loan (immediate participation or direct) under section 7(1). The revised section would clarify that assistance under other loan programs would be available at an equal loan category level.

Comment is especially invited on whether energy loan applicants should continue to be processed first as section 7(1) applications, or whether assistance under other loan programs should be examined first and section 7(1) assistance reserved for those applicants which could not be assisted under other programs. Reasons for processing first under section 7(1) include: it immediately provides the benefits of the

broader credit evaluation provided in section 130.7; direct funds under section 7(1) are often more immediately available to the energy loan recipient; and it facilitates the collection of more comprehensive and meaningful information that must be reported annually by SBA to the President and Congress pursuant to section 6 of Pub. L. 95-315. The argument in favor of first processing energy loan applications under other loan programs is that it would preserve the funds and assistance under section 7(1) for those applicants which cannot meet the qualifications, particularly the credit criteria, under other loan programs.

In consideration of the foregoing, it is proposed to amend § 130.8 as follows:

§ 130.8 Other financing.

No loan shall be made under this program unless the financial assistance is not otherwise available on reasonable terms from non-Federal sources. The initial processing of an energy loan will be under Section 7(1) of the Small Business Act. If a loan is approved, Section 7(1) guaranty (deferred) participation funds will be utilized. If a Section 7(1) guaranty participation is unavailable for any reason, a guaranty participation may be approved under another loan program for which the applicant is qualified. If no guaranty participation loan is available, or if applicant does not qualify for a guaranty participation under another program, the applicant may be considered for an immediate participation under Section 7(1). If a Section 7(1) immediate participation is unavailable, consideration for an immediate participation may be made under another program for which applicant is eligible. A direct Section 7(1) loan, or direct loan under another section if direct Section 7(1) loan funds are exhausted, will be granted only if no immediate participations are available under any program or if applicant does not qualify for an immediate participation under other programs. The requirements of § 120.2(a)(1) and (2), except § 120.2(a)(2)(iv), relating to documentation of efforts to find other financing, shall apply to loans under this program.

(Catalog of Federal Domestic Assistance Programs No. 59.028 Energy Loan Program.)

Dated: August 13, 1979.

A. Vernon Weaver,
Administrator.

**Semiannual Agenda of Regulations
Schedule**

AGENCY: U.S. Department of Commerce.

ACTION: Schedule for publication of semiannual agenda of regulations.

SUMMARY: The Department's semiannual agenda of regulations, required by Executive Order 12044, "Improving Government Regulations," will be published in the Federal Register on or before September 14, 1979, instead of August 15, as originally scheduled.

The publication dates for the Department's agendas in calendar year 1980 are being changed to coincide with the publication schedule of the Regulatory Council's Calendar of Regulations. The prospective dates for the publication of the Department's agendas are May 15, 1980, and November 14, 1980.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 791 0119]

**Bayer AG, et al.; Consent Agreement
with Analysis To Aid Public Comment**

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, among other things, would require a diversified chemical company, located in Leverkusen, Germany, and its two American subsidiaries to divest within one year to a Commission-approved buyer, all United States assets gained through their acquisition of Miles Laboratories, Inc. Additionally, for

specified time periods, the firms would be barred from acquiring, without prior Commission approval, any concern engaged in the manufacture, distribution or sale in the United States of allergenic extracts or chemically treated diagnostic reagent strips used for in vitro quantitative urinalysis.

DATE: Comments must be received on or before October 22, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: ETC/C. Alfred F. Dougherty, Jr., Washington, D.C. 20580 (202) 523-3601.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 791 0119]

Bayer AG et al.

Agreement Containing Consent Order

In the matter of Bayer AG, a corporation, Rhinechem Corporation, a corporation, and Miles Laboratories, Inc. (formerly Rhinechem Laboratories, Inc.), a corporation.

The Federal Trade Commission having initiated an investigation of the acquisition of Miles Laboratories, Inc., a corporation, by Rhinechem Laboratories, Inc. (now known as Miles Laboratories, Inc.), a wholly owned subsidiary corporation of Rhinechem Corporation, which in turn is an indirect wholly owned subsidiary corporation of Bayer AG, a corporation, and it now appearing that Miles Laboratories, Inc., Rhinechem Corporation and Bayer AG, hereinafter sometimes referred to as proposed respondents, are willing to enter into an agreement containing an order with respect to the acquisition being investigated.

It is hereby agreed by and between Bayer AG, Rhinechem Corporation and

Miles Laboratories, Inc., by their duly authorized officers and attorneys, and counsel for the Federal Trade Commission that:

1. Proposed respondent Bayer AG (Bayer) is a corporation organized and existing under and by virtue of the laws of the Federal Republic of Germany, with its principal office and place of business located at 5090 Leverkusen, Federal Republic of Germany.

2. Proposed respondent Rhinechem Corporation (Rhinechem) is a corporation organized and existing under and by virtue of the laws of the State of Delaware, with its principal office and place of business located at 425 Park Avenue, New York, New York 10022. Rhinechem is a wholly owned subsidiary corporation of Bayer International Finance N.V., which in turn is a wholly owned subsidiary corporation of proposed respondent Bayer.

3. Proposed respondent Miles Laboratories, Inc. (Miles Labs) is a corporation existing under and by virtue of the laws of the State of Delaware, with its principal office and place of business located at 1127 Myrtle Street, Elkhart, Indiana 46514. Miles Labs was organized originally under the name of Rhinechem Laboratories, Inc. for the purpose of acquiring Miles Laboratories, Inc. On February 8, 1979, the acquired company Miles Laboratories, Inc. merged into its nominal acquirer Rhinechem Laboratories, Inc., and the successor corporation has been named Miles Laboratories, Inc. Miles Labs is a wholly owned subsidiary corporation of proposed respondent Rhinechem.

4. Miles Laboratories, Inc. (Miles) was a corporation organized and existing under and by virtue of the laws of the State of Indiana, with its principal office and place of business located at 1127 Myrtle Street, Elkhart, Indiana 46514.

5. Proposed respondents Rhinechem and Miles Labs admit all the jurisdictional facts set forth in the draft of complaint here attached. Proposed respondent Bayer admits the jurisdictional facts set forth in the draft of complaint here attached only for purposes of this agreement and the enforcement of the order.

6. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

7. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby and related material pursuant to Rule 2.34, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

8. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

9. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to each of the proposed respondents' addresses as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation or interpretation not contained in the terms of the order or this agreement may be used to vary or contradict the terms of the order.

10. Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order, and that they may be liable for civil

penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purpose of this order, the following definition shall apply:

"Allergenic Extracts" are biological products that are administered to man primarily for the diagnosis or treatment of allergies.

I

It is ordered, That, subject to the prior approval of the Federal Trade Commission, respondents, through their officers, directors, employees, subsidiaries, affiliates, divisions, successors and assigns, whether direct or indirect, shall within one (1) year from the date on which this order becomes final divest absolutely and in good faith all United States assets (other than items which cannot be moved without substantial injury to the premises), of whatever description acquired by respondents as a result of their acquisition of Miles Laboratories, Inc. (Miles), as well as subsequent additions and improvements thereto, and primarily utilized by Miles in the manufacture, distribution or sale in the United States of Allergenic Extracts. Such assets shall include equipment, machinery, raw material reserves, inventory, a list of customers, product trade names, product trademarks, patents, assignable licenses (non-assignable licenses shall be relinquished), manufacturing specifications and procedures, market research materials, sales training materials, research and development projects (including licenses, license applications and Notices of Claimed Investigational Exemption for a New Drug (IND's)), and such other property of whatever description relating primarily to Miles Allergenic Extracts. Such divestiture shall be made to a third party which represents that it intends to use such assets in the manufacture, distribution or sale of Allergenic Extracts in the United States.

It is further ordered, That, upon the written request of the acquirer of the divested property, respondents shall, for no longer than three (3) years from the date of the agreement with a third party to transfer the assets referred to in Paragraph I, furnish such technical, market and quality control information of Miles and make available such personnel and technical assistance as may be necessary to enable such acquirer to manufacture and market those Allergenic Extracts manufactured

in the United States by Miles at the time of its acquisition by respondents.

III

It is further ordered. That, pending the divestiture required by this order, respondents shall not cause, and shall use their best efforts to prevent, any diminution of the value of the Miles Allergenic Extracts products or assets.

IV

It is further ordered. That, pursuant to the requirements of Paragraph I above, none of the Miles Allergenic Extracts assets shall be divested directly or indirectly to anyone who is, at the time of divestiture, an officer, director, employee or agent of, or under the control, direction or influence of, respondents or any of respondents' subsidiaries or affiliated corporations, whether direct or indirect, or who owns or controls more than one (1) percent of the outstanding shares of the capital stock of any respondent.

V

It is further ordered. That, for a period of ten (10) years from the date this order becomes final, no respondent, its subsidiaries, affiliates, divisions, successors or assigns, shall, without the prior approval of the Federal Trade Commission, directly or indirectly acquire any stock, share capital, or equity interest in any concern, corporate or noncorporate, engaged in, or the assets of such concern relating to, the manufacture, distribution or sale in the United States of Allergenic Extracts: *Provided, however,* That the foregoing provision shall not prohibit, with respect to Allergenic Extracts, (1) the taking by respondents from such concerns of non-exclusive licenses that contain no restrictions with respect to limiting other market entrants, and (2) purchases in the ordinary course of business which do not result in the elimination of a competitor.

VI

It is further ordered. That, for a period of five (5) years from the date this order becomes final, no respondent, its subsidiaries, affiliates, divisions, successors or assigns, shall, without the prior approval of the Federal Trade Commission, directly or indirectly acquire any stock, share capital or equity interest in any concern, corporate or noncorporate, engaged in, or the assets of such concern relating to, the manufacture, distribution or sale in the United States of chemically treated diagnostic reagent strips used for in vitro quantitative urinalysis: *Provided,*

however, That the foregoing provision shall not prohibit, with respect to such strips, (1) the taking by respondents from such concerns of non-exclusive licenses that contain no restrictions with respect to limiting other market entrants, and (2) purchases in the ordinary course of business which do not result in the elimination of a competitor.

VII

It is further ordered. That respondents shall, within sixty (60) days after the date of service of this order, and every sixty (60) days thereafter until respondents have fully complied with the divestiture provision of this order, and annually thereafter, on the anniversary date of service of this order, for the duration of this order, submit in writing to the Federal Trade Commission a verified report setting forth in detail the manner and form in which each or every respondent intends to comply, is complying or has complied with this order. Until divestiture is accomplished, all compliance reports shall include, among other things that are from time to time required, a summary of contracts or negotiations with anyone for the disposition of the assets specified in Paragraph I of this order, the identity of all such persons and copies of all written communications between such persons and any respondent.

VIII

It is further ordered. That respondents notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries of any other change in the corporation, which may affect compliance obligations arising out of the order.

Bayer AG, et al.

[File No. 791 0119]

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Bayer AG, Rhinechem Corporation and Miles Laboratories, Inc. (formerly Rhinechem Laboratories, Inc.).

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days,

the Commission will again review the agreement and comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Allegations of the Complaint

As of January 5, 1978, respondents acquired, through tender offer, over 90% of the outstanding common shares of Miles Laboratories, Inc. (Miles) for approximately \$250 million. On February 8, 1979, Miles was merged into its nominal acquirer Rhinechem Laboratories, Inc. and the successor company was named Miles Laboratories, Inc.

The Federal Trade Commission alleged in its complaint that this acquisition violates Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act in that it lessens or eliminates competition and tends to create a monopoly in the manufacture and sale of allergenic extracts in the United States.

The Federal Trade Commission alleges that the acquisition violates Section 7 and Section 5 by (a) eliminating actual and potential competition between respondents and Miles in the manufacture and sale of allergenic extracts, (b) eliminating a substantial, independent competitive factor in the manufacture and sale of allergenic extracts, (c) entrenching respondents' leading position in the manufacture and sale of allergenic extracts, (d) maintaining or increasing the concentration in the manufacture and sale of allergenic extracts, and reducing the possibility of deconcentration, (e) substantially increasing the existing barriers to entry, (f) encouraging additional acquisitions and mergers in the industry, (g) depriving independent manufacturers and sellers of allergenic extracts of a fair opportunity to compete with the combined resources and market position of respondents and Miles, and (h) depriving members of the consuming public of the benefits of free and unrestricted competition in the manufacture and sale of allergenic extracts.

The Terms of the Proposed Consent Order

Paragraph I of the proposed order requires respondents to divest, subject to prior Commission approval and within one (1) year from the date the order becomes final, all United States assets (other than items which cannot be moved without substantial injury to the premises) that were primarily utilized by Miles in the manufacture,

distribution or sale in the United States of allergenic extracts. The assets include equipment, machinery, raw material, inventory, a list of customers, product trade names and trademarks, patents, licenses, manufacturing specifications and procedures, market research materials, sales training materials and research and development projects.

Paragraph II of the proposed order requires respondents to assist the acquirer, at the acquirer's request and for no longer than three (3) years, by providing Miles' technical, market and quality control information and by making available personnel and technical assistance to enable the acquirer to manufacture and market the allergenic extracts that Miles manufactured at the time of its acquisition by respondents.

Paragraphs III and IV are standard provisions. Paragraph III prohibits respondents from causing, and requires respondents to prevent, any diminution of the value of the Miles allergenic extract assets or products. Paragraph IV prohibits the divestiture of the assets to anyone who is, at the time of the divestiture, an officer, director, employee or agent of, or under contract, direction or influence of respondents or who owns or controls more than one percent of the outstanding shares of any respondent.

Paragraph V prohibits respondents for 10 years from acquiring, without prior Commission approval, any stock, share capital or equity interest in any concern engaged in, or the assets of any concern relating to, the manufacture, distribution or sale in the United States of allergenic extracts. However, respondents may enter into non-exclusive licensing arrangements and may make purchases in the ordinary course of business with respect to allergenic extracts without prior Commission approval.

Paragraph VI prohibits respondents for 5 years from acquiring, without prior Commission approval, any stock, share capital or equity interest in any concern engaged in, or the assets of any concern relating to, the manufacture, distribution or sale in the United States of diagnostic reagent strips used for urinalysis. However, respondents may enter into non-exclusive licensing arrangements and may make purchases in the ordinary course of business with respect to this product market without prior Commission approval.

Paragraphs VII and VIII are standard provisions. Paragraph VII sets forth the standard compliance obligations of a company under a Commission consent order. Paragraph VIII requires notice to be given to the Commission of any

change in the corporate structure of any respondent.

The divestiture of the assets described in Paragraph I furthers competition in the United States allergenic extracts market by restoring an independent competitor that would otherwise be eliminated. The acquisition bans in Paragraphs V and VI protect future competition in those markets without the expenditure of significant Commission resources.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

James A. Tobin,
Acting Secretary.

[FR Doc. 79-25853 Filed 8-20-79; 8:45 am]
BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 2]

[Docket No. 79N-0305]

Imminent Hazard Criteria and Procedure; Proposed Rule

AGENCY: Department of Health, Education, and Welfare.

ACTION: Proposed rule.

SUMMARY: The Secretary of Health, Education, and Welfare is proposing rules to establish the criteria and procedure for determining whether the approval of certain human and animal drugs should be immediately suspended under the "imminent hazard" provisions of the Federal Food, Drug, and Cosmetic Act. The Food and Drug Administration has published elsewhere in this issue of the Federal Register a proposed rule concerning separation of functions in withdrawal proceedings involving a product for which an imminent hazard determination must be made.

DATES: Comments by October 22, 1979. The effective date of the final rule based on this proposal is proposed to be 30 days after date of its publication.

ADDRESSES: Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Margaret Gilhooley, Office of the General Counsel, Food and Drug Division (GCF-1), Department of Health, Education, and Welfare, 5600 Fishers

Lane, Rockville, MD 20857, 301-443-1345.

SUPPLEMENTARY INFORMATION:

The Statutory Framework

The Secretary of Health, Education, and Welfare, and by delegation, the Commissioner of Food and Drugs, are responsible for the administration of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 et seq.; 21 CFR 5.1). The provisions of the act require that all "new drugs," "new animal drugs," and "animal feed bearing or containing a new animal drug" be subject to an application "approved" by the Secretary before they are shipped in interstate commerce (21 U.S.C. 355(a), 360b(a)(1) and 360b(a)(2)). To obtain approval for an application, the applicant must establish that the product is safe and effective for its intended use, and that it meets other statutory requirements.

The burden of establishing safety and efficacy of these products remains at all times on the applicant. Whenever information warrants the conclusion that an approved new drug, new animal drug, or animal feed bearing or containing a new animal drug is unsafe or ineffective, the Secretary, acting through the Food and Drug Administration (FDA), is required to remove the product from the market. The act establishes two procedures for removing an approved product from the market: "withdrawal" and "suspension" (21 U.S.C. 355e, 360b(e)(1) and 360b(m)(4)(A)).

(1) *Procedures for Withdrawal of Approval.* The act requires FDA to withdraw approval of the application for a product if information shows that the product is unsafe or ineffective. The administrative procedure for withdrawing approval of a product includes notice to the applicant of an opportunity for hearing, and administrative determination of whether a hearing is justified, the conduct of a full evidentiary public hearing before a presiding officer, or the preparation of an order denying a hearing, and a decision by the Commissioner based on the administrative record.

This procedure usually requires at least 6 months, and sometimes much longer. A drug may remain on the market for years while withdrawal proceedings are under way.

(2) *Procedures for Suspension of Approval.* The elaborate procedural protections against improvident withdrawals emphasize the importance of the immediate suspension provision available under the act. This summary procedure permits the Secretary to act

promptly to suspend approval of an application temporarily, and thereby remove the product from the market. A new drug may be suspended if it represents an "imminent hazard to the public health" (21 U.S.C. 355(e)). A new animal drug or animal feed bearing or containing a new animal drug may be suspended if it presents an "imminent hazard to the health of man or of the animals for which * * * intended" (21 U.S.C. 360b(e)(1), 360b(m)(4)(A)). Once having suspended approval, the Secretary must provide the applicant with an opportunity for an expedited hearing on whether the application should be withdrawn and the product permanently removed from the market. This authority to suspend approval is placed by law in the Secretary, or in the absence of the Secretary, on the officer acting as Secretary, and may not be delegated.

The summary suspension procedure provides a critical procedural tool to carry out the obligation of this Department and of FDA to protect the public health and safety. Rapid action may be necessary if scientific data raise serious new questions concerning the safety of an approved product. If new evidence or further and more careful analysis of existing evidence indicates that a life-threatening or other serious risk is present, the summary suspension procedure allows the Secretary to end this serious risk promptly. The summary procedure does not eliminate the need to conduct a full administrative proceeding to determine whether the drug should be permanently removed from the market.

Development of Criteria

Because the "imminent hazard" provisions of the act are the only statutory mechanism permitting immediate suspension of approval, the criteria and procedure for making imminent hazard determinations are highly important to those seeking suspension, those holding applications for the products, those using the products, and others affected.

There are at present no regulations issued by the Secretary stating the criteria for making imminent hazard determinations. Until there is sufficient information to articulate general rules, the Secretary may proceed, as has been done, to develop the standards for decision on a case-by-case basis. As the Supreme Court stated in *Securities & Exchange Comm'n v. Chenery Corp.*, 332 U.S. 194, 203 (1947), " * * * the choice made between proceeding by general rule or by individual, ad hoc litigation is one that lies primarily in the informed discretion of the administrative agency."

The recent imminent hazard determinations made by the Secretary described below have provided a base of experience that has permitted the identification of general standards that can be used in future proceedings of this type. Accordingly, the Secretary believes it is appropriate at this time to establish the criteria and procedures for imminent hazard determinations in regulations, and to provide the public an opportunity for comment on the proposed rule.

At present, FDA has a regulation (21 CFR 2.5) that states the considerations that guide FDA in making recommendations to the Secretary concerning imminent hazard determinations. This FDA regulation was issued in 1971, before the recent developments that permitted a full examination by the Secretary of the criteria for the ultimate decision. The FDA regulation does not govern the actions of the Secretary, but the regulation has been taken into account in developing the Secretary's criteria. The Secretary's criteria and the FDA regulations differ in language, but they are not at "substantial variance," as stated by the court upon judicial review in *Forsham v. Califano*, 442 F. Supp. 203, 208 (D.D.C. 1977), appeal from denial of preliminary injunction dismissed as moot No. 77-2072 (D.C. Cir. April 10, 1979); dismissed as moot No. 77-1478 (D.D.C. July 23, 1979). FDA is proposing to withdraw the regulation, in a document published elsewhere in this issue of the Federal Register, because it is unnecessary and potentially confusing to have separate criteria for FDA's recommendations to the Secretary and for the Secretary's decision.

The Secretary invoked an imminent hazard provision for the first time on July 25, 1977, by suspending approval of the new drug applications for phenformin, a drug indicated for use in diabetes. A petition for invocation of this suspension power with respect to propoxyphene, an analgesic found in Darvon and other drugs, recently has been denied. These decisions are on display in the office of the FDA Hearing Clerk. In these proceedings, the Secretary identified the factors to be considered in making imminent hazard determinations. These factors are the basis of the criteria proposed in this document.

The Secretary's decision in the phenformin matter gave the following explanation of the legislative history of the imminent hazard provision of the act governing new drugs and recent judicial interpretations of comparable provisions

applicable to suspension of approval of pesticides.

[A] Legislative History of the Suspension Provision

The legislative history of the suspension provision is comparatively sparse. The provision was proposed by President Kennedy in a letter to Senator Eastland on August 3, 1962, very shortly before the 1962 Amendments were enacted. The proposal was a response to an inadequacy in the existing law—and in the proposed legislation already under consideration—to empower the Secretary to remove a drug from the market rapidly if necessary to protect the public health. 108 Cong. Rec. 16303 (Aug. 23, 1962).

The Senate report attempts to set out generally the circumstances when the suspension authority should be utilized: [Suspension is appropriate] when the evidence before the Secretary shows that a drug is so unsafe as to create a public health situation which must be corrected immediately, and cannot be permitted to continue while a hearing is being held. The committee contemplates that this power would be exercised only in the exceptional case of an emergency, which does not permit the Secretary to correct it by other means. S. Rep. No. 1744, Pt. 2, 87th Cong., 2d Sess., p. 7 (1962).

Senator Eastland, the Chairman of the Senate Committee that considered the bill, elaborated on this discussion in describing the bill on the Senate floor:

The committee believes that this authority, which could have grave effects upon a manufacturer and upon the confidence of the public in a drug which might later be found appropriate for continued availability to physicians, should only be exercised under the most extreme conditions and with the utmost care. For that reason, it is provided that it may be exercised only by the Secretary or the Acting Secretary. I feel that it would be desirable, wherever possible, for the Secretary, before taking action, not only to confer with the manufacturer, but also to consult a committee of experts appointed by the National Research Council. It should not be forgotten also that there may be other remedies available to the Secretary to cope with the situation instead of using the potentially lethal weapon of immediate suspension. 108 Cong. Rec. 16304-5 (August 23, 1962).

The only discussion of the provision in the House Report [H. Rept. No. 2524, 87th Cong., 2d Sess., 8-9 (1962)] also urges the Department to permit the manufacturers an opportunity to argue against suspension before the Secretary acts.

The standard that emerges most clearly from this legislative history is the declaration in the Senate Report that the Secretary should act "when the evidence before the Secretary shows that a drug is so unsafe as to create a public health situation which must be corrected immediately and cannot be permitted to continue while a hearing is being held." Such a standard plainly contemplates that the suspension power should be used

whenever delay in removing a drug from the market would significantly jeopardize the public health.

In my judgment, the legislative history suggests that Congress intended:

(1) that the summary suspension procedure be employed "when the evidence before the Secretary shows that a drug is so unsafe as to create a public health situation which must be corrected immediately and cannot be permitted to continue while a hearing is being held";

(2) that this procedure be used only when the public health situation to be corrected is serious; and

(3) that the Secretary's actions reflect the nature of the hazard and the extent of the proceedings that have occurred prior to his action.

[B] Relevant Judicial Precedents

In determining the appropriate standards to govern suspension of new drug applications under the Act, the recent case law interpreting an almost identical summary suspension procedure in the statute regulating pesticides provides some important guideposts.

(1) *Standard for Invoking Summary Suspension.* The United States Court of Appeals for the District of Columbia Circuit has approved a broad standard for invoking the summary suspension provision—specifically adopted from the Food, Drug, and Cosmetic Act—in the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 136d(d) (FIFRA). See *Environmental Defense Fund, Inc. v. Environmental Protection Agency*, 465 F. 2d 528 (D.C. Cir. 1972); *Environmental Defense Fund v. Environmental Protection Agency*, 510 F. 2d 1292 (D.C. Cir. 1979); *Environmental Protection Agency*, 548 F. 2d 998 (D.C. Cir. 1976) (cert. denied 431 U.S. 925 (1977)).

These decisions caution against any interpretation of the phrase "imminent hazard to the public health" that would restrict the suspension procedure to "crisis" situations. Rather, the Court of Appeals has held that summary suspension is appropriate in any circumstance where there was a "substantial likelihood that serious harm will be experienced during the year or two required in any realistic projection of the administrative process." 465 F. 2d, at 540; 510 F. 2d, at 1297; and 548 F. 2d, at 1005.

In those cases, the Court held that long-term damage to health and to environment threatened by continued use of pesticides justified the use of the summary suspension power, both because the harm threatened was serious and because it was irreversible. The Court specifically approved EPA's determination that the suspension authority should be exercised on the basis of an analysis of the "magnitude of the anticipated harm, and the likelihood that it will occur." 465 F. 2d, at 534. The court, in short, held that the nature of the hazard that would justify suspension should not be limited to a sudden or overwhelming threat. Indeed, the pesticides involved in the three cases in which the EPA administrator's suspension of pesticide registrations were upheld had been

in use for some time and threatened long-term environmental contamination. At the same time, the Court made clear that, in determining whether a pesticide posed an imminent hazard to health, the agency was empowered to consider the benefits of its use and the risks from its immediate removal from the market.

While the assessment of the factors involved (the nature of the risks, the nature of the benefits, the likelihood of harm) will clearly be different in the case of drugs intended for human consumption, the analysis of the appropriate legal standards for applying the summary suspension procedures in the FIFRA cases are directly relevant to interpretations of the same provision in the Food, Drug, and Cosmetic Act. Order of the Secretary Suspending Approval, New Drug Application for Phenformin, pp. 27-33 (July 25, 1977) (Footnote omitted).

Secretary's Criteria

On the basis of this review of the legislative history and relevant court decisions, the phenformin decision stated the factors to be considered for suspensions. The criteria proposed in this rulemaking proceeding are essentially the same as the criteria stated in the phenformin decision. Editorial revisions have been made to reflect the broader applicability of the proposed criteria to new animal drugs and animal feed bearing or containing new animal drugs, as well as to all new drugs for human use.

The criteria take into account the severity and likelihood of harm that could be caused during the completion of the withdrawal proceeding, the risk that might be occasioned by immediate withdrawal of the product from the market, the likelihood the product will be withdrawn after completion of the withdrawal proceeding, and the availability of other approaches to protect the public health. As the discussion in the phenformin proceeding quoted above makes clear, an imminent hazard can be found not only on the basis of harm that will actually occur during the completion of the withdrawal proceeding but also on the basis of harm with long-term effects that may be initiated during that period, the final anticipated injury from which occurs later. This interpretation is consistent with decisions, under the imminent hazard provisions of FIFRA, in which certain pesticides were found to be imminent hazards because of long-term carcinogenic risks (*Environmental Defense Fund v. EPA*, 510 F.2d 1292 (D.C. Cir. 1975) (aldrin/dieldrin); *Environmental Defense Fund v. EPA*, 548 F.2d 998 (D.C. Cir. 1976), cert. denied 431 U.S. 925 (1977) (heptachlor/chlordane)).

The criteria articulated in the phenformin proceeding have been upheld as acceptable upon judicial review in *Forsham v. Califano*, supra. In the only other judicial decision interpreting an imminent hazard provision under the act, the court rejected a charge that the Secretary was delinquent in not invoking the suspension power in that case and stated that "invocation of this emergency power is a matter which is peculiarly one of judgment" (*American Public Health Ass'n v. Veneman*, 349 F. Supp. 1311, 1316 (D.D.C. 1972)).

Applicability

The criteria for imminent hazard determinations for new drugs for human use are also applicable to determinations concerning new animal drugs and animal feed bearing or containing new animal drugs. The act gives the Secretary authority to suspend approval for these products when a product presents an "imminent hazard to the health of man or of the animals for which * * * intended" (21 U.S.C. 360b(e)(1), 360b(m)(4)(A)). This standard takes account of the effect on animals, as well as humans, but in all other respects it is the same as the standard of an "imminent hazard to the public health" that governs suspension of new drugs for human use (21 U.S.C. 355(e)). The legislative history of the animal drug amendments indicates that the imminent hazard provision was intended to be the same as that governing new drugs (Hearing on H.R. 3639 before the Subcommittee on Public Health and Welfare of the Health Committee on Interstate and Foreign Commerce, 90th Cong., 1st Sess. 43 (1967); H. Rept. No. 875, 90th Cong., 1st Sess. 5 (1967); H. Rept. No. 2168, 89th Cong., 2d Sess. (1966)).

Procedures

The statutory provisions governing imminent hazard do not prescribe the procedures to be used by the Secretary in reaching the decision, but do require that there be prompt notice of the decision to the applicant and an opportunity for an expedited hearing on the withdrawal determination. The proposed rule, and the FDA proposal published elsewhere in this issue of the Federal Register, provide that FDA shall provide notice of the decision promptly and an opportunity for a hearing on an expedited basis on the withdrawal of a product determined by the Secretary to be an imminent hazard.

In addition, the proposed rule states the procedures the Secretary uses in reaching the imminent hazard

determination. The proposed procedures contain provisions on the initiation of an imminent hazard proceeding, including the manner of filing a citizen's petition. The procedures provide for an evaluation by FDA of a citizen's petition requesting an imminent hazard determination. The Commissioner and the staff of FDA will also be available to advise the Secretary, upon request, in connection with every imminent hazard determination under the act. In accordance with the congressional intent discussed above, notice that a proceeding has been initiated will be provided to the appropriate applicant. Notice will also be given, when feasible, to other persons, known to FDA, who are interested in the proceeding. The Secretary will also provide an opportunity for interested persons to submit arguments for consideration in reaching his or her decision. If the Secretary finds it necessary, the Secretary may issue his or her decision without waiting for these submissions. As a matter of discretion, the Secretary may provide for meetings or provide for a public hearing by FDA concerning the imminent hazard determination. The Secretary will issue a written decision.

The proposal provides for a suspension order that allows a period of continued distribution of a product to permit a safe and orderly transition to alternative products or forms of therapy. A suspension order of this type was issued in the phenformin matter and was upheld as valid in *Forsham v. Califano, supra*.

The Secretary has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 505(e), 512, and 701(a), 52 Stat. 1055, 76 Stat. 782 as amended, 82 Stat. 343-351 (21 U.S.C. 355(e), 360b, and 371(a))), it is proposed that Subchapter A be amended in Part 2 by adding § 2.1 to read as follows:

§ 2.1 Secretary's determination of imminent hazard.

(a) *Factors to be considered.* In determining whether an imminent hazard to health exists that requires suspension of approval of an application for a new drug, new animal drug, or animal feed bearing or containing a new animal drug, the Secretary, or in the absence of the Secretary, the officer acting as Secretary, will consider—

(1) The likelihood that, after the customary administrative process is completed, the product will be withdrawn from the market;

(2) The severity of the harm that could be caused by the product during the completion of customary administrative proceedings to withdraw the product from the market;

(3) The likelihood that the product will cause such harm while the administrative process is being completed;

(4) The risk to the health of humans or animals currently taking the product that might be occasioned by the immediate removal of the product from the market, taking into account the availability of alternatives to the product and the steps necessary for affected persons to adjust to these other alternatives; and

(5) The availability of other approaches to protect the public health.

(b) *Procedures for initiating an imminent hazard determination.* (1) The Secretary will consider whether an imminent hazard to health is posed by a new drug, new animal drug, or animal feed bearing or containing a new animal drug when any of the following occurs:

(i) The Secretary initiates such a determination;

(ii) The Commissioner of Food and Drugs requests the Secretary to make such a determination.

(iii) A citizen files a petition pursuant to paragraph (b)(2) of this section requesting such a determination.

(2) A citizen's petition to the Secretary requesting suspension of approval of an application for a new drug, new animal drug, or animal feed bearing or containing a new animal drug due to the existence of an imminent hazard to health shall—

(i) Be addressed to the Secretary;

(ii) Identify the product that the petitioner contends presents an imminent hazard to health;

(iii) State clearly the harm from use of the product in question that the petitioner believes presents an imminent hazard to health;

(iv) State in detail how each of the factors described in paragraph (a) of this section applies to the product in question;

(v) Include all data and information upon which the petitioner relies and representative data and information known to the petitioner that are unfavorable to the petition;

(vi) Include the following statement: "The undersigned certifies that, to the best of my knowledge and belief, this petition includes all data and information on which the petition relies,

and that it includes representative data and information known to the petitioner that are unfavorable to the petition";

(vii) Be signed by an individual and include that individual's mailing address and telephone number;

(viii) Be submitted to the Hearing Clerk of the Food and Drug Administration in the manner stated in § 10.20 of this chapter, except that five copies of the petition (rather than the four copies required by § 10.20) shall be submitted.

(3) In the event that a petitioner believes that an emergency exists that precludes the submission of a full petition pursuant to this section and § 10.20 of this chapter, the petitioner may request a waiver of any provision of those sections by a letter addressed to the Secretary and submitted with the petition. The Secretary will grant a waiver only in unusual circumstances.

(4) The Hearing Clerk shall file, stamp with the date of filing, and assign a docket number to any petition that appears to meet the requirements of paragraph (b)(2) of this section and the requirements of § 10.20 of this chapter. All subsequent submissions relating to the matter shall refer to the docket number and shall be filed in the administrative file. The Hearing Clerk may file together and give the same docket number to identical, similar, or related petitions. The Hearing Clerk shall promptly notify the petitioner in writing of the filing and docket number of a petition.

(5) The Hearing Clerk shall transmit, by the fastest means feasible, one copy of the petition to the office of the Secretary.

(6) The Hearing Clerk shall place the petition, together with supporting information, on public display. Any interested person may submit to the Hearing Clerk written comments on any filed petition. Those comments will become part of the administrative record.

(c) *Procedures for decision.* (1) FDA will evaluate all petitions for imminent hazard determinations and will report its evaluation to the Secretary.

(2) FDA will notify each person holding an approved application for the product and, if feasible, any other person known to FDA to have an interest in the proceeding, and will solicit their views.

(3) The Secretary will, in reaching a decision, consider information and written arguments presented by any interested person.

(4) The Secretary may, as a matter of discretion, meet with any interested person to discuss the issues raised by a

decision under this section. Any meeting with any person outside the Department which involves more than a brief description of the matter shall be summarized in a written memorandum which shall become part of the administrative record.

(5) The Secretary may, as a matter of discretion, direct that a public hearing to gather information on an imminent hazard question be held by FDA under Part 15 of this chapter.

(6) The Secretary will issue a written statement announcing the decision whether or not to suspend the approval of a product under an imminent hazard provision. The secretary will include in that written decision reference to the information upon which the Secretary relies.

(7) The administrative record for an imminent hazard decision includes any request from the Commissioner under paragraph (b)(1) of this section, any citizen's petition filed under paragraph (b)(2) of this section, the report of the FDA evaluation submitted under paragraph (c)(1) of this section, any memorandum of meeting under paragraph (c)(4) of this section, the record of any hearing held under paragraph (c)(5) of this section, the decision issued under paragraph (c)(6) of this section, and all other documents and information submitted by petitioners and by persons commenting upon the proceeding. Each document or piece of information that is to be disclosed to the public will be placed on display in the office of the Hearing Clerk, Food and Drug Administration. Any information that is not available for public disclosure under Part 20 of this chapter will be placed in the office of the Hearing Clerk, Food and Drug Administration, but will be marked "Confidential."

(8) The Secretary may, when an emergency exists, immediately suspend the approval of an application pursuant to an imminent hazard provision without awaiting the submission of information and views under paragraph (c)(3) of this section by affected persons.

(9) The Food and Drug Administration shall give prompt notice to the applicant of any determination by the Secretary that a product presents an imminent hazard and afford an opportunity for hearing on an expedited basis on the withdrawal of the product, as provided in §§ 314.115 and 514.115 of this chapter.

(d) *Suspension order.* If the Secretary suspends approval of a new drug, new animal drug, or animal feed bearing or containing a new animal drug, the Secretary, as a matter of discretion, may provide for a period of continued

distribution of the product in order to permit a safe and orderly transition of patients or animals to alternative products or forms of therapy, or for other good reason.

Interested persons may, on or before October 22, 1979, submit to FDA written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the FDA Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Note.—In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 2, 1979.

Joseph A. Califano, Jr.,

Secretary.

BILLING CODE 4110-03-M

[21 CFR Parts 2, 5, 10, 314, and 514]

[Docket No. 79N-0306]

Imminent Hazard Determinations; Separation of Functions

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing rules to govern separation of functions in withdrawal proceedings involving products for which an imminent hazard determination by the Secretary of Health, Education, and Welfare must be made. In addition, FDA proposes to revoke its criteria for making recommendations to the Secretary concerning imminent hazard determinations. The Secretary has published elsewhere in this issue of the Federal Register a proposed rule stating the criteria for imminent hazard determinations.

DATES: Comments by October 22, 1979. The effective date of the final rule based on this proposal is proposed to be 30 days after its date of publication.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Margaret Gilhooley, Office of the General Counsel, Food and Drug Division (GCF-1), Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1345.

SUPPLEMENTARY INFORMATION: The Secretary of Health, Education, and Welfare has published elsewhere in this issue of the Federal Register a proposed rule establishing the criteria and procedures for determinations by the Secretary that a new drug, new animal drug, or animal feed bearing or containing a new animal drug presents an "imminent hazard" that requires suspension of approval of the marketing application under the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 et seq.). Under the Secretary's proposal, FDA is to make a report to the Secretary concerning its evaluation of any petition requesting an imminent hazard determination, and FDA is to be available to provide advice to the Secretary on any determination. The rules proposed in this document state the separation of function requirements that FDA intends to observe in pending withdrawal proceedings concerning products that are the subject of imminent hazard determinations by the Secretary. Under proposed § 10.55(g) (21 CFR 10.55(g)), the Commissioner of Food and Drugs may consult with the responsible Bureau in formulating a report and advice to the Secretary on an imminent hazard determination. When the Commissioner has consulted with the responsible Bureau off the record, the Deputy Commissioner would be designated to make the final decision for the agency in any associated withdrawal proceeding in progress concerning the same product. If the Deputy Commissioner is not available, the Associate Commissioner for Health Affairs would make the agency decision. This procedure would ensure that the final decision in the withdrawal proceeding is made by an official who has not communicated outside the record about the same product with the agency participants in the withdrawal proceedings.

Under the act, new drugs, new animal drugs, and animal feeds bearing or containing a new animal drug can be removed from the market in two ways: by withdrawal following an opportunity for an administrative hearing, or by a suspension effective without a prior opportunity for hearing in the case of those products found by the Secretary to present an imminent hazard (21 U.S.C. 355(e), 360b(e)(1), 360b(m)(4)(A)). The

authority to conduct withdrawal proceedings has been delegated to the Commissioner (21 CFR 5.1); the authority to make imminent hazard determinations is placed by statute in the Secretary and cannot be delegated (21 U.S.C. 355(e), 360b(e)(1), and 360b(m)(4)(A)).

The FDA withdrawal proceedings are subject to separation of function rules established by statute (5 U.S.C. 554) and by FDA regulation (21 CFR 10.55). The regulation precludes communications concerning the withdrawal proceeding between the Bureau responsible for the proceeding and the representatives of the Commissioner's office who are to make the final decision for the agency. No separation of function requirements apply to imminent hazard determinations by the Secretary.

Under the Secretary's proposal, FDA is to provide an evaluation of each citizen's petition seeking an imminent hazard determination and to be available to provide advice to the Secretary on the determination. This evaluation and advice to the Secretary will generally be made for FDA by the Commissioner and the Bureau responsible for regulating the product. Due to the need for prompt action on imminent hazard determinations, and the importance of the decision both to the general public and the manufacturers and users of the product, it is essential that the FDA report to the Secretary be made on the most informed basis possible. The Bureau responsible for the regulation of the product will ordinarily have the greatest familiarity with the history of the product and expertise on the evaluation of the issues involved in the imminent hazard determination. Consequently, the Commissioner needs to be able to consult with the Bureau, to the extent necessary, in formulating FDA's report and advice to the Secretary. The proposed rules will permit the Commissioner to consult fully with the Bureau on the agency's report and advice to the Secretary on every imminent hazard determination, including determinations affecting products involved in pending withdrawal proceedings that are subject to separation of function rules.

The need to make an imminent hazard determination can arise at any time, either upon the initiative of the Secretary, a request by the Commissioner, or the petition of any interested person. If an imminent hazard proceeding commences when a withdrawal proceeding is not in progress, separation of function rules do not apply. Thus, the Commissioner can

consult freely with the Bureau in formulating a report to the Secretary and make the final decision for FDA in any withdrawal proceeding concerning the product. However, if a withdrawal proceeding has already begun, communications between the Commissioner and the responsible Bureau about the imminent hazard determination give rise to more concern. The imminent hazard determination is likely to encompass issues that correspond to those involved in the withdrawal proceeding. Indeed, one of the factors proposed by the Secretary to be considered in the imminent hazard determination is the likelihood that the application will be withdrawn at the end of the administrative proceeding.

The separation of functions requirements in the Administrative Procedure Act (APA) (5 U.S.C. 554(d)) do not preclude the Commissioner from making the decision in the withdrawal proceeding even though the Commissioner has consulted with the Bureau during the proceeding about an imminent hazard determination concerning the same product. Under comparable procedures governing pesticides, the imminent hazard determination and withdrawal have been considered "separate proceedings * * * made under different legal standards" (*Environmental Defense Fund v. EPA*, 510 F. 2d 1292, 1305 (D.C. Cir. 1975)). The court also found that "to the extent that [the proceedings] are related," the prosecuting staff in a formal proceeding may consult with the agency head about the need to initiate a new proceeding. (Ibid.) The court noted that the APA (5 U.S.C. 554(d)) "only prohibits participation or advice in the decision, recommended decision or agency review" (510 F. 2d, at 1305, n. 45; see *Environmental Defense Fund v. EPA*, 548 F. 2d 998, 1006 n. 20 (D.C. Cir. 1976), cert. denied 431 U.S. 925 (1977)).

Nonetheless, FDA is concerned with any possible perception of unfairness if the Commissioner makes the final decision in the withdrawal proceeding after having consulted with the Bureau outside the public record during the proceeding about an imminent hazard determination for the same product. The Bureau is a party to the withdrawal proceeding, and consultations off the record during the proceeding about the same product, even though for a distinct purpose, may be perceived as allowing the Bureau to make arguments about the withdrawal proceeding that the other party cannot meet, and as having an exceptional potential to influence the final decision in the withdrawal proceeding. The withdrawal proceeding

is intended to allow affected persons a full opportunity to dispute the basis for the decision to initiate the withdrawal. The initial and final decisions in the withdrawal proceeding are made by officials who act as adjudicators, and in that capacity, they thoroughly review the agency action based on the complete record developed by the parties. The Commissioner believes it desirable, to the extent possible, to minimize the risk of nonrecord communications between the final adjudicator and one of the parties that could bear upon a withdrawal proceeding in progress and to remove the perception that these communications may occur.

Furthermore, FDA also believes it is feasible to adopt an alternative procedure that will eliminate the basis for this concern. Under the proposed procedure, in these circumstances, the Commissioner will designate the Deputy Commissioner, or if not available, the Associate Commissioner for Health Affairs, to make the agency decision in the withdrawal proceeding. The Commissioner will not communicate with this official about the withdrawal proceeding or about the imminent hazard determination. Thus, under the proposal, the final agency decision in a withdrawal proceeding in progress, when an imminent hazard proceeding arises will be made by an official who has not consulted in private with the Bureau about the product in either proceeding. This proposed procedure is similar to the procedure in 21 CFR 10.55(b)(2)(i), under which special designations can be made of persons in the Bureau to advise the Commissioner's office on matters subject to separation of functions.

The members of FDA and the Office of General Counsel who advise the Deputy Commissioner with respect to the final decision in the withdrawal proceeding will be subject to similar limitations on communications from the Bureau and the Commissioner about the imminent hazard determination.

The proposed rule would apply to any withdrawal proceeding to which separation of functions have become applicable if the Commissioner decides to consult off the record with the Bureau on the imminent hazard matter. Thus, the rule precluding the Commissioner from making the final decision in the withdrawal proceeding would not be applicable if the Commissioner obtains comments from the Bureau solely through a written submission included in the record of the withdrawal proceeding or through the Bureau's participation as witness or counsel in a public proceeding, such as a public

hearing before the Commissioner on the imminent hazard determination. In these circumstances, there is no need to preclude the Commissioner from making the final decision, because any communications from the Bureau about the imminent hazard determination will be a matter of public record in the withdrawal proceeding and can be evaluated in that proceeding for its bearing on it. In addition, the Commissioner will not automatically be precluded from making the final decision in the withdrawal proceeding upon the filing of a citizen's petition seeking an imminent hazard determination, but, instead, would be precluded only when the additional determination is made that the Commissioner needs to make a nonrecord communication with the Bureau in order to advise the Secretary.

In proceedings concerning withdrawal of applications for new animal drugs and animal feeds bearing or containing a new animal drug, separation of functions applies, under the present regulations (21 CFR 10.55, 514.200), only when a notice of hearing has been issued. As stated in the Federal Register of December 19, 1978 (43 FR 59095), in practice, FDA has observed separation of functions for proposed actions concerning these applications at the same point at which separation of functions applies in withdrawal proceedings for new drug applications, i.e., publication of the notice of opportunity for hearing. FDA intends to observe the proposed rules for separation of functions concerning products subject to imminent hazard determinations at the same point in withdrawal proceedings concerning new animal drugs and animal feed as it does for new drugs.

The agency recognizes that this proposal provides a novel solution to an unusual and difficult problem, and one that may rarely occur. If the proposed procedure proves unsatisfactory or lacking in feasibility in practice, the agency will reexamine these separation of function rules, and any alternative means to satisfy the concerns discussed above.

At present, FDA has a regulation (21 CFR 2.5) that states the considerations that guide the agency in making recommendations to the Secretary concerning imminent hazard determinations. This regulation was issued in 1971, before the recent developments that permitted a fuller examination by the Secretary of the criteria for the ultimate decision. The FDA regulation does not govern the actions of the Secretary, but the

regulation has been taken into account in developing the Secretary's criteria. The Secretary's criteria and the FDA regulation differ in language but they are not at substantial variance, as stated by the court upon judicial review in *Forsham v. Califano*, 442 F. Supp. 203, 208, (D. D.C. 1977), appeal from denial of preliminary injunction dismissed as moot, No. 77-2072 (D.C. Cir. Dec. 6, 1977); dismissed as moot, No. 77-1478 (D. D.C. July 23, 1979). The FDA regulation is being withdrawn because it is unnecessary and potentially confusing to have criteria for FDA's recommendations to the Secretary separate from the criteria for the Secretary's decision.

This proposal would also make conforming changes in §§ 314.115 and 514.115 (21 CFR 314.115 and 514.115) with respect to withdrawal of applications, and include an express provision that the Commissioner shall give prompt notice and an opportunity for hearing on an expedited basis on the withdrawal of approval of any of these products found to present an imminent hazard by the Secretary.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 505(e), 512, and 701(a), 52 Stat. 1055, 76 Stat. 782 as amended, 82 Stat. 343-352 (21 U.S.C. 355(e), 360b, and 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

PART 2—GENERAL ADMINISTRATIVE RULINGS AND DECISIONS

§ 2.5 [Revoked]

1. By revoking § 2.5 *Imminent hazard to the public health*.

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

2. By adding new § 5.85, to read as follows:

§ 5.85 Imminent hazard determinations and withdrawal proceedings.

The Associate Commissioner for Health Affairs is authorized when designated by the Commissioner in accordance with § 10.55(g) of this chapter to make the final decision under § 12.130 of this chapter following a formal evidentiary public hearing for the

withdrawal of approval of an application for a new drug, new animal drug, or animal feed bearing or containing a new animal drug for which an imminent hazard determination must be made.

PART 10—ADMINISTRATIVE PRACTICES AND PROCEDURES

3. By adding a new paragraph (g) to § 10.55 to read as follows:

§ 10.55 Separation of functions; ex parte communications.

(g) Where the pendency of a formal evidentiary public hearing on the withdrawal of approval of an application for a new drug, new animal drug, or animal feed bearing or containing a new animal drug requires separation of functions under paragraph (b) or (c) of this section between the Commissioner's office and the Bureau responsible for a product for which an imminent hazard decision must be made, the Commissioner may consult the responsible Bureau in order to advise and make a report to the Secretary under § 2.1 about an imminent hazard determination. When the Commissioner requests the Bureau to consult with the Commissioner on the imminent hazard determination, other than as witness or counsel in a public proceeding or in a written submission included in the record of the withdrawal proceeding, the following procedures will be observed:

(1) The Deputy Commissioner under authority delegated in § 5.20(b) will be designated to make the final decision under § 12.130 and exercise the Commissioner's functions in the withdrawal proceeding, and a copy of the designation will be included in the record. If the Deputy Commissioner is not available, the Associate Commissioner for Health Affairs under authority delegated in § 5.85 will be designated to perform these functions subject to the same requirements that would apply to the Deputy Commissioner under this paragraph.

(2) Separation of functions will continue between the Deputy Commissioner and the Bureau with respect to the withdrawal proceeding.

(3) The Commissioner will not communicate with the Deputy Commissioner concerning the withdrawal proceeding.

(4) The Deputy Commissioner and members of FDA and the Office of General Counsel who advise and participate with the Deputy Commissioner in the final decision and the exercise of the Commissioner's

function in the withdrawal proceeding shall have no communications with the Commissioner or Bureau concerning the imminent hazard determination other than as witness or counsel in a public proceeding or in a written submission included in the record of the withdrawal proceeding.

PART 314—NEW DRUG APPLICATIONS

4. By revising § 314.115(a) and (d) to read as follows:

§ 314.115

WITHDRAWAL OF APPROVAL OF AN APPLICATION.

(a) The Secretary has suspended the approval of such application on a finding that there is an imminent hazard to the public health under the criteria and procedure in § 2.1 of this chapter; or

(d) After any summary suspension on a finding of an imminent hazard to the public health, the Commissioner shall provide prompt notice of the action and an opportunity for hearing on the withdrawal of approval under this section on an expedited basis.

PART 514—NEW ANIMAL DRUG APPLICATIONS

5. By revising § 514.115(a) to read as follows:

§ 514.115

WITHDRAWAL OF APPROVAL OF APPLICATIONS.

(a) The Secretary may suspend approval of an application approved under section 512(c) or (m)(2) of the act if the Secretary finds, under section 512(e)(1) or (m)(4)(A) of the act and the criteria and procedure in § 2.1 of this chapter that there is an imminent hazard to the health of man or of the animals for which the animal drug or animal feed is intended. The Commissioner shall provide the applicant prompt notice of the action and afford the applicant the opportunity for an expedited hearing on the withdrawal of approval of the application.

Interested persons may, on or before October 22, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading

of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 10, 1979.

Sherwin Gardner,

Acting Commissioner of Food and Drugs.

[FR Doc. 79-25813 Filed 8-20-79; 8:45 am]

BILLING CODE 4110-02-M

[21 CFR Part 74]

[Docket No. 79N-0043]

Lakes of Color Additives; Intent To List; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of Comment Period.

SUMMARY: The agency extends the comment period on its notice of intent to propose regulations concerning lakes of color additives. This action is taken in response to a request for extension of the comment period.

DATE: Comments and information by November 19, 1979.

ADDRESS: Written comments and information to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of June 22, 1979 (44 FR 36411), the Food and Drug Administration announced its intention to propose regulations concerning lakes of color additives. Interested persons were requested to submit comments and information by August 21, 1979.

On August 8, 1979, a letter was received from the Cosmetic, Toiletry and Fragrance Association, Inc. (CTFA), Washington, DC, requesting an additional 90 days, to November 19, 1979, to allow sufficient time to prepare comments to this notice of intent.

The agency believes that the extension of the comment period on this notice is appropriate, and that the

additional time should be extended to all interested persons.

Therefore, the comment period for the notice of intent to propose regulations concerning lakes of color additives is extended to November 19, 1979.

Interested persons may, on or before November 19, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments and information (preferably four copies and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding the subject notice of intent. Received comments may be seen in the Hearing Clerk's office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 15, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR PART 172]

[Docket No. 79N-0017]

Sodium Stearoyl-2-Lactylate; Proposed Revision of Food Additive Provisions; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) extends the comment period on the proposal to revise the food additive provisions for sodium stearoyl-2-lactylate. Durkee Foods, Division of SCM Corp. has requested a 90-day extension of time to complete a study on the use levels of the additive.

DATE: Written comments by September 17, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of April 20, 1979 (44 FR 23539), FDA proposed to revise § 172.846 Sodium stearoyl-2-lactylate (21 CFR 172.846) by providing for additional uses and functions, establishing tolerances for currently regulated uses, revising the name of the additive, and by

incorporating the specifications prescribed for the additive in the "Food Chemicals Codex." FDA took these actions after evaluating the available information in two petitions from a manufacturer and in light of current data and information on the additive. Interested persons were requested to submit their comments on the proposal on or before June 19, 1979.

FDA received a letter from Durkee Foods, Division of SCM Corp. The firm requested a 90-day extension of the comment period to complete a study on the use levels of sodium stearoyl-2-lactylate as an emulsifier or stabilizer in liquid and solid edible fat-water emulsions intended for use as substitutes for milk or cream in beverage coffee. Section 172.46 currently provides for the use of the additive as an emulsifier in liquid and solid edible vegetable fat-water emulsions intended for use as substitutes for milk or cream in beverage coffee with no prescribed tolerance.

FDA determined that the requested extension is warranted and is therefore extending the comment period for an additional 90 days.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 402, 409, 701, 52 Stat. 1046-1047 as amended, 1055-1056 as amended, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 342, 348, 371)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), the comment period on the April 20, 1979 proposal to revise the provisions for sodium stearoyl-2-lactylate is extended to close of business September 17, 1979.

Interested persons may, on or before September 17, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 14, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

Procedural Regulations

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Equal Employment Opportunity Commission is publishing its proposed revisions to its procedural regulations for notice and comment by the public. The procedural regulations § 1601.70 and § 1601.71 currently provide that the Commission shall designate 706 deferral agencies only when notified of their qualifications under section 706(c) of Title VII and after meeting the strict requirements outlined in § 1601.70. The Commission is amending its procedural regulations to provide for the deferral of charges of all agencies that meet the less stringent requirements of the revised § 1601.70.

DATES: Comments on the proposed regulations must be received within 60 days of the date of the publication of this notice. The Commission proposes to consider the submissions for a period of at least ten days and thereafter to adopt final regulations.

ADDRESSES: Interested persons are invited to submit written comments regarding the proposed revisions to Marie Wilson, Executive Secretariat, Equal Employment Opportunity Commission, 2401 E Street, N.W., Washington, D.C. 20506. Copies of the comments submitted by the public will be available for review at the Social Sciences Library, Room 2003, EEOC, 2401 E Street, N.W., Washington, D.C. 20506, between the hours of 9:30 A.M. and 5:00 P.M.

FOR FURTHER INFORMATION CONTACT: Constance L. Dupre, Associate General Counsel, EEOC, 2401 E Street, N.W., Washington, D.C. 20506, Telephone (202) 634-6595.

SUPPLEMENTARY INFORMATION: The Equal Employment Opportunity Commission published its procedural regulations on September 22, 1977, as amended October 14, 1977 (42 F.R. 55388). Sections 1601.71 set forth the procedures by which the Commission designates a State or local fair employment practice agency as a deferral agency under Section 706(c) of Title VII. The regulations currently provide that only those agencies which notify the Commission of their qualifications under section 706(c) of Title VII and section 1601.70 and request designation as a "706 agency" will be

eligible for such designation. The regulations also require the establishment of an agency to process charges filed under the State fair employment practice law.

However, due to the *en banc* decision of the U.S. Court of Appeals for the Fifth Circuit in the case of *White v. Dallas Independent School District*, 581 F.2d 556 (5th Cir. 1978), the Commission has voted to revise Commission regulations § 1601.70 and § 1601.71 to conform with that decision.

The *White* decision held that all charges against employers must be deferred in jurisdictions where there are provisions for the enforcement of laws prohibiting discrimination in employment. Enforcement may include criminal penalties for violations. Also, because of the *White* decision, the performance and decertification standards of § 1601.72 are no longer applicable and therefore, § 1601.72 is revoked and reserved.

Revised § 1601.70 continues to request certain materials and information from an agency for designation as a 706 agency. However, § 1601.70 is amended to allow for the deferral of charges to a qualified agency or authority even though the agency authority has made no request for 706 designation.

Revised § 1601.70 is also amended to allow for the deferral of charges to a newly established State or local authority or an already existing State or local authority empowered to address employment practices found to be unlawful. Revised § 1601.71 is amended to conform with the changes made to § 1601.70. In addition, based on the *White* decision, there is no requirement for publishing in the Federal Register for notice and comment the Commission's designation of a 706 agency; therefore, revised § 1601.71 includes no provision for notice and comment. The proposed regulation authorizes the State and Local Division, Office of Field Services, in consultation with the Legal Counsel Division, Office of General Counsel, to ascertain that an agency qualifies under § 706(c) of Title VII and § 1601.70 and to publish notification in the Federal Register as an amendment to § 1601.74. The proposed revised regulations appear below.

Signed at Washington, DC, this 26th day of July, 1979.

For The Commission.

Eleanor Holmes Norton,

Chair, Equal Employment Opportunity Commission.

In 29 CFR Part 1601, §§ 1601.70 and 1601.71 are revised to read as follows:

§ 1601.70 706 Agency qualifications.

(a) State and local fair employment practice agencies or authorities which qualify under section 706(c) of Title VII and this section shall be designated as "706 Agencies." The qualifications for designation under section 706(c) are as follows:

- (1) That the State or political subdivision has a fair employment practice law which makes unlawful employment practices based upon race, color, religion, sex or national origin; and
 - (2) That the State or political subdivision has either established a state or local authority or authorized an existing state or local authority that is empowered, with respect to employment practices found to be unlawful, to do one of three things: to grant relief from the practice; to seek relief from the practice; or to institute criminal proceedings with respect to the practice.
- (b) Any State or local agency or authority seeking 706 designation should submit a written request to the Director, State and Local Division, Office of Field Services. However, if the Commission is aware that an agency or authority meets the above criteria for 706 designation, the Commission may defer charges to such agency or authority even though no request for 706 designation has been made.

(c) A request for 706 designation should include a copy of the agency's fair employment practices law and any rules, regulations and guidelines of general interpretation issued pursuant thereto. Submission of such data will allow the Commission to ascertain which employment practices are made unlawful and which bases are covered by the State or local entity. Agencies or authorities are requested, but not required, to provide the following helpful information:

- (1) A chart of the organization of the agency or authority responsible for administering and enforcing said law.
- (2) The amount of funds made available to or allocated by the agency or authority of fair employment purposes.
- (3) The identity and telephone number of the agency (authority) representative whom the Commission may contact with reference to any legal or other questions that may arise regarding designation.
- (4) A detailed statement as to how the agency or authority meets the qualifications of subsection (a) (1) and (2) of § 1601.70.
- (d) Where both State and local 706 Agencies exist, the Commission reserves the right to defer to the State 706 Agency only. However, if the Commission

determines that it would best serve the purposes of the Act, it may defer to either or both State and local 706 Agencies.

§ 1601.71 706 Agency notification.

(1) When the State and Local Division, Office of Field Services (OFS) determines that an agency meets the criteria outlined in § 706(c) of Title VII and § 1601.70, it shall so notify the agency by letter and shall notify the public by publication in the Federal Register of an amendment to 1601.74.

(2) Where the State and Local Division, OFS, determines that a State or Local agency or authority does not come within the definition of a 706 Agency for purposes of a particular basis of discrimination or where the agency or authority applies for designation as a Notice Agency, the State and Local Division, OFS, shall notify that agency or authority of the filing of charges for which the agency is not a 706 Agency. For such purposes that State or local agency will be deemed a Notice Agency.

§§ 1601.72 and 1601.73 [Reserved]

2. In 29 CFR part 1601, sections 1601.72 and 1601.73 are revoked and reserved.

FEDERAL COMMUNICATIONS COMMISSION**[47 CFR Part 31]****[CC Docket No. 79-105; FCC 79-263]****Accounting for Station Connections, Optional Payment Plan, Revenues, and Related Capital Costs, Customer Provided Equipment and Sale of Terminal Equipment**

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Communications Commission is proposing amendments to the present uniform system of accounts to provide accounting procedures for, (1) expensing station connection costs, (2) the sale of terminal equipment and the repair of customer provided terminal equipment, and (3) capital recovery of terminals offered under optional payment plan tariffs. This notice is issued to implement a Commission decision that the present accounting system should be modified so as to place the burden of all costs associated with station connections on the causative ratepayer as opposed to the present system which places the burden on present and future ratepayers.

DATES: Comments must be received before October 9, 1979, and Reply comments must be received before November 12, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.
FOR FURTHER INFORMATION CONTACT: Sanford Margolin, Accounting Branch, Accounting and Audits Division, Common Carrier Bureau, (202) 632-3863.

Adopted: August 10, 1979.
Released: August 14, 1979.

In the matter of Amendment of Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, of the Commission's Rules and Regulations with respect to accounting for station connections, optional payment plan revenues and related capital costs, customer provided equipment and sale of terminal equipment, CG Docket No. 79-105, RM-3017.

1. On November 16, 1977, the American Telephone and Telegraph

Company and the associated Bell System operating companies, (AT&T) filed a petition for rulemaking (RM 3017) requesting amendment of the uniform system of accounts to provide for expensing certain station connection costs currently capitalized in account 232, "Station Connections." AT&T's petition results from the Commission's Phase II Final Decision and Order in Docket No. 19129, 64 FCC 2d 1 (1977) (Phase II Order), wherein it held that the present accounting system should be modified so as to place the burden of all costs associated with station connections on the causative ratepayer as opposed to the present system which places the burden on present and future ratepayers. To accomplish this, AT&T was ordered to submit a proposal to change the accounting for station connections.

The station connection activities involved are: 1. Assignment, testing, and plant clerical. 2. Travel time of the craftsman to and from the customer's location. 3. Motor vehicle and tool use. 4. Apparatus handling (unpacking, connecting, etc.). 5. Inside wiring to all stations. 6. Drop wire, and protector. 7. Other (e.g., engineering, contractor charges).

AT&T's proposal only provided for the partial expensing (charged to the current accounting year instead of being deferred or capitalized over a longer period) for certain of the costs involved in an initial installation of telecommunications service at a location, currently capitalized to account 232. The costs to be expensed which are mentioned above are those associated with reconnections, reconnections and extensions, as well as a number of miscellaneous costs in connection with initial main installations. They are considered by AT&T as not reusable by subsequent customers at a location, and include such activities as assignment, testing, and apparatus handling. The costs to be changed from capitalization to expense would be phased-in over a four year period. The costs to the initial installation of the drop wire, protector and inside wiring to the main station in the AT&T proposal¹ would continue to

¹ We understand that main stations are synonymous with main telephones recognized by the telephone industry as telephones connected by individual or party line circuits directly to a central office switchboard or toll board. Only one telephone for each central office line is classified as main, subsidiary telephones connected to the same line are classified as extension. In key systems served exclusively by central office lines, the telephones up to the number of lines are classified as main, telephones in excess of the number of lines are classified as extension. A call director connected to

be capitalized to account 232. Further, the total embedded investment in account 232 would be separated into two parts. The first would include past costs of the type which would continue to be capitalized. These amounts (and corresponding additions to accounts 232 with respect to initial main installations) would be depreciated over the expected life of the plant.² The second part would include embedded costs (plus corresponding additions prior to change in treatment during the phase-in period) of the type to be expensed under the plan. These amounts would be amortized in equal amounts over a ten-year period. A more detailed discussion of the accounting proposed by AT&T is contained in appendix A of its petition.

2. The rationale behind AT&T's proposal is that the first installation of a main station at a location adds an availability for a customer to access the network. This installation is of value not only to the new subscriber at that location but also to all other subscribers since the value of their service depends on the number of subscribers who can call or be called. On the other hand, in AT&T's view, a reconnection, reinstallation or extension does not represent additional availability of access to the network (even though a reconnection or reinstallation does increase the number of customers on the network); whatever costs are incurred in providing it may, therefore, be more closely associated with the causative subscriber. Extensions represent even more of the individualized wants of subscribers, for which cost-causative pricing will be responsive. For the above reason, AT&T's proposal distinguishes

an individual or party line circuit is classified as a main telephone.

² AT&T requests in its petition that Equal Life Group (ELG) depreciation procedures proposed in Docket 20188 also be made applicable to additions to account 232 when such procedures are made applicable to accounts 231, "Station apparatus," and 234 "Large private branch exchanges," or upon approval of the accounting changes requested in its petition, whichever occurs later. AT&T also indicates that adoption of its proposed accounting would lead to significant changes in the life characteristics of station connections remaining in account 232 and requests prompt approval upon application of individual companies of revised depreciation rates for account 232. Neither of these requests shall be addressed in this proceeding. Docket 20188 is the appropriate proceeding to address the application of ELG depreciation to additions to the station connections account. The individual company depreciation rate prescription procedures would be the suitable vehicles in which to address any changes in the life characteristics of the investment that will remain in account 232 on a company-by-company basis. In addition, the proposed starting reserve balance, implied to be zero, will also have to be addressed at that time. We do address herein the issue of depreciation rates for station apparatus provided under optional payment plans (two-tier pricing).

between capitalized main costs and expensed supplemental costs. It is AT&T's position that in the sense of a continuing, revenue-generating availability to provide telephone service, the drop wire, protector and inside wiring for the main station on individual line service cannot be distinguished from the pair of wires leading through multiple customers at the location, servicing them, in turn, as they change. A clear and pragmatic line can be drawn, it is claimed, between the costs of installing main telecommunications service for the first time at a location, and the other costs now included in account 232.

3. In our Phase II Order, which concurred with the Presiding Judge's Initial Decision (paras. 135-139, and 705-722, respectively), the principle was established that the causative ratepayer should bear the full burden of the costs of station connections. That principle was held to be consistent with other policies that have been recently adopted (para. 137). Additionally, we found in rejecting the primary instrument concept petition that there is no valid basis for distinguishing between main stations and other extensions. In fact, the comments of the New York Public Service Commission which were directed towards AT&T's petition stated that adequate access to the network can be attained at a junction point other than at a main station. Therefore, to be compatible with our previous policies, we must reject AT&T's proposal and substitute our own proposed amendment to the present account Rules and Regulations.

4. In our Notice of Proposed Rulemaking issued in Docket CC 78-196 (paragraph 59), we invited general comments on the need for new or amended accounting rules because of the changed operating environment resulting from the equipment registration program. In this proceeding, we are proposing accounting rule changes to provide for several such items and request specific comment thereon. In commenting in this proceeding, interested parties may reference their comments prepared for submittal in Docket CC 78-196 so that they may be considered in addition to any additional comments submitted on our specific proposals. We note our findings in Docket 78-36 wherein we rejected the telephone industry's primary instrument concept and stressed the importance of allowing telephone customers the option to select terminal equipment and repair service which they think most beneficial. Therefore, we believe our final rules will have to be expanded to

provide appropriate accounting for the several optional station connection offerings that will be available to telephone company customers, including the sale of inside wiring, a practice already authorized by the New York Commission and favored by the Utah Commission in its comments to AT&T's petition.

5. We propose expensing the entire cost of station connections, which would include the drop and block wire, underground service wire, protector, and all inside wiring presently recorded in account 232. These costs would now be charged to expense account 605, "Repair of station equipment." This accounting change should permit the telephone carriers to recover from the causative ratepayer, the full burden of the costs of station connections, rather than recovering their costs from the general body of ratepayers, as is presently done. Changes to the applicable sections of Part 31 to accomplish this accounting are set forth in the Appendix.

6. Comments are invited on how to account for the several optional station connection offerings including the sale of either the entire connection, or only the inside wiring. How should we differentiate between the sale of in-place connections versus the sale of new installations? We also invite comments on:

(1) Whether the change in accounting should be phased in over a determinate period, or become effective with the final rulemaking.

(2) Should station connection activity be recorded in separate subaccounts of account 605, for residence, business, etc. and by type of service, i.e., main extension, vertical type of equipment, etc.

(3) What methods and/or treatment would be appropriate to dispose of the present balance in account 232, and the related theoretical depreciation reserve, if any?

If time periods are suggested for a phase-in period and the disposition of present embedded investment, a full showing of the impact upon revenue requirements should be submitted. If new accounts or sections are suggested, the proper definition, contents, and required changes to other affected sections of Part 31, should be included with the response.

7. We are also inviting specific comments on the appropriateness of the currently prescribed accounting for the costs of replacing aerial drop wire with buried or underground drop wire where service discontinuance is not involved. At present, and as continued in this Notice, these costs are required to be

charged to expense account 605. In the case of extensive replacements a company may request permission to defer these costs in account 138, "Extraordinary maintenance and retirements," with subsequent amortization to account 605 over some reasonable future period. At the time these requirements were established, the Commission called attention to this accounting anomaly and indicated that it might well be that the replacement of an entire station connection assembly should be treated as a plant retirement and an installation of a new unit of plant. However, because of the infrequency of an entire station connection being replaced under such circumstances and the advantage of simplicity in the reporting of plant work and changes, expense accounting for these replacements was adopted. We are aware that several state commissions have allowed, on a case-by-case basis, the capitalization of station connections installed in conversion from aerial to buried plant and at least one state commission has formally recognized the need for capitalization of replacements of the drop portion of station connections by amending its prescribed system of accounts accordingly. Therefore, we invite comments on whether expense accounting for changing drop and block wires should continue to be prescribed or whether provision should be made for capitalization and retirement accounting only under certain conditions. Comments should address the frequency of these occurrences in relation to the additional reporting of plant and work changes required for capitalization and retirement accounting versus expense accounting. In other words, has today's situation changed sufficiently from that upon which the Commission based its adoption of expense accounting to warrant a change in our accounting requirements? Parties that think a change is warranted should submit suggested revised language to Part 31 and should comment on the conditions under which capitalization and retirement accounting should be allowed.

8. As stated earlier, we are also proposing to amend Part 31 to provide appropriate accounting for several areas relating to terminal equipment offerings. Among these is the accounting to be performed for two-tier and other customer optional payment plan revenues and related capital costs. Two-tier and other optional payment plan tariffs offered for the provision of PBX and other terminal equipment services provide for one level of rates to apply

during an initial period with a lower level to apply after the initial period. The rates reflected in this tariff structure provide for the recovery of substantially all of the capital costs of the asset during the initial period of higher rates and are required to be recorded as revenue under Part 31. Because the period of capital recovery is less than the useful life of the asset during the early stages of the installation life, but depreciation thereon under Part 31 is recorded for some time beyond this initial period, a mismatch of revenue and expense occurs. In order that the accounting performed for these transactions accurately reflects the economic consequences of these tariffs, we are proposing amendments to Part 31 to: (1) Remove the investment in terminal equipment used in the provision of offerings covered by two-tier and other optional payment plan tariffs from the existing depreciation categories; (2) require this investment to be maintained separately; and (3) require that depreciation of this investment be recorded in line with actual capital recovery. Appropriate changes to the applicable sections of Part 31 to accomplish this accounting are set forth in the Appendix. Specific comments are invited on the accounting procedures required to safeguard against additional recovery of investment in this equipment from the general body of ratepayers in those instances where an item, the cost of which has been fully recovered, is used again in the provision of service. Because the actual recovery period is a matter of tariff, different PBX's installed at different dates may have different recovery periods if the tariffs have changed. Therefore, PBX's and other equipment offered under 2 part tariffs should be subject to unit plan amortization with individually kept reserves (since the matching of revenues and expense will be different for each amortization period, requiring many classes of plant, each with its own reserve). The initial amount of the reserve for plant in service will be determined by adding the debits and credits of the existing group plan, as if it were a unit plan, and transferring that amount from the group reserve to the unit reserve.

9. In 1978, telephone companies subject to Part 31 and required to report to this Commission were instructed to follow the current provisions of § 31.605(a) of Part 31 in accounting for the replacement of telephone company provided stations (TPE) with customer provided stations (CPE) when the station connections serving the CPE

continue to generate revenue, i.e., service discontinuance is not involved. Thereunder, account 605 would be charged for the costs of activities involved in removing the TPE, installing jacks, and related travel costs. Further, since this accounting would not result in retirements of station connections when the TPE is removed, the total number of station connections (TPE plus CPE) had to be considered in developing retirement unit costs for account 232. In our instructions to the companies, we noted that these matters would be addressed in a rulemaking proceeding, and that among the areas that must be reviewed is the disparate treatment of costs and revenues under currently applicable local tariffs in those instances where jacks are installed as part of the replacement effort as compared with those instances where jacks are already installed and a visit is made to remove the TPE only. In the first instance, an attempt is being made to match revenues and costs and to charge the causative ratepayer for these costs. However, in the second instance, the cost of the visit is spread to all ratepayers and not specifically to the cost causing customer. Under our present proposal, we no longer need to develop retirement unit costs for account 232, nor do we have the problem of disparate treatment of costs-revenues since the cost of the visit will no longer be distributed amongst all ratepayers. But, we invite specific comments on the accounting treatment to be prescribed for the visit to remove the TPE only in the instance when jacks are already installed.

10. Lastly, we are proposing amendments to Part 31 to address the sale of telephone sets and inside wire and the provision of repair service on customer provided equipment. The present provisions of Part 31 provide for cradle-to-grave accounting for telephone sets included in account 231, "Station apparatus." This means that equipment is included in this account from the date of purchase until its final disposition. Effectively, movement out of and back into service during its life is ignored for purposes of plant investment accounting. Section 31.171(b) of Part 31 treats proceeds from the sale of telephone equipment sold without traffic as salvage, therefore, no gains or losses are recognized in the income accounts. Section 31.2-25(g), however, treats gains or losses on items of plant sold with traffic as extraordinary income. Sales of telephone sets could involve any of three situations: (1) Sets in place at customers' premises; (2) reconditioned sets; and (3) new sets. Present

accounting rules do not provide a means to view the separate financial impact of realized gains or losses if telephone companies decide to sell station apparatus. In formulating our proposal, we are mindful of our decision in Docket 19129 wherein we ruled that all gains or losses realized from property sold from or previously included in a rate base account shall accrue to the ratepayers, and our decision regarding the primary instrument concept wherein we stated that the provision of terminals is not required to be a common carrier service. Accordingly, we are proposing that sales of new telephone sets, decorator housings, new station connections, and the provision of repair service on customer provided equipment shall be accounted for as non-telephone operations. It is proposed that separate subaccounts of account 122, "Material and supplies," be established to record the cost of merchandise held for sale or for use in repair service on customer provided equipment. In addition, we are expanding account 316, "Miscellaneous income," so that revenues and expenses associated with these operations will be separately accounted for. For sets, connections or inside wiring sold in place we are establishing separate subaccounts of accounts 675, "Other expenses," and 526, "Other operating revenues," to record the effects of these transactions as telephone operations. We solicit specific comments relating to the costing procedures to be used to ensure that both the direct and overhead costs of equipment sold, as well as, repair charges, are borne by the causative ratepayer. We are especially concerned that: (1) No costs properly associable with the sales or repair operations shall be borne by subscribers who continue to lease their equipment; and (2) sales operations costs not directly assignable to either telephone or non-telephone operations are equitably apportioned between them. We also solicit comments on the appropriate accounting to follow for the sale of reconditioned telephone sets. We propose that for used telephones, drop and block wire and protector and inside wiring the average cost per telephone or per jack be subtracted from plant; average depreciation reserve per telephone (calculated by adding debits and credits year by year) be subtracted from reserve; and the net amount so calculated be used as the cost.

11. The Commission proposes to make any rule amendments adopted as a result of this proceeding effective not less than six months after the issuance of a final order with respect to this docket, as required by Section 220(g) of

the Communications Act of 1934, as amended, 47 U.S.C. 220(g). As a practical matter and in order to avoid making substantive changes in accounting during the year, it is planned that any rule amendments adopted would be made effective as of January 1 of the first full calendar year beginning not less than six months after the issuance of a final order in this docket with the option that those telephone companies which desire to do so may place any amendments which may be adopted in this proceeding into effect retroactively to January 1 of the year in which the final order is issued.

12. This Notice of Proposed Rulemaking is issued under authority contained in Sections 4(i), 4(j), and 220 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), and 220.

13. In accordance with applicable procedures set forth in 47 CFR 1.415, interested persons may file comments on or before October 9, 1979 and reply comments on or before November 12, 1979.

14. In accordance with the provisions of § 1.419 of the Commission's rules, 47 CFR 1.419, an original and 5 copies of all statements or briefs shall be furnished to the Commission. Responses filed in this proceeding will be available for public inspection during regular business hours in the Commission's Broadcast and Dockets Reference Room.

Federal Communications Commission.
William J. Tricarico,
Secretary.

Appendix

Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, is amended as follows:

1. In the Table of Contents, under Telephone Plant accounts, delete § 31.232 Station Connections.

Telephone Plant Accounts

• • • • •
31.232 Station connections. [Deleted]

§§ 31.01-3, 31.02-80 and 31.02-81 [Amended]

2. Add at the end of §§ 31.01-3(n), 31.02-80(a) and 31.02-81(a) the words (Note exception in § 31.02-82(b) for plant used in the provision of PBX and other terminal equipment services under optional payment plan tariffs).

§ 31.01-3 [Amended]

3. Delete from paragraph(s) of § 31.01-3 the words "station connections". Paragraph(s), as amended, will read:

• • • • •

(s) "Minor items," as applied to depreciable telephone plant, means any part or element of such plant, other than station apparatus, which is not designated as a retirement unit in section § 31.8.

4. Delete from paragraph (ee) of § 31.01-3 the colon, item (1) following the colon, and the designation "(2)". Delete also the words "value" and "for other telephone plant" at the end of the paragraph. Paragraph (ee), as amended, will read:

(ee) "Service value" means the difference between the original cost and the net salvage as defined in paragraph (u) of this section.

5. Delete the last two sentences of paragraph (c) § 31.02-80, and substitute the words "(See account 605 for the accounting for costs incurred in the disconnection and removal of station apparatus.)" Paragraph (c), as amended, will read:

§ 31.02-80 Computation of depreciation rates.

(c) The company shall keep such records of property and property retirements as will reflect the service life of property which has been retired, or will permit the determination of service-life indications by mortality, turnover, or other appropriate methods, and also such records as will reflect the percentage of salvage value, or net salvage value, as appropriate, for property retired from each class of depreciable telephone plant. (See account 605 for the accounting for costs incurred in the disconnection and removal of station apparatus.)

6. In § 31.02-82, designate the present paragraph as (a), add a new paragraph (b), and delete the item "Station connections" in the list of classes of depreciable plant in paragraph (a). Make the existing note "Note A" and add a new "Note B". Section 31.02-82 as amended, will read:

§ 31.02-82 Classes of depreciable telephone plant.

(a) The classes of depreciable telephone plant and the accounts covering such plant are as follows:

Buildings (account 212).
Central office equipment (account 221).
Station apparatus (account 231).
Large private branch exchanges (account 234).
Pole lines (account 241).
Aerial cable (account 242:1).
Underground cable (account 242:2).
Buried cable (account 242:3).

Submarine cable (account 242:4).
Aerial wire (account 243).
Underground conduit (account 244).
Furniture and office equipment (account 261).
Vehicles and other work equipment (account 264).

(b) The investment in plant used in the provision of PBX and other terminal equipment services under optional payment plan tariffs shall be recorded in separate subaccounts of the accounts listed in paragraph (a) of this section for each unit of such plant installed. Depreciation of this investment shall be recorded in line with actual capital recovery by utilizing separate subaccounts of accounts 608, "Depreciation," and 171, "Depreciation reserve."

Note A.—When depreciable plant carried in account 276, "Telephone plant acquired," is distributed to the appropriate plant accounts, adjusting entries shall be made covering the depreciation charges applicable to such plant for the period during which it was carried in account 276.

Note B.—Plant held in separate subaccounts pursuant to paragraph (b) above will be subject to special unit plan depreciation in which the depreciable life will be considered to be the same as the capital recovery period. Initial amounts in the depreciation reserve for such plant will be computed using the actual full embedded cost of the particular retirement units and applying to the plant, for each year it has been in service, the depreciation rate appropriate to that class of plant in that year. Such amounts will then be transferred from the overall general plant asset and reserve accounts (231, 234 and 171) to the special subaccounts for these accounts for plant offered under optional payment plans. Such plant will also be omitted from all longevity studies for the classes of plant in question. It is expressly intended that the depreciable life of each unit of plant be that of the capital recovery period of the particular optional payment plan under which it is offered, which may vary from unit to unit according to the length of the recovery period in tariffs in force in particular years, and, at the time of the imposition of this rule, the number of years remaining in the optional payment period of the plant transferred from group to unit plant depreciation.

7. Delete from paragraph (a) of § 31.100:2 the words "station connections". Paragraph (a), as amended, will read:

§ 31.100:2 Telephone plant under construction.

(a) This account shall include the original cost of construction of telephone plant, other than station apparatus, that is not completed ready for service. It shall include interest during construction, as provided for in paragraph (d) of this section, taxes during construction, and all other

elements of cost of such construction work. (Note also §§ 31.2-20 to 31.2-22 and account 231).

8*. Amend § 31.122 as follows:

Add a new paragraph (b) and redesignate present paragraphs (b), (c), and (d) as (c), (d), and (e). Paragraph (b) will read:

§ 31.122 Material and supplies.

(b) This account shall also include the cost of terminal station equipment held for resale and the cost of material and supplies held for use in the provision of repair service on customer provided equipment. These costs shall be maintained in separate subaccounts and shall include applicable transportation charges, sales and use taxes, cash and other purchase discounts. Inventory shortages and overages shall be charged and credited, respectively to account 316.

Note D to § 31.122 [Amended]

9. Add the words (See paragraph (b) of this section for specific requirements for terminal station equipment held for resale and material and supplies held for use in the provision of repair service on customer provided equipment) at the end of Note D.

10. Delete from paragraph (b) of § 31.138, the words, "inside wires, and drop and block wires," and the words, "or wires" from paragraph (c). Paragraphs (b) as amended, will read:

§ 31.138 Extraordinary maintenance and retirements.

(b) This account shall include also the cost of extensive replacements of station apparatus, in accordance with the provisions of § 31.6-64. (Note also account 605).

(c) Charges provided in paragraphs (a) and (b) of this section shall be included in this account only after permission of this Commission has been obtained. The company's application to this Commission for such permission shall give full particulars concerning the property retired or of the extensive replacements of apparatus, the amounts chargeable to operating expenses, and the period over which in its judgement the amount of such charges should be distributed.

11. Delete from paragraph (b) of § 31.171 the words "station connections." Paragraph (b), as amended, will read:

§ 31.171 Depreciation reserved

(b) At the time of retirement of depreciable telephone plant, this account shall be charged with the original cost of the property retired plus the cost of removal and shall be credited with the salvage value and insurance recovered, if any. (With respect to entries relating to station apparatus, see account 231). This account shall also be credited with amounts chargeable to account 138, "Extraordinary maintenance and retirements," as provided in § 31.02-83, and with amounts charged to account 609, "Extraordinary retirements," as provided in paragraph (b) thereof. (Note also § 31.2-25.)

§ 31.2-20 [Amended]

12. Add at the end of paragraph (a) of § 31.2-20 the words "(See accounts 316 and 605 for the cost of installing or connecting station apparatus and station wiring and cabling, drop and block wires and of underground service wires)". Paragraph (a), as amended, will read:

(a) The telephone plant accounts (201 to 231 and 234 to 277, inclusive) are designed to show the original cost of the company's telephone plant which ordinarily has a service life of more than 1 year, including such plant whether used by the company or others in telephone service; also the original cost of franchises, patents, leaseholds and other interests in land. They shall also include the general expenses of organization of the accounting company. (See accounts 316 and 605 for the cost of installing or connecting station apparatus and station wiring and cabling, drop and block wires and of underground service wires.)

§ 31.2-20 [Amended]

13. Amend the reference in paragraph (b) of § 31.2-20 to include paragraph (1) in addition to paragraph (2) of § 31.5-50 (b). Paragraph (b), as amended, will read:

(b) The telephone plant accounts shall not include the cost or other value of telephone plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of telephone plant shall be credited to the accounts charged with the cost of such construction. Amounts of initial non-recurring charges based on the cost of plant or equipment furnished in rendering service to a customer, other than as provided in § 31.5-50 (b) (1) and (2), shall be credited to the accounts

charged with the cost of the plant or equipment. Amounts of initial charges based on the estimated cost of removal of such plant or equipment shall be credited to account 171, "Depreciation reserve." Amounts received for construction which are ultimately to be repaid wholly or in part, shall be credited to account 174; when final determination has been made as to the amount to be returned, any unrefunded amounts shall be credited to the accounts charged with the cost of such construction. Amounts received for the construction of plant, the ownership of which rests with or will revert to others, shall be credited to the accounts charged with the cost of such construction.

14. In paragraph (a) of § 31.2-25, delete the words, "account 232" in the parenthetical exception. The first sentence of paragraph (a), as amended, will read:

§ 31.2-25 Retirement units.

(a) To the end that the telephone plant accounts (note §§ 31.2-20 and 31.2-21) shall at all times disclose the original cost of all property in service, the original cost of retired property, whether replaced or not (except as provided in paragraph (b)(2) of this section and in account 231), shall be credited to the account or accounts in this classification to which such cost was charged.

15. In Paragraph (b)(2) of § 31.2-25 delete the words "station connections". The first sentence of paragraph (b)(2), as amended will read:

(2) Minor items: This group includes any part or element of plant, other than station apparatus which is not designated as a retirement unit.

16. In paragraph (b)(3) of § 31.2-25 delete the parenthetical note at the end. Paragraph (b)(3), as amended, will read:

(3) Station apparatus: The accounting to be performed upon the disposition of station apparatus shall be as provided in account 231.

(4) [Deleted]

17. Delete paragraph (b)(4) of § 31.2-25.

18. In paragraph (e) of § 31.2-25, delete the words "station connections". Paragraph (e), as amended, will read:

(e) Determination of the cost of property to be retired: The cost of telephone plant retired shall be the amount at which such property is included in the telephone plant accounts. When it is impracticable to determine the cost of each item due to the relatively large number or small cost of such items, the average cost of all the items covered by an appropriate subdivision of the account shall be used in determining the cost to be assigned to such items when retired: *Provided*, That the method used in determining average cost gives due regard to the quantity, size and kind of items, the area in which they were installed and their classification in other respects, as called for by the rules of the Commission regarding continuing property records and by the system of continuing property records accepted by the Commission specifically for use of the accounting company. This method of average cost may be applied in retirement of such items as telephones, poles, wire, cable, cable terminals, conduit, small private branch exchanges, and booths. Any company may use average cost of property installed in a year or band of years. It should be understood however, that the use of average costs shall not relieve the company of the requirement for maintaining its continuing property records in such manner as to show, where practicable, dates of installation and removal so as to provide these data for purposes of mortality studies.

19. Amend § 31.231 as follows:
Add the words, "except for items purchased for resale," following the word "thereto", in paragraph (a). Paragraph (a), as amended, will read:

§ 31.231 Station apparatus.

(a) This account shall include the original cost of station apparatus, including small private branch exchanges and booths, installed either for customers' or the company's use. This account shall also include the cost of materials in stock which are normally used as station apparatus or additions thereto, except for items purchased for resale, as distinguished from items normally used for repair purposes. Items included in this account which are normally used as station apparatus shall remain herein until finally disposed of or until used in such manner as to be includible in other accounts.

Delete Note A and substitute the following:

Note A.—The cost of installing and connecting station apparatus shall be charged to account 605, "Repairs of station equipment", if for telephone company ownership, or to account 316, "Miscellaneous income," if for customer ownership.

Add a new Note F to read:

Note F.—Items provided under optional payment plan tariffs will be subject to unit plan depreciation and a separate subaccount must be maintained for them, using actual (not average) embedded costs.

§ 31.232 [Deleted]

20. Delete § 31.232.

§ 31.234 [Amended]

21. In § 31.234 add a new Note D to read:

Note D.—Items provided under optional payment plan tariffs will be subject to unit plan depreciation and a separate subaccount must be maintained for them, using actual embedded costs.

§ 31.242.1 [Note A Amended]

22. Delete from Note A of § 31.242.1 the words "which are included in account 232", and "which are included in account 232 or account 234, as appropriate". At the end of Note A, add the words "(See accounts 234, 316, and 605). Note A, as amended, will read:

Note A.—House cables are considered to be extensions of aerial cable plant. They do not include the inside wires extending from terminal boxes of house cables to subscribers' stations or the cables for subscribers' private branch exchange switchboards. (See accounts 234, 316, and 605).

§ 31.242.2 [Note B Amended]

23. At the end of Note B of § 31.242.2 add the words "account 316 or account 605 as provided for in §§ 31.316 and 31.605". Note B, as amended, will read:

Note B.—The cost of small cables used in station installations or as drop wires shall be charged to account 316 or account 605 as provided for in §§ 31.316, and 31.605.

§ 31.242.2 [Note D Amended]

24. Delete from Note D of § 31.242.2 the words "which are included in account 232", and "which are included in account 232 or account 234, as appropriate". At the end of Note D, add the words "(See accounts 234, 316 and 605.)" Note D, as amended will read:

Note D.—House cables are considered to be extensions of aerial cable plant. They do not include the inside wires extending from terminal boxes of house cables to subscribers' stations or the cables for subscribers' private branch exchange switchboards. (See accounts 234, 316 and 605.)

§ 31.243 [Amended]

25. Delete the Note of § 31.243 and substitute the following:

Note.—The cost of drop and block wires shall be included in account 605.

§ 31.244 [Note B Amended]

25a. Delete from Note B of § 31.244 the words "shall be included in account 232", and substitute "shall be charged to account 605 as provided for in § 31.605, if for telephone company ownership, and to account 316, as provided in § 31.316 if for customer ownership." Note B, as amended, will read:

Note B.—The cost of pipes or other protective covering for underground drop and block wires or service connections shall be charged to account 605 as provided for in section 31.605 if for telephone company ownership, and to account 316 as provided in § 31.316 if for customer ownership.

26. Section 31.316 is revised to read as follows:

§ 31.316 Miscellaneous income.

(a) This account shall include in separate subaccounts revenues from and the cost of and expenses (direct and indirect) associated with the sale of new terminal telephone equipment initially includible in account 122, "Materials and supplies." It shall also include in separate subaccounts revenues and expenses associated with the provision of repair service on customer provided equipment.

(b) This account shall also include in separate subaccounts revenues from and the cost of and expenses (direct and indirect) associated with the sale of subscribers inside wiring and cabling which were constructed for customer ownership and were not in revenue service at the time of the transfer of ownership to the customer.

(c) This account shall also include all other items not provided for elsewhere, properly creditable to income.

Items

(Note § 31.01-8)

Fees collected in connection with the exchange of coupon bonds for registered bonds.

Profits from the telephone operations of other companies realized by the company under contracts.

Profits realized from custom work performed for others not incident to the company's telephone operations.

Profits realized on the sale of temporary cash investments.

§ 31.5-50 [Amended]

27. At the end of paragraph (b) (1) of § 31.5-50, add the words "(Note § 31.2-

20 (b).)" The paragraph, as amended, will read:

(b) *

(1) Amounts charged for connection, restoration and termination of service, and for inside moves, outside moves, instrument changes, and similar service requirements. (Note § 31.2-20 (b).)

28. Delete from paragraph (b) (2) of § 31.5-50 the account number "232". The paragraph, as amended, will read:

(b) *

(2) Amounts of initial nonrecurring charges for plant or equipment, furnished in rendering service to a customer, includible in accounts 231 and 234, except initial charges based on the cost of specially assembled private branch exchanges includible in account 234. (Note § 31.2-20 (b).)

29. In § 31.528 a new paragraph (b) is added and the present paragraph is designated (a). Paragraph (b) reads as follows:

§ 31.526 Other operating revenues.

(b) This account shall also include in a separate subaccount revenues received from the sale of terminal telephone equipment sold in-place and for the sale of station wire and cable, the cost of which had been charged to account 605, "Repairs of station equipment," and had been previously included in telephone plant in service (see also account 316).

30. In § 31.6-61, add paragraph (c). Section 31.6-61, as amended, will read:

§ 31.6-61 Cost of repairs.

(a) The cost of repairs chargeable to the various operating expense and clearing accounts includes: inspecting, testing, and reporting on the condition of telephone plant to determine the need for repairs, replacements,

rearrangements and changes; testing for, locating and clearing trouble; routing work (note also paragraph (b) of this section) to prevent trouble, such as pulling up slack, tightening guys and raking guy stubs, trimming trees, straightening poles and crossarms, and cleaning and adjusting equipment; replacing minor items of telephone plant (note also § 31.2-25); rearranging and changing the location of property not retired; repairing material for reuse; restoring the condition of property damaged by (paragraph (b) of this section); training employees for maintenance work; inspecting and testing after repairs have been made; and an equitable proportion of the cost of local plant administration, general plant supervision and engineering.

(b) The cost of repairs does not include the cost of replacing items of property designated as "retirement units." (Note also § 31.2-25.)

(c) The cost of repairs includes certain costs of station installations, and the costs of installing, connecting, disconnecting, and removing station apparatus. (See accounts 316 and 605.)

31. Delete from § 31.6-64 the words "inside wires or drop block wires," following the word "apparatus." Section 31.6-64, as amended, will read:

§ 31.6-64 Extensive replacements.

When it becomes necessary to replace the majority of station apparatus, in any given central office district, together with any number of such items in contiguous districts, the cost of the replacements chargeable to account 605, "Repairs of station equipment", if so authorized by this Commission upon application to it, shall be charged to account 138, "Extraordinary maintenance and retirements", and cleared to account 605 over the period specified in the authority.

§ 31.603 [Amended]

32. Amend paragraph (a) of § 31.603 as follows:

Delete the term "repairmen" (in two places) and substitute the phrase "people who are doing repair work".

After the words "location of trouble" replace the semicolon with a period, and capitalize "Dispatching".

After the words "condition of the plant" delete the remainder of this paragraph and insert "will be charged to this account if done on telephone company owned lines and equipment, and will be charged to account 316 if done on customer owned lines and equipment."

Add a last sentence to paragraph (a), so that, as amended, it will read:

(a) This account shall include the costs incurred by forces located in central offices and engaged in the work of receiving and recording reports of trouble from subscribers and others and; testing from test desks to determine the nature and location of trouble. Dispatching from test desks people who are doing repair work; testing from test desks with people who are doing repair work during the course of their work or upon its completion and making other tests from test desks to determine the condition of the plant will be charged to this account if done on telephone company owned lines or equipment, and will be charged to account 316 if done on customer owned lines or equipment.

This account shall also include all service order testing from test desks if

the telephone company will own the equipment ordered; the service order testing for those orders or portions of orders that will be customer owned will be charged to account 316.

§ 31.604 [Note B Amended]

33. Amend Note B of § 31.604 as follows:

After the word "test-board" delete the word "men" and substitute the word "personnel".

After the words "such as testing with" delete the terms "station repairmen, cablemen" and substitute the term "cable personnel".

Add two sentences to Note B, so that, as amended, it will read:

Note B.—The pay and expenses of test-board personnel and other employees in central offices engaged in testing circuits in connection with the maintenance of plant, such as testing with cable personnel, etc., shall be charged to account 603. Similar costs in connection with construction projects shall be included in the telephone plant accounts appropriate for the class of plant tested. Similar costs in connection with service orders shall be charged to account 603. Similar costs in connection with testing of service orders for customer owned equipment shall be charged to account 316.

34. Amend § 31.605 as follows: Delete paragraphs (a) and (b).

Add new paragraphs (a), (b), (c) and (d) so that § 31.605, as amended, will read:

§ 31.605 Repairs to station equipment.

(a) This account shall include the cost of installing or connecting items of station apparatus and the cost of inside wiring and cabling, drop and block wires, and of underground service wires. It shall also include the cost of reconnecting customers' lines at customers' premises.

(b) This account shall include the cost of repairing station apparatus, inside wiring and cabling, drop and block wires, underground service wires, and large private branch exchanges. It shall also include the cost of replacing station apparatus (excluding the cost of material other than repair parts) and the cost of replacing inside wiring and cabling, drop and block wires, and underground service wires.

(c) This account shall include the cost of disconnecting or removing station apparatus, inside wiring and cabling, drop and block wires, and underground service wires, if company owned.

(d) This account shall include also amortization of costs of extensive replacements of station apparatus, inside wires, drop and block wires, and

underground service wires, which, under conditions provided in § 31.6-64, have been included in account 138, "Extraordinary maintenance and retirements".

§ 31.605 [Amended]

35. Amend the Items list following § 31.605 as follows:

Delete from the second item the words "and drop and block wires", and substitute the words, "drop and block wires and underground service wires".

Delete the parenthetical note at the end of the fourth item. Add two sentences at the end of the fourth item to say "If the disconnection and reconnection are made in central offices, the cost thereof shall be charged to account 604, Repairs of central office equipment."

Delete from the sixth item the words "Inside moves (moves or relocations on the same premises or at the same address)" and substitute the words "Move or relocations". Delete the words "(See also Note A to this account)."

Delete from the ninth item the words "not incident to station connections".

Add to the list thirteen new items (which after placing the list in final arrangement appear as items 1 through 13, 12, 14, 20, 21 and 22, so that the Items list under § 31.605, as amended, will read:

Items

(Note § 31.01-8)

The wires (or small cables) from the station apparatus to the point of connection with the general overhead or underground system or to the junction boxes where the house cable or other cable terminates. This includes circuits carried by means of wire or small cables, wire plant in cases where connection is made to a general wire system, or to the point of connection with the aerial wire plant in cases where connection is made with a general wire system.

The wires (or small cables) used to connect station apparatus in the same building, such as main stations and extension stations, and stations of intercommunicating systems.

The wires (or small cables) used to connect private branch exchange switchboards or their distributing frames (or equivalent distributing panels) with terminal stations in the same building.

The wires (or small cables) used to connect the various parts of a small private branch exchange, such as the cables or wires from distributing frames (or equivalent distributing panels) to switchboards.

The wires (or small cables) installed specifically to serve as trunk, battery, or generator circuits from a small private branch exchange to the point of connection with the permanent or outside cables or wires.

Connecting blocks, jacks, ground wires, ground rods, station protectors, clamps, cleats, nails, screws and other material used

in the installation of station apparatus and inside wiring and cabling.

Labor and other costs incurred in connection with station apparatus and wiring installations or additions thereto.

Brackets, bridle rings, insulators, knobs, span clamps, screws, sleeves, strand, tubes, and other material used in the installation of drop and block wires, and underground service wires; trimming trees and other costs incurred in the installation of such wires; pipes or other protective covering used for underground drop and block wires or service connections; and permits and privileges for installation.

Changing inside, drop and block wires, and underground service wires.

Changing type of telephone, such as from nondial to dial or from one color to another.

Cleaning station apparatus and large private branch exchange equipment.

Connecting or installing station apparatus.

Disconnecting customers' lines at customers' premises. If the disconnection is made in a central office, the cost thereof shall be charged to account 604, "Repairs of central office equipment."

Disconnecting or removing station apparatus. House service for public telephones.

Inspecting, testing, and reporting on condition of equipment to determine the need for repairs and replacements. (See also account 603.)

Material normally used as repair parts for stations apparatus. Moves or relocations of items of station apparatus. Number plate changes.

Plant assignment and related clerical work (e.g., assigning plant facilities, service order dispatch, service order final completion, and assignment record administrative work).

Reconnecting customers' lines at customers' premises. If the reconnection is made in a central office, the cost thereof shall be charged to account 604, "Repairs of central office equipment."

Removing inside wiring and cabling, drop and block wires, and underground service wires.

Removing sediment from and cleaning batteries.

Repainting and other repairs of booths, except those owned by others.

Repairing used station equipment for reuse.

Replacing defective station apparatus.

Replacing dry-cell batteries.

Replacing minor items of large private branch exchanges, including labor and material used and the removal and recovery of the items retired less salvage recovered, except when such items are replaced through the replacement of retirement units. (note also section 31.2-25.)

Replacing one small private branch exchange by another.

Routine work to prevent trouble, such as trimming trees to protect existing drop and block wires.

Supply expense applicable to station apparatus being reused.

Testing for, locating and clearing trouble in station apparatus and large private branch exchanges. (See also account 603.)

§ 31.605 [Notes Amended]

36. Amend the notes to § 31.605 as follows: Delete Note A.

In Note B, following the words "large private branch exchanges", delete the remainder of the sentence and substitute the words "and for installing or connecting station inside wiring and cabling, drop and block wires, underground service wires, and station apparatus shall be accounted for as prescribed in § 31.5-50 (b)". Change the designation "Note B" to "Note C".

Add two new notes, designated "Note A" and "Note B", so that the notes to § 31.605, as amended, will read:

Note A.—Costs chargeable to this account in connection with inside cabling are restricted to small cables used in station installations instead of wires, such as those run from wall outlets or floor terminals to the station apparatus, and to cables used in installing small private branch exchanges. The cost of cables used in installing equipment includible in account 234, "Large private branch exchanges," shall be included in that account. The cost of other inside cables, including riser and distributing cables in buildings, which by their physical character, method of installation, and permanence constitute house cables, is chargeable to account 242:1, "Aerial cable."

Note B.—The cost of outside plant, such as poles, wires, and cables, whether or not on private property, used to connect a private branch exchange with its terminal stations shall be charged to the appropriate pole, wire and cable accounts.

Note C.—Amounts charged customers for moves and changes of station apparatus and large private branch exchanges and for installing or connecting station inside wiring and cabling, drop and block wires, underground service wires and station apparatus shall be accounted for as prescribed in § 31.5-50(b).

37. In § 31.675 a new paragraph (b) is added and the present paragraph is designated as (a). Paragraph (b) reads as follows:

§ 31.675 Other expenses

(b) This account shall also include the net book value of terminal telephone equipment and any formerly (prior to . . .) capitalized portion of station wire and cable sold in-place. A separate subaccount shall be maintained for these accounts.

§ 31.8 [Amended]

38. In § 31.8, delete the title and the parenthetical reference "(See § 31.2-25, 31.232, and 31.605)".

Appendix A [Amended]

39. In Appendix A, delete from item (h) in the Answer to Case 6-R-2 the

words "station connections". This item to be identified as a substantially complete telephone system, as amended, will read:

(h) All the central office equipment, station apparatus, large private branch exchanges, furniture and office equipment, or vehicles and other work equipment situated in or utilized in a single exchange area, central office area, or other extensive area, without additional classes of associated plant.

40. In Appendix A, delete from the last parenthetical expression in the Answer to Case 9-R-1 the words "See account 232, 'Station connections'" and substitute the words "see account 605, 'Repairs of station equipment'".

41. Delete from paragraphs 4(a) and 5 of Appendix B the words "station connections". Paragraphs 4 and 5 of Appendix B, as amended, will read:

4. Average costs. (a) In the development of average costs for plant consisting of a large number of similar units, such as telephones, poles, wire, cable, cable terminals, conduit, small private branch exchanges, and booths, units of similar size and type within each specified accounting area and plant account may be grouped without regard to year of construction. Each such average cost shall be set forth in the continuing property record or in records, supplemental thereto and in support thereof.

(b) The averaging of costs permitted under the provisions of the foregoing paragraph is restricted to the averaging of costs incurred within an accounting area as defined in paragraph 1 (a). The provisions of paragraph 4(a) shall not be interpreted as permitting the inclusion within such average cost of the cost of units involved in any unusual or special types of construction. The units involved in such unusual or special types of construction shall be recorded at actual cost by locations.

(c) When classes of plant are subdivided between exchange and toll, the bases of the average costs shall be confined to items priced in the respective subdivisions.

5. Identification of property-record units. There shall be shown in the continuing property record or in records supplemental thereto and in support thereof, a complete description of the property-record units in such detail as to identify plainly such units. The description (except for classes of plant for which it is impracticable, such as station apparatus) shall include the identification of the work order under which constructed, the year of installation (unless not determinable at reasonable expense with respect to past acquisitions or installations), the specific location of the property within each accounting area in such manner that it can be readily spot-checked for proof of physical existence, the accounting company's number or designation, and any other description used in connection with the determination of the original cost. Descriptions of units of similar size and type shall follow prescribed groupings.

BILLING CODE 6712-01-M

[47 CFR Part 76]

[CT Docket No. 79-193; RM-3115; > FCC 79-484]

Proposing To Add Florence, Alabama, to the Huntsville-Decatur Television Market

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking in Cable Television Docket.

SUMMARY: It is proposed to amend the Commission's cable television rules to include Florence, Alabama, as a designated city in the Huntsville-Decatur, Alabama, television market. This change is found to be consistent with the criteria used in the initial creation of the list of major television markets for purposes of the cable television rules.

DATES: Comments must be received on or before October 15, 1979, and reply comments on or before November 14, 1979.

ADDRESSES: Comments should be sent to: Office of the Secretary, Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William Johnson, Cable Television Bureau (202) 632-6468.

SUPPLEMENTARY INFORMATION:

Adopted: August 1, 1979.

Released: August 16, 1979.

By the Commission: Commissioner Lee absent.

In the matter of amendment to § 76.51 of the Commission's rules and regulations, CT-Docket No. 79-193, RM-3115.

1. Television Muscle Shoals, Inc. ("TMS"), licensee of station WOWL-TV (NBC, channel 15), Florence, Alabama, has requested that the Commission revise its list of top 100 television markets utilized in the cable television rules, to add the city of Florence, Alabama to the hyphenated market now designated as Huntsville-Decatur, Alabama (#96). TMS had originally filed its request as a petition for special relief pursuant to § 76.7 of the Commission's rules. Objections to that petition were filed by Teleprompter Southeast, Inc. and Decatur TeleCable Corp., both operators of cable systems located within this television market. When TMS replied to these objections, it became clear that what TMS sought was in fact a change in § 76.51(a)(96) of the rules, rather than special relief. TMS's pleading was thus converted to a petition for rule making, and all pleadings in the special relief

proceeding have been considered in the present context. Additionally, an informal comment in support of this petition was filed by Athens TV Cable of Alabama, Inc.

2. The pleadings of Teleprompter Southeast, Inc., operator of a cable television system at Huntsville, Alabama, and Decatur TeleCable Corporation, operator of a cable television system at Decatur and Morgan County, suggest that the signal of WOWL-TV may not be readily available for carriage in these communities, that the station has not presented programming directed to the needs and interests of these communities, and that another signal would have to be dropped or the systems redesigned in order to accommodate the signal. They, therefore, oppose the change requested.

3. This change, if made, would have four principal results: (1) It would entitle stations in Florence to carriage on cable television systems throughout the Huntsville-Decatur-Florence market as that term is defined in the Commission's cable television rules, (2) it would reduce the area in which Florence stations are entitled to network program non-duplication from 55 miles to 35 miles, (3) it would entitle stations in Florence to syndicated program exclusivity on cable television systems, and (4) it would permit cable systems within what is now the Florence market to carry two distant independent station signals in accordance with the top 100 market rules instead of the one distant independent allowed by the smaller market rules.

4. The Commission originally based its major market list on the American Research Bureau's (ARB) 1970 primetime households ranking, although it made minor adjustments to this list not relevant here. Para. 75, *Cable Television Report and Order*, FCC 72-108, 36 FCC 2d 143, 171-172 (1972). It is therefore significant that ARB's 1970 market rankings refer to the "Huntsville-Decatur-Florence" market. In fact, ARB appears never to have utilized a "Huntsville-Decatur" market designation; before ARB combined these markets (in 1966), they were considered separate television markets. This case therefore is readily distinguishable from those instances in which ARB changed its market rankings after our major market list was established; in those circumstances, the Commission stated that it would not revise its list, since a need for stability was perceived in this area. *Id.* The absence of Florence from this list therefore appears to be the result of inadvertent error.

5. In the past the Commission has characterized a hyphenated market as an area with more than one major population center supporting all stations in the cities within the market area. Para. 5 *Report and Order in Docket*, 19990, FCC 74-638, 47 FCC 2d 752, 753 (1974). The problem here seems to be that the area around Florence clearly provides support for the Huntsville stations which have significant audience in Florence and the surrounding counties. The reverse is not necessarily true—that Huntsville area residents view the Florence station. Thus, the designation of what is the proper "market" for purpose of the cable television rules is necessarily something of a compromise. In addition, since the cable rules determine the carriage rights on cable systems the rules create as well as reflect what the market will actually be like. In our view the Florence area seems to be part of the market on which Huntsville stations rely for advertising support and reciprocally the Commission's rules should not cut-off the Florence station from advertiser support in the Huntsville area.

6. In general the change proposed would be of benefit to cable subscribers by increasing access to broadcast programming and it does not appear that there would be any adverse impact on the television service provided by local stations to the area. Accordingly, we believe the proposal warrants consideration through the rulemaking process. We do recognize the problems raised by the Huntsville and Decatur cable systems concerning insufficient channel capacity and problems with reception of WOWL-TV. It may be that this situation will warrant special consideration if the market structure is changed so that the rules allow carriage but do not mandate it. Specific comments on this issue is requested. This does not, however, change the fact that the market structure proposed by Television Muscle Shoals appears to be in line with that used when the list was originally prepared and that the change can aid cable subscribers on other systems and create a more rational market structure. We are therefore issuing the rule change proposal as

¹Another confusing factor here is the inclusion of Decatur on the market list in the cable television rules. Section 76.51. Although Huntsville stations may identify with Decatur, no station is licensed to that city and accordingly it has no specified 35-mile zone under the cable rules and should not have been made a part of the market. Thus, for purposes of the cable rules the market should either be the Huntsville market or the Huntsville-Florence market but not Huntsville-Decatur. Compare *Order* FCC 74-1126, 49 FCC 74-1126, 49 CFF 2d 198 (1974) deleting Jacksonville from the Springfield-Decatur-Champaign, Illinois market.

requested. If the change is adopted the new market would become, in accordance with footnote 1 above, the Huntsville-Florence market.

7. In a rulemaking proceeding now pending (*Notice of Proposed Rule Making in Dockets 20988 and 21284*, FCC 79-243, FCC 2d (May 7, 1979)) some of the rules here involved are being re-evaluated and rule changes could be made as a result of this proceeding that would alter in some respects the consequences of the change requested by Television Muscle Shoals, Inc. Nevertheless, it seems to us that the change proposed here is likely to have consequence as long as the Commission continues to regulate any aspect of cable television signal carriage and that we should therefore proceed with this proposal.

8. Accordingly, we propose to amend § 7651(a)(96) of the rules to include Florence, Alabama within this major television market. Authority for the rule amendment proposed herein is contained in Sections in 2, 3, 4(i) and (j), 301, 303, 307, 308 and 309 of the Communications Act of 1934, as amended. All interested parties are invited to file written comments in this proceeding on or before October 15, 1979, and reply comments on or before November 14, 1979. All submissions by parties to this must be made in written comments, reply comments, or other appropriate pleadings.

9. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 5 copies of all comments, replies, or other documents filed in this proceeding shall be furnished to the Commission. Participants filing the required copies who also wish each Commissioner to have a personal copy of the comments may file an additional 8 copies. Members of the general public who wish to express their interest by participating informally in the rule making proceeding may do so by submitting one copy of the comments, without regard to form, provided only that the Docket Number is specified in the heading. Responses will be available for public inspection during regular business hours in the Commission's dockets Reference Room (Room 239) at its headquarters in Washington, D.C. (1919 M St., NW.).

Federal Communications Commission.

William J. Tricarico,
Secretary.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

1980 Wheat, Barley, Oats and Rye Programs; Determinations Regarding the Proclamation of 1980-Crop National Program Acreage, Set-Aside Level and Other Program Provisions for Wheat, Barley, Oats and Rye

AGENCY: Agricultural Stabilization and Conservation Service.

ACTION: Notice of Determination of 1980-Crop National Program Acreage, Set-Aside Level and Other Program Provisions for Wheat, Barley, Oats and Rye.

SUMMARY: This notice is for the purpose of proclaiming a national program acreage, no set-aside and other program provisions for the 1980 crop of wheat in accordance with applicable sections of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act"). Provisions of the Act require that a determination of national program acreage and set-aside requirements be made for wheat not later than August 15 prior to the year in which the crop is harvested.

EFFECTIVE DATE: August 15, 1979.

ADDRESSES: Production Adjustment Division, ASCS-USDA, 3630 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Bruce R. Weber (ASCS) (202) 447-6688.

SUPPLEMENTARY INFORMATION: A notice that the Secretary was preparing to make determinations with respect to the 1980 wheat, barley, oats and rye program was published in the Federal Register on June 5, 1979 (44 FR 32257) in accordance with 5 U.S.C. 553 and provided for a 60-day comment period. The comment period was subsequently shortened to allow the Secretary to announce the 1980 program provisions

at an earlier date (See 44 FR 39566, dated July 6, 1979). Comments were received from over 130 entities in 24 States. The breakdown of comments received were 87 farmers, three State and county farm organizations, 22 State and county ASC Committees, one State government agency, one State Agribusiness, four national farm organizations, seven national agribusinesses and six Members of Congress. The majority of the comments involved five issues: (1) set-aside, (2) announcement of barley and oats program along with wheat, (3) target price levels, (4) loan levels, and (5) special wheat acreage grazing and hay program. A majority of the comments favored set-aside for the 1980-crop of wheat. The general level of set-aside suggested was between 5 and 15 percent, with suggestions as high as 35 percent. All comments made favored an early announcement of the barley and oats program. Suggested target levels ranged from a low of \$3.50 per bushel to parity for wheat and \$2.88 per bushel to parity for barley. Comments on loan levels ranged from \$2.75 per bushel to parity for wheat; \$2.20 per bushel to parity on barley and \$1.75 per bushel for oats. A large majority of the comments made concerning the special wheat acreage grazing and hay program favored continuation of the program with a minimum payment guarantee. All comments received were duly considered by the Secretary. Accordingly the Secretary has made the following program decisions pertaining to the 1980-crops of wheat.

Notice of Determinations

1. 1980-Crop Barley, Oats and Rye

Although comments received unanimously favored announcement of the 1980-crop barley and oats program provisions along with wheat, it is hereby determined that a decision on the various program provisions pertaining to the 1980-crops of barley, oats and rye will be delayed until further information becomes available on the 1979 feed grains crop and utilization prospects. Section 105A(f)(1) of the Act provides that when a determination is to be made as to whether set-aside is needed for the 1980 crops of feed grains, such determination is to be based on the total feed grains complex rather than on the individual commodities. Accordingly, it

Federal Register

Vol. 44, No. 163

Tuesday, August 21, 1979

has been determined that until more complete 1979-80 supply and demand data becomes available for the 1979 feed grains crop (principally corn), a final 1980-crop program decision cannot be made.

2. National Program Acreage for 1980-Crop Wheat

It is hereby proclaimed that the preliminary national program acreage for the 1980 crop of wheat shall be 70.0 million acres. The national program acreage is based on the following data:

(a) Estimated domestic consumption 1980-81 (million bushels)	884.0
(b) Plus estimated exports, 1980-81 (million bushels)	1,250.0
(c) Minus estimated imports, 1980-81 (million bushels)	-2.0
(d) Plus adjustment to increase stocks to desired level (million bushels)	+157.0
(e) Divided by estimated national weighted average farm program yield (bushels/acre)	32.7
(f) Equals: Preliminary 1980 national program acreage (million acres)	70.0

¹The 157 million bushel adjustment for increased stocks was determined appropriate to bring the 1980-81 carryover more in line with a desired carryover level. 1979-80 carryover wheat stocks are estimated to be around 900 million bushels. The announced level of the national program acreage would likely result in a 1980-81 carryover of wheat at close to 1.0 billion bushels.

The Secretary may revise the national program acreage as proclaimed for the purpose of determining the allocation factor if he determines it is necessary based on latest information. The national allocation factor will be determined in the fall of 1980.

3. No set-Aside for 1980-Crop Wheat

Section 107A (f)(1) of the Act provides that the Secretary shall provide for a set-aside of cropland if the Secretary determines that the total supply of wheat will, in the absence of such a set-aside, likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices to meet a national emergency. In accordance with those criteria, it is hereby determined and proclaimed that no set-aside of cropland will be required for the 1980-crop of wheat. No set-aside will likely result in an 8 to 11 percent increase in planted acreage for 1980 and a modest increase in carryover stocks. Producers are encouraged to follow good farming practices in planting their 1980 crop of wheat. In 1978, world wheat production at 438 million metric tons (a record) was up 56 million tons (15%) from the previous year. Although trade remained strong, world ending stocks increased by 23 million tons. This stock increase

occurred outside of the United States. As a result of the 1979 set-aside program and near record exports, ending stocks declined nearly 7 million tons from the previous year. The 1979/80 world wheat production is forecast at 406 million tons, down more than 30 million tons (7%) from 1978-79. Global utilization is projected at 417 million tons. Trade is forecast to increase nearly 10 percent due largely to increased imports by the Soviet Union, but also to larger imports by some countries in Eastern and Western Europe where crops will likely be down from last year. As a result, world ending stocks for the 1979-80 season are forecast to be drawn down by 11 million tons (based on July 16 Foreign Agriculture Circular-Grains) and would represent less than 24 percent of utilization, next to the smallest in the past 4 years and nearly equal to that for 1971-72. Projected U.S. ending stocks (based on July 13, Agricultural Supply and Demand Estimates) at 23.4 million tons will likely decline by 2 million tons or more and would be the lowest since 1975-76.

The Southern Hemisphere wheat crop will not be harvested until December. The advent of unfavorable weather in that part of the world could seriously tighten current year world wheat supplies and exacerbate the 1979 and 1980 wheat supply-demand situation.

Given this outlook, it was determined that no set-aside was needed for the 1980 crop of wheat. The chances are just too great for wide swings in production and prices in the event of bad weather. Other measures such as the continuation and expansion, if needed, of the farmer-owned reserve program will be used in designing a 1980-81 supply management program aimed at providing remunerative prices to producers and will assure the U.S. consumer and our foreign customers of a reliable and adequate supply of wheat.

4. 1980 Land Diversion

It is hereby determined that in accordance with the no "set-aside" decision, no land diversion program will be implemented for the 1980 crop of wheat.

5. Voluntary Reduction from 1979 Planting for 1980-Crop Wheat

It is hereby determined and proclaimed that producers who plant no more wheat for 1980 harvest than was planted and considered planted for harvest in 1979 shall be guaranteed target price protection on the normal production from the entire acreage.

In applying the voluntary reduction for 1980, the 1979 wheat acreage shall be:

The 1979 wheat acreage planted for harvest. Such acreage shall be increased by any approved prevented planted acreage plus any special wheat grazing and hay acreage in addition to the larger of:

- (a) The total set-aside for 1979 or
- (b) The acreage reduced from the previous year but not to exceed the recommended 1979 voluntary reduction.

6. 1980 Established "TARGET" Price for Wheat

Based on the formula required by law, the 1980 established "target" price for wheat is expected to be between \$2.95 and \$3.20 per bushel. Based on preliminary costs of production data, the 1980 target price is indicated to be \$3.07 per bushel. However, this level is subject to change depending upon final 1979-crop costs of production and the final 1979 wheat yield per planted acre. It is anticipated that the final 1980 target price will be announced not later than March 15, 1980.

7. 1980 Loan and Purchase Level

It is hereby determined that the 1980-crop wheat loan and purchase level shall be \$2.50 per bushel, 15 cents higher than the 1979-crop level. It has been determined that this level will maintain the competitive relationship of wheat to other grains in domestic and export markets.

8. Special Wheat Acreage Grazing and Hay Program

It is hereby determined that in accord with the no set-aside decision, the Special Wheat Acreage Grazing and Hay Program will not be implemented at this time for the 1980-crop of wheat. However, if later information becomes available that indicates a need for this program it will be implemented.

Note.—This final determination has been reviewed under the USDA criteria established to implement Executive Order 12044 "Improving Government Regulations" and has been classified "significant." An approved Final Impact Statement will be available from Bruce R. Weber, (ASCS) (202) 447-6688.

Note.—ASCS has determined an environmental assessment will not be necessary since it has been determined that there will be no set-aside for the 1980 crop of wheat.

Bob Bergland,
Secretary

BILLING CODE 6320-01-M

[Docket No. 32851; Agreement C.A.B. 1175, as amended Order 79-8-92]

International Air Transport Association

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 15th day of August 1979.

On August 6, 1979, the International Air Transport Association (IATA) filed a motion requesting that the filing date for original testimony in this proceeding be extended until at least 60 days after: (a) The release of the Board's transcripts of the July 23-31, intergovernmental meetings; (b) the conclusion of diplomatic consultations related to this proceeding; or (c) the public announcement of the identity of the witnesses whom the Board has invited to participate in the legislative hearing, depending on which happens last. IATA also requested that reply testimony be due at least 60 days after the original testimony.¹

¹ On July 12, 1979, the Department of Justice filed a motion requesting that the deadline for filing original testimony be extended from August 1 until September 5, 1979. Although that motion was discussed at our meeting on July 12, it was not mentioned in Order 79-7-78, served July 13, which extended the filing date for original testimony from August 1 to August 20. Justice argued that the filing date for original testimony should follow governmental consultations so that information from the consultations could form a part of the

Footnotes continued on next page

Replies were filed by Air Canada, British Airways, Alitalia, Varig, S.A., Aer Lingus, and Lufthansa.

IATA's request that the procedural dates in this docket be further extended is denied. As IATA correctly noted in its pleading, the views of foreign governments are one of the many important factors that we intend to consider in reaching a final decision. However, as we indicated at our Board meeting on July 12, the extension granted in Order 79-7-76 was not calculated to allow parties to discuss the results of the intergovernmental consultations in their original testimony, but was directed instead to the need expressed by many parties for additional time to make final witness selections and begin preparation of original testimony. It appears at this time that the transcripts of the consultations will be available this week, so that analysis and discussion of their contents by the parties will be possible in reply testimony, at the legislative hearing, and in final briefs to the Board.²

In the course of the consultations, several governments made proposals to the United States delegation. The Department of State agreed to consider the proposals and provide the response of the United States government at a later date. IATA has requested a delay in the proceedings until after that response has been given.

As IATA certainly realizes, the proposals were directed by the foreign governments to the government of the United States, not the Board. The positions taken with respect to those proposals by the various organs of the government that are parties to this proceeding will no doubt become part of the record. There is, however, no reason why the procedure we have previously established should be delayed until those positions are clarified.

Both in Order 78-6-78 and Order 79-5-113 we set out the issues that we believed to be important to the resolution of this case. In the latter order

Footnotes continued from last page original testimony. On August 14, 1979, the Department of Transportation filed a motion, supported by the Departments of Justice and State, for a 30 day extension of the date for filing original testimony. The motions of Justice and Transportation are similar to IATA's, and this Order will therefore treat all three motions.

Due to the proximity of the filing date for original testimony, we are issuing this Order prior to the receipt of all replies to IATA's motion. To do otherwise would leave all parties in unjustified uncertainty as to whether or not they are still required to file their testimony on August 20.

² Copies of the transcripts can be obtained from Alpha Reporting Services, 201 I Street, S.W., Washington, D.C., 20024. Telephone inquiries should be directed to Phyllis Edwards (202) 737-2214.

we invited the parties to submit evidence on those issues through written testimony and witnesses at the legislative hearing. The previous filings in this docket convinced us that the testimony of the parties would not necessarily represent a full range of opinion on the issues, and we, therefore, decided to invite a number of witnesses who might be expected to "flesh out" the record. We did not, by our invitations, attempt to insure that all possible views would be presented. The parties have positions on the issues and we expect that they will present them. Furthermore, by our selection of witnesses we did not undertake to "present a case." All witnesses were requested to submit their personal views; none was asked to defend or justify a specified position.

There is no merit to IATA's argument that its preparation is hampered by ignorance of the identity of those we have asked to participate. All parties have been on notice since May that they would have an opportunity to present an affirmative case. If any party wishes to respond to a position taken, or argument made, by one of the witnesses we have invited, it will have that opportunity both in reply testimony and at the legislative hearing.

Although we will not delay the proceedings further, we are prepared to provide the names of the witnesses we have invited to submit testimony and appear at the legislative hearing. Appendix A lists those witnesses and their addresses. They have been added to the updated service list in Appendix B and should receive copies of the testimony filed by the parties.

In Appendix D of Order 79-5-113 we listed suggested topics that parties might wish to address in their testimony and at the oral hearing. Topic 5 of that appendix posed these questions: "Will any countries or group of countries be more seriously affected than others by CAB disapproval or withdrawal of immunity from Traffic Conferences? Is different treatment justified? Feasible?" During the consultation held in Bogota, Brussels, and Nairobi, various governmental parties suggested that IATA Traffic Conferences might be more necessary or desirable in certain parts of the world than in others, and that our final decision should recognize such differences. Because of the interest displayed at the governmental level in the possibility of regional solutions, we wish parties to focus on the question of whether certain regions of the world have a special need for the collective rate-setting offered by IATA.

Accordingly, 1. We deny the motions of the Departments of Justice and Transportation IATA that we further extend the date for filing original testimony or otherwise change the procedural schedule of this proceeding; and

2. We have set forth in Appendix A a list of the persons whom we have invited to participate in this proceeding, and in Appendix B an updated service list.

This Order shall be served on all parties who have previously filed in this docket and shall be published in the Federal Register.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,³

Secretary.

O'Melia, Member, Dissenting:

I move to dismiss the IATA Review case.

A delegation made up of representatives from CAB and the Departments of State, Justice and Transportation has now returned from visits about our withdrawal of approval of IATA with delegations of foreign governments at Bogota, Brussels and Nairobi. No one but Chile, I understand, supported the Board's proposal to withdraw our decades-long approval of the IATA ratesetting mechanism. The foreign governments indicated a preference for the stability of a system in which fares are first proposed and discussed among the carriers and then referred to governments if agreement is not achieved. Some governments dispute as a matter of principle the anti-trust, anti-price-setting attitudes inherent in our original show cause order (Order 78-6-78). Others are concerned about the viability of their national carriers in a no-IATA environment in competition with the giant U.S. carriers. Many are worried about the disruption and chaos and overall annoyance that would follow withdrawal of our approval of IATA.

In summary, all the world governments who participated in this series of talks but Chile, apparently, opposed our proposed action. They pointed out that new rules permit each carrier member to decide whether or not it will participate in rate conference agreements. A carrier may decide against participation yet still retain the benefits of agreement on the so-called "facilitation" issues of doing business. The foreign governments felt these new rules should be given a fair chance to work. I agree. An organism as long-standing and as widely accepted as

³ All Members concurred except Member O'Melia who filed the attached dissenting statement.

IATA deserves a decent test of its reformed procedures.

The Board has made it clear that its primary concern is about the rate-setting aspects of IATA—not the myriad agreements on other subjects that make an international airline system work efficiently. If carriers can participate in rate agreements or not as they individually see fit, we should allow the dynamics of the new, agree or not, environment develop as it will without riding rough-shod over the experiment before it gets started.

My call for dismissal of this case does not rest on the solid opposition of the governments we have been visiting with on the issue. I base it rather on the fact that IATA is no longer an effective influence on U.S. rates and fares. Most major U.S. flag carriers have withdrawn from participation in the rate-setting conferences of IATA. Only National, soon to disappear from the carrier rolls, and Tiger continue their active participation in trans-oceanic rate setting. In the Western Hemisphere, American and Eastern, for the moment at least, continue as members in the Caribbean/Mexico rate agreements, but we have independent, competitive carriers setting the fare levels as a matter of routine in many of those markets. In only a couple of obscure geographical areas of the world is there an IATA fare or rate agreement in effect! Why should we be concerned about such an ineffective rate setter?

An argument may be made that when the present right-thinking Members/staff of the Board are gone, the hydra-headed rate-setting beast will rise up again and ravage the pocketbooks of world travellers and shippers. But there will no longer be anti-trust immunity after 1985. Section 414 authority goes to the Department of Justice. Can anyone reasonably expect it to permit any more international rate-setting agreements than we have? Even before that, if Senator Cannon's proposed international aviation bill passes, rate-setting agreements are in for serious trouble.

Moreover every one of our new route awards in the last year or so, those already in effect across the Atlantic and Pacific and those still pending in major route cases, each one is another nail in IATA's coffin. So is every new intergovernmental agreement to a mutual suspension or country of origin rate article. IATA's increasing inability to cope with this new competition tells me that the majority's battle against rate-setting agreements is won. Clearly that is so in U.S.-Europe markets and it is increasingly so in U.S.-Asia markets

with the new liberal rate articles agreed upon with several major and strategic countries. IATA may still seem to be strong in South America but that merely reflects government policy there. But the majority's battle is not won in South America by destroying IATA: it is won by negotiating more favorable bilateral agreements as we have consistently been doing throughout the world in the last year or so. Considering the adamant stance of the South American countries at Bogota, it would appear to me that a more competitive environment could be better achieved by firm but friendly persuasion than by denouncing IATA over their strong objections.

Thus why ruin everyone's Fall arguing about IATA? Why drag the professors from the shady groves of academe to the bloody CAB arena? Why upset all the foreign governments and their carriers over an issue that cannot survive more than a year or two. It is a dying issue. There is no hope for survival. Let us forget about it and, as a headache, it will pass away.

If some do not see IATA's future influence on U.S. rates and fares as waning or if there is a hesitation that IATA might rise again phoenix-like from the ashes, I say we should rely on our historic pattern of intervening in and disapproving any IATA agreement we do not like and then, when we are gone, leave the matter to the Department of Justice. Implementation of our other more important policies of competitive licensing in international markets, our innovative new bilateral rate approaches will be jeopardized if we continue to infuriate foreign governments by pressing for the guillotine for IATA. With an ineffective IATA rate influence at present, we should be devoting our efforts to implementing more important Administration policy goals. (My agreement to every facet of those goals, or not, is irrelevant to my argument. I am saying that fighting about IATA is no longer worth the candle and, in fact, is a retard on our achievement of more important Administration policies.) We diminish our chances for success on our licensing/rate goals if we poison our approaches to foreign governments with the IATA issue.

I would grant IATA's modest request for brief delays in the procedures for processing this case for the reasons it cites.

Richard J. O'Melia

DEPARTMENT OF COMMERCE

Industry and Trade Administration

Numerically Controlled Machine Tool Technical Advisory Committee; Partially Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Numerically Controlled Machine Tool Technical Advisory Committee will be held on Thursday, September 6, 1979, at 10:00 a.m. in Room B841, Main Commerce Building, 14th Street and

Constitution Avenue, N.W., Washington, D.C.

The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1979, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production of technology, (C) licensing procedures which affect the level of export controls applicable to numerically controlled machine tools, including technical data or other information related thereto, and (D) exports to the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has six parts:

General Session

- (1) Opening remarks by the Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Continued discussion of accuracy parameters for numerically controlled machine tools.
- (4) Discussion of foreign availability of numerically controlled machine tools and numerically controlled machine tool technology.
- (5) New business.

Executive Session

- (6) Discussion of matters properly classified under Executive Order 11652 and 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (6), the Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that

the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Committee members have appropriate security clearances.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Numerically Controlled Machine Tool Technical Advisory Committee and of any Subcommittees thereof, was published in the Federal Register on October 25, 1978 (43 FR 49828).

Copies of the minutes of the General Session will be available by calling Mrs. Margaret Cornejo, Policy Planning Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-2583.

For further information contact Mrs. Cornejo either in writing or by phone at the address or number shown above.

Dated: August 16, 1979.

Robin B. Schwartzman,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council's Groundfish Advisory Subpanel; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), has established a Groundfish Advisory Subpanel (AP) which will meet to discuss the draft Groundfish Fishery Management Plan.

DATES: The meeting will convene at 1 p.m. on Wednesday, September 12, 1979; 8 a.m. on Thursday, September 13, 1979; adjourning at 5 p.m. on both days. The meeting is open to the public.

ADDRESS: The meeting will take place at the Oregon Department of Fish and Wildlife Office, 8th and Mill Street, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 SW. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221-6352.

Dated: August 15, 1979.

Winfred H. Meibohm,
Executive Director, Notional Marine Fisheries Service.

Office of the Secretary

[Dept. Organization Order 40-1, Amdt. 4]

Industry and Trade Administration; Statement of Organization, Functions, and Delegation of Authority

This order effective August 7, 1979 further amends the materials appearing at 42 FR 64724 of December 28, 1977, 43 FR 35533 of August 10, 1978 43 FR 38614 of August 29, 1978 and 44 FR 24618 of April 26, 1979.

Department Organization Order 40-1, dated December 4, 1977 is hereby further amended as shown below. The purpose of this amendment is to transfer the Office of International Commercial Representation from the Deputy Assistant Secretary for Administration and Legislative Policy to the Bureau of Export Development.

1. In section 5, "Bureau of Export Development," paragraph .05 is added to read as follows:

".05 The Office of International Commercial Representation shall serve as the Department of Commerce representative to the Department of State and other Government agencies on matters relating to the management of Foreign Service programs and resources outside of the United States; develop, coordinate, and present Departmental views on the allocation of economic/commercial (E/C) resources abroad and the assignment of individual E/C officers, as these actions relate to Commerce programs and needs of U.S. business; and insure that all elements of the Department are informed of, and monitor compliance with, requirements, policies, interagency agreements, and programs relating to overseas E/C representation."

2. Amendment 2 dated August 9, 1978, which established the Office of International Commercial Representation under the Deputy Assistant Secretary for Administrative and Legislative Policy, is hereby superseded by this amendment.

3. The organization chart attached to this amendment supersedes the organization chart dated April 8, 1979. A copy of the organization chart is on file with the original of this document in the Office of the Federal Register.

Effective date: August 7, 1979.

Guy W. Chamberlin, Jr.,
Acting Assistant Secretary for Administration.

BILLING CODE 3510-17-M

[Dept. Organization Order 25-5A]

National Oceanic and Atmospheric Administration; Statement of Organization, Functions, and Delegation of Authority

This order effective July 12, 1979 supersedes the materials appearing at 42 FR 35672 of July 11, 1977, 43 FR 6127 February 13, 1978, 43 FR 6128 February 13, 1978, 43 FR 21497 May 18, 1978, 43 FR 27224 June 23, 1978, 43 FR 57939 December 11, 1978 & 44 FR 12230 March 6, 1979.

Section 1. Purpose.

.01 This Order delegates authority to the Administrator of the National Oceanic and Atmospheric Administration ("NOAA") and prescribes the functions of NOAA.

.02 This revision: (1) Incorporates outstanding amendments; (2) brings the delegation of authority of the Administrator, NOAA, into conformance with the new Federal Grant and Cooperative Agreement Act of 1977 (subparagraph 3.01i); (3) delegates to the Administrator, NOAA, the Secretary's authority under Section 303(b)(3) of Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Subparagraph 3.01j); (4) delegates to the Administrator, NOAA, the Secretary's authority under the Antarctic Conservation Act of 1978 and the Fish and Wildlife Improvement Act of 1978 (subparagraphs 3.01kk, and 3.01ll); (5) delegates to the Administrator, NOAA, the Secretary's authority under the Endangered Species Act Amendments of 1978 (subparagraph 3.01x); and (6) generally updates the language of the Order.

Section 2. Status and Line of Authority.

.01 NOAA, established by Reorganization Plan No. 4 of 1970, effective October 3, 1970, is continued as an operating unit of the Department of Commerce.

.02 As provided by Reorganization Plan No. 4 of 1970:

a. The Administrator of NOAA, who is appointed by the President by and with the advice and consent of the Senate, shall be the head of NOAA.

b. The Deputy Administrator of NOAA, who is appointed by the President by and with the advice and consent of the Senate, shall perform such functions as the Administrator shall from time to time assign or delegate, and shall act as Administrator during the absence or disability of the Administrator or in the event of a vacancy in the office of Administrator.

c. The Associate Administrator of NOAA, who is appointed by the President by and with the advice and consent of the Senate, shall perform such functions as the Administrator shall from time to time assign or delegate, and shall act as Administrator during the absence or disability of the Administrator and Deputy Administrator.

.03 The Administrator shall report and be responsible to the Secretary of Commerce.

Section 3. Delegation of Authority.

.01 Pursuant to the authority vested in the Secretary of Commerce by Reorganization Plan No. 4 of 1970, Executive Order 11564 of October 6, 1970, and otherwise by law, the Administrator is hereby delegated authority to perform the following functions vested in the Secretary of Commerce; provided, however, that the Secretary reserves the authority to provide general policy guidance to the Administrator and, from time to time in the Secretary's discretion, either on the Secretary's own initiative or at the request of the Administrator, to consult with the Administrator to the extent permitted by law concerning the functions delegated by this section:

a. The functions in Title 15, Chapter 9, and in Title 49, Sections 1351 and 1463, of the U. S. Code, which relate to the provision of weather services.

b. The functions relating to weather in Title 49, Chapter 15 of the U. S. Code, which pertain to international aviation facilities.

c. The functions in 15 U.S.C. 272(f)(12), which relate to the transmission of radio waves, as applicable to the functions assigned herein.

d. The functions in Title 33, Chapter 17, U. S. Code, which pertain to commissioned officers, surveys and related matters.

e. The functions of Sections 901 (3)(a) and (b), 905 and 906 of Executive Order 11490, as amended, and the functions of Executive Order 10480, as amended. These relate to emergency

preparedness, provision of weather, geodetic, hydrographic, and oceanographic data in consonance with civil defense programs, and developing overall plans and programs for the fishing industry's continued production during an emergency.

f. The functions in Sections 3 and 4 of the Office of Management and Budget Circular No. A-62 of November 13, 1963, which pertain to the coordination of Federal meteorological services and supporting research.

g. The functions in Sections 3b. and 4 of the Office of Management and Budget Circular No. A-16 of May 6, 1967, which pertain to the establishment and maintenance of the National Networks of Geodetic Control, and to the Development and execution of a coordinated national program of geodetic surveys.

h. The functions in the President's memorandum of July 5, 1968, issued in accord with Senate concurrent resolution 67 of May 29, 1968, furthering participation in and support of the World Weather Program by the United States. The plan to be developed annually for submission by the President to Congress on the proposed participation by Federal agencies shall be prepared for transmittal to the President by the Secretary.

i. The functions in the Federal Grant and Cooperative Agreement Act of 1977 (Pub. L. 95-224), with regard to making grants and cooperative agreements, as they pertain to the authority delegated in this section.

j. The functions authorized to be performed by the Department of Commerce in accordance with Chapter 19B of Title 42, United States Code, relating to water resources planning.

k. The functions transferred to the Secretary of Commerce in Section 1 of the Reorganization Plan No. 4 of 1970. The functions are:

"(a) All functions vested by law in the Bureau of Commercial Fisheries of the Department of the Interior or in its head, together with all functions vested by law in the Secretary of the Interior or the Department of the Interior which are administered through that Bureau or are primarily related to the Bureau, exclusive of functions with respect to (1) Great Lakes fishery research and activities related to the Great Lakes Fisheries Commission, (2) Missouri River Reservoir research, (3) the Gulf Breeze Biological Laboratory of the said Bureau of Gulf Breeze, Florida, and (4) Trans-Alaska pipeline investigations.

"(b) The functions vested in the Secretary of the Interior by the Act of September 22, 1959 (Pub. L. 86-359, 73

Stat. 642, 16 U.S.C. 760e-760g; relating to migratory marine species of game fish).

"(c) The functions vested by law in the Secretary of the Interior, or in the Department of the Interior or in any officer or instrumentality of that Department, which are administered through the Marine Minerals Technology Center of the Bureau of Mines.

"(d) All functions vested in the National Science Foundation by the National Sea Grant College and Program Act of 1966 (80 Stat. 99), as amended (33 U.S.C. 1121 *et seq.*).

"(e) Those functions vested in the Secretary of Defense or in any officer, employee, or organizational entity of the Department of Defense by the provision of Pub. L. 91-144, 83 Stat. 326, under the heading 'Operation and maintenance, general' with respect to 'surveys and charting of northern and northwestern lakes and connecting waters,' or by other law, which come under the mission assigned as of July 1, 1969, to the United States Army Engineer District, Lake Survey, Corps of Engineers, Department of the Army and relate to (1) the conduct of hydrographic surveys of the Great Lakes and their outflow rivers, Lake Champlain, New York State Barge Canals, and the Minnesota-Ontario border lakes, and the compilation and publication of navigation charts, including recreational aspects, and the Great Lakes Pilot for the benefit and use of the public, (2) the conception, planning, and conduct of basic research and development in the fields of water motion, water characteristics, water quantity, and ice and snow, and (3) the publication of data and the results of research projects in forms useful to the Corps of Engineers and the public, and the operation of a Regional Data Center for the collection, coordination, analysis, and the furnishing to interested agencies of data relating to water resources of the Great Lakes.

"(f) So much of the functions of the transferor officers and agencies referred to in or affected by the foregoing provisions of this section as is incidental to or necessary for the performance by or under the Secretary of Commerce of the functions transferred by those provisions or relates primarily to those functions. The transfers to the Secretary of Commerce made by this section shall be deemed to include the transfer of authority, provided by law, to prescribe regulations relating primarily to the transferred functions."

l. The functions in Title 37 of the U.S. Code with respect to pay and allowances for the Commissioned Officer corps of NOAA established by

Section 4(d) of Reorganization Plan No. 4 of 1970.

m. The functions in Title 10 of the U.S. Code made applicable to commissioned officers of NOAA by 33 U.S.C. 857a.

n. The functions in following sections of Executive Order 11023: Sections 1 (a) through 1 (j) and 1 (1); Section 2(1); Section 3; Section 5; and Section 6. These relate to the appointment, promotion, retirement, separation, and resignation of commissioned officers of NOAA, and to the employment of public vessels.

o. The functions in Title II of the National Housing Act, as amended (12 U.S.C. 1715m), which pertain to mortgage insurance for commissioned officers to aid in the construction or purchase of homes.

p. The functions in 7 U.S.C. 450b and 2220, which relate to cooperation with outside sources and disposition of funds received.

q. The functions relating to the operation of (1) the National Oceanographic Instrumentation Center, (2) the National Oceanographic Data Center, and (3) the National Data Buoy Development Project, whose programs and activities were transferred to the Secretary of Commerce by Executive Order 11564.

r. The functions relating to (1) upper air observations taken on board ocean station vessels and at specific Pacific Trust Territories, and (2) hydroclimatic observations taken at stations located along U.S. rivers and the Great Lakes, which programs and activities were transferred to the Secretary of Commerce by Executive Order 11564.

s. The functions in Section 607 of the Merchant Marine Act, 1936, as amended by the Merchant Marine Act of 1970 (46 U.S.C. 1177), which relate to capital construction funds for those owning or leasing vessels which are operated in the fisheries of the United States, including, but not limited to, the adoption of regulations, and the preparation and signing of all necessary forms or agreements.

t. The functions prescribed in 15 U.S.C. 33d *et seq.*, which pertain to collection, maintenance and dissemination of information concerning weather modification activities.

u. The functions in 46 U.S.C. 749 (relating to the arbitration, compromise or settlement of maritime claims) with regard to any claim in the amount of \$5,000 or less involving a vessel operated by the Administration.

v. The functions prescribed by the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*).

w. The functions prescribed in the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 *et seq.*), including those prescribed in Pub. L. 94-370, subject to the following exceptions and limitations whereby the Secretary reserves the authority to:

1. Carry out the mediation functions under section 307(h) of the Act and to make the findings under subsections 307(c)(3) and 307(d) of the Act; and

2. Approve initial regulations for the implementation of the coastal energy impact program contained in section 308 of the Act.

x. The functions prescribed by the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

y. The functions prescribed by the Offshore Shrimp Fisheries Act of 1973, (16 U.S.C. 1100b *et seq.*).

z. The functions prescribed by the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1401 *et seq.* and 16 U.S.C. 1431 *et seq.*).

aa. The functions in Paragraphs 4 and 5, Office of Telecommunications Policy Circular No. 12 of October 12, 1973, which pertain to the coordination of Federal planning programs for environmental telecommunications systems and services.

bb. The functions assigned to the Secretary of Commerce by the Atlantic Tuna Convention Act of 1975, Pub. L. 94-70.

cc. The functions relating to section 202 of the Disaster Relief Act of 1974 (42 U.S.C. 5132) specified in the delegation of authority from the Secretary of Housing and Urban Development (40 FR 42769), effective September 16, 1975, which pertains to disaster warnings for meteorological catastrophes.

dd. The functions prescribed in the Fishery Conservation and Management Act of 1976, as amended (16 U.S.C. 1801 *et seq.* and other miscellaneous provisions), subject to the following exceptions and limitations.

1. The Secretary reserves the authority to:

(a) Submit the annual reports to the Congress and the President under subsection 305(f) of the Act;

(b) Make final findings and notifications under subsection 306(b) of the Act;

(c) To issue, in particular instances, preliminary fishery management plans and implementing regulations under subsection 201(g) of the Act in each instance where the Secretary specifically determines such action is appropriate; and

(d) In particular instances to approve, disapprove, partially disapprove, or issue a fishery management plan or

amendment and implementing regulations under sections 304 and 305 of the Act in each instance where the Secretary specifically determines that such action is appropriate.

2. To assure a full opportunity to the Secretary to exercise the authority which is reserved to the Secretary, the Administrator shall advise the Secretary before any final action is taken with respect to the following functions:

(a) The appointment of members of the Regional Fishery Management Councils under subparagraph 302(b)(1)(C) of the Act;

(b) The establishment of guidelines to assist in the development of fishery management plans under subsection 301(b) of the Act;

(c) The prescribing of uniform standards for each Regional Fishery Management Council under paragraph 302(f)(6) of the Act; and

(d) The taking of emergency actions under subsection 305(e) of the Act.

3. The Administrator shall not redelegate beyond an Assistant Administrator any of the final actions to be taken under those provisions of the Act set forth in subparagraphs 3.01dd.2(a) through (d) of this Order, or the establishment of schedules of fees under paragraph 204(b)(10) of the Act.

ee. The functions prescribed in the National Weather Modification Policy Act of 1976, Pub. L. 94-490, except that the Secretary reserves the authority to submit the final report to the President and the Congress under Section 5(a) of the Act.

ff. The functions prescribed by the Central, Western, and Southern Pacific Fisheries Development Act (16 U.S.C. 758e through 758e-5).

gg. The functions prescribed by the Whale Conservation and Protection Study Act (16 U.S.C. 917 through 917d).

hh. The functions prescribed by the Fisherman's Protective Act of 1967, as amended (22 U.S.C. 1977 *et seq.*).

ii. The functions prescribed by the National Climate Program Act (Pub. L. 95-367, September 17, 1978): *Provided, however, That the Secretary reserves the authority to:*

1. Submit 5-year plans to the Congress under section 5(d)(9) of the Act;

2. Establish the Advisory Committee under 5(e) of the Act; and

3. Submit the annual report to the President and the authorizing committees of the Congress under section 7 of the Act.

jj. The following functions prescribed by the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372, September 18, 1978):

1. The conduct of environmental studies and monitoring of the Outer Continental Shelf for the Secretary of the Interior as authorized by Section 20 of the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1346).

2. The conduct of studies of underwater diving techniques and equipment suitable for protection of human safety and improvement of diver performance as authorized by Section 21(e) of the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1347(e)).

3. Title IV of Pub. L. 95-372, pertaining to the Fishermen's Contingency Fund, except that the Secretary reserves the authority to submit the annual report to Congress required by section 406 (43 U.S.C. 1846).

4. Responsibilities related to assertion of claims against the Offshore Oil Pollution Compensation Fund for injury, to or damage of natural resources and to expenditure of sums recovered for the restoration, rehabilitation or acquisition of equivalent natural resources as authorized by Section 303(b)(3) of Pub. L. 95-372 and delegated to the Secretary of Commerce by Executive Order 12123 of February 26, 1979.

kk. The functions assigned to the Secretary of Commerce by the Antarctic Conservation Act of 1978 (Pub. L. 95-541).

ll. The functions assigned to the Secretary of Commerce by the Fish and Wildlife Improvement Act of 1978 (Pub. L. 95-616).

02 The Administrator may exercise other authorities of the Secretary as applicable to performing the functions assigned in this Order.

03 The Administrator may delegate the Administrator's authority to any employee of NOAA subject to such conditions in the exercise of such authority as the Administrator may prescribe or as may be prescribed in this Order.

Section 4. Functions.

To insure the safety and welfare of the public, and to further the Nation's interests and activities with respect to the protection of public health against environmental pollution, the protection and management of the Nation's biological, mineral and water resources, the maintenance of environmental quality, agriculture, fisheries, industry, transportation, communications, space exploration, national defense, and the preservation of the Nation's wilderness and recreation areas, NOAA shall perform the following functions:

a. Observe, collect, communicate, analyze, process, provide and

disseminate comprehensive data and information about the state of the upper and lower atmosphere, of the oceans and the resources thereof including those in the seabed, of marine and anadromous fish and related biological resources, of inland waters, of the earth, the sun and the space environment;

b. Prepare and disseminate predictions of the future state of the environment and issue warnings of all severe hazards and extreme conditions of nature to all who may be affected;

c. Provide maps and charts of the oceans and inland waters for navigation, geophysical and other purposes, aeronautical charts, and related publications and services;

d. Operate and maintain a system for the storage, retrieval and dissemination of data relating to the state and resources of the oceans and inland waters including the seabed, and the state of the upper and lower atmosphere, of the earth, the sun and the space environment;

e. Explore the feasibility of, develop the basis for, and undertake the modification and control of environmental phenomena;

f. Coordinate efforts pertinent to Federal agencies in support of national and international programs as may be assigned from time to time, such as Federal meteorological services and supporting research, World Weather Program, National Networks of Geodetic Control, Integrated Global Ocean Station System, and Marine Environmental Prediction, Mapping and Charting;

g. Administer a program of sea grant colleges and education, training and research in the fields of marine science, engineering and related disciplines as provided in the Sea Grant College and Program Act of 1966, as amended;

h. Perform basic and applied research and develop technology relating to the state and utilization of resources of the oceans and inland waters including the seabed, the upper and lower atmosphere, the earth, the sun and the space environment, as may be necessary or desirable to develop an understanding of the processes and phenomena involved;

i. Perform research and develop technology relating to the observation, communication, processing, correlation, analysis, dissemination, storage, retrieval, and use of environmental data as may be necessary or desirable to permit NOAA to discharge its responsibilities;

j. Acquire, analyze and disseminate data and perform basic and applied research on electromagnetic waves, as

relate to or are useful in performing other functions assigned herein; prepare and issue predictions of atmospheric, ionospheric and solar conditions, and warnings of disturbances thereof; and acquire, analyze and disseminate data and perform basic and applied research on the propagation of sound waves, and on interactions between sound waves and other phenomena;

k. Administer a program for the protection, management and conservation of marine mammals and endangered marine species; provide for the administration of the Pribilof Islands; assist the native inhabitants of those islands; and manage the fur seal herds of the North Pacific Ocean;

l. Perform economic studies, education and other services related to management and utilization of marine and anadromous fisheries, administer grant-in-aid, fishery products inspection, financial and technical assistance, and other programs to conserve and develop fisheries resources and to foster and maintain a viable climate for industry to produce efficiently under competitive conditions;

m. Develop and implement policies on international fisheries including the negotiation and implementation of agreements, conventions and treaties in that area; and enforce provisions of international treaties and agreements on fishing activities of United States nationals and perform surveillance of foreign fishing activities;

n. Participate in technical assistance programs for fishery development projects in foreign countries;

o. Develop technology and carry out scientific and engineering data collection and analysis and other functions to assess, monitor, harvest, and utilize marine and anadromous fishery resources and their products;

p. As a Departmentwide responsibility, coordinate the requirements for and the management and use of radio frequencies by all organizations of Commerce;

q. Administer a national management program to preserve, protect, develop, and where possible restore or enhance the land and water resources of the coastal zones, including grants, loans, and loan guarantees to the States and interagency coordination and cooperation, as provided by the Coastal Zone Management Act of 1972, as amended; and

r. Administer a marine sanctuaries program to preserve or restore such areas for their conservation, recreational, ecological, or esthetic values.

Effective date: July 12, 1979.

Guy W. Chamberlin, Jr.,
Acting Assistant Secretary for
Administration.

BILLING CODE 3510-17-M

[Dept. Organization Revocation Notice]

U.S. Fire Administration; Statement of Organization, Functions, and Delegation of Authority

This order effective August 6, 1979 supersedes the material appearing at 40 FR 25702 of June 18, 1975, 44 FR 12230 of March 6, 1979 and 44 FR 15523 of March 14, 1979.

Department Organization Orders 25-6A, dated April 28, 1975 as amended and 25-6B, dated February 6, 1979 are hereby revoked.

Explanation

In accordance with Reorganization Plan No. 3 of 1978, the functions, personnel, funds, property, and records of the United States Fire Administration have been transferred from the Department of Commerce to the Federal Emergency Management Agency effective April 1, 1979.

Effective date: August 6, 1979.

Guy W. Chamberlin, Jr.,
Acting Assistance Secretary for
Administration.

BILLING CODE 3510-17-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Cancelling Import Restraint Level on Certain Man-Made Fiber Textile Products from the Dominican Republic

August 16, 1979.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Cancelling the import restraint level established on man-made fiber brassieres in Category 649, produced or manufactured in the Dominican Republic and exported to the United States during the twelve-month period which began on December 1, 1978.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the *Federal Register* on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), September 5, 1978 (43 FR 39408), January 2, 1979 (44 FR 94), March 22, 1979 (44 FR 17545), and April 12, 1979 (44 FR 21843))

SUMMARY: On August 7 and 8, 1979, the Governments of the United States and the Dominican Republic exchanged notes establishing a new Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement for the four-year period beginning on June 1, 1979 and extending through May 31, 1983. Accordingly, there is published below a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs cancelling the directive of March 12, 1979, as amended, which limited imports of man-made fiber textile products during the twelve-month period which began on December 1, 1978.

EFFECTIVE DATE: August 16, 1979.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

Arthur Carel,

Acting Chairman, Committee for the
Implementation of Textile Agreements.

Committee for the Implementation of Textile
Agreements, August 16, 1979.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: This directive cancels and supersedes the directive issued to you on March 12, 1979, as amended, by the Chairman of the Committee for the Implementation of Textile Agreements, which directed you to prohibit entry for consumption or withdrawal from warehouse for consumption of man-made fiber textile products in Category 649, produced or manufactured in the Dominican Republic and exported to the United States during the twelve-month period which began on December 1, 1978.

The actions taken with respect to the Government of Dominican Republic and with respect to imports of textile products from Dominican Republic have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs which are necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the *Federal Register*.

Sincerely,

Arthur Carel,

Acting Chairman, Committee for the
Implementation of Textile Agreements.

[FR Doc. 79-25832 Filed 8-20-79; 8:45 am]

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, October 2, 1979; Tuesday, October 9, 1979; Tuesday, October 16, 1979; Tuesday, October 23, 1979; and Tuesday, October 30, 1979 at 10:00 a.m. in Room 3D-325, The Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Public Law 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92-463, the Federal Advisory Committee Act, meetings may be closed to the public when they are "concerned with matters listed in section 552b. of Title 5, United States Code." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b. (c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b. (c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b. (c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b. (4)).

However, members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this

meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D-281, The Pentagon, Washington, D.C.

H. E. Lofdahl,

Director, Correspondence and Directives,
Washington Headquarters Services,
Department of Defense.

August 16, 1979.

BILLING CODE 3510-70-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Public Notice of Proposed Floodplain Action

Bonneville Power Administration (BPA) is proposing the reconductoring of 33 miles (53 km) of 115-kV transmission line to higher capacity. For a total of approximately 10 miles (16 km) between Colville and Spirit Substations in northeast Washington State, this action would be located in the floodplains of Mill Creek and the South Fork of Deep Creek. Minimal impacts to the floodplains are anticipated because existing access roads and right-of-way would be utilized. Existing facilities would also be used, with the exception of one new lattice steel tower to allow spanning a frequently flooded area. The only alternative that would completely avoid floodplains is no action, which would lead to impending overload conditions. All other location alternatives would require establishing a new transmission corridor and would result in greater environmental impacts. The proposed action conforms to applicable State and local floodplain protection standards. An environmental assessment including effects of the proposed action on the floodplains has been prepared.

Comments or requests for the environmental assessment may be directed to the Environmental Manager's Office, Bonneville Power Administration, P.O. Box 3821, Portland, OR 97208, telephone 503-234-3361, extension 4721. The public comment period will close September 21, 1979.

Dated at Portland, Oregon, this 13 day of August, 1979.

Ray Foleen,
Deputy Administrator.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

Advisory Committee on Revision of Rules of Practice and Procedure; Meeting

August 15, 1979.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770); notice is hereby given that the Advisory Committee on Revision of Rules of Practice and Procedure will meet Friday, September 7, 1979 from 10 a.m. to 3 p.m., at the Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Hearing Room A, Washington, D.C.

The purpose of the meeting is to discuss the recommendations of the Subcommittee on *Ex Parte* and Separation of Functions.

The meeting is open to the public. A transcript of the meeting will be available for public review and copying at FERC's Division of Public Information, Room 1000, 825 North Capitol Street NE., between the hours of 8:30 a.m. and 5:00 p.m. Monday through Friday except Federal holidays. In addition, any person may purchase a copy of the transcript from the reporter. Kenneth F. Plumb, Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1301.5]

Update of Power Plants Potentially Subject to Section 120 Noncompliance Penalties; Availability; Correction

AGENCY: U.S. Environmental Protection Agency.

ACTION: Correction notice to FRL 1288-4 published in the Federal Register, Vol. 44, No. 151, Friday, August 3, 1979, pages 45752-45754, Notice of Availability of information updated in support of proposed rule for Section 120 noncompliance penalties.

SUMMARY: Several errors were made when the above-referenced notice of availability was published on August 3, 1979. The supplementary information and accompanying list of power plants was intended to be made available through docket number EN-79-1 rather than being published with the notice. The list published in the August 3 Federal Register was not the most up-to-date list. The following changes to that list should be made to conform it to the

corrected copy, as contained in the official docket referenced above:

1. The Springfield W. L&P Lakeside station in Illinois should be shown as being in violation and on an unapproved schedule for visible emissions only.

2. The reference to Kansas City G&E Quindaro and Kaw River Plants should have been to the Kansas City Board of Public Utilities Quindaro and Kaw River plants.

3. The Cincinnati Gas and Electric Beckjord station name was misspelled.

4. The reference to Western Illinois Electric should have been to the Western Illinois Power Co-op.

5. All Commonwealth Edison and Western Illinois Power Co-op plants listed should have been under category #1, i.e.—"According to information available to the US EPA, the following sources are in final compliance with applicable SIP regulations. If such compliance is maintained, there will be no assessment of noncompliance penalties." (See EPA's Notice of Deficiency, 44 FR 40723, July 12, 1979)

FOR FURTHER INFORMATION CONTACT: Howard Wright, Chief, Compliance Analysis Section, Division of Stationary Source Enforcement, Environmental Protection Agency at (202) 755-0103.

Dated: August 16, 1979.

Edward E. Reich,
Director, Division of Stationary Source Enforcement (EN-341).

BILLING CODE 6560-01-M

[OPP-00102; FRL 1301-4]

State-FIFRA Issues Research and Evaluation Group (SFIREG); Working Committee on Enforcement; Open Meeting

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Notice of Open Meeting.

SUMMARY: There will be a two-day meeting of the Working Committee on Enforcement of the State FIFRA Issues Research and Evaluation Group (SFIREG) on Wednesday and Thursday, September 12 and 13, 1979, beginning each day at 8:00 a.m. and ending by noon on September 13th. The meeting will be held at the American West 6th Avenue Motor Hotel, 2000 6th Avenue, Seattle, Washington, Telephone: 206/682-8300, and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Mr. William Buffalo, North Carolina Department of Agriculture, Raleigh, North Carolina, Telephone: 919/733-3558;

or

Mr. Anthony Dellavechia, Pesticide and Toxic Enforcement Division (EN-342), EPA, 401 M Street SW., Washington, D.C. 20460, Telephone: 202/755-0914.

SUPPLEMENTARY INFORMATION: This is the third meeting of the Working Committee on Enforcement. The tentative agenda is as follows:

1. ULV Report, Advisory Opinion and future plans;
2. Development for Inspector Manuals of uniform recommendations on size of pesticide samples which should be taken for laboratory analysis;
3. Discussion of enforcement actions taken by EPA on cases submitted by the States under enforcement grants;
4. Sale of restricted use pesticides to uncertified applicators when the pesticide is to be applied by a certified applicator;
5. Regulation of pesticide drift; and
6. Warning statement enforcement procedures.

Dated: August 15, 1979.

Edwin L. Johnson,
Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Policy on § 706 Designation of Personnel Boards, Merit Boards, and Civil Service Systems

SUPPLEMENTARY INFORMATION: On June 26 the Commission voted to grant to the Colorado Personnel Board (CPB) 706 designation. This action was taken only after exhaustive analysis of the issues involved by the Commissioners and their staffs with the assistance of the Office of the General Counsel, the Office of Field Services and the Office of Policy Implementation. It was determined that the requirements of law and the interest of charging parties mandated the designation. Similarly situated State and local personnel boards, merit boards or civil service systems will be treated similarly. Simultaneously with issuing notice of this action, the Commission has also today published new proposed regulations for the 706 designation process itself. Because the original proposal to grant 706 status to the CPB caused such concern, both within the Commission and among members of the public, we are issuing the following statement explaining the background and facts that have led to the 706 designation of the CPB.

On October 6, 1978 the Fifth Circuit Court of Appeals, pursuant to an en banc hearing, rendered an opinion in *White v. Dallas Independent School District*, 581 F.2d 558. The Court found that Section 706(c) of Title VII requires deferral whenever a state has a law prohibiting employment discrimination and has established an enforcement authority of any kind. The effect of the Court's reasoning, which appears to be shared by the Sixth and Ninth Circuits, *Mitchell v. Mid-Continent Spring Co.*, 466 F.2d 24 (8th Cir. 1972), *Cert. denied*, 410 U.S. 928 (1973); *Ferguson v. Kroger Co.*, 545 F.2d 1034 (8th Cir. 1976); *General Insurance Co. v. EEOC*, 491 F.2d 133 (9th Cir. 1974); *Crosslin v. Mountain States Telephone and Telegraph Co.*, 400 U.S. 1004 (1971), vacating 422 F.2d 1028 (9th Cir. 1970), is that 706 deferral status arises by operation of law and not by virtue of the Commission conferring such designation. The *White* case arose because the Commission had not deferred Ms. White's employment discrimination charge to the appropriate Texas County Attorney who had authority to process charges of discrimination pursuant to a Texas statute. When Ms. White sought to bring a federal suit on her Title VII claim, both the District Court and the Fifth Circuit Court dismissed her action for want of jurisdiction due to the lack of deferral. The Court of Appeals, in its en banc decision, re-affirmed the panel opinion that deferral was required, but reluctantly reinstated Ms. White's Title VII action.

The proposal to designate the Colorado Personnel Board (CPB) as a 706 agency caused considerable concern as to the *White* Court's reasoning and the extent of Commission discretion, if any, on the deferral question. Under the *White* reasoning, the Board is a 706 agency and the Commission must defer charges to it.

Numerous FEP Agencies and persons within the Commission expressed concern about adopting the *White* standard beyond the Fifth Circuit. At the recent conference in Philadelphia with representatives from almost all the 706 agencies, this question was a volatile issue. There was almost unanimous consent that *White* should not be applied outside the Fifth Circuit. There is belief that, with such a minimal standard, state and local governments will be encouraged to create token agencies or seek to withdraw jurisdiction from established agencies so as to weaken effective enforcement of FEP laws. It is for this reason that the proposal had been made not to designate personnel boards with FEP

law enforcement authority as 706 agencies. There is belief that personnel boards are too self-interested to fairly and objectively apply the law.

There is also the fear that designation of any personnel boards will encourage state to remove jurisdiction over state employees from state human rights agencies and lodge that jurisdiction in some ineffective branch of the state government.

Nonetheless, upon analysis of the applicable case law and of Section 706(c) of Title VII, including the legislative history of that Section, the Commission was compelled to adopt the *White* standard and find that the CPB qualified for 706 designation. The Court in *White* set forth the standards which the Commission is required to apply in deferring charges to state and local authorities under Section 706(c):

The statute on its face sets out three requirements. The practice alleged must violate the federal law, Title VII; it must also violate a state or local law prohibiting the practice alleged; the state must have set up some mechanism to deal with the violation. That last requirement is fulfilled if the state has either established a state or local authority or authorized an existing state or local authority that is empowered to do one of three things: to grant relief from the practice; to seek relief from the practice; or to institute criminal proceedings with respect to the practice. 42 U.S.C. 2000e-5; 581 F.2d at 558-59.

A comparison of this standard with the actual language of Section 706(c) demonstrates that the *White* Court did not invent its own criteria but merely paraphrased, point for point, the elements of 706(c). The Court's reasoning, therefore, is parallel to the language of the statute.

The CPB qualifies as a 706 agency under the *White* standard, and, indeed, under a literal reading of the statute, but not by virtue of simply being a personnel board. The CPB is an existing state authority empowered to enforce a state FEP statute on behalf of state employees. The CPB has been found by the Colorado State Supreme Court to be the *only* agency through which government employees may seek redress of employment discrimination. This holding is based upon provisions of the State Constitution giving the Personnel Board *exclusive* jurisdiction over such matters. The Court found that the Colorado Civil Rights Commission did not have jurisdiction over state government employees. However, designation of the CPB does *not* mean the Commission will find any and all personnel boards to be qualified deferral agencies.

Whatever ill may flow from the designation of the CPB can be offset by two potent policies. The Commission has already established that 706 designation and funding are separate and distinct matters. While 706 designation has been considered the threshold issue for funding eligibility, it is not determinative. Effective enforcement of FEP laws is the essential criterion. In this regard, the Commission has established as a matter of policy that personnel boards, merit boards, and civil service systems shall not be funded. Also a District Office may recommend at any time the policy whereby the Commission assumes actual processing of charges deferred to personnel boards, merit boards or civil service systems on the 61st (or 121st) day regardless of the board's action or interaction.

FOR FURTHER INFORMATION CONTACT: Dorothy D. Howze, telephone 202-634-6040, Equal Employment Opportunity Commission (State and Local), 2401 E Street, N.W., Washington, D.C. 20506.

Signed at Washington, D.C., this day of July 26, 1979.

For the Commission:
Eleanor Holmes Norton,
Chair, Equal Employment Opportunity Commission.

BILLING CODE 6570-06-M

FEDERAL COMMUNICATIONS COMMISSION

[BC Docket No. 79-200, File No. BPH-9319; et al.]

Portland Communications Corp., et al.

Adopted: August 6, 1979.

Released: August 15, 1979.

In the matter of applications of Portland Communications Corporation, Portland, Oregon, Req: 103.3 MHz, #277, 100 kW, 877 feet (BC Docket No. 79-200, File No. BPH-9319); Gordon A. Rogers, Robert M. Schaefer, and John E. Wynne d.b.a. Columbia-Willamette Broadcasting Company, Beaverton, Oregon, Req: 103.3 MHz, #277, 100 kW, 940 feet (BC Docket No. 79-201, File No. BPH-9634); East-West FM Group, Inc., Portland, Oregon, Req: 103.3 MHz, #277, 100 kW, 897 feet (BC Docket No. 79-202, File No. BPH-9635); Leonard Kesselman, Laura Hopper, and Raymond Benton d.b.a. Gaviota Wireless Communications Company, Beaverton, Oregon, Req: 103.3 MHz, #277, 100 kW, 901 feet (BC Docket No. 79-203, File No. BPH-9681); for construction permits. Memorandum Opinion and Order

designating applications for consolidated hearing on stated issues.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications, filed by Portland Communications Corporation (hereinafter "Portland"), Gordon A. Rogers, Robert M. Schaefer, and John F. Wynne d.b.a. Columbia-Willamette Broadcasting Company (hereinafter "Columbia-Willamette"), East-West FM Group, Inc. (hereinafter "East-West") and Leonard Kesselman, Laura Hopper, and Raymond Benton d.b.a. Gaviota Wireless Communications Company (hereinafter "Gaviota").

2. Analysis of the financial data submitted by Gaviota reveals that \$62,249 will be required to construct and operate the proposed station for three months, itemized as follows:

Equipment (5 months rent plus last month pre-paid)	\$9,012
Building	500
Legal	30,000
Installation	1,000
Other	1,000
Operating Costs (3 months)	20,737
Total	62,249

Gaviota plans to finance the construction and operation of its proposed station with the proceeds of a loan of \$67,000 from Jeremy D. Lansman. As the financial statement submitted for Mr. Lansman by Gaviota fails to segregate his assets and liabilities into short and long term categories, no determination can be made as to his ability to make such a loan to the applicant corporation. Therefore, a limited financial issue will be specified with respect to Gaviota.

3. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

4. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive with each other, they must be designated for hearing in a consolidated proceeding on the issues specified below.

5. Accordingly, IT IS ORDERED. That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications, ARE DESIGNATED FOR

HEARING IN A CONSOLIDATED PROCEEDING, at a time and place to be specified in the subsequent Order, upon the following issues:

1. To determine whether Jeremy D. Lansman has available the funds necessary to make the proposed \$67,000 loan to Gaviota and, in light thereof, whether Gaviota is financially qualified.

2. To determine the areas and populations which would receive primary aural service (1 mV/m or greater) from Portland, Columbia-Willamette, East-West and Gaviota and the availability of other primary service to such areas and populations.

3. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

4. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

5. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

6. It is further ordered, That, to avail themselves of an opportunity to be heard, the applicants, pursuant to § 1.221(c) of the Commission's Rules, in person, or by attorney shall, within twenty (20) days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

7. It is further ordered, That, the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rules, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.
Richard J. Shiben,
Chief, Broadcast Bureau.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

U.S. Fire Administration

Sale of Real Property

The United States Fire Administration (USFA) is offering for sale the site of the former Marjorie Webster Junior College in northwest Washington, D.C. The site was purchased by the USFA in 1977 for use as the National Fire Academy; subsequently a larger facility was obtained to house the Academy.

The Administrator, USFA, is selling the property pursuant to Pub. L. 95-422, which authorizes the sale without regard to the provisions of the Federal Property and Administrative Services Act of 1949. The proceeds from the sale will be used to defray the renovation expense at the National Fire Academy, Emmitsburg, Maryland; therefore, only offers for value will be considered.

A bidder's information package is available from USFA. Requests should be directed to: Daniel P. Cosgrove, Assistant General Counsel for Fire, Federal Emergency Management Agency, Washington, D.C. 20472, Telephone: (202) 632-9685. The site may be previewed by appointment only.

The USFA reserves the right to accept or reject any or all bids, and to sell the site in its entirety or any portion thereof.

Bids, to be considered, should be received prior to November 1, 1979.

Dated: August 15, 1979.

Gordon Vickery,

Administrator, U.S. Fire Administration.

[FR Doc. 79-25885 Filed 8-20-79; 8:45 am]

BILLING CODE 4210-23-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

Mine Health Research Advisory Committee; Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), the Center for Disease Control announces the following National Institute for Occupational Safety and Health Committee meeting:

Name: Mine Health Research Advisory Committee.

Date: September 13, 1979.

Place: Conference Room C, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Time: 9 a.m.

Type of Meeting: Open: 9 a.m. to 4 p.m. on September 13. Closed: Remainder of meeting.

Contact Person: William A. Felsing, Jr.,
Interim Executive Secretary, 5600 Fishers
Lane, Room 8-47, Rockville, Maryland
20857, Phone: 301-443-3443.

Purpose: The Committee is charged with advising the Secretary, Department of Health, Education, and Welfare, on matters involving or relating to mine health research, including grants and contracts for such research.

Agenda: Agenda items for the open portion of the meeting will include announcements, consideration of future meeting dates, a discussion of the legislative background of the Federal Mine Safety and Health Amendments Act of 1977 (P.L. 95-164) and its implications for the National Institute for Occupational Safety and Health (NIOSH), the NIOSH mine research program including mine industry surveillance, coal workers' surveillance, health hazard evaluations, industry-wide studies of the mining industry, and mine health standards development. Discussions will also be held relative to the health issues related to development of new energy technology and discussion of mine health priorities. Beginning at 4 p.m., the Committee will be performing the final review of the mine research grant applications for Federal assistance, and this portion of the meeting will not be open to the public in accordance with the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code, and the Determination by the Director, Center for Disease Control, pursuant to Pub. L. 92-463.

Agenda items are subject to change as priorities dictate.

The portion of the meeting so indicated is open to the public for observation and participation. Anyone wishing to make an oral presentation should notify the contact person listed above as soon as possible before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the presentation. Oral presentations will be scheduled at the discretion of the Chairperson and as time permits. Anyone wishing to have a question answered during the meeting by a scheduled speaker should submit the question in writing, along with his or her name and affiliation, through the Executive Secretary to the Chairperson. At the discretion of the Chairperson and as time permits, appropriate questions will be asked of the speakers.

A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: August 15, 1979.

William H. Fooge,

Director, Center for Disease Control.

BILLING CODE 4110-07-M

Food and Drug Administration

[Docket No. 78N-0135]

John D. Copanos, Inc., et al.;
Dihydrostreptomycin,
Dihydrostreptomycin-Streptomycin
Injectable Drugs for Animal Use;
Withdrawal of Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document withdraws approval of new animal drug applications (NADA's) for certain dihydrostreptomycin, and dihydrostreptomycin-streptomycin injectable drugs for animal use. This action is being taken because the sponsors have not filed appearances in response to a notice of opportunity for hearing on a proposal to withdraw the applications.

EFFECTIVE DATE: August 31, 1979.

FOR FURTHER INFORMATION CONTACT: Donald Gable, Bureau of Veterinary Medicine (HFV-101), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4313.

SUPPLEMENTARY INFORMATION: In the Federal Register of June 27, 1978 (43 FR 27894), the Food and Drug Administration issued a notice pertaining to dihydrostreptomycin, and dihydrostreptomycin-streptomycin injectable drugs for animal use. The notice stated that dihydrostreptomycin sulfate injectable is effective in the treatment of leptospirosis in dogs and horses due to *Leptospira canicola*, *L. icterohemorrhagiae* and *L. pomona*; in cattle due to *L. pomona* and in swine due to *L. pomona* and *L. grippotyphosa*. The notice also stated that dihydrostreptomycin injectable lacks substantial evidence of effectiveness for all other labeled indications and that there is no evidence to establish that the combination of dihydrostreptomycin-streptomycin injectable is effective for any indication. The notice permitted sponsors to submit supplements to their NADA's for revised labeling in accord with the effective uses and offered an opportunity for hearing to the sponsors for the indications lacking substantial evidence of effectiveness.

The following companies and products were identified as being subject to the notice:

NADA 65-120V, Dihydrostreptomycin Sulfate Injection; NADA 65-138V, Bi-Strept Solution (Dihydrostreptomycin-Streptomycin Sulfates Solution); NADA 65-231V, Dihydrostreptomycin for

Injection. John D. Copanos, Inc., Baltimore, MD 21225.

NADA 65-013V, Dihydrostreptomycin Sulfate Injection; NAS-069, Dihydrostreptomycin Sulfate-Streptomycin Sulfate Solution Veterinary. Maury Biological Co., Inc., Los Angeles, CA 90047.

NADA 65-097V, Twin Biotic Injectable (Dihydrostreptomycin Sulfate and Streptomycin Sulfate). Vineland Laboratories, Inc., Vineland, NJ 08360.

Maury Biological Co., Inc., submitted revised labeling regarding NADA 65-013V which was approved and notice published in the Federal Register of February 9, 1979 (44 FR 8260).

John D. Copanos, Inc., submitted revised labeling regarding NADA 65-120V which was found to be incomplete; the agency has informed the sponsor of the deficiencies. This application will be subject to a future Federal Register publication.

The following sponsors did not submit revised labeling, file a timely written appearance, or request a hearing: John D. Copanos, Inc., regarding NADA 65-138V or NADA 65-231V; Maury Biological Co., Inc., regarding NAS-069; or Vineland Laboratories, Inc., regarding NADA 65-097V.

Failure to file a written appearance or request for hearing within the 30-day period provided, as required by § 514.200 *Contents of notice of opportunity for a hearing* (21 CFR 514.200) is construed as an election by the sponsor not to avail itself of the opportunity for hearing and is grounds for entering a final order without further notice.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84) and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 65-138V, NADA 65-231V, NADA 65-097V, and NAS-069 and all supplements and amendments thereto is hereby withdrawn, effective August 31, 1979.

Dated: August 13, 1979.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

[FR Doc. 79-25907 Filed 8-20-79; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 79N-0244]

**National Patent Development Corp.;
Premarket Approval of Hydron®
(Polymacon) Hydrophilic Contact Lens****AGENCY:** Food and Drug Administration.**ACTION:** Notice.

SUMMARY: The Food and Drug Administration (FDA) announces approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Hydron® (polymacon) Hydrophilic Contact Lens sponsored by National Patent Development Corp., New Brunswick, NJ. After reviewing the Ophthalmology Device Classification Panel's recommendation, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by September 20, 1979.

ADDRESS: Requests for copies of the summary of safety and effectiveness, data and petitions for administrative review may be sent to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Keith Lusted, Bureau of Medical Devices (HFK-402), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: The sponsor, National Patent Development Corp., New Brunswick, NJ 08902, submitted an application for premarket approval of the Hydron® (polymacon) Hydrophilic Contact Lens to FDA on October 16, 1978. The application was reviewed by the Ophthalmology Device Classification Panel, an FDA advisory committee, which recommended approval of the application. On April 6, 1979, FDA approved the application by a letter to the sponsor from the Director of the Bureau of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (Pub. L. 94-295, 90 Stat. 539-583 (the amendments)), soft contact lenses and solutions were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)) (the act), soft contact lenses and solutions are now regulated as class III devices (premarket

approval). As FDA explained in a notice published in the Federal Register of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly considered new drugs. Furthermore, FDA requires, as a condition to approval, the sponsors of applications for premarket approval of soft contact lenses or solutions comply with the records and reports provisions of Part 310 (21 CFR Part 310), Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the information on which FDA's approval is based is available upon request from the Hearing Clerk (HFA-305), address above. Requests should be identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document.

The labeling of the Hydron® (polymacon) Hydrophilic Contact Lens, like that of other approved soft contact lenses, states that the lens is the only to be use with certain solutions for disinfection and other purposes, the restrictive labeling helps to inform new lens users that they must avoid purchasing inappropriate products, e.g., solutions for use with hard contact lenses. However, the restrictive labeling needs to be updated periodically to refer to new solutions that FDA approves for use with an approved lens. A sponsor who fails to update the restrictive labeling may violate the misbranding provisions of section 502 of the act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41-58), as amended by the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (Pub. L. 93-637). Furthermore, failure to update the restrictive labeling to refer to new solutions that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens, under section 515(e)(1)(F) of the act (21 U.S.C. 360e(e)(1)(F)). Accordingly, whenever FDA publishes a notice in the Federal Register of the agency's approval of a new solution for use with an approved lens, the sponsor of the lens shall correct its labeling to refer to the new solution, at the next printing or at any other time as FDA prescribes by letter to the sponsor.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g)

of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of the FDA administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petition must designate the form of review requested (hearing or independent advisory committee) and must be accompanied by supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing any petition, FDA will decide whether to grant or deny the petition and publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before September 20, 1979, file with the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, four copies of each petition and supporting data and information, identified with the name of the device and the Hearing Clerk Docket number found in brackets in the heading of this document. Received petitions may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 13, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

[Docket No. 79N-0315]

**Diagnostic Radiology and Nuclear
Medicine Quality Assurance Programs;
Open Meeting****AGENCY:** Food and Drug Administration.**ACTION:** Notice.

SUMMARY: The Food and Drug Administration announces an open meeting to be conducted under contract by the American College of Radiology to discuss means of motivating diagnostic radiology and nuclear medicine facilities

to voluntarily establish quality assurance programs.

DATES: The meeting will be held September 6 and 7, 1979; sessions will convene at 9 a.m. on September 6 and at 8:30 a.m. on September 7.

ADDRESS: The meeting will be held at Arlington Hyatt House Hotel, 1325 Wilson Blvd., Arlington, VA 22209.

FOR FURTHER INFORMATION CONTACT: Richard E. Gross or Roger L. Burkhardt, Bureau of Radiological Health (HFX-70), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2436.

SUPPLEMENTARY INFORMATION: Participants from industry, government, and appropriate professional organizations have been invited to make presentations and/or participate in workshops to discuss the problems delaying the establishment of programs in diagnostic radiology and nuclear medicine facilities. Other interested persons may attend the sessions as observers and, to the extent that time permits, express their views.

The goal of the meeting is to recommend mechanisms for motivating personnel in diagnostic radiology and nuclear medicine facilities to establish quality assurance programs. Proceedings of the open meeting will be published as a Bureau of Radiological Health (BRH) technical report. Availability of the report will be announced in the BRH Bulletin at a later date.

August 14, 1979.

William F. Randolph,
Acting Associate Commissioner for
Regulatory Affairs.

BILLING CODE 4110-03-M

**INTERAGENCY REGULATORY
LIAISON GROUP****Testing Standards and Guidelines
Work Group; Availability of Draft
Guidelines and Public Meeting**

AGENCY: Interagency Regulatory Liaison Group (IRLG), representing the Consumer Product Safety Commission (CPSC); the Environmental Protection Agency (EPA), the Food and Drug Administration, Department of Health Education and Welfare (FDA); the Food Safety and Quality Service, Department of Agriculture (FSQS); and the Occupational Safety and Health Administration, Department of Labor (OSHA).

ACTION: Notice of availability of draft guidelines and public meeting.

SUMMARY: A package containing drafts of the following IRLG guidelines is available: Acute Eye Irritation, Acute Oral Toxicity in Rodents, Acute Dermal Toxicity, Acute Inhalation, and Teratogenicity. These guidelines are being developed by the Testing Standards and Guidelines Work Group of the IRLG, for use when testing chemicals for toxicity.

REQUESTS FOR GUIDELINES: Single sets of guidelines may be obtained by writing to: Industry Assistance Office (TS-799), Environmental Protection Agency, 401 "M" Street, Washington, DC 20460, or by calling (800) 424-9065 (Toll Free) or (202) 554-1404.

DATE: Any written comments on the guidelines should be submitted by October 19, 1979.

ADDRESS: Comments should be addressed to Dr. Victor Morgenroth, III, HFF-185, Food and Drug Administration, Bureau of Foods, Division of Toxicology, 200 "C" Street, SW, Washington, DC 20204. Comments may be examined in the IRLG Office, Room 509, 1111 18th Street, NW, Washington, DC 20207, 9:00 a.m. to 4:00 p.m., Monday through Friday.

PUBLIC MEETING DATE AND LOCATION: A public meeting to discuss the guidelines and comments on the guidelines will be held at 9:00 a.m. on October 30, 1979, Auditorium, Main Floor, Hubert H. Humphrey Building, 200 Independence Avenue, SW, Washington, DC 20201. Work Group members representing the five IRLG agencies will discuss the philosophy of the Work Group, comparisons with other guidelines, the relationship of IRLG guidelines to other proposed guidelines, and future activities of the Work Group. Scientific issues of each guideline will be addressed individually, and the public will have opportunity to participate in all discussions. The proceedings will be recorded and made available to the public upon request at a later date.

SUPPLEMENTAL INFORMATION:**Background**

The IRLG was established for the purpose of improving public health through sharing of information, avoiding duplication of effort, and developing consistent regulatory policy. The testing of chemicals to determine their health effects is a fundamental step in many of the regulatory programs being implemented by the IRLG agencies. The agencies recognize that toxicity testing guidelines which they currently use are

not always uniform although the differences exist primarily in details of methodology and not in fundamental toxicological principles.

The IRLG established the Testing Standards and Guidelines Work Group for the purpose of attempting to resolve these differences and preparing guidelines which would satisfy the toxicity testing needs of all the agencies. The Work Group was to review tests and procedures already in use or under development, obtain outside guidance when appropriate, and coordinate its work with the agencies and others who might also be in the process of developing guidelines. On December 17, 1977, the Work Group held a public meeting to explain its purpose and goals, and to answer questions about its activities.

Draft guidelines on testing for Acute Eye irritation, Acute Oral Toxicity in Rodents, Acute Dermal Toxicity, Acute Inhalation, and Teratogenicity were prepared by the IRLG Work Group as a first step toward their ultimate goal of developing guidelines which satisfy the needs of the IRLG agencies. The Work Group is releasing these guidelines in order to obtain public comment before it prepares final drafts of the guidelines for submission to the member agencies for their consideration. These draft guidelines are not intended at this stage to have the force of law. In order to make them legally binding, some of the agencies would be required to issue them through a rulemaking procedure. The use agencies make of the guidelines and whether they initiate such rulemaking will be determined by each agency after receiving final draft guidelines prepared by the IRLG Work Group.

IRLG guidelines are based on those currently used or under development in the agencies, in international organizations, and in industry. Early drafts of the IRLG guidelines were circulated through each agency for review, and comments from that review are included in these draft guidelines. In addition, drafts of the EPA Office of Pesticides Programs (OPP) proposed guidelines (43 FR 37336, 22 August 1978) under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), and public comments to those guidelines were used extensively in an effort to assure compatibility and to benefit from the appreciable time and effort the OPP staff and respondents put in to their development. A second major source of information was *Principles and Procedures for Evaluating the Toxicity of Household Substances* (NAS Pub. No. 1138), prepared for CPSC by the

National Academy of Sciences. Still others heavily relied on were the Pharmaceutical Manufacturers' Association *Guidelines for the Assessment of Drug and Medical Device Safety in Animals* (February 1977) the FDA, Bureau of Foods Direct Additive Cyclic Review Draft Guidelines; the *Appraisal of the Safety of Chemicals in Foods, Drugs and Cosmetics*, Association of Food and Drug Officials of the U.S.; and protocols submitted by several industrial organizations. To the extent possible, IRLG guidelines are being coordinated with development of guidelines by the Organization for Economic Cooperation and Development (OECD). The Work Group acknowledges the contributions from each of these information sources and takes this opportunity to express its appreciation to the scientists who developed them and made them available.

The draft guidelines are available for comment and a public meeting will be held on October 30, 1979, at 9:00 a.m., in the Auditorium, Main Floor, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, in order to give interested persons an opportunity to express their views on the validity and appropriateness of the methods described for toxicity testing.

Dated: August 15, 1979.

Victor Morgenroth, III,

Chairman, Testing Standards and Guidelines Work Group, Interagency Regulatory Liaison Group.

Bureau of Land Management

[AA-6704-A AA-6704-B]

Alaska Native Claims Selection

On March 11, 1974 and July 24, 1974, Tazlina, Incorporated, for the Native village of Tazlina, filed selection applications AA-6704-A and AA-6704-B under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611 (1976)) (ANCSA), for the surface estate of certain lands in the vicinity of Glennallen.

The village corporation selected lands which were withdrawn by Secs. 11(a)(1) and 11(a)(2) of ANCSA. Section 11(a)(2) specifically withdrew, subject to valid existing rights, all lands within the townships withdrawn by Sec. 11(a)(1) that had been selected by, or tentatively approved to, but not yet patented to the

State of Alaska under the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 8(b) (1976)).

Section 12(a)(1) of ANCSA provides that village selections shall be made from lands withdrawn by Sec. 11(a). Section 12(a)(1) further provides that no village may select more than 69,120 acres from lands withdrawn by Sec. 11(a)(2).

The following described lands which are State selected have been properly selected under village selection applications AA-6704-A and AA-6704-B. Accordingly, tentative approvals are hereby rescinded and the State selection applications identified below are rejected as to the following described lands:

State selection A-051380, filed on March 9, 1960, as amended.

T. 3 N., R. 1 W., Copper River Meridian (Surveyed)

Sec. 4, Lots 6, 10, E $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$;
Sec. 8, SW $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 9, Lots 10 and 14, NE $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 10, Lot 2;
Sec. 14, W $\frac{1}{2}$;
Sec. 17, E $\frac{1}{2}$;
Sec. 27, NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$.
Containing 1,339.95 acres.

State selection A-056786, filed March 20, 1962, as amended.

T. 4 N., R. 1 W., Copper River Meridian (Surveyed)

Sec. 4, Lots 1 to 6, inclusive, S $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$;
Sec. 7, Lots 6, 11, 17, 21, 22, 26, 27, 31, 32, 36, 37, 41, 42, SE $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 8, S $\frac{1}{2}$;
Sec. 17, NE $\frac{1}{4}$;
Sec. 20, SW $\frac{1}{4}$;
Sec. 29, N $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 30, Lots 1 to 4, inclusive, N $\frac{1}{2}$ NE $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ W $\frac{1}{2}$;
Sec. 31, Lots 1 to 7, inclusive, NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 32, SW $\frac{1}{4}$.
Containing 2,520.12 acres.

Those portions of Tract A, more particularly described as (protracted):

Sec. 3, all;
Sec. 4;
Secs. 9, 10, 15, 16, 21, 22, 27, 28, 33, 34, 35, 36, all.

Containing approximately 8,330 acres.

Of the above-described lands, approximately 6,370 acres were tentatively approved June 10, 1964 and November 22, 1965, as modified.

State selection A-056781, filed March 20, 1962, as amended.

T. 4 N., R. 2 W., Copper River Meridian (Surveyed)

Sec. 24, Lots 14, 18, 40, 43, 44, 45, 48, 49, 50, 51, 52, 54, 55, 56, 57, 58, 69, 70, N $\frac{1}{2}$ S $\frac{1}{2}$;
Sec. 25, all;
Sec. 29, NE $\frac{1}{4}$ NE $\frac{1}{4}$, S $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$;

Sec. 30, Lot 2, S $\frac{1}{2}$ N $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$.
Containing 993.17 acres.
Those portions of Tract A more particularly described as (protracted):

Secs. 1, 2, 3, all;
Secs. 7 to 18, inclusive, all;
Sec. 19, excluding U.S. Survey 4598 and U.S. Survey 5508.

Containing approximately 10,063 acres.
Tract B, excluding Native allotment application AA-5967.

Containing approximately 3,820 acres.
State selection AA-4800, filed December 18, 1968, as amended.

T. 4 N., R. 3 W., Copper River Meridian (Unsurveyed)

Sec. 31, all.
Containing approximately 607 acres.

Of the above-described lands, approximately 10,978 acres were tentatively approved June 4, 1964, as modified.

The State-selected lands described below, however, are not valid selections and the acreage will not be charged against the village corporation as State-selected lands.

On June 16, 1972, the State of Alaska amended selections A-051380, A-056781 and A-056786 to include additional lands. The lands described below were withdrawn for Native selection by Sec. 11(a)(1) of ANCSA on December 18, 1971 and therefore were not available for selection by the State of Alaska. In view of this, the State selection applications identified below are hereby rejected as to the following described lands:

Copper River Meridian (Surveyed)

State selection A-051380.

T. 3 N., R. 1 W.

Sec. 35, Lot 3;
Sec. 36, Lot 12.

Containing 222.52 acres.
State selection A-056786.

T. 4 N., R. 1 W.

Sec. 33, Lot 1.

Containing 37.68 acres.
State selection A-056781.

T. 4 N., R. 2 W.

Sec. 23, E $\frac{1}{2}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$.

Containing 20 acres.

On December 16, 1968, the State filed general purposes grant selection applications AA-4799, AA-4800, AA-4808 and AA-4809. These selection applications are also rejected as to the lands selected by Tazlina. Public Land Order 4582, dated January 17, 1969, withdrew "all public lands in Alaska which are unreserved or which would otherwise become unreserved * * * from all forms of appropriation and disposition under the public land laws * * * including selection by the State of Alaska pursuant to the Alaska

Statehood Act (72 Stat. 339) * * *." This reservation became effective prior to the date the selection applications were filed, when the telegram notifying the Alaska State Office of the proposed withdrawal was received on December 12, 1968, and the records were noted.

Paragraph 4 of P.L.O. 4582 permitted the State to complete its selection of lands "which at the time of such filing were embraced in leases, licenses, permits, or contracts issued pursuant to the Mineral Leasing Act of 1920 or the Alaska Coal Leasing Act of 1914 * * *."

Since there were no mineral leases, etc., on December 16, 1968, on any of the lands described below in State selection applications AA-4799, AA-4800, AA-4808 and AA-4809 as to the lands selected by Tazlina, none of those lands were available for State selection. Section 8(b) of the Alaska Statehood Act provides that the lands selected must be public lands which are " * * * vacant, unappropriated, and unreserved at the time of their selection * * *." (Emphasis added.) Therefore the selection applications must be and are hereby rejected as to the following described lands:

Copper River Meridian (Surveyed)

State Selection AA-4799

T. 4 N., R. 1 E.

Those portions more particularly described as (protracted):

Secs. 31 to 36, inclusive.
Containing approximately 3,807 acres.
State Selection AA-4808

T. 3 N., R. 2 W.

Those portions more particularly described as (protracted):

Secs. 1 to 18, inclusive;
Secs. 21 to 25 inclusive.
Containing approximately 13,378 acres.
State Selection AA-4809

T. 3 N., R. 3 W.

Those portions more particularly described as (protracted):

Secs. 1 to 8, inclusive;
Secs. 17, 18, 19, 30 and 31, all.

Containing approximately 8,157 acres.

State Selection AA-4800

T. 4 N., R. 3 W.

Those portions of Tract A more particularly described as (protracted):

Secs. 11 to 30, inclusive;
Secs. 32 to 36, inclusive.

Containing approximately 15,708 acres.

The State selected lands rejected above aggregate approximately 89,003 acres; however, 41,330 acres of State selections A-056786, A-056781, AA-051380, AA-4799, AA-4800, AA-4808 and AA-4809 were not valid selections and will not be charged against the village corporation as State selected lands. Further action on the subject State selection applications as to those

lands not rejected herein will be taken at a later date.

The total amount of lands which have been properly selected by the State, including any selection applications previously rejected to permit conveyances to Tazlina, Incorporated is approximately 27,673 acres, which is less than the 69,120 acres permitted by Sec. 12(a)(1) of ANCSA.

As to the lands described below, the applications, as amended, are properly filed and meet the requirements of the Alaska Natives Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 77,437 acres, is considered proper for acquisition by Tazlina, Incorporated and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA:

U.S. Survey 5569, Alaska, located on the northerly side of the Glenn Highway at about Mile 180.

Containing 40.00 acres.

Copper River Meridian (Surveyed)

T. 3 N., R. 1 W.

Sec. 4, Lots 6, 10, E $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$;
Sec. 8, SW $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 9, Lots 10, 14, NE $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 10, Lot 2;
Sec. 14, W $\frac{1}{2}$;
Sec. 17, E $\frac{1}{2}$;
Sec. 27, NE $\frac{1}{4}$ E $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$;
Sec. 35, Lot 3;
Sec. 36, Lot 12.

Containing 1,562.47 acres.

T. 4 N., R. 1 W.

Sec. 4, Lots 1 to 6, inclusive, S $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$;
Sec. 7, Lots 6, 11, 17, 21, 22, 26, 27, 31, 32, 36, 37, 41, 42, SE $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 8, S $\frac{1}{2}$;
Sec. 17, NE $\frac{1}{4}$;
Sec. 20, SW $\frac{1}{4}$;
Sec. 29, N $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 30, Lots 1 to 4, inclusive, N $\frac{1}{2}$ NE $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ W $\frac{1}{2}$;
Sec. 31, Lots 1 to 7, inclusive, NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 32, Lot 2, SW $\frac{1}{4}$;
Sec. 33, Lot 1.

Containing 2,559.83 acres.

T. 4 N., R. 2 W.

Sec. 23, E $\frac{1}{2}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 24, Lots 14, 18, 40, 43, 44, 45, 48, 49, 50, 51, 52, 54, 55, 56, 57, 58, 69, 70, N $\frac{1}{2}$ S $\frac{1}{2}$;
Sec. 25, all;
Sec. 29, NE $\frac{1}{4}$ NE $\frac{1}{4}$, S $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$;
Sec. 30, Lot 2, S $\frac{1}{2}$ N $\frac{1}{2}$ NE $\frac{1}{4}$ NE $\frac{1}{4}$, S $\frac{1}{2}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$.
Containing 1,013.17 acres.
Aggregating 5,175.47 acres.
Lands on Which Additional Survey Is Required:

Copper River Meridian (Surveyed)

T. 4 N., R. 1 E.

The following portions of Tract A, more particularly described as (protracted):

Secs. 31 to 36, inclusive, all.
Containing approximately 3,807 acres.

T. 4 N., R. 1 W.

The following portions of Tract A, excluding the Copper River, more particularly described as (protracted):

Sec. 3, all;
Sec. 4, the portion east of the west bank of the Copper River;
Secs. 9, 10, 15, 16, 21, 22, 27 and 28, all;
Sec. 33, the portion north and east of the Copper River;
Secs. 34, 35 and 36, all.

Containing approximately 7,850 acres.

T. 3 N., R. 2 W. (protracted):

Secs. 1 to 6, inclusive, all;
Secs. 8 to 18, inclusive, all;
Secs. 21 to 25, inclusive, all.

Containing approximately 12,786 acres.

T. 4 N., R. 2 W.

The following portions of Tract A, more particularly described as (protracted):

Secs. 1, 2 and 3, all;
Secs. 7 to 18, inclusive, all;
Sec. 19, excluding U.S. Survey 4598 and U.S. Survey 5508.

Containing approximately 10,063 acres.
Tract B, excluding Native allotment application AA-5967.

Containing approximately 3,820 acres.

T. 3 N., R. 3 W. (protracted)

Secs. 1 to 8, inclusive, all;
Secs. 17, 18, 19, 30 and 31, all;

Containing approximately 8,157 acres.

T. 4 N., R. 3 W.

The following portions of Tract A, more particularly described as (protracted):

Secs. 11 to 18, inclusive, all;
Sec. 19, excluding U.S. Surveys 4598 and 5644;
Sec. 20, excluding U.S. Survey 5664;
Sec. 21, all;
Sec. 22, excluding U.S. Survey 5569;
Sec. 23, excluding U.S. Survey 5665;
Secs. 24 and 25, excluding U.S. Surveys 3581, 3582, 4864, 5529 and 5565;
Sec. 26, excluding U.S. Surveys 5665 and 5678;
Secs. 27 and 28, all;

Sec. 29, excluding U.S. Survey 5664;
Sec. 30, excluding U.S. Survey 5644;
Secs. 31 to 36, inclusive, all.

Containing approximately 16,315 acres.
Aggregating approximately 62,780 acres.

Copper River Meridian (Unsurveyed)

T. 3 N., R. 1 E.

Sec. 1, all.

Containing approximately 640 acres.

T. 3 N., R. 2 E.

Sec. 6, all.

Containing approximately 608 acres.

T. 2 N., R. 3 W.

Secs. 5 to 8, inclusive, all;
Secs. 16 to 21, inclusive, all;
Secs. 28, 29 and 30, all.

Containing approximately 8,234 acres.
Aggregating approximately 9,482 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (1978)); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (1978)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file AA-6704-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: Travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: Travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles and four-wheel drive vehicles.

60 Foot Road—The uses allowed on a sixty (60) foot wide road easement are: Travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

One Acre Site—The uses allowed for a site easement are: Vehicle parking (e.g., aircraft, boats, ATVs, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 2 C1) A one (1) acre site easement upland of the ordinary high water mark in Sec. 10, T. 4 N., R. 1 W., Copper River Meridian, on the left bank of the Copper River. The uses allowed are those listed above for a one (1) acre site easement.

b. (EIN 4a C5, D9) An easement for an existing access trail fifty (50) feet in width from the left bank of the Copper River in Sec. 3, T. 4 N., R. 1 W., Copper River Meridian, southeasterly through site EIN 2 C1 and continuing southeasterly then northeasterly to public lands in Sec. 2, T. 4 N., R. 1 W., Copper River Meridian. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

c. (EIN 6a C5, D1, D9) An easement for an existing access trail fifty (50) feet in width from the Glenn Highway in Sec. 22, T. 4 N., R. 3 W., Copper River Meridian, northerly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

d. (EIN 10b C5, D1) An easement sixty (60) feet in width for an existing road from the

Richardson Highway in Sec. 8, T. 3 N., R. 1 W., Copper River Meridian, southeasterly to public lands. The uses allowed are those listed above for a sixty (60) foot wide road easement.

e. (EIN 10c C5, D1) An easement sixty (60) feet in width for an existing road from the Richardson Highway in Sec. 38, T. 3 N., R. 1 W., Copper River Meridian, northerly to public lands. The uses allowed are those listed above for a sixty (60) foot wide road easement.

f. (EIN 11a C5, D9) An easement for an existing access trail twenty-five (25) feet in width from the western end of road EIN 11h C5, D9 in Sec. 7, T. 3 N., R. 1 W., Copper River Meridian, northwesterly through Sec. 3, T. 3 N., R. 2 W., Copper River Meridian, thence southerly to the southwest corner of Sec. 27, T. 3 N., R. 2 W., Copper River Meridian, thence joining trail EIN 11d C5, D9. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

g. (EIN 11d C5, D9) An easement for an existing access trail twenty-five (25) feet in width from trail EIN 11a C5, D9 in Secs. 27 and 28, T. 3 N., R. 2 W., Copper River Meridian, westerly to public lands in T. 3 N., R. 4 W., Copper River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

(EIN 11h C5, D9) An easement sixty (60) feet in width for an existing road from the Richardson Highway in Sec. 17, T. 3 N., R. 1 W., Copper River Meridian, westerly to public lands and the Trans-Alaska Oil Pipeline in Sec. 7, T. 3 N., R. 1 W., Copper River Meridian. The uses allowed are those listed above for a sixty (60) foot wide road easement.

i. (EIN 11i D1) An easement twenty-five (25) feet in width for a proposed powerline and telephone line from the Richardson Highway in Sec. 17, T. 3 N., R. 1 W., Copper River Meridian, westerly along the north side of road EIN 11h C5, D9 to public lands in Sec. 7, T. 3 N., R. 1 W., Copper River Meridian. The uses allowed are those activities associated with the construction, operation, and maintenance of the telephone line and powerline.

j. (EIN 11j C5 D9) An easement for an existing access trail twenty-five (25) feet in width from Sec. 35, T. 2 N., R. 3 W., Copper River Meridian, northeasterly to trail EIN 11d C5, D9. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

k. (EIN 14 D1) An easement for an existing access trail twenty-five (25) feet in width from the southern border of Sec. 35 T. 4 N., R. 1 E., Copper River Meridian, northwesterly to public lands in Sec. 26, T. 4 N., R. 1 E., Copper River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

l. (EIN 19 C5, L) An easement for a proposed express feeder line thirty-five (35) feet in width from Copper Valley Electric Association's present generating facilities in Sec. 23, T. 4 N., R. 2 W., Copper River Meridian, easterly about one mile; thence southeasterly, roughly paralleling the Trans-Alaska Pipeline to the proposed substation EIN 19a C5, L in Sec. 31, T. 4 N., R. 1 W.,

Copper River Meridian. The uses allowed are those activities associated with the construction, operation, and maintenance of the powerline facility.

m. (EIN 19a C5, L) An easement for a proposed substation 300 feet by 300 feet in size for the Copper Valley Electric Association located adjacent to Pump Station 11 of the Trans-Alaska Pipeline (AA-6890) in Sec. 31, T. 4 N., R. 1 W., Copper River Meridian. The uses allowed are those activities associated with the construction, operation and maintenance of a power facility.

n. (EIN 20 C5, L) An easement one hundred (100) feet in width for existing powerlines and telephone lines roughly paralleling the Glenn Highway from its junction with the Richardson Highway in Sec. 19, T. 4 N., R. 1 W., Copper River Meridian, westerly to public lands in T. 4 N., R. 4 W., Copper River Meridian. The uses allowed are those activities associated with operation and maintenance of the power and telephone line facilities.

o. (EIN 20a C5, L) An easement one hundred (100) feet in width for existing powerlines and telephone lines roughly paralleling the Richardson Highway from Sec. 1, T. 2 N., R. 1 W., Copper River Meridian, northerly to Sec. 6, T. 4 N., R. 1 W., Copper River Meridian. The uses allowed are those activities associated with operation and maintenance of the power and telephone line facilities.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the unsurveyed lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1976))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permitted, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of ANCSA, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (1976)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section;

4. An easement for highway purposes, including appurtenant protective, scenic and service areas, extending 150 feet on each side of the centerline of the Glenn and Richardson Highways, as established by Public Land Order 1613 (23 FR 2376), pursuant to the Act of August 1, 1958 (70 Stat. 898), and transferred to the State of Alaska pursuant to the Alaska Omnibus Act, Pub. L. 86-70 (73 Stat. 141), as to:

Copper River Meridian

14. Those rights for pipeline purposes, AA-

8862, 100 feet in width, access road, as have

been granted to Alyeska Pipeline Service

Company, its successors and assigns,

pursuant to Sec. 28, of the Mineral Leasing

Act (30 U.S.C. 185), as amended November

16, 1973, (87 Stat. 576), as to NE $\frac{1}{4}$, Sec. 17, T.

3 N., R. 1 W., Copper River Meridian.

15. Those rights for pipeline purposes as

have been issued to Alyeska Pipeline Service

Company, its successors and assigns,

pursuant to Sec. 28 of the Mineral Leasing

Act (30 U.S.C. 185), as amended November

16, 1973, (87 Stat. 576), more specifically

identified as follows:

a. As to S $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 25, T. 4 N., R. 2 W., Copper River Meridian, a mineral material sale, AA-8868;

b. As to SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 25, T. 4 N., R. 2 W., Copper River Meridian, a mineral material sale, AA-8867.

16. Those rights for pipeline purposes as have been issued to the owners of the Trans-Alaska Pipeline, their successors and assigns, pursuant to Sec. 28 of the Mineral Leasing Act (30 U.S.C. 185) as amended November 16, 1973, (87 Stat. 576), more specifically identified as follows:

a. As to Lots 6, 7, N $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 31, T. 4 N., R. 1 W., Copper River Meridian, a disposal site, AA-8750;

b. As to SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 8; NE $\frac{1}{4}$, Sec. 17; T. 3 N., R. 1 W., Copper River Meridian, a mineral material sale, AA-8143.

17. Those rights for pipeline purposes as have been issued to the owners of the Trans-Alaska Pipeline their successors and assigns, pursuant to Sec. 28 of the Mineral Leasing Act (30 U.S.C. 185) as amended November 16, 1973, (87 Stat. 576), for construction zone permit AA-9149.

18. A right-of-way, 30 feet in width, AA-9552, for a transmission line, granted to the Copper Valley Electric Association, Inc. under the Act of March 4, 1911 (36 Stat. 1253), as amended; 43 U.S.C. 961 (1970), as to Lots 2, 3 and 4, E $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 30; E $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 31; T. 4 N., R. 1 W., Copper River Meridian; Lots 43 and 44, Sec. 24; E $\frac{1}{2}$ E $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 25; T. 4 N., R. 2 W., Copper River Meridian.

19. A right-of-way, 80 feet in width, AA-16679, for a road, under the Act of October 21, 1976 (43 U.S.C. 1701, 1761), as to Lots 14, 18, NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 24, T. 4 N., R. 2 W., Copper River Meridian.

Tazlina Incorporated is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 77,588 acres. The remaining entitlement of approximately 14,572 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA, conveyance of the subsurface estate of the lands described above shall be issued to AHTNA, Inc. when the surface estate is conveyed to Tazlina, Incorporated, and shall be subject to the same conditions as the surface conveyance.

Within the above described lands, only the following inland water body is considered to be navigable: Copper River

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the Federal Register and once a week, for four (4) consecutive weeks, in the ANCHORAGE DAILY NEWS and the TUNDRA TIMES. Any party claiming a property interest in lands affected by

this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed to refused to sign the return receipt shall have until September 20, 1979, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 "C" Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Tazlina, Incorporated, Glennallen, Alaska 99588.

AHTNA, Inc., Drawer G, Copper Center, Alaska 99573.

State of Alaska, Division of Lands, 323 East Fourth Avenue, Anchorage, Alaska 99501.

Carlene M. Welfelt,
Acting Chief, Branch of Adjudication.

BILLING CODE 4310-04-M

[F-14912-A, F-14912-B]

Alaska Native Claims Selection; Easement Conformance

By decision dated June 28, 1978, among other things, certain lands were determined proper for village selection and approved for interim conveyance or patent to Northway Natives Incorporated under the provisions of section 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611(a) (1976) (ANCSA). Additionally, that decision reserved certain public easements to the United States pursuant to section 17(b) of the ANCSA.

The decision of June 28, 1978, states that, "These reservations (section 17(b)

easements) have not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation *Calista, et al v. Andrus, et al*, and implementation of the Secretary's new easement policy." On November 27, 1978, new section 17(b) easement regulations were published in the Federal Register as final rule making (43 FR 56328). The process of review by the Bureau of Land Management to bring easements into conformance with the regulations is now complete.

Accordingly, the decision of June 28, 1978, is modified by deleting paragraph 12 of the listed reservations to the United States and substituting the following new paragraph:

"Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611(b) (1976)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-14912-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: Travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

60 Foot Trail—The uses allowed on a sixty (60) foot wide road easement are: Travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

One Acre Site—The uses allowed for a site easement are: Vehicle parking (e.g., aircraft, boats, ATVs, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

Easements To Be Reserved

a. (EIN 5 C5, L) An easement for an existing access trail fifty (50) feet in width from the Alaska Highway in Sec. 19, T. 16 N., R. 18 E., Copper River Meridian, easterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

b. (EIN 14 C5, L) An easement for an existing access trail twenty-five (25) feet in width from the Alaska Highway in Sec. 11, T. 14 N., R. 19 E., Copper River Meridian, northerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

c. (EIN 19 C5, M) A one (1) acre site easement upland of the ordinary high-water mark in Sec. 9, T. 14 N., R. 19 E., Copper River Meridian, on the right bank of the Chisana River. The uses allowed are those listed above for a one (1) acre site.

d. (EIN 27 C3, C5, D9) An easement for an existing access trail fifty (50) feet in width from the Northway Airport in Sec. 25, T. 14 N., R. 18 E., Copper River Meridian, southerly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

e. (EIN 28 D1) An easement sixty (60) feet in width for an existing road from the Northway Airport in Sec. 26, T. 14 N., R. 18 E., Copper River Meridian, northerly to Northway Village. The uses allowed are those listed above for a sixty (60) foot wide road easement.

f. (EIN 29 D9) A one (1) acre site easement upland of the ordinary high water mark in Sec. 21, T. 14 N., R. 19 E., Copper River Meridian, on the right bank of Moose Creek. The site is one (1) acre in size with an additional twenty-five (25) foot wide easement on the bed of the stream along the entire waterfront of the site. The uses allowed are those listed above for a one (1) acre site.

g. (EIN 39 C3, C5, D1) An easement sixty (60) feet in width for an existing road from the Alaska Highway in Sec. 30, T. 13 N., R. 21 E., Copper River Meridian, westerly to public lands on Deadman Lake. The uses allowed are those listed above for a sixty (60) foot wide road easement.

h. (EIN 46 I) An easement sixty (60) feet in width for an existing road from the Northway Airport in Sec. 25, T. 14 N., R. 18 E., Copper River Meridian, southerly to the FAA TACAN site in Sec. 36, T. 14 N., R. 18 E., Copper River Meridian. The uses allowed are those listed above for a sixty (60) foot wide road easement. The uses are limited to the U.S. Government, its agents, or assignees.

i. (EIN 49b K) An easement one hundred (100) feet in width for an existing road and utility line from the Beaver Creek Radio Relay Site in Sec. 28, T. 15 N., R. 19 E., Copper River Meridian, northerly to the AFTAC site in Sec. 21, T. 15 N., R. 19 E., Copper River Meridian. The uses allowed for the utility line are those activities associated with the operation and maintenance of the utility line facility and the uses allowed for the road are those listed above for a sixty (60) foot wide road easement. The uses are limited to the U.S. Government, its agents or assignees.

j. (EIN 50 K) An easement sixty (60) feet in width for an existing road from the Alaska Highway in Sec. 28, T. 15 N., R. 19 E., Copper River Meridian, northerly to the Beaver Creek Radio Relay Site in Sec. 21, T. 15 N., R. 19 E., Copper River Meridian. The uses allowed are those activities associated with the operation and maintenance of the road, the Beaver Creek Radio Relay site and the AFTAC site facility. The uses are limited to the U.S. Government, its agents or assignees.

k. (EIN 51 K) An easement fifty (50) feet in width for an existing communication cable from the ACS pole line in Sec. 28, T. 15 N., R. 19 E., Copper River Meridian, northerly to the Beaver Creek Radio Relay site. The uses

allowed are those activities associated with the operation and maintenance of the communication cable facility. The uses are limited to the U.S. Government, its agents, or assignees.

l. (EIN 53 C4, C5, E) A site easement upland of the ordinary high-water mark in Sec. 34, T. 14 N., R. 19 E., Copper River Meridian, on the south shore of Fish Lake. The site is one (1) acre in size with an additional twenty-five (25) foot wide easement on the bed of the lake along the entire waterfront of the site. The uses allowed are those listed above for a one (1) acre site.

m. (EIN 53a C4, C5, E) An easement for a proposed access trail twenty-five (25) feet in width from trail easement EIN 53 C4, C5, E in Sec. 34, T. 14 N., R. 19 E., Copper River Meridian, southerly to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement."

Except as modified by this decision, the decision of June 26, 1978, stands as written.

Notice of this decision is being published once in the Federal Register and once a week, for four (4) consecutive weeks, in the FAIRBANKS DAILY NEWS-MINER. Any person who claims a property interest in land which is adversely affected by the modification set forth in this decision (as to conformed section 17(b) easements), may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501. Also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate and any parties who failed or refused to sign the return receipt shall have until September 20, 1979, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision as to the issue of section 17(b) easements, shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

If an appeal is taken, the adverse parties to be served with a copy of the notice of appeal are:

Northway Natives Incorporated, Box 441, Northway, Alaska 99784.

Doyon, Limited, First and Hall Streets, Fairbanks, Alaska 99701.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such

appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

Judith A. Kammins,
Chief, Division of ANCSA Operations.

BILLING CODE 4310-04-M

BLM In Nevada Issues Final Decision On Mineral Hill Special Wilderness Inventory

BLM Acting Nevada State Director Roger McCormack has approved the release of 18,500 acres of public lands in Eureka County from further wilderness consideration because the area lacks wilderness characteristics specified by Congress. Unless there are objections, the decision will be implemented on Sept. 4, 1979.

The area, known as the Mineral Hill unit (NV-010-083A) is about 36 miles south of Carlin and covers the Sulphur Springs Mountain Range. McCormack's decision is based upon a special project inventory that indicated the area lacks naturalness because of roads, ways, developed springs, evidence of mining activity, and fences that are substantially noticeable. Opportunities for outstanding solitude and a primitive and unconfined type of recreation were also found to be lacking.

The Bureau's findings were open to the public for a 30-day comment period. Five comments were received, four in favor of releasing the area from further consideration and one opposing that action. Of the four received in favor, one supported the Bureau's recommendation with the following reservations: That the 30-day comment period was too short for the public to adequately review the area; that the amount of information and photo documentation was inadequate and could have been improved; that special inventories tend to subvert and fragment the orderly process of the inventory process.

Another person who agreed with the recommendation stated that it was unfortunate that the company requesting the special inventory, so that it could mine barite in the area, was forced to hold up its operations until the special inventory was complete. The only comment received in opposition to the Bureau's recommendation stated that despite the evidence of man's activity identified in the area, it still should be preserved as wilderness or at least protected from further development because we have "too little wilderness."

Since no information contrary to the Bureau's findings was obtained from the public, the decision to release the unit from further wilderness consideration will become final September 4, 1979, 30 days from the close of the public comment period.

Further information on the decision can be obtained from the Bureau of Land Management, 300 Booth Street, Room 3008, Reno, NV 89509.

Dated: August 13, 1979.

Roger J. McCormack,
Acting State Director, Nevada.

BILLING CODE 4310-04-M

[W-68636]

Wyoming; Application

August 13, 1979.

Notice is hereby given that pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct a 6 1/2 inch O.D. pipeline, a 4' X 6' meter house and related metering and dehydration facilities for the purpose of transporting natural gas across the following described public lands:

Sixth Principal Meridian, Wyoming

T. 39 N., R. 90 W.,

Sec. 14, SE 1/4 SW 1/4;

Sec. 23, E 1/2 NW 1/4 and SW 1/4 SW 1/4;

Sec. 26, NW 1/4 NW 1/4;

Sec. 27, E 1/2 NE 1/4 and NE 1/4 SE 1/4;

Sec. 35, W 1/2 NW 1/4, N 1/2 SW 1/4 and SE 1/4 SW 1/4.

The proposed pipeline will transport natural gas from the #1-14 Victor Well located in the SW 1/4 of section 14 to a point of connection with an existing pipeline located in the SW 1/4 of section 35. The 4' X 6' meter house and related metering and dehydration facilities are to be located entirely within the 60 foot right-of-way in the SW 1/4 of section 14, all within T. 39 N., R. 90 W., Fremont County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third

Street, P.O. Box 870, Rawlins, Wyoming 82301.

Harold G. Stinchcomb,
Chief, Branch of Lands and Minerals
Operations.

Geological Survey

Known Recoverable Coal Resource Area; Knife River, N. Dak.; Revision

Pursuant to authority contained in the Act of March 3, 1879 (43 U.S.C. 31), as supplemented by Reorganization Plan No. 3 of 1950 (43 U.S.C. 1451, note), 220 Departmental Manual 2, Secretary's Order No. 2948, and Section 8A of the Mineral Leasing Act of February 25, 1920, as added by Section 7 of the Federal Coal Leasing Amendments Act of 1976 (Pub. L. 94-377, August 4, 1976), Federal lands within the State of North Dakota have been classified as subject to the coal leasing provisions of the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 201). The name of the area, effective date, and total acreage involved are as follows:

(34) North Dakota

Revised Knife River (North Dakota) Known Recoverable Coal Resource Area (KRCRA); September 12, 1978; 160 acres were added. Total area now classified for leasing is 1,351,814 acres.

A plat showing the revised boundary and acreage has been filed with the appropriate land office of the Bureau of Land Management. Copies of the diagram and the land description may be obtained from the Conservation Manager, Central Region, U.S. Geological Survey, Stop 609, Box 25046, Federal Center, Denver, Colorado 80225. J. S. Cragwall, Jr.,
Acting Director.

Chesapeake and Ohio Canal National Historical Park Commission; Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, September 15, 1979, at 1:00 p.m. at the

Elks Lodge, 114 South Centre Street, Cumberland, Maryland.

The Commission was established by Public Law 91-664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Mr. Donald R. Frush, Chairman, Hagerstown, Maryland
Mrs. Bonnie Troxell, Cumberland, Maryland
Miss Nancy Long, Glen Echo, Maryland
Mrs. Constance Morella, Bethesda, Maryland
Mr. Kenneth S. Rollins, Brookmont, Maryland
Mr. Vladimir A. Wahbe, Baltimore, Maryland
Mr. Edwin F. Wesely, Jr., Brookmont, Maryland
Mr. John D. Millar, Cumberland, Maryland
Mr. James B. Coulter, Annapolis, Maryland
Mrs. Dorothy Grotos, Arlington, Virginia
Mrs. Minnie Pohlmann, Dickerson, Maryland
Mrs. Margaret G. Dietz, Lovettsville, Virginia
Mr. William H. Ansel, Jr., Romney, West Virginia
Dr. James H. Gilford, Frederick, Maryland
Mr. Lorenzo W. Jacobs, Jr., Washington, D.C.
Mr. Silas F. Starry, Shepherdstown, West Virginia
Mr. Rockwood H. Foster, Washington, D.C.
Mr. R. Lee Downey, Williamsport, Maryland
Mr. John C. Frye, Capland, Maryland

Matters to be discussed at this meeting include:

1. Development Concept Plan, North Branch/ Cumberland
2. Access to the Town of Brunswick campground
3. Development Concept Plan, Great Falls
4. Bridge to Olmstead Island
5. Ski jump ramp, Potomac River
6. Interpretive Prospectus, Seneca to Cumberland
7. Georgetown park complex access
8. Rattling Springs Development
9. Rockwood Tract

The meeting will be open to the public. Any member of the public may file with the Committee, a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact William R. Failor, Superintendent, C&O Canal National Historical Park, P.O. Box 4, Sharpsburg, Maryland 21782, telephone 301-948-5641 or 301-432-2231.

Minutes of the meeting will be available for public inspection four (4)

weeks after the meeting at Park Headquarters, Sharpsburg, Maryland. Manus J. Fish, Jr.,

Regional Director, National Capital Region, August 14, 1979.

BILLING CODE 4310-70-M

DEPARTMENT OF JUSTICE

Advisory Committee on Tax Litigation; Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub.

L. 92-463, 86 Stat. 770-776, 5 U.S.C. App. I, Supp. II), and with the approval of the Attorney General, and the concurrence of the Office of Management and Budget, the Assistant Attorney General, Tax Division, Department of Justice, has determined that establishment of the Advisory Committee on Tax Litigation is in the public interest in connection with the performance of duties imposed on the Tax Division by law.

Purpose. The primary purpose of the Advisory Committee on Tax Litigation is to provide an organized public forum for discussions of relevant tax litigation issues between Justice Department officials and representatives of the public. The Advisory Committee also is to provide constructive observations about the Tax Division's current or proposed policies, programs, and procedures, and problems which may be encountered by taxpayers and tax practitioners in dealing with the Tax Division, Department of Justice. Where appropriate or necessary, the Advisory Committee is to present recommendations on improving Tax Division operations.

Membership. The Advisory Committee will consist of twelve (12) members, all of whom must have a background and interest in, and concern for, litigation of Federal tax matters.

The Committee will have a balanced membership, including women, minority representatives, representatives of the academic and public interest group sectors, and private practitioners, selected from diverse geographical areas of the country, to be appointed by the Assistant Attorney General, Tax Division.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act, on or before September 5, 1979.

Termination. The services of the Advisory Committee are expected to be needed for an indefinite period of time and the Committee will be an ongoing endeavor. Initial authorization is a one (1) year term, with provision for renewal of the Committee's charter on a biennial basis thereafter.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee on Tax Litigation. Such comments, as well as any inquiries, may be addressed to the Advisory Committee Management Officer, Office of Management and Finance, Department of Justice, Washington, D.C. 20530, phone: 202-633-4531.

Dated: August 13, 1979.

M. Carr Ferguson,
Assistant Attorney General, Tax Division,
Department of Justice.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Employment Transfer and Business Competition Determinations Under the Rural Development Act; Notice of Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local

area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing with two weeks of publication of this notice. Comments received after the two-week period may not be considered. Send comments to: Administrator, Employment and Training Administration, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 16th day of August 1979.

Ernest G. Green,
Assistant Secretary for Employment and Training.

Applications Received During the Week Ending August 18, 1979

Name of applicant and location of enterprise	Principal product or activity

Mine Safety and Health Administration

[Docket No. M-79-119-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241, has filed a petition to modify the application of 30 CFR 75.305 (weekly examination of return airways) to its Franklin No. 65 Mine, located in Harrison County, Ohio. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. Due to adverse roof conditions, numerous roof falls have occurred in

designated return airways of the petitioner's mine, making these airways virtually impassable at points and extremely hazardous to travel and examine.

2. Attempts to rehabilitate these airways have proven unsuccessful.

3. The existing falls have had no effect on the velocity or quantity of air passing through the return airways, particularly since a new portal, a new return and other facilities have been established to accommodate the situation.

4. The return airways are not designated as return escapeways.

5. As an alternative to weekly examinations of the return airways, the petitioner proposes to establish a five station air monitoring system detailed in the petition.

6. The petitioner states that this alternative will achieve no less protection than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 20, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 13, 1979.

New Elk Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

New Elk Coal Company, General Delivery, Baisden, West Virginia, 25608 has filed a petition to modify the application of 30 CFR 75.1719 (illumination) to its No. 3 Mine located in Wyoming County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The petition concerns the illumination of underground working places in which self-propelled mining equipment is operated.

2. The petitioner is mining a coal seam averaging 30 inches in height.

3. In the close quarters of the petitioner's mine, lighting on the petitioner's continuous mining machine

and roof bolter would result in excessive and blinding glare, causing a diminution of safety to the miners involved.

4. In addition, the low seam heights make it infeasible to operate such equipment with the required lighting.

5. For these reasons, the petitioner requests relief from the application of the standard to its mine.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 20, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Union Carbide Corp.; Petition for Modification of Application of Mandatory Safety Standard

Union Carbide Corporation, P.O. Box 8004, South Charleston, West Virginia 25303, has filed a petition to modify the application of 30 CFR 75.305 (weekly inspection of return airways) to its No. 7 Mine in Kanawha County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The roof of a designated return airway in the petitioner's mine has deteriorated, making it hazardous to walk the airway for weekly inspections for a distance of about 5,200 feet.

2. As an alternative, the petitioner has established air monitoring checkpoints along the full length of the return airway to routinely monitor both air quantity and quality in the airway.

3. The petitioner states that this alternative method will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 20, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203.

BILLING CODE 4510-43-M

[Docket No. M-79-113-C]

The Valley Camp Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

The Valley Camp Coal Company, Post Office Box 218, Triadelphia, West Virginia 26059 has filed a petition to modify the application of 30 CFR 75.1105 (permanent pump housings) to its Alexandria Mine located in Marshall County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The petitioner requests permission to operate six permanent pumps in designated areas without coursing the air ventilating the areas directly into return airways.

2. The return airways in the vicinity of the pumps have not been maintained and therefore have become unusable. To rehabilitate these airways would expose miners to undue hazards and disrupt the mine ventilation system, resulting in a diminution of safety.

3. The air that flows by the pumps is not used to ventilate working sections.

4. As an alternative to coursing the air directly to the return airways, the petitioner proposes the following:

(a) The pumps will be housed in a fireproof enclosure with doors that automatically close in the event of a fire.

(b) An automatic fire suppression device will be installed over each of the pumps.

(c) Combustible materials will not be stored within the pump enclosure.

(d) A warning light, connected with the fire suppression device, will be installed adjacent to the haulage track so that it can be readily seen by passers-by in the event of a pump fire.

5. The petitioner states that this alternative will achieve no less protection for its miners than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 20, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety

and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 14, 1979.

BILLING CODE 4510-43-M

[Docket No. M-79-118-C]

**Virginia Iron, Coal and Coke Co.;
Petition for Modification of Application
of Mandatory Safety Standard**

Virginia Iron, Coal and Coke Company, Post Office Drawer C, Coeburn, Virginia 24230 has filed a petition to modify the application of 30 CFR 77.214(a) (refuse piles) to its Toms Creek Preparation Plant No. 1 located in Wise County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The standard prohibits the locating and construction of refuse piles over abandoned mine openings.

2. The petitioner is planning to construct a new coal preparation plant and proposes to deposit waste material from the plant in an area that contains six abandoned mine openings (the entries of two abandoned mines).

3. The entry areas of these mines were recently strip mined and backfilled with eight to twenty-five feet of inert material and revegetated.

4. Mine maps and field investigations lead the petitioner to believe that water from the abandoned mines will drain away from the openings. However, the petitioner will insure that the entry areas properly drain by constructing underdrains to relieve any water pressure build-up.

5. The petitioner believes that its alternative method will always achieve no less protection for its workers than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before September 20, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: August 13, 1979.

Robert B. Lagather,
Assistant Secretary for Mine Safety and Health.

**Florence Coat Company, Inc.;
Hoboken, N.J.; Negative Determination
Regarding Eligibility To Apply for
Worker Adjustment Assistance**

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Florence, Hoboken, New Jersey. The investigation revealed that the correct corporate title is Florence Coat Company, Incorporated. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

The investigation was initiated on June 18, 1979 in response to a worker petition received on June 12, 1979 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Florence, Hoboken, New Jersey. The investigation revealed that the correct corporate title is Florence Coat Company, Incorporated. In the following determination, without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Sales of ladies' coats by Florence Coat Company increased in 1978 compared with 1977. The manufacturer for whom Florence did contract work reported unchanged sales of ladies' coats from the first half of 1978 to the first half of 1979. This manufacturer discontinued imports of ladies' coats in 1979 while increasing inhouse production. The manufacturer had not relied upon foreign contractors for the production of ladies' coats during the period under investigation.

Conclusion

After careful review, I determine that all workers of Florence Coat Company, Incorporated, Hoboken, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 14th day of August 1979.

C. Michael Aho,
Director, Office of Foreign Economic Research.

BILLING CODE 4510-28-M

**Holly Sugar Corp., et al.; Investigations
Regarding Certifications of Eligibility
To Apply For Worker Adjustment
Assistance**

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial

separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance,

at the address shown below, not later than August 31, 1979.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 31, 1979.

The petitions filed in this case are available for inspection at the Office of

the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 14th day of August 1979.

Harold A. Bratt,
Acting Director, Office of Trade Adjustment Assistance.

**Pension and Welfare Benefit Programs
Advisory Council on Employee
Welfare and Pension Benefit Plans;
Meeting**

Pursuant to Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 29 U.S.C. 1142, a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m. on Thursday, September 6, 1979, in the Federal Ballroom North, Quality Inn-Capitol Hill, 415 New Jersey Avenue, N.W., Washington, D.C.

The purpose of the meeting is to discuss the items listed below and to invite public comment on any aspect of the administration of ERISA.

1. Department of Labor Progress Report.

2. Council Work Group Reports: Collective Bargaining, Communications, Investment and Fiduciary, Legislation, Portability, Prohibited Transactions, Reporting, Disclosure, and Recordkeeping, Seasonal Industries.

3. Statements from the Public.

Members of the public are encouraged to file a written statement pertaining to any topic concerning ERISA, by submitting 30 copies on or before September 5, 1979, to the Administrator, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room S-4522, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

Persons desiring to address the Council should notify Edward F. Lysczek, Executive Secretary of the Advisory Council, in care of the above address or by calling (202) 523-8753.

Signed at Washington, D.C., this 15th day of August 1979.

Ian D. Lanoff
Administrator of Pension and Welfare Benefit Programs.

**NUCLEAR REGULATORY
COMMISSION**

**Advisory Committee on Reactor
Safeguards Ad Hoc Subcommittee on
the Three Mile Island, Unit 2 Accident;
Implications Re Nuclear Powerplant
Design; Meeting**

The ACRS Ad Hoc Subcommittee on the Three Mile Island, Unit 2 Accident—Implications Re Nuclear Power Plant Design, will hold a meeting on September 5, 1979 in Room 1046, 1717 H St., NW., Washington, DC 20555.

In accordance with the procedures outlined in the Federal Register on October 4, 1978, (43 FR 45926), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Wednesday, September 5, 1979—8:30 a.m.
Until the Conclusion of Business

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendation to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will discuss with representatives of the NRC Staff, the nuclear industry, various utilities, and their consultants, state and local officials, and other interested persons, the implications of the Three Mile Island, Unit 2 Accident.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Pub. L. 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Richard K. Major, (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m., EDT.

Background information concerning this nuclear station can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street, N.W., Washington, DC 20555 and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Street, Harrisburg, PA 17126.

Dated: August 15, 1979.

John C. Hoyle,
Advisory Committee Management Officer.

BILLING CODE 4510-23-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 10831; 812-4234]

Federal Life Insurance Co. (Mutual), et al.; Application

August 14, 1979.

Notice is hereby given that Federal Life Insurance Company (Mutual) ("Federal Life"), a mutual life insurance company organized under the laws of the State of Illinois, Federal Life Variable Annuity Account A ("Separate Account"), a separate account of Federal Life registered as a unit investment trust under the Investment Company of 1940 ("Act") and FED Mutual Financial Services, Inc. ("Underwriter"), 3703 W. Lake Avenue, Glenview, IL 60025, the principal underwriter of the Separate Account, (hereinafter collectively referred to as "Applicants"), filed an Application on November 25, 1977, and Amendments thereto dated February 24, 1978, and July 6, 1979 pursuant to Section 11 of the Act for an Order approving certain offers of exchange, pursuant to Section 6(c) of the Act for an amended Order of exemption from the provisions of Section 26(a) and 27(c)(2), and for additional exemptions under Section 22(d). The original Order which is sought to be amended was issued to the Applicants herein on April

7, 1976 (with the exception of Underwriter) (File No. 812-3810) pursuant to Section 11 of the Act approving certain offers of exchange, and pursuant to Section 6(c) of the Act granting exemptions from the provisions of Sections 26(a) and 27(c)(2) (Investment Company Act Release No. 9341).

All interested persons are referred to the Application, and Amendments thereto, on file with the Commission for a statement of the representations contained therein which are summarized below.

The Separate Account was established by Federal Life to fund both individual and group periodic premium deferred and single premium immediate variable annuity contracts ("Contracts") designed for use in connection with retirement plans, which may or may not qualify for Federal tax advantages. The Contracts are currently being offered and sold to the public pursuant to an effective registration statement under the Securities Act of 1933, the latest Post-Effective Amendment to which was declared effective on April 30, 1979 (File No. 2-53626). The Separate Account presently consists of six Account Divisions, which invest respectively, in the shares of Wellington Fund, Inc., Windsor Fund, Inc., Qualified Dividend Portfolio, Inc., Wellesley Income Fund, Inc., W.L. Morgan Growth Fund, Inc., and Westminster Bond Fund, Inc. ("Fund Participants"). Applicants propose to create two new Account Divisions or "Series", which would invest in the shares of Whitehall Money Market Trust and Qualified Dividend Portfolio II, Inc., respectively, ("Additional Fund Participants").

The Fund Participants and Additional Fund Participants are members of the Vanguard Group of Investment Companies, and each is diversified, open-end management investment company registered under the Act. Each has a currently effective registration statement under the Securities Act of 1933.

Applicant FED Mutual Financial Services, Inc. a registered broker-dealer, acts as the principal underwriter of the Contracts issued by the Separate Account. Wellington Management Company ("Wellington") serves as investment adviser to each of the above Fund Participants and Additional Fund Participants.

Under all of the Contracts, the Owner of an Individual Contract or a Certificate Holder under a Group Contract (hereinafter referred to as individual Participants) may allocate all or a portion of his Net Purchase

Payments (the amount remaining after deduction of sales and administrative expenses from the gross purchase payment) between any of the Account Divisions (limited to two Account Divisions at any one time). The value of Net Purchase Payments allocated to the Separate Account, and the value of an individual Participant's interest will vary depending upon the investment performance of the Fund shares of the designated Division in which such Net Purchase Payments are allocated. In addition, an individual Participant may transfer all or a part of his interest in one Division to another Division of the Separate Account or to a fixed accumulation account maintained by Federal Life; or he may transfer all or a part of his interest in a fixed accumulation account to a Separate Account Division. Transfers from the fixed accumulation account to the Separate Accounts may be effected only once annually, except such transfer may be also effected at time of annuitization. Except for the fact that no transfers may be made during the first contract year, transfers among the Divisions are not limited in number. No partial transfer will be permitted if the value of the Division from which amounts are to be transferred is less than \$600 after such transfer, or if the amount transferred is less than \$300. Each transfer is made at the relative net asset values of the Funds in the Divisions affected without the imposition of additional sales and administrative expense charges, at the next succeeding valuation on the date written directions from the individual Participant are received by Federal Life.

With regard to Section 11, Applicants seek to amend and supplement the Order of April 7, 1976 to add the Additional Fund Participants in the offers of exchange as approved by that Order, and to include such Additional Fund Participants and the Underwriter in the exemptions from Sections 26(a) and 27(c)(2) previously granted pursuant to Section 6(c). In addition, Applicants seek to amend and supplement the previous Order with regard to Section 22(d) of the Act to the extent necessary to permit aggregation of the value of shares of the Funds with the Adjusted Purchase Payments under the Contracts for purposes of calculating the applicable reduced sales load for quantity discounts.

Section 11

Section 11(a) of the Act makes it unlawful for any registered open-end investment company or principal underwriter therefor to make an offer to the holder of a security of such company

or of any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged unless the terms of the offer have first been submitted to and approved by the Commission. Section 11(c) provides that, irrespective of the basis of exchange, the provisions of subsection (a) shall be applicable to any type of offer of exchange of the securities of registered unit investment trusts for the securities of any other investment company.

The Order of April 7, 1976 approved the conversion of Contract Accumulation Units from any one of the six Divisions of the Separate Account to any other Division of the Separate Account then in existence. It is proposed that this conversion right be extended so as to encompass the two additional Divisions whose underlying investment media will consist of shares of Qualified Dividend Portfolio II, Inc. and Whitehall Money Market Trust, respectively.

Applicants assert that under the terms of the right to convert among Divisions of the Separate Account, no danger of any of the abuses that Section 11 was enacted to prevent is present. It is also asserted that the purpose of providing such rights is to permit Unitholders of one Division of the Separate Account who wish to have their annuity Contracts funded by the Fund shares of another Division the opportunity to do so, thus providing individual Participants with greater flexibility in planning for their financial futures.

Applicants submit that there will be no imposition of sales and administrative expense charges, and the conversion will be at net asset value.

Sections 26(a) and 27(c)(2)

Section 27(c)(2) of the Act, as here relevant, prohibits the issuer of a periodic payment plan certificate and any depositor or underwriter for such issuer from selling such periodic payment plan certificates unless the proceeds of all payments (other than any sales load) are deposited with a qualified bank as trustee or custodian, and held under an indenture or agreement containing specified provisions. Section 26(a) requires that such indenture or custodianship agreement must provide, *inter alia*, that the bank (i) shall have possession of all property of the unit investment trust and segregate and hold the same in trust subject only to the charges and collections specifically allowed under clauses (A), (B) and (C) of such Section until distribution to the security holders

of the trust; (ii) shall not resign until the trust has been liquidated or a successor has been appointed; (iii) may collect from the income and, if necessary, from the corpus of the trust such fees for services provided for in the agreement; (iv) shall not allow as an expense any payment to the depositor or principal underwriter except a fee, not exceeding such reasonable amount as the Commission may prescribe, for performing bookkeeping and other administrative services of a character normally performed by the bank itself.

In the arrangement now existing pursuant to the Order set forth in Investment Company Act Release No. 9241, the Separate Account acts as custodian of its own assets. Applicants request that the Order of exemption from Section 26(a) and 27(c)(2) of the Act be amended to include the Contracts funded in the proposed two additional Divisions of the Separate Account.

In support of such request, Applicants state that the assets of the eight Divisions of the Separate Account will consist solely of the shares of the mutual funds in which each particular Division of the Separate Account invests and that such shares will be held in an open account so that ownership of Fund shares by the Separate Account will only be indicated on the books of the Funds and the Separate Account, and will not be evidenced by transferable stock certificates. The assets of each Separate Account Division will be kept physically segregated by Federal Life and held separate from the assets of Federal Life itself. Applicants state that Federal Life will maintain a record of all purchases and redemptions of the Fund shares in each applicable Division of the Separate Account and will prepare and forward reports to the Commission and others where required.

Applicants further state that Federal life is subject to extensive supervision and control by the Illinois Insurance Commissioner and the comparable official of each state in which it does business; and that Federal Life's activities are subject to constant review by the Illinois Insurance Department and its representatives at all times and subject to comprehensive examination periodically. Applicants assert that Federal Life may not abrogate its obligations under the Contracts and that any substitution of an underlying Fund of the Separate Account can only take place upon sound reasons by Federal Life, as stated in the Separate Account prospectus, and then only upon a prior favorable vote of a majority of the units having an interest in the Fund to be

substituted and the prior approval of the Securities and Exchange Commission. Applicants finally state that Federal Life maintains fidelity bonds covering its employees which provide coverage in the amount of \$650,000.

Applicants contend that the foregoing laws, regulations and arrangements will provide substantial assurance that all obligations under the Contracts participating in the Separate Account will be performed, and that the dangers addressed by Sections 26(a) and 27(c)(2) are not present in this situation.

Applicants have consented that the request for the foregoing exemptions may be made subject to the following conditions: (1) that the deductions for administrative services shall not exceed such reasonable amount as the Commission shall prescribe, and the Commission may reserve jurisdiction for such purpose, and (2) that the payment of sums and charges out of the assets of the Separate Account shall not be determined to be exempted from regulation by the Commission by reason of the requested amended Order, provided that Applicants' consent to this condition shall not be determined to be a concession to the Commission of authority to regulate the payment of sums and charges out of such assets other than charges for administrative services, and Applicants reserve the right in any proceeding before the Commission, or in any suit or action in any court, to assert that the Commission has no authority to regulate the payment of such other sums and charges.

Additional Exemptions Requested—Section 22(d)

Applicants propose to permit present shareholders of the participating Funds who have held at least ninety percent of the value of their shares for one year or longer to purchase Contracts at a reduced sales load applicable to a quantity discount, which sales load is to be determined by combining the value of all Fund shares owned with the amount of Adjusted Purchase Payments under the Contracts. Shareholders of the Funds may do this without transferring shares held in an existing Fund Account into this Contract.

Section 22(d) of the Act provides in pertinent part that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus.

Rule 22d-3, in substance, permits the sale of variable annuity contracts at variations in the sales load deductions,

provided that the prospectus for such variable annuity discloses the variations in sales load and the basis therefor, and further provided that such variations are not unfairly discriminatory. Applicants warrant that the availability of the reduced sales loads to the proposed categories of prospective purchasers and the bases therefor will be fully disclosed in the prospectuses of the Contracts, if said variations are approved. Applicants concede that the Rule 22d-3 exemption criteria may not be literally satisfied, although they assert the proposed arrangement is not unfairly discriminatory against any person and will be disclosed in the prospectus for the Contracts. In proposing this reduced sales load privilege, Applicants indicate reliance on the Commission's announcement in Investment Company Act Release No. 8570 (November 4, 1974) which indicates that the Commission would favorably consider an application for exemption from Section 22(d) to permit sales load reductions offered to persons who have previously or contemporaneously purchased another investment or insurance product from the same retailer or distributed by the same underwriter, if such exemption were in the best interest of investors.

Applicants assert that it is in the public interest and in the interest of investors to permit the proposed reduction of sales load. This is so even though the underwriter of the Separate Account and the underwriter of the Funds are different entities, because of the close relationship existing among Applicants which warrants such reduced sales charge. The Separate Account only invests in mutual funds which are members of the Vanguard Group of Investment Companies.

NOTICE IS FURTHER GIVEN that any interested person may, not later than September 10, 1979, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or laws proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and

Regulations promulgated under the Act, an order disposing of the application will be issued as of course following September 10, 1979, unless the Commission thereafter orders a hearing upon the Commission's motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing, if ordered, and any postponements thereof.

For the Commission, by the Divisions of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Rel. No. 6104; 18-31]

Pension Plan and Trust Agreement for Attorneys of Fulbright & Jaworski; Application

August 14, 1979.

Notice is hereby given that Fulbright & Jaworski ("Applicant" or the "Firm"), 800 Bank of the Southwest Building, Houston, TX 77002, a law firm organized as a partnership under the laws of the State of Texas, filed an application on January 9, 1979, for an exemption from the registration requirements of the Securities Act of 1933 (the "Act") for interests or participations issued in connection with the Pension Plan and Trust Agreement for Attorneys for Fulbright & Jaworski (the "Plan").

Introduction

The Plan covers the Firm's attorneys, of whom approximately 124 associates and 119 partners were participants in the Plan as of May 31, 1978. The Plan provides that attorneys of the Firm are eligible to participate therein if they have completed the requisite one year of service and received admissible annual compensations (i.e., the portion of the first \$100,000 of their annual earnings in excess of the maximum considered wages for FICA tax purposes for such year). Participation in the Plan by eligible partners and associates of the Firm is mandatory, and each eligible employee is automatically admitted to participation upon completion of one year of service or attainment of age 25 if later. Person who are 60 years of age when initially hired by the Firm are excluded.

The Plan covers persons (in this case Applicant's partners) who are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954, as amended ("Code"), and

therefore the exemption provided by Section 3(a)(2) of the Act is inapplicable to the Plan.

The Commission may, pursuant to Section 3(a)(2), exempt from the provisions of Section 5 of the Act any interest or participation issued in connection with a stock bonus, pension, profit sharing, or annuity plan which covers employees some or all of whom are employees within the meaning of Section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Description and Administration of the Plan

The Firm represents that the Plan was adopted effective as of June 1, 1975, and was amended and restated in its entirety, effective as of May 23, 1978. The Plan was subsequently amended by the First Amendment thereto as was required by the Internal Revenue Service ("IRS") prior to approving the Plan as continuing to be a qualified plan under section 401(a) of the Code. In connection with these amendments the Plan has been reviewed by the IRS and the Firm has received a favorable determination letter confirming the qualification of the Plan under Section 401(a) of the Code. The Firm states that, under the Plan, contributions to the Plan are permitted only from the Firm based upon the funding requirements under the Internal Revenue Code as determined and certified by the independent actuaries. No contributions are permitted from any member.

The firm represents that it maintains substantial administrative control over the Plan. The Plan is administered by a Pension Committee ("Committee") consisting of one to five persons each of whom may or may not be a participant in the Plan. The Committee has overall responsibility and authority in connection with the general administration of the Plan, including the interpretation of all terms, provisions, conditions and limitations of the Plans establishment and enforcement of rules relating to administration of the Plan, the determining of the period of credit service and amount of earnings upon which the benefit of each member shall be calculated, the authority to instruct the Trustee in all matters relating to payment of Plan benefits and all matters relating to management of the Trust funds, and the authorization for

payment of proper expenses in administering the Plan.

The Firm represents that the Plan is an "employee pension benefit plan" subject to regulation by the Department of Labor under the Employee Retirement Income Security Act of 1974 ("ERISA") and is subject to the fiduciary standards and full reporting and disclosure requirements of ERISA.

The Firm represents that the Trustee has entered into, at the direction of the Committee, a Deposit Administration Contract (the "Contract") with The Prudential Insurance Company of America ("Prudential"), pursuant to which most of the assets of the Plan have been invested. The remainder of the assets are invested in short-term variable demand notes. Amounts invested through the Contract have been guaranteed by Prudential. The yield on such amounts will be compounded annually at a rate based on Prudential's investment experience but in any event not less than a stated rate agreed to by the Trustee and Prudential. The Contract is for a five year term, and no cash may be withdrawn therefrom until the Contract has expired.

The Firm represents that retirement benefits are a function of years of service, average monthly earnings from the Firm for certain years prior to retirement, and the member's monthly primary social security benefit at his normal retirement date. The normal retirement date under the Plan is the month next following the sixty-fifth (65) birthday of a participant. Options are available to participants for early or late retirement and for types of payouts at retirement date. A participant's benefit from the Plan upon termination of employment prior to retirement is his retirement benefit accrued to the date of severance to the extent vested. Vesting is determined by length of service. Both the benefit formulas and the method of vesting comply with the requirements of ERISA.

The Firm represents that the Firm has not distributed and does not intend to distribute any type of promotional material relating to the Plan (other than such material as the Firm may be required under ERISA to distribute to participants or employees) and has not and does not intend to make any solicitation of voluntary contributions to the Plan. The Firm makes available to each Plan participant a Pension Plan Description and, upon request, copies of the Pension Plan and Trust Agreement and the latest interim financial statements of the Plan.

Discussion

Applicant contends that if the Firm were a corporation rather than a partnership, interests or participations issued in connection with the Plan would be exempt from registration under Section 3(a)(2) of the Act. Applicant further represents that the Plan is subject to the fiduciary standards and reporting and disclosure requirements of ERISA; that the Applicant has retained substantial administrative control of the Plan, including ultimate control over investment policies; that the Applicant is engaged in providing legal services involving sophisticated and complex financial matters and can adequately represent its and its employees' interests; and that no solicitation of employee contributions has been or will be made.

Applicant submits that, in light of the foregoing, granting the requested exemptive order would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 8, 1979, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following September 8, 1979, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[Rel. No. 6107; 18-44]

The Rosenman Firm Profit-Sharing Plan; Application for Exemption

August 15, 1979.

Notice is hereby given that Rosenman Colin Freund Lewis & Cohen (the "Applicant" or "Firm"), Rosenman Colin Freund Lewis & Cohen, 575 Madison Avenue, New York, NY 10022, a law firm organized as a partnership under the laws of the State of New York, filed an application on February 16, 1979, and June 20, 1979, for exemption from the registration requirements of the Securities Act of 1933 (the "Act") for participations or interests issued in connection with the Rosenman Firm Profit-Sharing Plan (the "Plan"). All interested person are referred to that application which is on file with the Commission, for the facts and representations contained therein, which are summarized below.

Introduction

The Plan provides that partners of the Firm (except partners who own more than ten percent of either the capital interest or profits interest in the Firm) and employees of the Firm are eligible to participate therein if they are at least 24½ years of age and have completed 2½ years of service with the Firm. An individual practitioner or a member of another firm whose practice has been merged into that of the Firm (or a person who was employed by such individual practitioner or other firm prior to the merger) receives credit for service prior to the merger for the purposes of establishing his eligibility to participate in the Plan. Participation in the Plan begins on the first day of January, coincident with or next following the date on which a person first becomes eligible for participation. As of December 31, 1978, there were 128 participants in the Plan, including 87 employees and 41 partners.

The Plan is of the type commonly referred to as an "H.R. 10" or "Keogh" plan which covers persons who are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954 (the "Code") and, therefore the exemption provided by Section 3(a)(2) of the Act for interests or participations in certain employee

benefit plans of corporate employers is inapplicable. Section 3(a)(2) of the Act provides, however, that the Commission may exempt from the provisions of Section 5 of the Act any interest or participation issued in connection with a pension or profit-sharing plan which covers employees some or all of whom are employees within the meaning of Section 401(c)(1) of the Code, if and to the extent the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Description and Administration of the Plan

The Plan is a defined contribution H.R. 10 plan originally adopted in December, 1969, and most recently amended effective as of January 1, 1976. The Plan is subject to the Employee Retirement Income Security Act of 1974 ("ERISA"). The Internal Revenue Service has issued a determination letter to the effect that the Plan, as amended to date, continues to meet the requirements of Section 401(a) of the Code.

Under the Plan, the Firm contributes annually with respect to each employee participant in the Plan an amount which is determined in accordance with a formula contained in the Plan. This formula provides, with respect to the calendar year 1978, that the Firm will contribute 7% of the employee's compensation in excess of \$12,000 plus 1.34% of his total compensation. The \$12,000 figure automatically increases by \$500 a year and the 1.34% figure also automatically increases by .035% a year. Each partner participant in the Plan can contribute, at his own election, such amount as he determines up to the maximum amount that would be contributed on his behalf by the Firm if he were an employee participant. Each person's compensation is, of the purposes of the Plan, limited to \$100,000.

In addition to the foregoing, each participant in the Plan is permitted, at his or her option, to make voluntary contributions annually in an amount not exceeding 10% of his or her compensation paid during the period of his or her participation in the Plan.

Four partners of the Firm serve as Trustees under the Plan. The Trustees have the power to employ agents, attorneys, accountants and other persons to advise them as they deem necessary. The daily administration of the Plan is handled by the Plan Administrator, who is one of the Trustees.

The Plan is divided into two funds for investment purposes and each participant is allowed to choose, each year, in which of these two funds his account balances should be invested. The first of these funds is an "equity fund" which is managed by an independent investment adviser and the second of these funds is a "bond fund" which is managed by the Trustees.

Discussion

Applicant contends that if the Firm's business were organized in corporate form, interests and participations in the Plan would be exempt from registration pursuant to Section 3(a)(2) of the Act. It is only because of the participation of "employees" within the meaning of Section 401(c)(1) of the Code that the exemption is not available.

Applicant further contends that the Plan does not present the risks associated with the sale of interests or participations in multi-employer plans by financial institutions with which Congress was primarily concerned when it drafted Section 3(a)(2). The Plan is not a master or prototype plan designed to be marketed by a promoter to unrelated self-employed persons. The assets of the Plan are not commingled in pooled accounts with the assets of other employers' plans.

Applicant represents that the Firm exercises substantial administrative responsibility with respect to the Plan, and has employed independent experts to provide investment management and advisory services; that because the Plan is subject to the requirements of ERISA, the Firm must provide descriptive and financial information to Plan participants; that due to the nature of the Firm's business, which involves complex financial matters, the Firm is able to protect its interests and those of Plan participants.

Applicant concludes that for the foregoing reasons, granting the requested exemptive orders would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 10, 1979, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication

should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following September 10, 1979, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01

[Rel. No. 10836; 812-4471]

Shearson Daily Dividend Inc.; Application for Exemption

August 15, 1979.

Notice is hereby given that Shearson Daily Dividend Inc. ("Fund"), 767 Fifth Avenue, New York, New York 10022, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified investment company filed an application on May 1, 1979, and an amendment thereto on July 23, 1979, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting the Fund from the provisions of Rule 22c-1 thereunder to the extent necessary to permit the Fund to compute its net asset value per share, for purposes of effecting sales and redemptions of its shares, using a time other than the close of trading on the New York Stock Exchange. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Fund represents that it registered under the Act on March 20, 1979, as a "money market" fund designed as an investment vehicle for investors who desire to place assets in money market instruments where the primary considerations are safety, liquidity and, to the extent consistent with the foregoing, a high income return. The

Fund further represents that its portfolio may be invested exclusively in a variety of short-term money market instruments consisting of securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities; certificates of deposit, including those issued by domestic banks, and savings and loan and similar associations; and high-grade commercial paper. According to the application, all investments by the Fund must consist of obligations maturing within one year from the date of acquisition, and the average maturity of all its investments (on a dollar-weighted basis) will be 120 days or less.

The Fund proposes to compute its net asset value using a time other than the close of trading on the New York Stock Exchange. In this regard, the Fund represents that the board of directors of the Fund, including a majority of the directors who are not interested persons, have determined that it is in the best interest of the Fund to compute its net asset value for the purposes of sales and redemptions of its shares solely as of 2:30 P.M., New York City time, and to require that notice of intent to purchase or redeem its shares be given prior to 2:30 P.M., New York City time in order for such purchases to be effected upon receipt of Federal Funds or for such redemptions to be effected on the same day as requested. The Fund also represents that such determination by its board of directors will be reviewed no less frequently than annually.

Rule 22c-1 under the Act provides, in pertinent part, that no registered investment company issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security. Subsection (b) of Rule 22c-1 defines the term "current net asset value" of a redeemable security as that value computed on each day during which the New York Stock Exchange is open for trading, not less than once daily as of the time of the closing of trading on such exchange.

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision of the Act or any rule thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly

intended by the policy and provisions of the Act.

In support of the relief requested, the Fund represents that this policy of computing net asset value as of 2:30 P.M., New York City time, would aid in the effective management of the Fund's portfolio. According to the application, in order for the Fund to make investments which will generate income immediately, it must have Federal Funds available to it. The earlier in the day that the Fund is aware of the cash available for investment through net purchases of its shares, the more time it will have to analyze the available investment alternatives and secure terms most attractive and beneficial to the Fund.

The Fund further proposes to declare its daily net dividend as of 2:30 P.M., New York City time, to shareholders of record, excluding shares purchased, but including shares redeemed, on that day. In view of the above and the fact that the portfolio securities of the Fund will not be listed on any stock exchange, the Fund's management can perceive no benefit to shareholders in computing the net asset value for a second time as of the close of trading on the New York Stock Exchange, aside from technical compliance with Rule 22c-1. The Fund asserts that opportunities for dilution of the value of the outstanding securities of the Fund will not be present if the requested exemption is granted. In addition, because the Fund's distributor and custodian reconcile their accounting records on a daily basis, the Fund rejects all orders for the purchase of its shares received by its distributor after 2:30 P.M., New York City time. The Fund believes that if it were permitted to determine its net asset value as of 2:30 P.M., there would be no necessity for the Fund to reject any orders for the purchase of its common shares.

The Fund submits that the exemption it requests is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 10, 1979, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission,

Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Fund at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8025-01-M

[Proposal No. 05/05-0142]

Claremont/LaSalle Corp.; Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the SBA Regulations (13 CFR 107.102(1979)), by Claremont/LaSalle Corporation, 29 South LaSalle Street, Chicago, Illinois 60603 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. *et seq.*).

The proposed officers, directors and stockholders are:

Name and address, Title and relationship and Percent of ownership

Steven B. Randall, 888 Kimbal Rd., Highland Park, Ill. 60035, President, General Manager, Director, *
Harvey Pyes, 507 Karey Ct., Wilmette, Ill. 60091, Secretary, Director, *
S. William Pattis, 195 Elder Ln., Highland Park, Ill. 60035, Director, *
Patrick H. Arbor, 180 East Pearson, Chicago, Ill. 60611, Director, *
Dante A. Greco, 700 Old Elm Rd., Highland Park, Ill., 60035, Director, *

*The exact percentage of ownership will not be known until the conclusion of a private placement offering.

The Applicant proposes to begin operations with a capitalization of \$500,000 and will be a source of equity capital and long term loans for qualified small business concerns. This initial capital will be obtained through the sale of common stock to no more than 35 persons. The Applicant intends to render management consulting services to small business concerns.

Matters involved in SBA's consideration of the application include, the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of the publication of this Notice, submit written comments on the proposed SBIC to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of the Notice will be published in a newspaper of general circulation in Chicago, Illinois.

BILLING CODE 8025-01-M

[Proposed License No. 05/05-5141]

Innercity Capital Access Center, Inc.; Application for License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of

1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Innercity Capital Access Center, Inc. (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1979).

The officers and directors of the applicant are as follows:

Hawkins R. Steele, 736 Pallister, Detroit, MI 48202, Chairman, Director.
Mark Rollinson, 410 Federal Bar Bldg., 1819 H St., N.W., Washington, D.C. 20006, Vice Chairman, Director.
Walter M. McMurtry Jr., 1535 Lincolnshire, Detroit, MI 48203, President, Director.
Richard P. Barnard, 784 Overhill Road, Birmingham, MI 48101, Director.
Thomas W. Cross, Cross & Company, 1985 W. Big Beaver Road, Suite 209, Troy, MI 48064, Director.
Karl Gregory, 18495 Adrian, Southfield, MI 48075, Director.
Kenneth Mabuchi, c/o P. F. Industries, Inc., 54 Buttonwood Street, Bristol, R. I. 02809, Director.
Claude Reese, 2481 Woodstock, Detroit, MI 48203, Director.
S. Martin Taylor, MESC, 7310 Woodward, 5th Floor RM #510, Detroit, MI 48202, Director.
Donald Carros, 40 Birwood, Pontiac, MI 48055, Vice President, Secretary.
Harbans Dang, 17214 Charest, Detroit, MI 48212, Treasurer.

The applicant will maintain its principal place of business at 3049 East Grand Boulevard, Detroit, Michigan 48202. It will begin operations with capital of \$1,178,500 of which \$935,000 will be a grant to the Inner City Business Forum, the sole stockholder of the applicant 3049 East Grand Avenue, Detroit, Michigan 48202 from the Office of Special Projects of the Economic Development Administration, U.S. Department of Commerce.

The applicant will operate principally in the State of Michigan.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including

adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Acting Associate administrator for Finance and Investment, Small Business Administration, 1441 L Street, N. W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Detroit, Michigan.

BILLING CODE 8025-01-M

[Proposed License No. 08/08-5049]

Minority Enterprise Capital Corp.; Application for License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Minority Enterprise Capital Corporation (applicant), with the Small Business Administration (SBA), pursuant to 13 C.F.R. 107.102 (1979).

The officers, directors and stockholders of the applicant are as follows:

N. F. Anthony Seibert, 2661 Grapewood Lane, Boulder, Colorado 80302, Chairman of the Board, President, 100 percent Stockholder.
Lowell G. Shofner, 98 South Cherry, Denver, Colorado 80222, Vice President, Director.
Rebecca L. McBrayer, 7331 South Columbine Way, Littleton, Colorado 80122, Secretary-Treasurer, Director.

The applicant, a Colorado Corporation, with its principal place of business at 469 South Cherry Street, Suite 101, Denver, Colorado 80222, will begin operations with \$500,000 of paid-in capital and paid-in surplus derived from the sale of 50,000 shares of common stock.

The applicant will conduct its activities principally in the State of Colorado and in other areas within the Rocky Mountain region.

Applicant intends to provide assistance to all qualified socially or

economically disadvantaged small business concerns as the opportunity to profitably assist such concerns is presented.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than September 5, 1979, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Denver, Colorado.

[Proposed License No. 04/04-5176]

Tennessee Venture Capital Corp.; Application for License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Tennessee Venture Capital Corporation (TVCC), with the Small Business Administration (SBA), pursuant to 13 C.F.R. 107.102 (1979).

The officers, directors and principal stockholders of TVCC are as follows:

David O. Kardokus, 4005 Vailwood Drive, Nashville, TN 37215, President, Treasurer, Director.

Risley P. Lawrence, 919 Van Leer Drive, Nashville, TN 37220, Vice President, Director.

Mack S. Linebaugh, Jr., 5958 Post Road, Nashville, TN 37205, Vice President, Director.

Allen M. Steele, 1001 Overton Lea Road, Nashville, TN 37220, Director.

J. Lillard Templeton, Jr., 5948 Sedberry Road, Nashville, TN 37205, Vice President, Director.

George H. Thompson III, 500 5th Avenue,

North, Nashville, TN 37219, Vice President, Director.
E. Townes Duncan, 704 Kendall Drive, Nashville, TN 37209, Secretary.

10 common stockholders, each owning less than 10 percent of common stock..... 71.15
1 preferred stockholder, Tennessee Industrial Development Authority..... 28.85

100.00

TVCC, a Tennessee corporation with its principal place of business located at Room 622, J. C. Bradford Building, 170 Fourth Avenue North, Nashville, Tennessee 37219, will begin operations with \$505,000 of net combined paid-in capital and paid-in surplus derived from the sale of 3,700 shares of common stock and 1,500 shares of preferred stock.

TVCC will conduct its activities primarily in Middle Tennessee.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Acting Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Nashville, Tennessee.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: August 9, 1979.

Peter F. McNeish,
Acting Associate Administrator for Finance and Investment.

DEPARTMENT OF STATE

[Public Notice CM—8/214]

Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on September 13, 1979, in Room 856, Federal Communications Commission, 1919 M Street, NW., Washington, D.C., at 9:30 a.m.

Study Group 1 deals with matters relating to efficient use of the radio frequency spectrum, and in particular, with problems of frequency sharing, taking into account the attainable characteristics of radio equipment and systems; principles for classifying missions; and the measurement of emission characteristics and spectrum occupancy. The purpose of the meeting will be to work on documents for the 1980 international meeting of Study Group 1 and to consider responses to a questionnaire concerning future organization of CCIR Study Groups.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman.

Requests for further information should be directed to Mr. Gordon Huffcutt, State Department, Washington, D.C. 20520, telephone (202) 632-2592.

Dated: August 9, 1979.

Gordon L. Huffcutt,
Chairman, U.S. CCIR National Committee.

Agency for International Development

Joint Committee for Agricultural Development of the Board for International Food and Agricultural Development; Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a), (2),

Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the meeting of the Joint Committee on Agricultural Development (JCAD) of the Board for International Food and Agricultural Development (BIFAD) on September 10 and 11, 1979.

The purpose of the meeting is to: review and coordinate the reports from Regional Work Group (RWG) consultations with A.I.D. Missions; discuss the JCAD role in the involvement of Private Volunteer Organizations (PVO's) in Title XII Country Programs; discuss the desirability of Work Groups to monitor the Strengthening Grants; discuss the report of the Training Work Group and need for JCAD action; and discuss reorganization of RWG's and future meeting dates.

The meeting on September 10, 1979, will convene in Regional Work Groups: Africa RWG at 9:00 a.m. in Room 2941, New State Department Bldg. (Mr. William Johnson, A.I.D. Federal Designee for this meeting, can be contacted at (703)-632-0196); Latin America RWG at 10:00 a.m. in Room 2242 New State Department Bldg. (Mr. Blair Allen, A.I.D. Federal Designee for this meeting can be contacted at (202)-632-8279); Near East RWG at 9:30 a.m. in Room 6484 New State Department Bldg. (Mr. Russell Olson, A.I.D. Federal Designee for this meeting, can be contacted at (202)-632-9256); and the Asia RWG at 9:00 a.m. in Room 218, Rosslyn Plaza Bldg., 1601 North Kent Street, Rosslyn, Virginia. (Mr. David Lundberg, A.I.D. Federal Designee for this meeting can be contacted at (703)-235-8870). The meeting on September 11, 1979 will convene from 9:00 a.m. to 4:30 p.m. in the Dynasty Room of the Holiday Inn, 1850 N. Ft. Myer Drive, Arlington, Virginia, 22209. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Frank H. Madden, Office of Title XII Coordination and University Relations, Development Support Bureau, is designated A.I.D. Advisory Committee Representative at the September 11 meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department,

Washington, D.C. 20523, or telephone him at (703)-235-9085.

Dated: August 13, 1979.

Frank H. Madden,

A.I.D. Advisory Committee Representative,
Joint Committee on Agricultural Development, Board for International Food and Agricultural Development.

BILLING CODE 4710-02-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

Imported Steel Mill Products Trigger Price Mechanism: Fourth-Quarter 1979 Revision of Trigger Prices

The Treasury Department hereby announces steel mill products trigger prices for the fourth quarter of 1979. These trigger prices are used by the Treasury Department to monitor the prices of steel mill product imports for possible initiation of dumping investigations under the Antidumping Act. Each quarter Treasury reviews the cost of Japanese steel production and revises trigger prices accordingly.

Fourth-quarter trigger base prices and extras for the steel mill products manufactured principally by integrated steel producers will remain at the third-quarter 1979 trigger price levels. These products account for about 90 percent of U.S. steel mill product imports.

The trigger base prices and extras of those steel mill products manufactured principally by electric furnace producers will decrease by 0.1 to 0.3 percent from their third-quarter levels. The trigger price bases and extras for stainless steel wire products will increase or decrease slightly, depending on the product.

The steel trigger price mechanism (TPM) includes a "flexibility band" designed to allow the moderation of price fluctuations, particularly those due to currency exchange rate changes, by as much as 5 percent. This band has been used each of the past three quarters to lessen the magnitude of trigger price increases and decreases that were caused by currency value movements. In determining the levels of fourth-quarter bases and extras, Treasury utilized 1.1 percent of this band to keep most trigger price bases and extras at their third-quarter levels. If Treasury had not used the flexibility band, fourth-quarter trigger prices would have been reduced 1.1 percent from their third-quarter levels.

Table 1.—Third and Fourth Quarter 1979 Average Costs and Trigger Prices: Integrated Producers

	(Dollars per net ton)	
	Third quarter	Fourth quarter
Average cost estimate.....	341.08	343.70
Average trigger price.....	347.54	347.54

I. Production Costs

A. Integrated and Electric Furnace Producers

Treasury estimated dollar-valued Japanese steel production costs for fourth-quarter 1979 trigger prices on the basis of recent cost submissions from Japan's Ministry of International Trade and Industry (MITI) and a 217 yen/dollar currency exchange ratio. The currency ratio used is the average yen/dollar exchange rate for the period June 8 through August 7. Treasury's production cost estimates for third-quarter trigger prices were based on a 212 yen/dollar ratio, the average for March 5 through May 4, 1979. This 2.4 percent depreciation in the yen's value relative to the dollar decreased Treasury's dollar-valued estimates of the steel production costs of Japan's integrated producers by 1.6 percent.

Offsetting the depreciation of the yen is the increasing cost of fuel. Fuel costs have a substantial impact on Japanese production costs both directly through the fuel oil used in steel production, and indirectly through the increase in the cost of transporting raw materials to the Japanese steel plants. As shown in Tables 2 and 3 below, these costs increases resulted in a net increase in Treasury's average production cost estimates of 0.8 percent for integrated producers and 0.4 percent and 0.5 percent for electric furnace producers.

The resulting base prices for products produced by integrated producers and electric furnace producers are shown in Table 4.

Table 2.—Japanese Production Cost Estimate: Integrated Steel Producers Third and Fourth Quarters, 1979

	(U.S. dollars per metric ton of finished product)	
	Third quarter	Fourth quarter
Basic raw materials.....	\$124.66	\$132.99
Other raw materials.....	67.10	65.55
Labor.....	91.86	89.88
Other expenses.....	26.62	26.01
Depreciation.....	27.62	26.98
Interest.....	24.12	23.56
Profit ¹	24.82	25.14
Yield credit.....	(10.70)	(11.05)
Total cost \$/MT.....	375.87	378.88
Total cost \$/NT.....	341.08	343.70

¹ Profit = 0.08 (Raw materials + labor + other expenses).

B. Stainless Steel Wire

Treasury's production cost estimates for stainless steel wire base prices and extras reflect information from a new MITI submission, use of 1.1 percent of the flexibility band, as well as adjustments to a 217 yen/dollar exchange average. The increase in stainless steel wire trigger base prices principally reflects changes in the cost of the metal contained in the wire. Since the magnitude of the price changes of the various metals used in stainless steel wire varied widely, the third-to-

fourth-quarter changes in the base prices of the wire vary depending on the type of metal each contains. The production costs of stainless steel trigger price extras increased significantly due primarily to the increase in the price of fuel. However, for most products these increases were more than offset by the effect of the change in the exchange rate.

The resulting stainless steel base prices and extras are shown in the revised pages of the *Trigger Price Manual*, which follows Table 5 of this notice.

Table 3.—Japanese Production Cost Estimates: Electric Furnace Products, Third and Fourth Quarter 1979
(U.S. dollars per metric ton of finished product)

	Group A ¹		Group B ²		Group C ³	
	Third quarter	Fourth quarter	Third quarter	Fourth quarter	Third quarter	Fourth quarter
Basic Raw Materials	\$168.08	\$170.78	\$182.82	\$188.18	\$168.52	\$171.29
Other Raw Materials	33.72	33.33	36.34	35.91	33.13	32.74
Labor	28.17	27.52	30.74	30.08	22.28	21.74
Other Expenses	11.20	10.94	17.23	16.68	13.55	13.24
Depreciation	7.00	6.83	9.65	9.48	6.34	6.20
Interest	8.33	6.18	7.25	7.08	6.35	6.21
Profit ⁴	19.29	18.41	21.37	21.52	19.00	19.12
Scrap Credit	(2.93)	(2.95)	(2.51)	(2.58)	(2.68)	(2.70)
Total \$/MT	270.66	272.04	302.89	304.45	266.49	267.84
Total \$/NT	245.72	246.79	274.78	276.19	241.76	242.98

¹Group A Products are equal angles, unequal angles, channels, and I-beams.

²Group B products are hot rolled strip from bar mills; merchant quality flat bars, hot rolled round bars, squares, and round cornered squares; and bar size channels.

³Group C products are concrete reinforcing bars, plain and deformed.

⁴Profit=.08 (Raw materials+labor=other expenses).

II. Freight and Interest Charges

MITI submitted current data concerning freight costs from Japan to the United States to reflect increases in the price of fuel oil. As a result, all TPM freight rates will increase \$3 for steel mill product imports entering the West Coast and \$5 for each of the other port areas.

As a result of increases in production costs, the interest component in trigger prices has been increased using the same interest formula as previously applied. For many products the interest

component will increase \$1 or \$2, although the interest charge on most products will remain unchanged.

Revised freight and interest charges are shown in Table 4.

III. Product Additions and Adjustments

Revised pages to the *Trigger Price Manual* containing additions and adjustments to previously published pages follow in Table 5. All prices in these pages are published in terms of the fourth quarter, 1979.

Table-5 Product Additions and Adjustments

AISI Category/T.P. Manual
Page Number and Product Description

14-2	Freight Charges on Pipe and Tube Products	Increased freight rate charges to all coasts.
14-3	ERW Carbon Steel Pressure Tubing	Corrected size extras
15-5	Seamless Carbon Steel Oil Well Casing	Corrected size extras
15-43	Seamless Carbon Steel Oil Well Tubing EUE with Threading and coupling	Extended coverage to include plain end seamless carbon steel oil well tubing
16-21 Thru 16-33	Stainless Steel Wire	Revised base price and extras extended coverage to include "cold drawn bar" in wire gauges.
26-1, 26-2	Electrical Steel Sheets, Grain Oriented	Revised base price and extras
26-8	Cold Rolled Sheet, Full Hard Feedstock	Clarified distinction between feedstock used for galvanizing lines and feedstock for other uses; established negative extra for feedstock material suitable for painting, strapping and other similar uses.

Rev. August, 1979

GROUP I - ANNEALED WIRE

Annealed: The condition of soft wire in which there is no further cold drawing after the last annealing treatment. Wire of this temper is made by annealing in open fired furnaces or molten salt followed by pickling, which produces a clean gray matte finish. It is also made with a bright finish by annealing wet, oil or grease drawn wire in a protective atmosphere, and is sometimes described as bright annealed wire.

GROUP III - SOFT/INTERMEDIATE WIRE

Soft/Intermediate: A condition of wire drawn one or more drafts after annealing as required to produce minimum strength or hardness. The properties of such wire can be varied between those of soft temper and those approaching spring temper wire. Wire in this temper is usually produced in a variety of dry drawn tempers. Cold heading wire, by example, belongs in this group.

Questions and Answers Pertaining to the Revised Special Summary Steel Invoice

The Department of the Treasury has received numerous inquiries following the Federal Register Notice of March 7, 1979 amending the regulations requiring the presentation of a completed Special Summary Steel Invoice (SSSI) to accompany each importation of steel mill products. The Treasury Department hereby publishes the most frequently asked questions and the Department answers regarding the completion and Customs processing of the revised SSSI.

Dated: August 15, 1979.

David R. Brennan,
Deputy General Counsel.

Questions and Answers Pertaining to Revised SSSI

1. Q. A revised Special Summary Steel Invoice (SSSI) must be presented to Customs for each shipment of steel mill products exported on or after May 7, 1979. How is "shipment" defined?

A. A shipment of steel mill products is defined as that quantity shipped by one buyer to one seller, on one carrier, entering at one port of entry. (At land border crossings, one carrier is equated to one conveyance such as one truckload or one carload.)

2. Q. The Customs Procedural Reform and Simplification Act introduces new concepts of "entry" and "entry summary." When the regulation implementing these legislative changes takes effect, will the Special Summary Steel Invoice (SSSI) be required to be presented at "entry" or at "entry summary"?

A. Under the implementing regulations, the SSSI will be required to be presented at the time of "entry summary." If the SSSI is not presented, the entry will be rejected, and Customs will order redelivery of the goods or assess liquidated damages.

Note.—If the SSSI presented at entry summary is prepared incorrectly or inadequately, the entry may also be rejected.

3. Q. In completing section 28 (Other Costs) and 30 (Selling Expenses and Processing) of the revised SSSI, must each type of cost be listed separately?

A. Yes. In section 28, each type of expense and the cost incurred must be identified. Section 30 can be an aggregation of all selling expenses and/

or processing costs. If more room is needed to show the data, continuation sheets may be used.

4. Q. In case of an international transaction between related parties and a resale price to an unrelated party, section 29 of the revised SSSI should be completed showing the amount paid for duty. If the exact amount of duty is unknown, can an estimate be used?

A. An estimate should not be used. The amount of the duty is usually known at the time the entry summary is filed, if not earlier. Thus, the broker empowered to be the agent of the importer can fill in the amount of the duty at the time of entry summary, if the importer does not know the amount.

5. Q. Previously, where the international transaction was between related parties and a resale to an unrelated party in the United States has occurred, a resale worksheet was submitted with the entry. This resale worksheet listed the expenses now required to be shown in sections 28, 29, and 30 of the revised SSSI. Can the resale worksheet continue to be submitted instead of completing these sections of the SSSI?

A. If the resale worksheet incorporates all the information required in sections 28, 29, and 30 and if a copy of the worksheet is attached to each SSSI covering a shipment, the worksheet is acceptable in lieu of completing sections 28-30 of the SSSI. However, if a worksheet is submitted, a copy must be attached to each and every copy of the SSSI.

6. Q. In international sales a commission is often paid by the foreign seller to the importer or end user. Does Treasury make any distinction between a commission paid to a related party and a commission paid to unrelated parties?

A. Yes. In the case of the commission paid by a foreign seller to an unrelated importer or end user, Treasury always deducts the amount of this commission from the invoice price before the U.S. sales price is compared to the trigger price since such a commission is, in effect, a reduction in the sales price.

In the case of a sale between related parties, Treasury compares to the trigger price the sales price to the first unrelated party (adjusted to deduct the reseller's costs). As long as this sales price is available at the time of entry summary, Treasury disregards the commission paid by the foreign seller to the related importer, since this is viewed as an intracompany transaction.

In the case of a sale to a related importer where the latter's resale price is not available at the time of entry

summary, the commission paid to the related importer will be deducted from the international transaction price and the shipment then treated for purposes of comparison with the trigger price as though the sale were to an unrelated importer.

7. Q. In some transactions between a foreign seller and an unrelated U.S. purchaser, an agent (who may or may not be related to the foreign seller) acts as the importer of record and arranges the sale, although he is not a purchaser or reseller of the steel. If a commission is paid by the foreign seller to this agent, how is this commission treated for purposes of trigger price?

A. In this situation, Treasury would compare to the trigger price the sales price of the steel from the foreign seller to the unrelated purchaser, and the commission would not be deducted, since it does not reduce the price of the end user. However, if the commission were used to absorb such costs as duty, brokerage fees or inland freight, these costs would be deducted from the sales price before a comparison to the trigger price is made.

8. The final rulemaking regarding the revised Special Summary Steel Invoice (SSSI) was published in the Federal Register on March 7, 1979. The second paragraph on page 12413 reads:

"If in the course of its monitoring (including audits), the Department finds that a U.S. consumer of steel is using a foreign buying agent to avoid a direct sale from the foreign mill to that consumer so that the related firms, viewed as a whole, are acquiring steel below applicable trigger prices, the Department will consider the ex-mill prices as the proper basis for comparison to the trigger price. That is consistent with prior practice in anti-dumping cases."

8a. Q. What is meant by "consumer"?

A. For trigger price purposes, a "consumer" is any person/company that buys steel and does anything prior to its resale other than routine maintenance or warehousing. Routine maintenance includes re-packing or re-oiling. Thus, a person who trims the steel, edges it or processes it is a "consumer".

8b. Q. What is meant by "foreign buying agent"?

A. The term refers to a foreign company that purchases on behalf of, or on order of, a domestic consumer to which it is related within the meaning of the Antidumping Act "so that the related firms, viewed as a whole" are a single entity. The Customs Service may in such a situation request information on the price at which the foreign buying agent acquired the steel.

8c. Q. What is meant by "to avoid"? The phrase implies intent. Will it apply to a company whose standard method of doing business for years before the trigger price mechanism (TPM) came into effect has been to use a foreign agent who buys from a mill and sells to the related U.S. company?

A. No concept of "intent" is intended. The fact that a company's standard method of doing business before TPM came into effect has been to use a related foreign buying agent, or whether such an agent is newly created, does not preclude Treasury from considering the ex mill price as the proper basis of comparison with the trigger price if the related firms viewed as a whole are acquiring steel at prices below the applicable trigger price.

8d. Q. Does the cited paragraph apply if the foreign mill is unrelated to either the foreign agent or the U.S. consumer?

A. Yes.

8e. Q. What is meant by "related firms viewed as a whole"?

A. This phrase "related firms viewed as a whole" encompasses a variety of trade patterns in which there is a relationship between the mill, foreign trading company, the domestic importer or customer.

8f. Q. If a foreign agent is related to a U.S. importer that is also a processor of the steel, and if the U.S. importer provides a resale price at the time of entry summary, may that resale price be used for comparison with the trigger price?

A. Yes, provided all processing, handling and similar costs are also submitted with the resale price.

8g. Q. As most of the time processing costs are not known at the time of entry summary, would it be acceptable for the related processor to submit standard processing costs based on several months' experience and adjusted for inflation, with the understanding such submission would be subject to audit?

A. Such a submission would be acceptable.

9. Q. In answering Section 8, calling for information concerning the producer if other than the seller, is it permissible to identify the producing group and give its headquarters, where there are a number of mills in the groups?

A. Yes, assuming all mills are located in the same country. However, if mills are in different countries, the mill actually producing the steel must be identified.

10. Q. In answer to Section 14 calling for a description of the goods, will a chemical analysis be routinely required or will the applicable ASTM or AISI specification number be sufficient?

A. Normally a description by specification number is all that is required for the SSSI. However, whether or not a chemical analysis also will be required is a matter within the discretion of the local steel specialist, who may require such a document for classification purposes.

11. Q. In answer to Section 19a, in view of the limited space provided, will it be permissible to use an abbreviation such as "NSHM" to indicate that the product is not sold in the home market, if this is the case?

A. Yes. However, it is not acceptable to use such a phrase if "such or similar" merchandise is sold in the home market by the producer. Adjustments to render non-identical merchandise comparable may be detailed.

12. Q. If the international transaction is between unrelated parties should Section 19c be left blank?

A. Yes.

13. Q. If the international transaction is between related parties and the merchandise has not been resold by the importer by time of entry summary should Section 19c be left blank?

A. Yes. However, the importer should complete Section 31 by checking the appropriate box, signing, and dating the SSSI.

14. Q. The instructions for Section 19c call for "time of delivery if different from Section 12." Should this read "terms" rather than "time"?

A. Both the terms of delivery and the time of payment are required in answer to Section 19c. Insofar as time of payment is concerned, the trigger price is based on payment terms of 30 days after delivery. The attachment of the resale invoice will answer the question, if it contains the necessary information.

15. Q. In answer to Sections 24, 25, and 26, if the cost involved is included in the price, is the answer "included" sufficient?

A. No. The Customs Service needs a breakdown of the various costs called for by these boxes to analyze components of the price. If such information is available on the resale invoice or other document, such document can be attached to each copy of the SSSI in answer to these questions.

16. Q. With respect to Section 27 concerning freight from U.S. point of importation, if such costs are not borne by the importer or by a party related to the importer, is it permissible to answer "not included"?

A. Yes.

17. Q. For specialty steel items covered by the quotas or other products for which no trigger prices exist, is it

necessary to give the information required by the new SSSI form?

A. Yes. For the 32 categories of steel products for which the SSSI form must be filed at entry summary, all information must be provided. The Customs Service is monitoring all steel products in AISI categories 1-32, whether or not they are specifically covered by published trigger prices.

18. Q. Should a bunker surcharge be included as part of the ocean freight in answer to Section 25?

A. Yes.

19. Q. In view of the fact that the exporter in many cases does not know the price of the resale even if made by a related importer and prior to entry, can the importer provide this information on the SSSI form?

A. Yes.

20. Q. Where a renegotiation of the purchase price has taken place after the original contract of sale, what date should be given in answer to Section 10?

A. The last renegotiation date should be given since that is the date upon which the price terms are finally agreed.

21. Q. If a steel mill product is imported whose size is above or below the range of sizes for which size extras have been published, then the product is usually not intended to be covered by trigger prices. Does this mean that absolutely no check is made on the international transaction price of that product?

A. Trigger prices cover those steel mill products commonly made in or imported into the United States. Where the size of a particular product exceeds the published sizes, then no trigger price exists for that particular product. However, the nonexistence of a published trigger price for a specific product size does not indicate the lack of a check.

To illustrate, suppose a product is imported whose size is 60 feet but published trigger prices cover sizes to 50 feet. Technically there is no trigger price for the 60-foot product. However, based on trade practice and commodity knowledge, the 60-foot product can be assumed to be more expensive than the 50-foot one. Therefore, if the 60-foot product is imported at or below the trigger price published for the 50-foot product, Customs would scrutinize the price of the 60-foot product and report it to Headquarters if below the price of the 50-foot product. If shipments of the 60-foot size grow in number, a specific trigger price may be established for that product. The same applies to shipments of any unusual sizes or variations that appear to be mere evasions of trigger prices.

UNITED STATES RAILWAY ASSOCIATION

[Docket No. STP-1]

Evaluation of Supplemental Transaction, Proposal No. 1; Report

On April 11, 1979, the United States Railway Association ("USRA") received a Supplemental Transaction Proposal ("STP") developed and submitted by the Administrator of the Federal Railroad Administration ("Administrator"), under authority delegated to him by the Secretary of Transportation ("Secretary"). The following is USRA's report of its evaluation of that proposal.

I. Background

A. *The STP.*—The Administrator proposes that the Consolidated Rail Corporation ("Conrail") transfer 29.9 miles of railroad in eastern Connecticut to the Providence and Worcester Company ("P&W"). The lines proposed for transfer are:

1. The southernmost portion of the Norwich Secondary Track, from Groton, Connecticut, to Plainfield, Connecticut (MP 0.0 to MP 27.0); and
2. The "Groton Old Main Branch" located in the city of Groton, Connecticut (MP 0.0 to MP 2.9).

In addition, the proposal would require Conrail to relinquish to P&W, assuming agreement by the National Railroad Passenger Corporation ("Amtrak"), its right to operate freight service over some three miles of Amtrak's Shoreline Track between the Groton Old Main Branch and Norwich Secondary Track junctions.*

In developing the STP, the Administrator sought comments from interested parties and reported that there was no opposition to the proposal.

The Administrator also requested both Conrail and P&W to furnish information on financial terms of the transaction, including a proposed selling price and the cost and revenue data used to calculate that price. P&W submitted data supporting a price of \$813,626 based on estimates of the annual net freight income expected to be generated by P&W from the STP properties. Conrail submitted data in support of a price of \$2.75 million based on its estimate of the decrease in net revenue it would experience as a result of the transfer of the STP properties to P&W.

Finding that "the STP properties apparently generate net income", the Administrator concluded that the selling

* Counsel for P&W represents that an agreement already has been negotiated with Amtrak.

price should be the "going-concern value" of the lines to Conrail; and having "presently no reason to believe that the figures presented by Conrail are not accurate", he adopted Conrail's proposed price of \$2.75 million. At the same time, because of the disparity between the prices proposed by the parties, the Administrator stated that he would institute an audit of Conrail's revenue and cost data "to confirm the proposed transfer price of \$2.75 million." The audit was to be conducted concurrently with the STP process, and the results were to be made available to USRA within 90 days after delivery of the STP.

B. *The Statutory Process.*—Section 305 of the Regional Rail Reorganization Act of 1973 ("Act") (45 U.S.C. 745) provides a process for the further restructuring of rail properties of railroads reorganization in the "region" (as defined in Section 102 of the Act), through transactions supplemental to the Final System Plan prepared and approved pursuant to Sections 206 and 208 of the Act. Section 305(a) authorizes the Secretary to develop an STP if he finds that a supplemental transaction would "promote the establishment and retention of a financially self-sustaining rail service system in the region adequate to meet the needs of the region."

The Act requires that any such proposal be submitted by the Secretary to USRA, which, in turn, by public notice, must afford all interested parties an opportunity to comment. Section 305(b) then directs USRA to "analyze" the STP, "taking into account the comments of interested persons and statements and exhibits submitted at any public hearings which may have been held." Following its analysis, the Association must publish in the Federal Register a report evaluating the proposal: "Such evaluation shall state whether the supplemental transactions contained in such proposal, considered in their entirety, are (1) in the public interest and consistent with the purpose of this Act and the goals of the final system plan, and (2) fair and equitable."

The statute further provides that for purposes of the latter finding, "the term 'fair and equitable' means fair and equitable, in accordance with the standards applicable to the approval of a plan of reorganization (or a step in such plan) under Section 77 of the Bankruptcy Act to (1) the estates of railroads in reorganization in the region . . . who have conveyed rail properties . . . in exchange for securities of the Corporation, the Association, or profitable railroads . . .; and (2) the

holders of other securities of the Corporation."

In addition, Section 305(b) provides that if Conrail "opposes or seeks modification of" the STP, "its written comments shall be given due consideration by the Association and shall be published as part of the evaluation."

Within 30 days after publication of USRA's report, the proposed transferee of the STP properties, P&W in this case, must notify the Association in writing as to whether the supplemental transaction proposal is acceptable to it. If P&W fails to so notify USRA, all proceedings on the STP terminate.

During the course of the evaluation of this STP, a question was raised as to the legal effect to be accorded a qualified acceptance by P&W. USRA requested comment on this issue from the Secretary's General Counsel, Linda H. Kamm, Esq. She responded that it was the "view of the Department" that such a qualified acceptance should "be treated as a failure by P&W to notify the association that the proposal is acceptable to it." USRA concurs in and adopts this position.

If P&W accepts the STP, the next step in the statutory process is review by the Interstate Commerce Commission. Under Section 305(c) of the Act, the ICC has 90 days from the date of publication of this report to determine "whether the supplemental transactions referred to in the report, considered in their entirety, would be in the public interest and consistent with the purposes of this Act and the goals of the final system plan." In addition, Section 305(c) authorizes the Commission to modify the STP, and " . . . condition its approval . . . on such reasonable terms and conditions as it may deem necessary in the public interest."

If USRA has found in its report that the proposal is in the public interest and is "fair and equitable", and P&W has accepted it, the association must petition the Special Court for an order directing Conrail to carry out the transaction proposed. Section 305(d) requires this petition to be filed within 40 days after the ICC's determination under Section 305(c), or upon expiration of the 90-day ICC review period if the Commission does not act. If USRA does not make the required findings, it has no further responsibility or authority in the STP process. The Secretary, however, may himself make those findings and may petition the Special Court for the implementing order.

Upon presentation of a petition from either USRA or the Secretary, the Special Court must hold a hearing, after

which it may order the transaction to proceed or it may suggest modifications to the STP. If modifications are suggested, the Secretary may amend the STP in conformity with the Special Court's opinion and may request the Court's reconsideration of the proposal as modified.

C. *The Role of USRA.*—The first and second sentence of Section 305(b) of the Act require USRA to analyze STP's submitted by the Secretary and to publish a report evaluating each such proposal. The third sentence of that Section prescribes that the Association's published evaluation "shall state" USRA's conclusions with respect to two specific findings, namely, whether the STP is in the public interest and whether it is fair and equitable. The Association believes that the third sentence was intended to assure that the required findings be made and was not meant to limit the broader analysis called for in the first sentence. Since that analysis must take into account "the comments of interested persons and statements and exhibits submitted at any public hearing which may have been held", the Association has considered all factors deemed relevant to a full and fair evaluation of the STP.*

The requirement that USRA consider comments submitted at any hearing which "may have been held" implies that the Association may include a hearing in its evaluation process. Moreover, Section 203(c) of the Act specifically authorizes it to do so. None of the interested parties has disputed USRA's authority to hold hearings to consider the STP. However, there was a dispute as to the form those hearings should take. At the outset of USRA's consideration of the proposed Supplemental Transaction, P&W insisted that the Association hold hearings to receive testimony and evidence and at which P&W attorneys would be permitted to cross-examine Conrail witnesses. In addition, P&W has argued that the hearing should be adjudicatory in nature, with the Association's evaluation limited to considering information formally made of record and tested by cross-examination at the hearing. Conrail opposed any such hearing on the basis that Section 305 does not contemplate adversary proceedings. Instead, Conrail argued that the P&W's interests are

* It should be noted that the Department of Transportation concurs in this interpretation of Section 305(b). The Department's General Counsel in a letter to USRA dated July 10, 1979 stated that it was the view of the Department that "the Association is unrestricted in its ability to comment on the Supplemental Transaction Proposal submitted by the Secretary."

protected by the fact that at any point it may halt further proceedings merely by refusing to accept the transaction.

While it is clear that under Section 305 the holding of a hearing is not required but discretionary, USRA decided that a hearing should be held and that, consistent with Section 305, all interested parties should be invited to submit testimony and exhibits bearing on the proposed transaction, to further USRA's evaluation of the STP all interested parties were allowed to question one another concerning their respective positions.

The hearing was held on July 25th and 26th. At that hearing the P&W questioned FRA, USRA, and Conrail witnesses. In addition, representatives of organized labor and the Department of Defense were present and were offered the opportunity to participate. Since the Rail Act does not specify the form such hearings must take, the proceedings were conducted in a relatively informal manner, although a transcript was made. This was consistent not only with the Rail Act but with the position of the P&W which had agreed with USRA prior to the hearing that the Administrative Procedure Act does not apply in this case. In addition, it is evident from Section 305 that USRA's role in the Supplemental Transaction Process is neither adjudicatory nor rulemaking in nature. Rather, it is the duty of the Association to "analyze" the proposed transaction, "taking into account" statements and exhibits submitted at "any public hearings which may have been held." Thus, the hearing that was held is but one part of USRA's analysis of the STP, and the Association is not limited to considering only the information developed at that hearing.

Though USRA may broadly analyze and evaluate an STP, the Association lacks the statutory authority to modify the proposal by amending or deleting any of its terms, or imposing new conditions. The power to initiate supplemental transaction proposals is conferred on both the Secretary and the Association by Section 305(a) of the Act, subject to the definition and limitations of Section 102(19). However, USRA's authority under Section 305(a) is narrowly confined to a specified class of transactions. The STP which is the subject of this report is not of that class, and could only have been, as it was, initiated by the Secretary who has broad authority under Section 305(a). Since Section 305(b) "says nothing

* In contrast, as noted earlier, Section 305(c) expressly authorizes the Commission to condition its approval of an STP on reasonable terms and conditions modifying the proposal.

about initiation or modification of supplemental transaction proposals, it is unreasonable to conclude that the Association may, through its evaluation process, exercise powers specifically denied to it, but afforded to the Secretary, by Section 305(a).

This conclusion is fully supported by the legislative history of Section 305. The Committee of Conference on S. 2718 which followed the House version of proposed Section 305 (H.R. Rep. No. 781, 94th Cong., 2d Sess., 197 (1976)), did not retain from the rejected Senate version a provision that would have authorized the Association to modify a supplemental transaction proposal. This Senate provision was located in Section 609(b) of S. 2718 and stated that "prior to such publication, the Association may modify the initial proposal in accordance with public response or any comments submitted to the Secretary." The deletion of that provision from the bill as enacted indicates that Congress did not intend to authorize the Association to modify a supplemental transaction proposal submitted by the Secretary.

Regardless of the conclusions reached by USRA as a result of its evaluation, P&W, as transferee, is free to accept or reject the STP as proposed by the Administrator. If it accepts, the supplemental transaction process moves forward even though the Association's evaluation may have been unfavorable.

As noted above, if USRA's evaluation includes positive determinations with regard to the two findings required by the third sentence of Section 305(b), the Association must petition the Special Court for an order directing the proposed transfer (assuming P&W has accepted). If the Association's findings are negative, and P&W has nonetheless accepted the proposal, the Secretary may make the required findings and petition the Special Court, thereby overriding the Association's evaluation. To this limited procedural extent, USRA's evaluation may have some impact on the STP process in that negative findings would require some reconsideration of the STP by the Secretary (or his delegate, the Administrator). If the Secretary determines to proceed, however, the Special Court need not attribute any particular significance to the Association's findings. Under Section 305(c), only determinations of the Interstate Commerce Commission are entitled to be given "due weight and consideration" by the Court.

D. *USRA Proceedings.*—On April 20, 1979, 44 FR 23624, USRA published a notice of its receipt of the STP in the

Federal Register and solicited public comments. Comments were received from:

James Donoghue, General Manager, Worcester Business Development Corporation
Kris Cloyd, Transportation Manager, Worcester Area Chamber of Commerce
J. Alfred Clark, Jr., Mayor, Town of Ledyard, Ledyard, Connecticut
Duke Niebur, Military Traffic, Management Command, Department of the Army
John L. Richardson, Esq., Counsel for P&W
Arthur B. Powers, Commissioner, Connecticut Department of Transportation
Paul A. Cunningham, Esq. and Richard M. Rindler, Esq., Counsel for Conrail
William G. Mahoney, Esq., Counsel for the Brotherhood of Maintenance of Way Employees, the Brotherhood of Railroad Signalmen, and the United Transportation Union
Allen J. Dowd, Special Assistant for Engineering, Military Traffic Management Command, Department of the Army
Hon. Christopher J. Dodd, Member of Congress, 2d District, Connecticut.

The Worcester Business Development Corporation and the Worcester Area Chamber of Commerce expressed strong support for the STP, as did the Connecticut Department of Transportation. The Town of Ledyard, Connecticut, located on the Norwich secondary track, took a neutral position as between P&W and Conrail, expressing concern only that the two railroad bridges within the town be adequately maintained.

Mr. Dowd of the Military Traffic Management Command indicated in his comment that the Department of the Navy had expressed concern that reinstitution of passenger service on the rail line transiting its New London submarine base (located on the Norwich Secondary Track) might violate safety and security regulations. This was due to the fact that new weapons handling areas had been constructed since 1971 when passenger service through the base was terminated. Mr. Dowd stated that the Navy was conducting a safety and security study, and that its findings might result in a withdrawal of its objection to passenger service. Subsequently, Mr. Niebur of the MTMC reported that the Navy had not yet completed its full-scale study, but maintained its objection.

Representatives of labor urged USRA to include an assessment of the impact of the STP on affected employees of Conrail and P&W as a part of the "public interest aspect of the Association's evaluation."

Comments from P&W and Conrail focused on the scope and nature of proceedings to be conducted by USRA

in connection with its evaluation of the STP. P&W insisted that the Association should conduct full, formal, public evidentiary hearings on the issue of whether the price specified in the proposal was fair and equitable. Conrail argued that no formal proceedings were required. The P&W position was strongly supported in written comments received from Congressman Christopher J. Dodd of Connecticut and from Commissioner Arthur B. Powers of the Connecticut Department of Transportation.

On June 12, 1979, USRA received a copy of Audit Report No. 79-PH-11 prepared by the Office of the Inspector General of the Department of Transportation. This was the report of the audit which the Administrator, in his proposal, had stated would be conducted. The report stated that the auditors had completed an initial survey of the data sources, methodology, and assumptions used by Conrail in developing its financial presentations to FRA with respect to revenues, on-branch costs, and off-branch costs allocable to the STP rail properties. The survey was originally intended to be preliminary to a full audit of Conrail's submission. However, the report stated that because of problems encountered with Conrail's methodology, the auditors were "unable to determine the reasonableness and accuracy of the resultant financial presentations." It concluded that a full audit of Conrail's submission "would be of little value since no clearly defined or generally acceptable accounting criteria were established; revenues and costs were determined to be from different accounting periods; and, the fair presentation of most of the estimated costs rely on the validity of a large number of technical assumptions."

In an attempt to explore the possible need for the hearing P&W had suggested and in order to elicit a broader range of comments, USRA convoked a procedural conference on June 25, 1976. Counsel for P&W and Conrail, representatives of the Department of Transportation and the Department of Defense, and representatives of affected labor unions attended. Presiding was Douglas L. Siegel who had been appointed by USRA's Board of Directors to serve as Hearing Officer at any proceedings conducted by the Association.

Following the conference, further written comments were received from Conrail and P&W, reiterating the parties' respective positions with regard to the need for formal hearings. In addition, the Administrator, John M. Sullivan, in a

letter dated July 11, 1979 to Donald C. Cole, president of USRA, repeated his assessment that "the \$2.75 million valuation of the STP properties is fair", but added that should "USRA's evaluation of the STP disclose facts that call into question my initial assessment of the fairness of this price, I will, of course, reconsider the financial terms of the transaction."

On the basis of the discussions at the procedural conference, and the subsequent written comments received by the Association, the Board of Directors of USRA at its meeting on July 12, 1979, directed the Hearing Officer to order an exchange of information among interested parties through an informal discovery process; and to take evidence in the case primarily through written submissions, with open hearings to be utilized only for receiving statements and exhibits on substantive issues remaining in dispute.

Counsel for P&W, the Administrator, Conrail and the labor unions were notified of the Board's decision. They were advised that because of time limitations imposed by the Act, a period of informal discovery would begin immediately, to be completed no later than July 24, 1979. An evidentiary hearing would then be held on July 25, 1979, if necessary, pertaining to any matters still in dispute following discovery. They were advised, further, that it was "envisioned" by USRA that P&W and Conrail would "cooperate fully in allowing each other's attorneys and technical experts to explore the data and methodology underlying development of their respective estimates of value for the lines in question."

On July 18, 1979, a pre-hearing conference was held at the offices of the Association to discuss objections that Conrail had presented with respect to the informal discovery process. Counsel for P&W asserted at the conference that P&W had the right to obtain discovery from Conrail through interview of all persons taking part in Conrail's valuation of the lines proposed for transfer, and review of all documents related to such valuation. Counsel for Conrail questioned whether P&W, in fact, had that right, but had no objection to providing both USRA and the Department of Transportation with such information.

As a result of discussions at the conference, it was agreed that P&W would provide USRA with a written request specifying the kinds of documents and other information it required from Conrail. USRA would then review P&W's discovery proposal

and transmit a request for documents and information to Conrail.

A Document and Witness Production Request was prepared by USRA on July 18, 1979, and was served on counsel for Conrail that day. The request provided that any objections to the discovery requested would be heard at a conference at the offices of the Association on July 20, 1979.

On July 20th the conference was held. Counsel for Conrail, P&W and the Association were present. Conrail reiterated its position that the proceedings in progress were unnecessary and irrelevant to USRA's responsibilities under the Act. Counsel further objected to the discovery request on the grounds that much of the information required to be provided was proprietary in nature and, therefore, privileged from disclosure to P&W, a competitor; and that the request, if construed literally, would require the production of enormous masses of documents. After discussion, it was agreed that (a) Conrail need produce only the documents developed from primary data sources and not the bulk of the raw data itself; (b) Conrail would produce information considered by it to be proprietary to USRA; (c) USRA would review all documents to which a claim of privilege might be asserted by Conrail to determine if they should be disclosed to P&W; and (d) Conrail would appear at the hearing scheduled for July 25th, and would make all documents requested available on or before that date.

On July 20, 1979, the USRA staff issued a written evaluation of the STP price. The evaluation was based upon the staff's analysis of the revenue and cost assumptions posited by Conrail in its information submission to FRA.

On July 24, 1979, an informal discovery session was conducted at the offices of the Association to permit both P&W and Conrail to question the technical experts employed by USRA in preparation of the staff evaluation as to the data and methodology underlying the development of their conclusions. P&W counsel attended and questioned a number of witnesses. Conrail did not attend.

An evidentiary hearing on the STP convened as scheduled on July 25, 1979, and continued through July 26th. Present were counsel from Conrail, P&W and USRA, and representatives from labor and FRA. Presentations were made at the hearing by FRA, USRA staff and P&W. Conrail presented no direct testimony, but produced two employees who had been involved in the development of the cost and revenue

data provided by Conrail to FRA, and permitted them to testify.

At its meeting on August 2, 1979, the Board of Directors, of USRA considered the STP in open session. The members were provided with written submissions from P&W, Conrail and the USRA staff, as well as proposed findings prepared by the Hearing Officer. All interested parties were invited to make oral presentations. The conclusions of the Board with respect to the findings required of USRA under section 305(b) of the Act are embodied in this Report.

II. Evaluation of the STP

A. Recent History of the STP Lines.—

Prior to April 1, 1976, the Norwich Secondary Track was owned by the Norwich & Worcester Railroad ("N&Wo"), but was operated by Penn Central under the terms of a provision contained in the Interstate Commerce Commission order approving the Penn Central merger. As a "rail property" operated by a "railroad in reorganization in the region", as those terms were defined in the Act, the Norwich Secondary Track was deemed subject to designation and conveyance under Section 206(c) of the Act, and was included in the development of the Final System Plan ("FSP").

The northern segments of the line from Putnam, Connecticut, at MP 45.8, to Worcester, Massachusetts, at MP 70.8, were designated for offer to the P&W under the provisions of Section 206(c)(1)(B) of the Act. The southern portion, from Putnam to the junction with the Shoreline Track at MP 0.0 in Groton, was designated for conveyance to Conrail (FSP, Vol. I, P. 269).

In recognition of the fact that the N&Wo was itself a noncontrolled, nonbankrupt line, the FSP expressly afforded that company the opportunity to arrange for the operation of its properties outside the provisions of the Act. Two options were presented, each to remain open for 60 days from the effective date of the FSP. If the N&Wo were able to arrange with another railroad for the sale or operation of its properties designated to Conrail, those designations would not take effect. Or, if the company could demonstrate its own competence to operate its properties by presenting "a sound plan" which would maintain the same service coverage as the designations would provide, none of the designations of the Norwich Secondary Track would take effect.

On February 19, 1976, the Board of Directors of the Association considered the plan presented by the N&Wo under

the second option, and rejected it as failing to meet the required test of "soundness".

In the meantime, the State of Connecticut petitioned the Association pursuant to the provisions of Section 208 of the Act for a redesignation from Conrail to the P&W of the Norwich Secondary Track from Groton to Putnam; the Plainfield Secondary Track from Plainfield to Versailles, Connecticut; and the Groton Old Main Branch. At its meeting on February 19, 1976, the Board of Directors of the Association approved the redesignations as to the Norwich and Plainfield Secondary Tracks, but did not approve the redesignation of the Groton Old Main. The P&W was notified of the redesignations, and on March 1, 1976, was advised that net liquidation values had been established for the Groton to Putnam and Plainfield to Versailles lines at \$919,388 and \$58,832, respectively. On March 5, 1976, the P&W informed the Association that, while it desired to acquire the proffered lines, it was rejecting the offer as presented on the ground that the net liquidation value price was too high. However, further negotiations between the P&W and the Association resulted in the acceptance by P&W on March 12, 1976, of a modified offer to purchase the Putnam to Plainfield segment of the Norwich Secondary Track at a price of \$202,898, and the Plainfield Secondary Track. Accordingly, P&W now owns and operates the Norwich Secondary Track segment from Plainfield north, while the southern segment remains a part of the Conrail system.

Prior to the conveyance date, the Groton Old Main Branch was owned and operated by the Penn Central. It was, essentially, a spur of the Shoreline Track, and, as such, it was not separately identified and evaluated in the development of the FSP. The segment of the Shoreline Track running through the Groton, Connecticut area was designated for conveyance to Conrail under the provisions of Section 206(c)(1)(A), and for lease to or acquisition by Amtrak as part of the Northeast Corridor (NEC) under the provisions of Section 206(c)(1)(C). In identifying the specific properties along the corridor essential for passenger service, the Groton Old Main Branch was found to be suitable for freight service only and was excluded from the corridor properties identified for lease or conveyance to Amtrak. Consequently, the Groton Old Main remains a part of the Conrail system from its terminus to the boundary of Amtrak's NEC (Shoreline Track) property.

The sole rail link between the Groton Old Main Branch and the Norwich Secondary Track is an approximately three-mile long segment of Amtrak's Shoreline Track. In conveying the designated NEC properties to Amtrak, Conrail reserved to itself by easement the exclusive right to operate "freight trains, cars and locomotives" on the corridor lines. Under the terms of the Freight Operating Agreement implementing the easement, dated April 1, 1976, neither Amtrak nor Conrail may grant to any person any right to operate freight service on any portion of the NEC without the agreement of the other party.

D. *The STP and the Public Interest, the Purposes of the Act, and the Goals of the Final System Plan.*—For the most part, those factors relevant to an evaluation of whether the STP is "in the public interest" and is "consistent with the purposes of the Act" may be considered to be particularized in the statement of the goals of the FSP set forth in Section 206(a) of the Act. The consistency of the STP with each of those goals is analyzed below in the sequence in which the goals are listed in Section 206(a). Where additional public interest issues have been raised, they have been considered in conjunction with the FSP goal to which they most closely relate.

(1) *The Creation of a Financially Self-Sustaining Rail and Express Service System in the Region.*—This FSP goal corresponds to the purpose stated in Section 101(b)(2) of the Act to provide for "the reorganization of railroads in this region into an economically viable system." Evaluation of the consistency of the STP with this goal requires consideration of the financial impact of the transaction on both Conrail and the P&W.

In a valuation estimate prepared by P&W on October 10, 1977, the company indicated that it anticipated a net contribution from the STP lines of \$238,299 annually before federal taxes. In its final submission to the Administrator, P&W estimated that the annual net freight income it would receive from the lines would be \$23,931, but stated that it expected its profit margin to improve once it began actual operation of the lines. USRA evaluated this issue and concluded that operation of the STP lines by the P&W would generate an annual contribution to the company of \$600,000. Though the figures differ, all estimates indicate that operation of the STP lines by the P&W will be economically viable.

The overall financial impact of the STP on P&W depends on whether the

anticipated net contribution to the company from the STP lines will be sufficient to permit it to finance the purchase price. It should be repeated here that P&W, unlike Conrail, cannot be forced to accept the STP. It is free to accept or reject the proposal based on its perception of the profitability of the transaction. USRA has evaluated the available data only for the purpose of determining whether the STP is apparently economically sound. As the Association has concluded that operation of the STP lines will generate a net annual contribution to P&W of \$600,000, it appears that P&W should be well able to finance the Administrator's proposed purchase price of \$2.75 million.

The financial impact of the STP on Conrail depends entirely on the adequacy of the price it receives for the lines transferred. As discussed more fully in Section E below, USRA believes that the price established by the Administrator, in order to meet the fair and equitable test of Section 305, must fully compensate Conrail for any net loss of revenue that may reasonably be anticipated to result from implementation of the proposal. As further discussed in Section E, USRA has determined that the existence of certain unresolved issues precludes the Association from reaching a conclusion as to the appropriateness of the \$2.75 million price proposed by the Administrator. For the same reason, USRA cannot now assess the impact of the STP on Conrail's efforts to develop a financially self-sustaining system.

2. *The Establishment and Maintenance of a Rail Service System Adequate to Meet the Rail Transportation Needs and Service Requirements of the Region.*—The P&W proposes to service all customers presently served by Conrail on the STP lines. Nothing suggests that service to shippers on the lines as provided by the P&W would be other than adequate, or that the divestiture of these lines by Conrail would adversely affect the adequacy of service provided to Conrail's customers elsewhere on its system.

P&W cost projections for operation of the STP lines have made adequate provision for needed rehabilitation and for maintenance-of-way at a normalized level comparing at least with FRA Class I standards. USRA sees no reason to expect that the lines would be maintained by P&W at a level of efficiency lower than that which would be expected if they continued to be operated by Conrail.

The majority of shippers, municipalities, business organizations

and others who submitted comments on the STP expressed support for the proposal. Two shippers who submitted comments to the Administrator, Atlantic Carton Corporation and Wyre Wynd, Inc., had high praise for P&W operations on its line from Plainfield north, and expressed the opinion that service provided by the P&W on the STP lines would be of comparable quality. A few shippers, notably Dow Chemical USA (the second or third most important shipper on the STP lines), took a neutral position as between Conrail and P&W, Dow stating that current Conrail service was adequate. None of the rail service customers expressed any concern that the quality of service to be received from the P&W would be less than adequate.

Accordingly, USRA has concluded that implementation of the STP would promote the FSP goal of establishment and maintenance of a rail service system adequate to meet the rail transportation needs and service requirements of the region, in accordance with Section 206(a)(2) of the Act.

3. *Establishment of Improved High-Speed Rail Passenger Service in the Northeast Corridor.*—None of the STP lines include property required for the provision of passenger service in the NEC. Implementation of the STP will not affect accomplishment of the FSP goals set forth in Section 206(a)(3) of the Act.

4. *Preservation, Consistent with Other Goals, of Existing Patterns of Service by Railroads.* The STP will restore the pattern of service (single-carrier operation with access through the Worcester gateway) that existed in eastern Connecticut prior to implementation of the FSP. This is a pattern of service for which shippers and Municipalities in the affected area express strong preference. As discussed below in 7, the FSP itself attempted to preserve this pattern by recommending three alternatives for securing single carrier service over the Norwich secondary track.

The STP is consistent with this goal as stated in Section 206(a)(4) of the Act.

5. *Retention and Promotion of Competition in the Provision of Rail and Other Transportation Services in the Region.* Prior to the implementation of the FSP, the principal gateway for freight traffic originating and terminating on the Norwich secondary track and the Groton old main branch was Worcester, Massachusetts. This pattern may be expected to be reestablished if the STP lines are conveyed as proposed.

Shippers using the Worcester gateway have the option of sending traffic over either of the two principal freight routes entering New England from New York State gateways: Conrail's line via Springfield from Selkirk, New York; or the Boston and Maine line via Greenfield from Mechanicsville, New York. The P&W connects directly with Conrail at Worcester, and with the Boston and Maine at Gardner, Massachusetts.

Implementation of the STP would permit shippers on the affected lines some discretion in selecting routing on the basis of their perceptions of the service received from the competing carriers.

Since the proposal would merely substitute P&W for Conrail as the operator of the lines transferred, there would be no change in the single carrier direct service pattern that now obtains on the lines.

To the limited extent that implementation of the STP will provide shippers on the STP lines with routing options through the Worcester gateway that they do not now have, the potential for competition in the region in the provision of rail transportation services will be enhanced. The STP is, therefore, consistent with therefore, consistent with the goals set forth in Section 206(a)(5) of the Act.

6. *Attainment and Maintenance of Environmental Standards.* In its petition to the Secretary requesting the development of the STP, the State of Connecticut stated that it "believes that applicable air quality standards would not be affected by the STP." No information contradicting this assertion was presented to USRA by any interested person. Given that the STP will not require any construction or other physical disruption of the environment, and that the shippers affected by the proposal are presently using, and will continue to use, rail transportation, it appears that the STP is environmentally neutral.

7. *Efficient Movement of Passengers and Freight in Rail Transportation.* By providing for single carrier operation between Groton and Worcester, the STP would enhance the possibility of reinstitution of passenger service over this line. Although there are apparently no concrete plans for passenger operations at this time, the State of Connecticut indicated in its petition that it was considering the possibility of reinstituting such service, and that P&W had indicated its willingness to contract with the Connecticut Department of Transportation to provide service. ConnDOT found that "one of the major

obstacles to providing this service" was the disposition of the Norwich Secondary Track to two operators. The STP would resolve this problem and make future negotiations between the State and P&W for passenger operations more feasible.

As noted above, the Department of Defense has some reservations about the reestablishment of passenger service on the Norwich Secondary Track. Since the primary impact of the STP is on freight service and no concrete plans for passenger service presently exist, the Department's concern has no significant bearing on the propriety of implementation of the Supplemental Transaction. However, the Department may wish to present the issue to the ICC and the Special Court, since those bodies have authority to suggest appropriate conditions to the STP.

To the limited extent noted, the STP promotes the passenger service element of the FSP goal set forth in Section 206(a)(7) of the Act.

The Association has consistently viewed single-carrier operation of the Norwich Secondary Track as desirable from the standpoint of efficiency of freight service. The FSP, as presented to Congress on July 26, 1975, suggested three possible arrangements for accomplishing this objective: Operation by P&W under an agreement with the N&Wo as to the southern segment of the line; operation of the entire line by the N&Wo itself under the "sound plan" that never emerged; or operation by the P&W under an agreement with Conrail as to the southern segment. The latter proposal was developed by the Association under the provisions of Section 206(g) of the Act, and was recommended on the ground that it would provide "more efficient local service Groton to Putnam." (FSP, Vol. I, p. 344.)

The present division of the Norwich Secondary Track between two operators isolates the shippers on the southern portion of the line from access to the Worcester gateway. Traffic bound from the STP lines is presently routed by Conrail via New Haven to Springfield, and thence east to Worcester or west to the Selkirk gateway; or it is sent over the "Beacon Branch Route" via New Haven, Derby and Beacon to Selkirk. Compared with access to eastern Connecticut through Worcester, these routes are circuitous and wasteful in terms of transit time and distance covered. Furthermore, they impose additional costs on Conrail by reason of the need for switching at both Springfield and New Haven and for

operation over substantial segments of Amtrak-owned line.

Circuitous routing is less a factor for the Groton Old Main Branch than for the Norwich Secondary Track. For most shippers on the Groton Old Main, the difference in rail distance to the Springfield and Worcester gateways is not very significant. Either gateway will provide adequate access to freight routes from the south and west where most of the Connecticut bound traffic originates, though use of Worcester does allow for more efficient routing of traffic coming from the north to east.

Operation of both STP lines by a single carrier would, however, provide a number of other advantages. It would eliminate the need for the internal switch presently made by Conrail at Cedar Hill (New Haven). It would reduce the total volume of freight traffic presently operating over Amtrak-owned trackage, and, although Conrail would continue to service shippers located on the Shoreline Track between New Haven and Groton, only three trains per week would be required for this purpose rather than the presently scheduled five. Viewed on a regional basis, therefore, implementation of the STP would reduce total freight train movements on the Shoreline by two per week, with no loss of service.

The two principal shippers located on the Groton Old Main Branch: Pfizer, Inc. and Sonoco Service, have expressed strong support for the STP; Pfizer because it desires access to the Worcester gateway, and Sonoco because it expects lower shipping costs for stone, the principal commodity it receives.

Implementation of the STP will promote efficiency in the rail transportation of freight in the region; the proposal is consistent with the goal of the STP as stated in Section 206(a)(7) of the Act.

8. *Minimization of Job Losses and Community Benefit Costs.* Under the STP, all communities and shippers presently receiving rail service will continue to receive such service, and USRA found no evidence suggesting that implementation of the proposal would have any adverse impact on employment in the vicinity of the affected lines. On the other hand, a number of community and business organizations, notably the Worcester Business Development Corporation, the Worcester Area Chamber of Commerce, and the Norwich Area Chamber of Commerce, commented that P&W ownership of the STP lines would "improve" economic development potentials, and "the attractiveness of the

* * * Norwich area to industry seeking to expand or locate in the Northeast."

During the course of USRA proceedings, representatives of several labor unions argued that if the STP were implemented, the public interest would require that adequate provision be made for the "just and reasonable treatment of railroad employees in mitigation of the hardship imposed on them in carrying out the national policy of railway consolidation" * * * (quoting *Lowden v. United States*, 308 U.S. 225 (1939)). The Act expressly provides for the application of labor-protective provisions to STP's. Section 305(d)(7) states that "any supplemental transaction under this Section shall subject the transferor and transferee, * * * to the requirements and other provisions of Title V (Employee Protection) of this Act." That provision is reflected in Section 501(8) which defines "transaction" for purposes of Title V to include actions taken pursuant to Section 305. Moreover, Section 503(3)(D) defines "protected employee" for purposes of Title V to include any employee of a railroad who is adversely affected by a supplemental transaction, and Subsections 505(b)(1) and (b)(3) specifically refer to supplemental transactions in prescribing the computation of the monthly displacement allowance for protected employees.

Given the mandatory employee protection provisions of the Act and the assurances from both Conrail and P&W that they intend to comply with those provisions, it appears that implementation of the STP will not be inconsistent with the FSP goals set forth in Section 206(a)(8) of the Act.

E. Fair and Equitable. The definition contained in Section 305(e) of the Act focuses the "fair and equitable" inquiry on the value to Conrail of the lines proposed for transfer. The clear purpose of the definition is to afford some protection for the owners of Conrail—its security holders. This focus is logical since an STP developed by the Administrator will not necessarily reflect the type of agreement that would be negotiated at arm's length between a willing buyer and a willing seller, since supplemental transactions can be imposed on Conrail over its objection.

Nothing in Section 305(e) suggests any right on behalf of a voluntary purchaser such as P&W to object to the financial terms and conditions of a supplemental transaction proposal. A proposed transferee may submit any information and make any argument it desires to the Administrator during the STP development process. If it does not like

the resulting proposal for any reason, it is free to reject it under the provisions of Section 305(b). Thus, the transferee does not need the protection of the fair and equitable standard.

Moreover, in determining whether a Supplemental Transaction Proposal is fair and equitable, the Special Court has no duty under Section 305(e) similar to the duties imposed on it in the valuation litigation under Sections 303(c)(1)(B) and 303(c)(3) where it must find also whether the price is "more fair and equitable than is required by a Constitutional minimum", and, if so, direct a refund.

Given the statutory framework, the price proposed by the Administrator in the STP is "fair and equitable" if it is adequate to fully compensate Conrail for the loss of the lines to be transferred. Thus, the price is adequate to protect Conrail as long as it is not too low, and the Association has not attempted to determine whether the Administrator's proposal is "just right" from the standpoint of both Conrail and P&W. Any disagreement P&W may have with the financial terms and conditions of the STP must be resolved with the Administrator and cannot be resolved by the Association.

The appropriate measure of fairness and equitability of the STP price is the present value to Conrail of whatever positive contribution Conrail would lose if the STP properties were transferred to P&W. To calculate that figure, USRA attempted to estimate the annual revenues Conrail would lose as a result of P&W's operation of the STP lines, and the costs Conrail would avoid by not having to operate those lines. Revenue lost, less costs avoided, represents the annual contribution of the STP lines to the Conrail system.

To the annual contribution figure thus derived, USRA applied maximum and minimum capitalization rates of 7.3 and 4.2 to determine a range of present values for the stream of income from the STP lines. Those capitalization rates were determined by USRA's financial consultant on the basis of market-determined price/earnings ratios for Class I railroads operating in the northeast region. As noted above, this methodology was adopted not for the purpose of determining the "perfect price", but to locate a range of values within which the STP price could be said to be fair and equitable.

The \$2.75 million STP price adopted by the Administrator was derived by Conrail from 1977 cost and revenue data. From the 1977 data, Conrail projected its costs and revenues attributable to the STP lines for 1978. It adjusted both estimates to reflect

anticipated traffic increases for 1979, and estimated the reduction in both costs and revenues (expressed in 1978 dollars) that would occur upon transfer of the STP lines to P&W. Finding that its revenues would decrease more than its expenses, Conrail capitalized the anticipated lost earnings to arrive at the \$2.75 million price.

USRA's staff analyzed and refined Conrail's figures and found an expected loss of earnings of \$480,000. Applying the capitalization rates developed by USRA's consultant, the value of the STP lines to Conrail was determined to be in the range of \$1,932,000 to \$3,358,000.

A summary of the Conrail computation, as refined by USRA staff, is attached as Exhibit 1 to this report.

P&W's presentation to the Administrator in support of its suggested \$836,632 price was based on the value of the STP lines to P&W. For that reason the P&W. For that reason the P&W approach is not relevant to the "fair and equitable" determination required by the Act.

At the hearings conducted by USRA, P&W presented its own consultant's estimate of the projected cost savings that Conrail would experience upon conveyance of the STP lines. The study concluded, essentially, that the cost savings projected would exceed estimated revenue losses, thereby giving the STP lines a negative going-concern value to Conrail.

Both the Conrail and P&W studies relied heavily on methodologies utilizing the application of system-wide cost experience to the lines in question, rather than data derived directly from experience on the lines themselves, so-called "line-specific data". P&W's consultants did, however, make an effort to particularize costs to a greater extent than did Conrail, which in its study combined a wide variety of expenses in a single category entitled "Long-term Variable Costs". This particularization permitted USRA's staff to analyze some individual cost items more closely, on the basis of the line-specific data available. As a result of this analysis, USRA was able to revise the P&W study, and to conclude that it indicated a range of values for the STP lines, using USRA's capitalization rates, from \$1,092,000 to \$1,898,000.

A summary of the P&W study, together with an explanation of the revisions made by USRA, is included in Exhibit 1 to this Report.

Necessarily, there are a wide variety of assumptions underlying the figures presented in each of the valuation estimates considered by USRA. In most cases, particularly in regard to cost, the

degree of uncertainty involved can be minimized through the application of empirical data. On the revenue side, however, there are two major issues that have a potentially significant impact on the fair and equitable determination required of the Association: Division of revenue ("divisions") and diversion of traffic ("diversions").

1. Division of Revenue. At present Conrail receives all revenues attributable to the origination or termination of traffic on the STP lines. With implementation of the Supplemental Transaction, P&W will be entitled to a division of the revenue generated by that traffic. Conrail has maintained throughout the Supplemental Transaction proceedings that the appropriate range for the division to which P&W will be entitled is 22 to 25 percent.

USRA staff found Conrail's division figures reasonable in light of rates applicable elsewhere in the region, and used those figures in its analysis of the various valuation estimates presented. However, the matter of rate divisions is presently being litigated between the P&W and Conrail and each party has taken a position in this Supplemental Transaction which conforms with the position taken in its divisions litigation. Counsel for the P&W stated on the record that if P&W were successful in obtaining 42 to 45 percent division of revenues for its present lines, it would seek a similar division for the Norwich Secondary Track and Groton Old Main. While the USRA staff determined that the more conservative approach would be to accept Conrail's estimates, it should be noted that if the P&W is successful in its litigation, it would result in an annual decrease of revenue to Conrail of approximately \$1.1 million over and above the \$1.9 million decrease already attributed by P&W after conveyance of the line to P&W. Using the capitalization rates of 4.2 times earnings to 7.3 times earnings, this issue alone—if resolved against Conrail—could be valued at between \$4.5 and \$8 million.

2. Diversion of Traffic. Conrail now has considerable control over the routing of traffic originating and terminating on the STP lines. As noted above, however, the conveyance of those lines to P&W would result in the

routing of traffic through the Worcester gateway, giving shippers some option in the selection of routes. To some extent, traffic presently routed on Conrail would be diverted to other carriers. Conrail estimates a 7 percent diversion rate; P&W, 15 percent.

In its evaluation of the proposed Supplemental Transaction, USRA determined that an 11 percent diversion rate was an appropriately conservative rate to use for its analysis. However, P&W used a 15 percent diversion rate in its STP information response to FRA. Presumably, P&W's estimate was based on its expectations regarding the types of long distance traffic which it could reasonably take away from Conrail. Here again Conrail runs a substantial risk which cannot be quantified with absolute precision. However, if P&W is successful in attracting its estimated level of traffic away from Conrail, Conrail would suffer a further decline in revenues of almost \$300,000 per year, assuming an average net contribution per car load. Using the capitalization rates of 4.2 to 7.3 times earnings, this

USRA	P&W (revised)	Conrail	Conrail RSPO
\$1.9 to \$3.4 Million	\$1.1 to \$1.9 Million	\$2.75 Million	\$2.1 to \$3.7 Million

On the assumption that the division for the line would be in the range Conrail has estimated, the staff believes the \$2.75 million purchase price fair and equitable to Conrail; indeed, on that assumption no person has suggested that the price set forth in the STP is too low. The problem, however, lies in the uncertainty injected by the division litigation. If P&W were to prevail, the value of what Conrail would lose through the STP transfer would be much higher and the \$2.75 million price, therefore, not fair and equitable. Unfortunately, USRA cannot predict the likely outcome of the division litigation, nor can it remove the uncertainty by imposing a condition. In its comments submitted on August 1, 1979, Conrail reiterated the position it stated to the Administrator, indicating that the \$2.75 million price is acceptable only if the divisions are fixed in the range of its estimates.* Faced with a factor that could vary the acceptable price by

means that an additional \$1.26 to \$2.2 million of value is at risk to Conrail.

F. RSPO Valuation.—In the course of USRA's hearings on the STP, it was revealed that Conrail had performed an additional valuation of the line in the fall of 1978 using a modified version of the Rail Services Planning Office (RSPO) methodology for determining light density lines subsidies. That study concludes that the contribution to Conrail of operations on the line is approximately \$505,000. Applying the capitalization rate gives a range of values for the line of \$2.1 to \$3.7 million.

G. Conclusion.—As a result of its analysis, and in the absence of contrary comments from interested parties, USRA concludes that the STP is in the public interest and consistent with the purposes of the Act and the goals of the Final System Plan.

However, as discussed above, there remains a question as to whether the price specified by the Administrator is fair and equitable. The range of values derived from each of the valuations is summarized below:

orders of magnitude, no prudent businessman would agree to sell without that uncertainty being resolved. Since from Conrail's perspective the STP is a compelled transfer, USRA cannot determine whether the \$2.75 million price is fair and equitable so long as the divisions issue remains unresolved.

Dated: August 16, 1979.

The foregoing report is promulgated under the authority of Section 305(b) of the Regional Rail Reorganization Act of 1973, as amended, pursuant to the order of the Board of Directors of the United States Railway Association.

Peter J. Gallagher,
Secretary.

*A copy of the letter submitted by Conrail is attached as Exhibit 2, pursuant to the publication requirement of Section 305(b).

Exhibit 1

COMPARISON OF USRA AND P&W VALUATIONS

(Figures Rounded to Nearest 5,000)

(All Figures in 1978 Dollars)

Item Description	USRA	P&W (Bixler-Harris Study)	P&W Revised
I. CRC Revenue (Current Results)	6,525,000		
II. CRC Revenue Decrease After Proposed Transaction	1,895,000		
III. Expenses			
A. Crew Wages	290,000	325,000	290,000 ^{1/}
B. Nonwage Line Haul			
1. Fuel		40,000	40,000
2. Locomotive Servicing		25,000	25,000
3. Locomotive Maintenance		105,000	105,000
4. Locomotive Ownership		220,000	0 ^{2/}
USRA Nonswitching	50,000		
USRA Switching	65,000		
C. Car Per Diem & Mileage	70,000	150,000	150,000
D. Nonwage Switching		85,000	85,000
E. Normalized Maintenance-of-Way	310,000	310,000	310,000
F. Clerical, Inspection, Data Communication Machines	80,000	85,000	80,000 ^{1/}
G. Long-Term Variable Costs Reduction	570,000		
H. Train Supplies & Expenses		45,000	45,000
I. Car Inspection		10,000	10,000
J. Clearing Wrecks		25,000	25,000
K. Damage to Property		5,000	5,000
L. Miscellaneous Variable (Overhead)		55,000	55,000
M. Claims		25,000	25,000
N. Taxes		40,000	0 ^{3/}
O. Amtrak Charges		255,000	230,000 ^{4/}
P. Diversion Savings		155,000	155,000
TOTAL EXPENSES	1,435,000	1,950,000	1,635,000
IV. Contribution to Conrail (Item II less Item III)	460,000	(None)	260,000
V. Valuation	1,932,000		1,092,000
Capitalization Rate at 4.2 to 7.3 times Contribution	to 3,358,000		to 1,898,000

BILLING CODE 8240-01-C

Notes

¹USRA's figure in this category was used since it is site-specific was obtained directly from Conrail records.

²P&W's figure was based on the amount it assumed Conrail would save in locomotive ownership costs because it would not be running trains on the line after conveyance of the line to P&W. However, given the shortage of locomotives on the Conrail system, the USRA staff concluded that it was unreasonable to assume that Conrail would eliminate locomotives as a result of the proposed transaction.

³The \$40,000 in taxes estimated by the P&W was computed using the property taxes actually paid by Conrail on the line (\$2,285) plus a Connecticut tax of 2% of gross revenues. However, the Connecticut statute imposing the tax allows credits to be applied against the tax on a dollar for dollar basis for maintenance-of-way expenses applied to the line. Since this statute went into effect in 1978, Conrail experienced no net tax liability. Given the level of maintenance projected for the line, it is reasonable to assume that situation will remain unchanged. Since the remaining property tax is rounded to the nearest \$5,000 for this analysis, the tax indicated is zero.

⁴The cost in this category was revised due to an apparent arithmetic error.

Exhibit 2

Pepper, Hamilton & Scheetz, Washington, D.C., August 1, 1979.

The Board of Directors, United States Railway Association, Washington, D.C.

Gentlemen: Pursuant to section 305(b) of the 3R Act, Conrail wishes to direct your attention to a point made in its earlier submissions in this proceeding (copies of which are enclosed), relating to the proposed transfer of certain Conrail properties to the Providence and Worcester Company (P&W).

The Secretary of Transportation has proposed that these properties be conveyed to P&W for cash payment of \$2.75 million. This price is acceptable to Conrail only if the divisions of revenues between Conrail and P&W are settled before the transfer of the property and if the level of those divisions is that claimed by Conrail. In addition, the operating agreements reached before transfer of the property cannot affect the value of the transfer to Conrail. If the proposed transfer is not so conditioned, the cost of the transfer to Conrail would increase and the price of the sale would accordingly have to increase. Under those circumstances, if the proposed price were not increased, Conrail would oppose the transfer.

Very truly yours,

Ronald M. Dietrich.

BILLING CODE 8240-01-M

VETERANS ADMINISTRATION

Animal Research Facility; Vamroc, San Francisco, Calif.; Finding of No Significant Impact

The Veterans Administration proposes the design and construction of an Animal Research Facility consisting of a one-story expansion, 5,063 net square feet, to Building No. 12.

Development of the project will have impacts on the human and natural environments as it affects vehicular circulation, soil stability, erosion, vegetation and noise levels. During the construction phase, additional noise, fumes, odors, dust, traffic and visual impacts will exist. Mitigating actions include implementation of thorough erosion control methods, dust and fume emission controls, onsite noise abatement techniques, landscaping, and compatible architectural and open space design.

A "Finding of No Significant Impact" was concluded on the basis of the information presented in this assessment. This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. Questions may be addressed to and requests for single copies of the Environmental Assessment may be made to the above office.

Dated: August 14, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

[FR Doc. 79-25841 Filed 8-20-79; 8:45 am]

BILLING CODE 8320-01-M

208-Bed Domiciliary; VAMC, Bath, N.Y.; Finding of No Significant Impact

The Veterans Administration has assessed the potential environmental impacts that may occur as the result of the construction of a 208-Bed Domiciliary Building at the Veterans Administration Medical Center (VAMC) at Bath, New York.

The domiciliary will consist of two, two-story bedroom units and a one-story support unit with a total net square footage of 93,362.

Development of the project will have impacts on the human and natural environment as it affects surface runoff, erosion and landscaping. Additionally, construction noise, fumes, dust, odors and visual impacts will exist during construction of the project.

Mitigating actions include: compatible architectural design; landscaping and open space design; control of erosion, dust and fumes; and noise abatement techniques, in conformance to Federal, State and local specifications.

Findings conclude that the proposed action will not cause significant adverse effects on the human and physical environment. Further investigation of the site, in the form of an Environmental Impact Statement, is not required. This action was recommended by the Environmental Determination Board and the final evaluation was conducted by the Environmental Planning Division after preparing an Environmental Assessment on the proposed project. This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. Questions or requests for single copies of the Environmental Assessment may be addressed to the above office.

Dated: August 15, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

BILLING CODE 8320-01-M

Clinical Addition; VAMC, Beckley, W. Va.; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impacts that may occur as a result of the construction of a new Clinical Addition at the Veterans

Administration Medical Center (VAMC), Beckley, West Virginia.

The project proposes construction of two additions attached to Building No. 1. A two-story addition to the southeast will provide approximately 28,160 gross square feet and house the following services: ambulatory care, laboratory and radiology. The second two-story addition will be located to the northwest. It will provide 6,715 gross square feet and house the warehouse, supply, processing and distribution, and pharmacy services.

Development of the project will have minimal impacts on the human and natural environment as it affects erosion, circulation and parking. During construction, additional noise, dust, fumes and visual impacts will exist.

Mitigation of the project impacts include: soil erosion and sedimentation control, onsite noise abatement measures, alterations to traffic and parking, and building emissions design and operation in accordance with Federal, State and local air quality standards.

Findings conclude that the proposed action will not cause a significant effect on the physical and human environment and, therefore, does not require the preparation of an Environmental Impact Statement. This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. Questions may be addressed to and requests for single copies of the Environmental Assessment may be made to the above office.

Dated: August 14, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

BILLING CODE 8320-01-M

Clinical Administration Addition; VAMC, Perry Point, Md.; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impacts that may occur as a result of the new Clinical Administration Addition at the Veterans Administration Medical Center (VAMC), Perry Point, Maryland.

The Clinical Administration Addition will consist of a multi-story addition attached to, and on both sides of, the connecting interior corridor. The addition will provide approximately 17,700 gross square feet and house the following services: building management, dietetics, fiscal, nursing administration, psychiatry, psychology, social work and the Director's suite.

Development of the project will have minimal impacts on the human and natural environment as it affects circulation, soil stability, erosion, vegetation, and noise levels. During construction, additional noise, fumes, dust, odors and visual impacts will exist. The administrative addition must also be compatible with the surrounding architectural style and long term open space plan.

Mitigation of the project impacts include: erosion control measures, dust and fume emission controls, onsite noise abatement techniques and landscaping. This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. / Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. Questions or requests for single copies of the Environmental Assessment may be addressed to the above office.

Dated: August 15, 1979.

BILLING CODE 8320-01-M

Clinical Services Addition and Renovation; VAMC, Charleston, S.C.; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impacts that may occur as a result of the construction of a Clinical Services Addition and Renovation project at the Veterans Administration Medical Center (VAMC), Charleston, South Carolina.

The proposed project action will provide additional space and facilities for laboratory, radiology, cardio-pulmonary, hemodialysis and pharmacy services. The two-story vertical addition will provide approximately 20,000 gross square feet of space.

The specific project site lies directly in front of, and next to, the main hospital building. The project will include exterior site work and realignment of the hospital access, dropoff area.

Development of the proposed project will have impacts on the environment as they affect vegetation, open space, soil stability and noise levels. Although located within a base floodplain, the project action will not impact the base floodplain area of the Ashley River.

The mitigation of the project impacts on the environment include: implementation of erosion and sedimentation controls; onsite noise abatement measures; and possible development of an exterior open space area. Short term impacts of dust and fumes associated with the project construction will be minimized by control measures outlined in construction contract documents.

This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. Questions may be addressed to and requests for single copies of the Environmental Assessment may be made to the above office.

Dated: August 14, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

[FR Doc. 79-25842 Filed 8-20-79; 8:45 am]

BILLING CODE 8320-01-M

Expansion of Clinical Outpatient and Education Space; VAMC, New Orleans, La.; Finding of No Significant Impact

This project proposes the construction of a new clinical addition, service core, and renovations to Building No. 1 for the purpose of expansion of clinical, outpatient and education space at the New Orleans Veterans Administration Medical Center. Construction of an eight-story (plus basement and mechanical penthouse) building will occur on an adjacent 1.1 acre site and the two-story service core (expansion space) will be developed in the existing service courtyard of the hospital. Renovations will occur within the interior spaces of Building No. 1.

It is estimated that a range of 263,000 to 332,000 gross square feet of new construction (175,000 to 217,000 gross square feet clinical addition, 80,000 to 115,000 gross square feet service core) will be required and a range of 159,000 to 179,000 gross square feet of renovations to Building No. 1 will be required as part of this project.

Construction of the project will have temporary minor impacts on the human, natural, and urban environment in the form of disruptions to transportation, degradation of local air quality, increases in noise levels, and special considerations for solid waste treatment and disposal. Additionally, minor impacts to the floodplain (500 year, critical action) will occur, however, development will be in total conformance with existing floodplain management objectives.

This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Section 1508.9, Title 40, Code of Federal Regulations. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, Director, Office of Environmental Affairs (004A), Room 1018, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. Questions may be addressed

to and requests for single copies of the Environmental Assessment may be made to the above office.

Dated: August 14, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

BILLING CODE 8320-01-M

Issuance of Policies and Procedures for Participation of Fee Personnel in the Home Loan Program

AGENCY: Veterans' Administration.

ACTION: Notice of Proposed Policies.

SUMMARY: The VA (Veterans' Administration) is proposing to issue a statement of policies and procedures governing the participation of appraisers and compliance inspectors in the VA's guaranteed and direct home loan operations. Policies and procedures are being updated.

DATES: Comments must be received on or before September 20, 1979. It is proposed to make these policies effective on the date of final approval.

ADDRESS: Send written comments to Administrator of Veterans' Affairs (271A), Veterans' Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above until October 1, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Lyman T. Miller, Assistant Director for Construction and Valuation (262), Loan Guaranty Service, Veterans' Administration, Washington, D.C. 20420, 202-389-2691.

SUPPLEMENTARY INFORMATION: The VA utilizes the assistance of fee basis appraisers and compliance inspectors in the valuation and inspection of properties proposed as security for guaranteed and direct loans authorized by sections 1810, 1811, and 1819 of title 38, United States Code. A policy statement specifying the qualifications, selection methods, performance criteria, evaluation measures, and disciplinary action procedures will be issued as a Department of Veterans Benefits Circular after expiration of the comment period and consideration of all comments. Thereafter the policy statement will be applicable to fee basis personnel throughout the nation, and will be administered by the 49 VA Regional Offices and Centers with home loan operations. The proposed policy is shown below. The numbering system used is that of the circular.

ADDITIONAL COMMENT INFORMATION: Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (271A), Veterans' Administration, 810 Vermont Ave., NW, Washington, DC 20420. All written comments received will be available for public inspection at the above address only between 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until October 1, 1979. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: August 15, 1979.

Maury S. Cralle, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

Processing of Applicants for Fee Appraiser and Compliance Inspector Rosters

1. *Purpose.* The purpose of this circular is to announce new procedures for processing applications and appointing appraisers and compliance inspectors to fee rosters. The procedures for the supervision and removal of such fee personnel are also covered.

2. *Responsibility for Selection, Designation and Separation of Loan Guaranty Fee Personnel.* DVB field stations will be responsible for the selection and designation of qualified persons to Loan Guaranty fee rosters and for the removal of such designated personnel as may be in the best interest of the VA. The Construction and Valuation Section, Loan Guaranty Division, will handle all matters related to fee appraisers and compliance inspectors: i.e., maintenance of fee personnel files, receiving and responding to related correspondence, making arrangements for and administering written examinations, managing the roster of appraisers and compliance inspectors, etc.

3. *Fee Roster Committee.* A Fee Roster Committee will be established consisting of the Loan Guaranty Officer, the Assistant Loan Guaranty Officer, and the Chief of the Construction and Valuation Section. If there is no Assistant Loan Guaranty Officer position at a station, a section chief in the Division will be designated by the Loan Guaranty Officer. The Loan Guaranty Officer will be the Chairperson of the committee.

4. Qualification Requirements.

a. General Requirements for Appraisers and Compliance Inspectors.

(1) Applicants must have complied with local or State licensing requirements, if any, prior to designation.

(2) Designation will not be made in those instances in which an applicant's employment or other position may result in a conflict of interest between such position or employment and performance as a fee person with the VA, or when embarrassment, adverse public relations or adverse publicity concerning the applicant or the VA might result.

(3) An individual may be designated to more than one fee roster.

(4) A satisfactory credit report must be obtained for each applicant before designation.

(5) Employees of Federal or quasi-governmental organizations; i.e., FNMA (Federal National Mortgage Association), FHLMC (Federal Home Loan Mortgage Corporation), Postal Service, will not be approved by VA as fee appraisers or compliance inspectors. Employees of local or State governments may be designated, but care must be taken that assignments to them will not result in a conflict of interest or the appearance of a conflict of interest.

(6) An applicant must submit three letters of reference attesting to the applicant's qualifications as a appraiser or inspector as listed on the application.

b. *Fee Appraisers.* (1) With respect to qualifications for designation as a VA fee appraiser, VA Regulation 4339 provides as follows: "To qualify for approval as a designated fee appraiser, an applicant must show to the satisfaction of the Administrator that his or her character, experience, and the type of work in which he or she has had experience for at least 5 years qualifies the applicant to competently appraise and value within a prescribed area the type of property to which the approval relates."

(2) When it is possible, every effort should be made to only designate fee appraisers who (a) are full-time appraisers, (b) have completed basic appraisal courses and (c) are not connected with a firm or firms active in the origination of VA loan applications.

(3) Those appraisers who wish to appraise condominiums, planned unit developments, new construction or other complex assignments must demonstrate past significant experience, education and ability in this type of appraising.

(4) A written test and a performance test will be given the applicant in order to evaluate the applicant's capabilities.

The written test will be prepared by the station and will test the applicant's knowledge of appraisal theory and terminology. The performance test will be a demonstration appraisal on VA Form 26-1803, Residential Appraisal Report. The station may waive the written test in cases in which it is determined that the applicant possesses the desired knowledge. Completion of the demonstration appraisal, however, will not be waived. Prior to the performance test, the applicant will be furnished with instructional and procedural material necessary to complete the appraisal. A sample appraisal on VA Form 26-1803 should be part of this material.

(5) No written or performance test will be required for designation to make appraisals provided in VA Regulation 4340, or to make appraisals for supplemental loans when the cost of the repairs, alterations, or improvements does not exceed \$3,500. Evaluation of the qualifications of such applicants for approval shall be on the basis of information contained in the application.

(6) The procedures outlined in subparagraph (4) above will also be applicable to mobile home appraisers. However, the performance test will be a demonstration appraisal on VA Form 26-8712, Mobile Home Appraisal Report, instead of VA Form 26-1803.

Additionally, the instructional and procedural material necessary to complete the appraisal will include a sample appraisal on VA Form 26-8712.

Note: The requirement for a credit report and letters of reference will not be applicable in the case of an officer or employee of a supervised lending institution who is designated to make appraisals as provided in VA Regulation 4340.

c. *Compliance Inspector.* (1) To qualify for designation as a VA compliance inspector, an applicant must have at least 5 years of experience which would competently qualify him or her to make inspections within a prescribed area of the type of property to which the approval relates. To be considered qualifying, the experience must have been of one of the following types or a combination thereof:

(a) As a construction inspector of real properties for the purpose of determining compliance with construction requirements established by law;

(b) As a construction engineer;

(c) As an architect;

(d) As a superintendent of construction in large housing developments;

(e) As a builder of residential or commercial properties; and/or

(f) In other capacities of a like nature in which the applicant has demonstrated an ability to perform the duties of a compliance inspector.

(2) A written test and a performance test will be given the applicant in order to evaluate the applicant's capabilities. The written test will be prepared by the station and will test the applicant's knowledge of construction techniques and terminology. The performance test may be a demonstration inspection on VA Form 26-1839, Compliance Inspection Report. The station may waive the written test in cases in which it is determined that the applicant possesses the desired knowledge. Completion of the demonstration inspection, however, will not be waived. Prior to the performance test, the applicant will be furnished with instructional and procedural material necessary to complete the inspection.

5. *Application Processing.* a. One of the following application forms will be used when applying for designation as a VA fee appraiser or compliance inspector:

(1) VA Form 26-6681, Application for Designation as Fee Appraiser;

(2) VA Form 26-6681a, Application for Designation as Mobile Home Appraiser; or

(3) VA Form 26-6683, Application for Designation as Compliance Inspector.

b. In addition to one of the application forms listed above, each applicant must submit VA Form 26-6684, Statement of Fee Appraiser and Compliance Inspector.

c. Upon receipt of an application, the Chief, Construction and Valuation Section, will determine if the basic qualifications have been met.

Applications which meet the basic qualifications, but no vacancy exists, will be placed in a pending file and the applicant informed by letter that all eligible applications will be considered when a vacancy exists. Applicants who do not meet the basic qualifications will be so informed by letter and the application held for 6 months and then destroyed.

d. When the Loan Guaranty Officer determines that a need exists for fee personnel in an area, the committee will review the pending applications and determine the best qualified applicants.

6. *Designation Procedures.* Upon completion of the application processing described above, the Fee Roster Committee will review the application file and recommend the designation or rejection of the applicant to the Director. If the determination is made to

designate, the individual will be notified by letter signed by the station Director. The letter will welcome the person to the fee roster and remind the person of the responsibilities involved. The letter will also point out that the first year on the roster is a probationary period. During this time the individual can be removed from the panel at the discretion of the Director. After the 1-year probationary period has been satisfied, removal must follow the procedure described in paragraph 9.

7. *Personnel and Performance Files.* a. A fee personnel file will be established and maintained for each fee applicant. This file should contain the individual's application, supporting letters of reference and appropriate correspondence concerning appointment and termination actions. (Documents relating to work assignments and internal Loan Guaranty matters will not be filed in the fee personnel folder.) The folders should be filed alphabetically by name in an "active" or "inactive" file. An "active" file for this purpose should contain folders of fee personnel who are on approved rosters, regardless of degree of activity.

b. A separate performance file will be maintained for each individual on a fee roster. The file will contain copies of correspondence relating to the individual's performance, such as field reviews, late notices, letters, etc. Any material in this file more than 2 years old can be destroyed.

Detailed records of errors, delays in production, incompetence, pertinent interviews, letters of admonishment, and other similar material concerning designated fee appraisers and compliance inspectors shall be maintained to justify and support any action for disqualification.

c. Disposition of folders described above shall be in accordance with Records Control Schedule VB-1, part I.

8. *Private Interests of Fee Appraisers and Compliance Inspectors.* a. Except as may be otherwise expressly authorized by VA regulations, instructions or directives, designated or approved fee appraisers and compliance inspectors shall not engage in any private pursuits in which there may or will be:

(1) Any connection established that may result in a conflict between the private interests of the VA fee appraiser or compliance inspector and his or her duties and responsibilities to VA and veterans.

(2) Any connection established that may tend to bias his or her judgment as a VA fee appraiser or compliance inspector.

(3) Any circumstances in which information obtained from or through a VA assignment to appraise or to make compliance inspections will be used to the detriment of the Government or veterans.

b. The foregoing statement of policy and standards are intended to preclude any fee appraiser or compliance inspector from:

(1) Selling land to a builder or sponsor and then making an appraisal or compliance inspection of dwelling units erected or to be erected thereon which are or will be purchased by veterans with guaranteed, insured or direct loans.

(2) Owning an interest in, being employed by, or operating an architectural, engineering, or land planning firm which renders services to builders or sponsors and later accepting an assignment from VA to appraise or inspect dwelling units built or to be built by a particular builder or sponsor for whom architectural, engineering, or land planning services have been or are being rendered by the firm in which the fee appraiser or compliance inspector has employment or an interest.

(3) Appraising or inspecting dwelling units on VA assignments and later accepting exclusive selling rights for the homes.

(4) Appraising or inspecting properties for builders or sponsors who are purchasing hazard insurance or title service with respect to those properties from a company in which the fee appraiser or compliance inspector has an interest.

(5) Owning an interest in a project development by a builder and accepting VA assignments in another VA regional area in respect to dwelling units which the same builder owns, is building, or is handling as a real estate broker.

(6) Having an interest in or representing building supply firms and accepting VA assignments on dwelling units built or to be built by builders or sponsors who deal extensively with such supply firms.

(7) Accepting a VA assignment to appraise a property if his or her fee is contingent upon supporting a predetermined conclusion.

c. The foregoing examples do not include all possible situations in which the private interests or pursuits of fee appraisers and compliance inspectors would contravene VA standards. The above specific examples are supplied only to illustrate some of the activities prescribed by the standards.

d. It is not intended that the provision of subparagraph b(3) above will forever preclude a fee appraiser or compliance inspector from acting as sales agent or

broker in connection with a particular property which he or she has appraised or inspected. Those provisions mean that he or she may not accept exclusive selling rights for the sale of a property to a veteran financed with a VA loan when in the particular sale the appraisal is or has been used in establishing reasonable value or any compliance inspection made is or has been used in determining that onsite improvements were completed in accordance with approved plans and specifications and minimum property requirements. The rule in subparagraph b(3) does not apply when he or she accepts a listing or acts as a broker if the purchaser obtains non-VA financing or if any appraisal or inspection made by him or her pursuant to a VA assignment is not used in a transaction involving VA financing. Furthermore, the rule does not apply to the sale of a property by a veteran-obligor under terms whereby the transferee assumes an outstanding guaranteed, insured or direct loan.

e. The information contained in subparagraph a above shall be made available to all fee appraisers and compliance inspectors in connection with the execution of VA Form 26-6684. Upon initial designation and at intervals of not less than each 12 calendar months, each fee appraiser and compliance inspector will be required to complete and return such statement to the appropriate regional office.

f. When it is disclosed that a fee appraiser or a compliance inspector has any private pursuits or interests, such disclosure shall be carefully evaluated and investigated, if such action is deemed necessary. If any private pursuit or interest disclosed conflicts with VA standards, the particular fee appraiser or compliance inspector shall be promptly informed and immediate appropriate action taken; e.g., withdrawing pending assignments or withholding further assignments. In any case in which evidence is obtained indicating a contravention of VA standards, it will be determined whether or not the facts warrant removal of the appraiser or compliance inspector. If so, removal action shall be initiated as quickly as possible.

9. *Disciplinary Actions.* a. Assignments for a period up to 2 months' duration may be withheld by the Chief, Construction and Valuation Section for cause. Notice of such action will be given in writing to the individual and will specify the reasons for the action. The fee person will be notified that written appeal from the action can be made to the Fee Roster Committee. Appeals must be accompanied by

specific evidence showing the action by VA was not justified. Assignments will not be made during the appeal process. The Fee Roster Committee must consider the appeal within 2 weeks, make its determination as to whether the action should be sustained, modified or rescinded and notify the individual in writing.

b. Permanent removal of fee personnel may be made by the Fee Roster Committee for cause. The individual will be notified in writing of the action and will be given the reason(s) which formed the basis for the action. The individual will also be advised that if he/she believes the action is not warranted, he/she may ask to appear before the Fee Roster Committee and present evidence to show the action was not warranted or may submit such evidence in writing or both. If an appearance before the Committee is requested, the Loan Guaranty Officer will arrange for a mutually acceptable time and place. The proceedings of the Committee will be informal. Within 2 weeks from completion of the hearing and/or receipt of the written material, the Committee will make its determination as to whether the action should be sustained, modified or rescinded. Written notice of its determination will be given to the individual promptly. Such notice must include a statement that if the individual still believes the action was not warranted, he/she may, within 30 days, submit a written request to the Station Director for review and reconsideration of the action.

c. Upon receipt by the Station Director of an appeal, all relevant material concerning the matter will be furnished to the Director by the Fee Roster Committee. The Director will review the entire matter and notify the individual and the Committee of his/her decision as to whether the decision of the Committee is sustained, modified or rescinded.

d. If removal action is taken, Central Office (262) will be notified.

10. When fee personnel are removed from rosters for reasons other than cause; i.e., voluntary resignation, death, unavailability for assignments, etc., the reasons will be recorded in the individual's fee personnel folder. This folder will then be placed in the "inactive file" (see par. 7a). No report to Central Office is necessary in such cases.

11. Rescission: DVB Circular 25-66-6.

Dorothy L. Starbuck,
Chief Benefits Director.

BILLING CODE 8320-01-M

National Memorial Cemetery of the Pacific, Honolulu, Hawaii; Availability of Draft Environmental Impact Statement

Notice is hereby given that a document entitled "Draft Environmental Impact Statement for the National Memorial Cemetery of the Pacific, Honolulu, Hawaii," dated July 1979, has been prepared as required by the National Environmental Policy Act of 1969.

The preferred course of action is to develop the existing National Cemetery as conceptually delineated in a master plan study prepared by a local consultant. Elements of this conceptual master plan include: an administrative/visitor center and parking facility; mausoleum/columbarium facilities; expanded service facility; and site improvements at the Punchbowl Overlook. There are several additional minor projects, but the above listing is the most significant.

The Draft Statement discusses the potential environmental impact of the master plan for the existing National Cemetery as identified above and the impact of the alternatives to this action. The document is being placed for public examination in the Veterans Administration office in Washington, D.C. Persons wishing to examine this report or to request a copy can do so at the following office: Mr. Willard Sittler, Director, Office of Environmental Affairs (004A) Room 1018, Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

Dated: August 14, 1979.

Maury S. Crallé, Jr.,

Assistant Deputy Administrator for Financial Management and Construction.

[FR Doc. 79-25839 Filed 8-20-79; 8:45 am]

BILLING CODE 8320-01-M

Procedures for Adjudication of Ionizing Radiation Claims

AGENCY: Veterans Administration.

ACTION: Issuance of Program Guide.

SUMMARY: The Veterans Administration is issuing a program guide for use by the various regional offices in the development and disposition of claims of veterans alleging exposure to ionizing radiation during service while

participating in atmospheric testing of nuclear weapons.

This program guide is intended as informational rather than directive to apprise all adjudication personnel of the background of the atmospheric nuclear testing program, the health effects upon veterans resulting from radiation generated by those tests, the types of diseases associated with radiation exposure, and assumptions with respect to low levels of radiation exposure. These guidelines are expected to lead to improvement in the adjudication of claims of veterans from alleged exposure to ionizing radiation resulting from their participation in atmospheric nuclear tests.

FOR FURTHER INFORMATION CONTACT:
Robert C. Macomber (211C) 202-389-2635.

SUPPLEMENTAL INFORMATION: Program guides are nondirective and non-rule or policy making. They are superseded by instructions, technical bulletins, or other non-rule making issues which may be at variance on the same subject matter.

Approval: August 15, 1979.

Maury S. Crallé, Jr.,

Assistant Deputy Administrator for Financial Management and Construction

Rating Practices and Procedures; Disability; Ionizing Radiation Exposure

1. *Claims Alleging Disabilities Attributed to Exposure to Ionizing Radiation.* For some time, claims have been received in which it is alleged that disabilities have resulted from veterans' exposure to ionizing radiation during service through their participation in atmospheric testing of nuclear devices.

Some 225,000 U.S. military personnel participated in the atmospheric testing of nuclear weapons in Nevada and the South Pacific between 1945 and 1962. Since the Atmospheric Test Ban Treaty of 1963, all U.S. tests have been underground.

This testing and the resultant health hazard are the subjects of a recent comprehensive study by representatives of several executive agencies, including the VA, HEW, DoD, DoE, DoL, EPA and NRC. The findings are contained in the "Report of the Interagency Task Force on the Health Effects of Ionizing Radiation," June 1979. The Interagency Task Force (hereafter referred to as "ITF") reported that an estimated 43% of the test participants received no exposure to ionizing radiation as a result of their participation; 87% received less than 1 rem of external radiation; 97% less than 3 rem, and over 99% less than 5 rem. It should be pointed out that these estimates are based upon

external film badge readings of participants. These dosimetry badges measured gamma and neutron radiation; they do not reflect what, if any, amounts of alpha-emitter material ingestion occurred through inhalation.

2. Health Effects of Ionizing Radiation.

a. *Acute Somatic Effects.* Individuals exposed to high levels and rates of ionizing radiation may experience acute somatic effects within days or weeks after exposure. The ITF reported that single, whole-body doses of over 100 rem can effect bone marrow cells and cells lining the intestinal tract, causing some effects as anemia, hemorrhage, infections, nausea and diarrhea. High doses were also said to cause neural cell and chromosome damage.

b. *Late Somatic Effects.* There is little empirical data on the long-term effects of the exposure of humans to ionizing radiation at the low levels experienced by the vast majority of those military personnel exposed during atomic testing. As pointed out by the ITF, current estimates of the health effects are largely based upon the studies of the survivors of the bombings of Hiroshima and Nagasaki, which involved single doses at very high rates. The ITF reported that the diseases which these studies have to date most firmly associated with radiation exposure are: leukemia, lymphomas (including multiple myelomas), thyroid cancer, female breast cancer, esophageal cancer, stomach cancer, urinary organ cancer, lung cancer.

The ITF acknowledged that ongoing and proposed research will permit a more definitive listing of late somatic effects of low-level ionizing radiation.

There are no distinguishable pathological features of the cancers induced by radiation from which they may be differentiated from cancers due to "natural" factors. It is thus impossible to say with certainty whether such a disease would have occurred regardless of the radiation exposure.

In the absence of acceptable hard data on the latent effects of low level radiation, the ITF reports, it has been necessary to assume that there is a directly proportional or "linear" relationship between the risks of high and low doses. This theory assumes as well that there is no threshold level of exposure below which radiation will not have any potentially carcinogenic effect. These assumptions have been criticized as both underestimating and overestimating the potential hazard of low-dose exposure, although it would appear that they currently offer the most rational basis for projecting this risk.

The Work Group on Care and Benefits of the ITF reported a "natural" incidence of fatal cancer of 1,600 in any population of 10,000. They provided the estimate of one additional death for each additional rem to which the entire group was exposed; for example, if all in a group of 10,000 were exposed to one rem in addition to naturally occurring background radiation, there would be only one fatal cancer beyond the 1,600 otherwise expected. Even assuming that such a projection underestimates the risk by a factor as much as 10, the realm of probabilities vis-a-vis the atomic test participants is placed in some perspective.

c. *Genetic Effects.* While animal experimentation has shown gene mutations as a result of exposure to ionizing radiation, the ITF reports that the study of the human survivors of the Japanese bombings has to date produced no evidence of increased genetic defects in offspring.

3. *Development of Evidence.* Claims for disabilities based upon such exposure pose unique development problems for claimants and special assistance should be extended to them. Paragraph 22.05.1 of M21-1 provides for Central Office coordination of the search of Government records for exposure data, and lists the identifying information necessary for these special searches to ensue.

4. *Adjudication of Claims—Reasonable Doubt.* The problems inherent in the adjudication of claims in which there are allegations of late somatic effects of radiation are many. The records obtained may not conclusively place an individual at a test site or elsewhere, or document with certainty the dosage of exposure in a given claim. The resolution of reasonable doubt in a claimant's favor requires that, at a minimum, veterans be presumed to have been present at a test or series of tests as claimed unless the service department conclusively places them elsewhere at the time in question. Also, when an individual dosimetry reading for a claimant is not available but the service department is able to supply or estimate a range of exposure for the claimant's organizational unit, exposure at the upper limit of the range can be conceded.

The many remaining unknowns concerning the carcinogenic effects of low-level radiation make such determinations especially perplexing. It should presently be assumed, however, that there is no level of exposure below which some risk does not attach, and that the probability of radiation-induced disease increases with the intensity and

duration of exposure. That is not to say that dosage should be the sole, or even controlling, criterion. Consideration should be given to such factors as the estimated date of onset of the disease in relation to the dates of exposure, and where available, to such post service personal and occupational histories as cigarette smoking (in lung cancer cases) and significant contact with other known carcinogens (such as benzene in leukemia cases).

Where the evidence in its entirety creates a reasonable doubt as distinguished from speculation or remote possibility, such doubt should be resolved in favor of service connection. Additionally, there should be no hesitancy in submitting claims based on malignancies to Central Office (212) for advisory opinions.

5. *Copies of Rating Sheets Furnished to Compensation and Pension Service.* The copies of rating sheets furnished in accordance with M21-1, paragraph 49.06a(6)(a), should contain the dates and branch of service; serial number; name, date and location of all A-tests attended; the military unit to which assigned at time of test; duty assignment at test; dosimetry reading or amount of radiation exposure, if known; and any other identifying information which would assist in any further search for information.

Permanent Authority Applications; Decision-Notice

Decided: August 2, 1979.

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a petition for intervention, either in support of or in opposition to the granting of an application, must be filed with the Commission within 30 days after the date notice of the application is published in the *Federal Register*.

Protests (such as were allowed to filings prior to March 1, 1979) will be rejected. A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(l) setting forth the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters, and things relied upon, including the extent, if any, to which petitioner (a) has solicited the traffic or business of those supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace the extent to which petitioner's interest will be represented by other parties, the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Petitions not in reasonable compliance with the requirements of the rules may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Section 247(f) provides, in part, that an applicant which does not intend to timely prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If an applicant has introduced rates as an issue it is noted. Upon request, an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administrative acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are consistent with the public interest and

the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient petitions for intervention, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Fortier, and Hill.
Agatha L. Mergenovich,
Secretary.

MC 1427 (Sub-5F), filed March 19, 1979. Applicant: NEW MEXICO TRANSPORTATION COMPANY, INC., 515 North Main St., P.O. Box 1494, Roswell, NM 88201. Representative: W. L. McCracken, Greyhound Tower, Phoenix, AZ 85077. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting passengers and their baggage, in the same vehicle with passengers, in special one-way and round-trip operations, from points in Castro, Deaf Smith, El Paso, Farmer, Potter, Randall, and Reeves Counties, TX, and Bernalillo, Chaves, Curry, De Baca, Dona Ana, Eddy, Guadalupe, Lincoln, Otero, Quay, Roosevelt, San Miguel, Santa Fe, and Torrance Counties, NM, to points in the United States, including AK, but excluding HI. (Hearing site: Roswell or Albuquerque, NM.)

MC 5227 (Sub-48F), filed March 26, 1979. Applicant: ECKLEY TRUCKING, INC., P.O. Box 201, Mead, NE 68041. Representative: A. J. Swanson, 521 S. 14th St., P.O. Box 81849, Lincoln, NE 68501. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes,

transporting iron and steel articles, from the facilities of Northwestern Steel & Wire Co., at Sterling and Rock Falls, IL, to points in IA, NE, MN, CO, KS, MO, AR, IN, MI, WI, WY, UT, MT, ID, NV, CA, OR, WA, TX, OK, NM, AZ, ND, and SD. (Hearing site: Sterling, IL, or Omaha, NE.)

MC 8457 (Sub-10F), filed March 28, 1979. Applicant: MILWAUKEE TRANSFER & FUEL CO., a Corporation, P.O. Box 522, Clackamas, OR 97015. Representative: Larry Smart, 419 N.W. 23rd, Portland, OR 97210. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting iron and steel articles, between points in CA, OR, WA, and ID. (Hearing site: Portland, OR, or Vancouver, WA.)

MC 11207 (Sub-471F), filed March 21, 1979. Applicant: DEATON, INC., Avenue 317 W, P.O. Box 938, Birmingham, AL 35201. Representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting construction materials, and materials and supplies used in the manufacture and distribution of construction materials, (except commodities in bulk), between the facilities of The Celotex Corporation at or near Russellville, AL, on the one hand, and, on the other, points in AR, FL, GA, KY, LA, MS, NC, SC, and TN. (Hearing site: Birmingham, AL, or Tampa, FL.)

MC 11207 (Sub-472F), filed March 21, 1979. Applicant: DEATON, INC., Avenue 317 W, P.O. Box 938, Birmingham, AL 35201. Representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting metal articles, from the facilities of O'Neal Steel, Inc., at or near Birmingham and Mobile, AL, Little Rock, AR, Jacksonville and Tampa, FL, Atlanta, GA, Lafayette, Monroe, and Shreveport, LA, Jackson, MN, and Chattanooga and Knoxville, TN, on the one hand, and, on the other points in AL, AR, FL, GA, KY, LA, MD, MS, MO, NC, OK, SC, TN, TX, VA, and WV. (Hearing site: Birmingham, AL, or Washington, DC.)

MC 26396 (Sub-237F), filed March 14, 1979. Applicant: POPELKA TRUCKING CO., d.b.a. THE WAGGONERS, P.O. Box 990, Livingston, MT 59047. Representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over

irregular routes, transporting fireplace logs, from the facilities of Northwest Forest Fuels, Inc., at or near Livingston, MT, to (1) points in AZ, CA, CO, FL, ID, IL, IA, IN, KS, MD, MO, MN, NE, NM, NY, ND, OH, OR, WA, WI and WY, and (2) to ports of entry on the International boundary line between the United States and Canada located in MT. (Hearing site: Billings, MT.)

MC 33037 (Sub-22F), filed March 23, 1979. Applicant: STUDER TRUCK LINE, INC., Beattie, KS 66406. Representative: John E. Jandera, 641 Harrison St., Topeka, KS 66603. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting fertilizer, in bulk and in bags, from the facilities of Farmland Industries, Inc., at or near Lawrence, KS, to points in CO, IL, KY, ND, OK, SD, TX, WI, and WY. (Hearing site: Kansas City, MO.)

MC 41118 (Sub-58F), filed March 23, 1979. Applicant: FOGLEMAN TRUCK LINE, INC., P.O. Box 1504, Crowley, LA 70528. Representative: Austin L. Hatchell, 801 Vaughn Bldg., Austin, TX 78701. To operate as a contract carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) paper and paper articles, plastics, plastic products, and chemicals, (except commodities in bulk), and (2) materials, equipment, and supplies used in the manufacture or distribution of the commodities named in (1), (except commodities in bulk), between points in the United States (except AK and HI), under continuing contract(s) with Union Camp Corporation, of Wayne, NJ. (Hearing site: Baton Rouge or New Orleans, LA.)

Note.—Dual operations may be involved.

MC 41406 (Sub-134F), filed March 21, 1979. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, Hammond, IN 46323. Representative: Wade H. Bourdon (same address as applicant). To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting iron and steel articles, between Solon, OH, on the one hand, and, on the other, points in AR, FL, KY, NJ, RI, TN and TX. (Hearing site: Columbus, OH.)

MC 41406 (Sub-135F), filed March 21, 1979. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, Hammond, IN 46323. Representative: Wade H. Bourdon (same address as applicant). To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting aluminum, zinc and lead articles, between the

facilities of U.S. Reduction Co. at Toledo, OH, Alton and Madison, IL, Gary, Hammond, and East Chicago, IN, Marietta, PA, and Russellville and Anniston, AL, on the one hand, and, on the other, those points in the United States in and east of ND, SD, NE, KS, OK and OK. (Hearing site: Chicago, IL.)

MC 43867 (Sub-45F), filed March 28, 1979. Applicant: A. L. McALLISTER TRUCKING COMPANY, P.O. Box 2114, Wichita Falls, TX 76307. Representative: John T. Wirth, 717 17th St., Suite 2000, Denver, CO 80202. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) iron and steel articles and pipe, from the facilities of Ft. Worth Pipe & Supply company at or near Conroe, TX, to points in the United States, including AK but excluding HI, and, (2) materials, equipment and supplies used in the manufacture and distribution of the commodities described in (1) above, in the reverse direction. (Hearing site: Dallas, TX.)

MC 52437 (Sub-4F), filed March 28, 1979. Applicant: SHIPPERS SERVICE EXPRESS, INC., 7200 Fly Rd., P.O. Box 207, East Syracuse, NY 13057. Representative: Herbert M. Canter, 305 Montgomery St., Syracuse, NY 13202. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting sugar, from Boston, MA, to those points in NY north of Sullivan, Ulster, and Dutchess Counties. (Hearing site: Boston, MA, or Syracuse, NY.)

MC 52727 (Sub-3F), filed March 22, 1979. Applicant: RAY BELLEW, INC., 7810 Alameda-Genoa Rd., Houston, TX 77034. Representative: Joe G. Fender, 711 Louisiana, Suite 1150, Houston, TX 77002. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting iron and steel articles, pipe, concrete beams, and concrete piling, between points in TX, on the one hand, and, on the other, points in LA, AR, OK, and NM. (Hearing site: Houston or Dallas, TX.)

MC 59367 (Sub-140F), filed March 23, 1979. Applicant: DECKER TRUCK LINE, INC., P.O. Box 915, Fort Dodge, IA 50501. Representative: William L. Fairbank, 1980 Financial Center, Des Moines, IA 50309. To operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting foodstuffs (except frozen foodstuffs and commodities in bulk), from the facilities of Del Monte Corporation, at De Kalb, Mendota, and

Rochelle, IL, to points in IA and NE. (Hearing site: Chicago, IL.)

MC 63417 (Sub-199F), filed March 28, 1979. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, P.O. Box 13447, Roanoke, VA 24034. Representative: William E. Bain (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *water heaters, hydropneumatic tanks, and parts of and accessories for water heaters and hydropneumatic tanks*, (except commodities which because of size or weight require the use of special equipment), from Chicago, IL, to points in AL, DE, FL, GA, IN, KY, MD, MI, MS, NJ, NY, NC, OH, PA, SC, TN, VA, WV, and DC. (Hearing site: Roanoke, VA, or Chicago, IL.)

MC 71296 (Sub-3F), filed March 27, 1979. Applicant: FORT TRANSPORTATION & SERVICE CO., INC., 1600 Janesville Ave., Fort Atkinson, WI 53538. Representative: Michael J. Wyngaard, 150 E. Gilman St., Madison, WI 53703. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Edgerton, WI, and Milton, WI, over WI Hwy 59, serving all intermediate points, and (2) between Milton, WI, and Fort Atkinson, WI, over WI Hwy 26, serving all intermediate points. (Hearing site: Madison or Milwaukee, WI.)

Note.—Applicant intends to tack this authority to others.

MC 98776 (Sub-6F), filed March 28, 1979. Applicant: ELDRIDGE TRUCK LINE, INC., P.O. Box 659, Somerset, KY 42501. Representative: Robert H. Kinker, 314 West Main Street, P.O. Box 464, Frankfort, KY 40602. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) from Louisville, KY, over Interstate Hwy I-64 to junction Interstate Hwy I-75 north of Lexington, then over Interstate Hwy I-75 to access roads to Lexington, KY and return over the same route, serving no intermediate points as an alternate route

for operating convenience only. (Hearing site: Lexington, KY.)

Note.—Applicant states it will tack with its existing regular route authority in MC 98776 at Lexington, KY.

MC 100666 (Sub-450F), filed March 22, 1979. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Representative: Wilburn L. Williamson, Suite 615-East, The Oil Center, 2601 Northwest Expressway, Oklahoma City, OK 73112. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *paper and paper products*, from the facilities of The Alton Box Board Company at or near Jacksonville, Wilson, Statesville and Hendersonville, NC, Cedartown and Rossville, GA, and Jacksonville and Miami, FL, to points in AR, IL, IN, LA, MI, OH, OK, TX and WI. (Hearing site: Chicago, IL.)

MC 100666 (Sub-451F), filed March 23, 1979. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, LA 71107. Representative: Wilburn L. Williamson, Suite 615-East, The Oil Center, 2601 Northwest Expressway, Oklahoma City, OK 73112. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *paper and paper articles* from the facilities of South Carolina Industries, Inc., at or near Florence, SC, to points in IL, IN, KY, MI, MN, OH, and WI. (Hearing site: Charleston, SC.)

MC 105007 (Sub-59F), filed March 22, 1979. Applicant: MATSON TRUCK LINES, INC., 1407 St. John Avenue, Albert Lea, MN 56007. Representative: Val M. Higgins, 1000 First National Bank Bldg., Minneapolis, MN 55402. To operate as a *common carrier*, by motor vehicle in interstate or foreign commerce, over irregular routes, transporting *meats, meat products, meat by-products and articles distributed by meat packing houses* as described in Sections A and C of Appendix 1 to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, (except hides and commodities in bulk), from the facilities of Geo. A. Hormel & Co., at Ottumwa, IA, to points in KY, MI, OH, PA and WV. (Hearing site: Minneapolis-St. Paul, MN.)

MC 105016 (Sub-11F), filed March 25, 1979. Applicant: PELLISSIER TRUCKING, INC., 1002 Hostetter, P.O. Box 192, The Dalles, OR 97058. Representative: Russell M. Allen, 1200 Jackson Tower, Portland, OR 97205. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes,

transporting *lumber and wood products*, (1) between those points in WA east of the summit of the Cascade Range, on the one hand, and, on the other, points in OR, and (2) between those points in OR east of the summit of the Cascade Range, on the one hand, and, on the other, points in WA. (Hearing site: Portland or The Dalles, OR.)

MC 106207 (Sub-15F), filed February 16, 1979. Applicant: NEW YORK-KEASNBURG-LONG BRANCH BUS CO., INC., 50 State Highway, Leonardo, NJ 07737. Representative: Sidney J. Leshin, 575 Madison Avenue, New York, NY 10022. To operate as a *common carrier*, by motor vehicle in interstate or foreign commerce, over irregular routes, transporting *passengers and their baggage*, between Point Pleasant, NJ and the World Trade Center, New York, NY: From Point Pleasant, NJ, at Atlantic Avenue to Highway 35, over Highway 35 to Highway 71, over Highway 71 to Washington Boulevard, in Sea Girt, NJ, over Washington Blvd. to the Crescent to First Ave., over First Avenue to Lake Avenue in Spring Lake, NJ, over Lake Ave. to Third Ave., over Third Ave. to Ludlow Ave. over Ludlow Ave. to Allaire Rd., to the intersection of Highway 34, over Highway 34 to the interchange 98 on the Garden State Parkway, over the Garden State Parkway to the New Jersey Turnpike, over the New Jersey Turnpike to the Pulaski Skyway, over the Pulaski Skyway to the Holland Tunnel across the Hudson River to the Borough of Manhattan, NY, NY., and return over the same route. Service is authorized to and from all intermediate points. (Hearing site: New York, NY or Newark, NJ.)

MC 106707 (Sub-17F), filed March 23, 1979. Applicant: ADAMS TRUCKING INC., 1711 West Second St., Webster City, IA 50595. Representative: Ronald D. Adams (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *iron and steel articles*, from Chicago, IL, to points in IA and those in IL on and north of U.S. Hwy 136, restricted to the transportation of traffic originating at the facilities of J & L Steel Company, at or near Chicago, IL, and destined to the indicated destinations. (Hearing site: Chicago, IL, or Washington, DC.)

MC 107107 (Sub-475F), filed March 13, 1979. Applicant: ALTERMAN TRANSPORT LINES, INC., 12805 NW, 42nd Ave. Opa Locka, FL 33054. Representative: Ford W. Sewell (same address as applicant). To operate as a *common carrier*, by motor vehicle, in

interstate or foreign commerce, over irregular routes, transporting (1) *such merchandise* as is dealt in by wholesale, retail and chain grocery and food business houses, and (2) supplies and industrial products (except in bulk, in tank vehicles), from points in Clayton, Cobb, DeKalb, Fulton and Gwinnett Counties, GA, to points in FL. (Hearing site: Miami, FL.)

MC 107496 (Sub-1204F), filed March 23, 1979. Applicant: RUAN TRANSPORT CORPORATION, 666 Grand Ave., Des Moines, IA 50309. Representative: E. Check, P.O. Box 855, Des Moines, IA 50304. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *chemicals*, in bulk, between the facilities of Wausau Chemical Corporation, at points in MI and WI, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Des Moines, IA, or Chicago, IL.)

MC 107496 (Sub-120F), filed March 23, 1979. Applicant: RUAN TRANSPORT CORPORATION, 666 Grand Ave., Des Moines, IA 50309. Representative: E. Check, P.O. Box 855, Des Moines, IA 50304. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1)(a) *animal fats, animal oils, and vegetable oils*, in bulk, and (b) *blends and products of the commodities named in (1)(a)*, in bulk, from Champaign, IL, to points in IN, KY, MI, OH, and WI; and (2) *weed killing compounds*, in bulk, in tank vehicles, from Lafayette, IN, to points in SD, AR, and LA. (Hearing site: Memphis, TN, or Des Moines, IA.)

MC 109397 (Sub-447F), filed March 21, 1979. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, MO 64801. Representative: A. N. Jacobs (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *refined copper*, from Garfield, UT, and Hurley, NM, to points in the United States (except AK and HI), and (2) *materials, equipment, and supplies* used in the mining and manufacture of refined copper, in the reverse direction. (Hearing site: Salt Lake City, UT.)

MC 109397 (Sub-448F), filed March 21, 1979. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, MO 64801. Representative: A. N. Jacobs (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes,

transporting (1)(a) *commodities* the transportation of which because of size or weight requires the use of special equipment or special handling, and (b) *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in mixed loads with the commodities named in (1)(a) above, (2)(a) *self-propelled articles*, on trailers, and (b) *machinery, tools, parts, and supplies* for the commodities named in (2)(a) above, from the facilities of Riley Beaird, Inc., at or near Shreveport, LA, to points in the United States (except AK and HI), and (3) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities named in (1) and (2) above, (except commodities in bulk), in the reverse direction. (Hearing site: Dallas, TX.)

MC 109397 (Sub-450F), filed March 26, 1979. Applicant: TRI-STATE MOTOR TRANSIT CO., a Corporation, P.O. Box 113, Joplin, MO 64801. Representative: A. N. Jacobs (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *heating and melting equipment, and electrical transformers*, (2) *parts of and accessories for the commodities named in (1)*, and (3) *such commodities as are used in the installation of the commodities named in (1)*, between points in Madison County, KY, on the one hand, and, on the other, points in the United States (except AK, HI, and KY). (Hearing site: Louisville, KY.)

MC 115056 (Sub-21F), filed March 26, 1979. Applicant: LANE TRUCK LINES, INC., 120 Newby Court, Rocky Mount, NC 27801. Representative: Thomas L. Young, 131 North Church Street, Rocky Mount, NC 27801. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *wooden fencing and fencing materials*, from points in Halifax County, NC, to points in CT, DE, FL, GA, MA, MD, NJ, NY, OH, PA, SC, VA, WV. (Hearing site: Raleigh, NC.)

MC 115826 (Sub-430F), filed March 26, 1979. Applicant: W. J. DIGBY, INC., 6015 E. 58th Ave., Commerce City, CO 80022. Representative: Howard Gore (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *meats, meat products, meat byproducts, articles distributed by meat-packing*

houses, and such commodities as are used by meat packers in the conduct of their business when destined to and for use by meat packers, as described in Sections A, C, and D of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), between the facilities of Lauridsen Foods, Inc., at or near Britt, IA, on the one hand, and, on the other, points in the United States (except AK and HI), restricted to the transportation of traffic originating at or destined to the facilities of Lauridsen Foods, Inc. (Hearing site: Denver, CO.)

Note.—Dual operations may be involved.

MC 115826 (Sub-438F), filed March 25, 1979. Applicant: W. J. DIGBY, INC., 6015 E. 58th Ave., Commerce City, CO 80022. Representative: Howard Gore (same address as applicant). To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *such commodities as are dealt in by grocery and food business houses* (except commodities in bulk), from points in CA, OR, WA, and ID, to Hutchinson, KS. (Hearing site: Denver, CO.)

MC 117386 (Sub-9F), filed March 23, 1979. Applicant: L. B. TRANSPORT, INC., Buffalo Center, IA 50424. Representative: Kenneth F. Dudley, 611 Church St., P.O. Box 279, Ottumwa, IA 52501. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *lard, grease, and tallow*, in bulk, in tank vehicles, from the facilities of John Morrell & Co., at or near Esterville, IA, to points in IL, IA, MN, MO, NE, and WI. (Hearing site: Chicago, IL, or Kansas City, MO.)

MC 118696 (Sub-22F), filed March 26, 1979. Applicant: FERREE FURNITURE EXPRESS, INC., 252 Wildwood Rd., Hammond, IN 46324. Representative: Carl L. Steiner, 39 S. LaSalle St., Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *new furniture, clock cases, and parts of furniture*, from the facilities of Smith Cabinet Mfg. Co., at or near Salem, IN, to points in AR and TN. (Hearing site: Indianapolis, IN.)

MC 119656 (Sub-58F), filed March 26, 1979. Applicant: NORTH EXPRESS, INC., 219 Main Street, Winamac, IN 46996. Representative: Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46420. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes,

transporting *aluminum scrap and aluminum*, between points in AK, AL, IA, IL, IN, KY, LA, MI, MO, MS, and OH, restricted to the transportation of traffic destined to the Schwartz Metal Trading Company facilities at points in the states named above. (Hearing site: Chicago, IL.)

A and C of Appendix I to the report in *Descriptions of Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides, skins, and commodities in bulk), from the facilities of John Morrell & Co. at or near Sioux Falls, SD, Estherville and Sioux City, IA, to points in CT, DE, ME, MD, MA, NH, NY, PA, RI, VT, VA, WV and DC, restricted to the transportation of traffic originating at the above described origins and destined to points in the described destination points. (Hearing site: Fort Worth, TX, or Chicago, IL.)

MC 144667 (Sub-7F), filed March 29, 1979. Applicant: ARTHUR E. SMITH & SON TRUCKING, INC., P.O. Box 1054, Scottsbluff, NE 69361. Representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *meats, meat products, meat byproducts, and articles distributed by meat-packing houses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, (except hides and commodities in bulk), (1) from the facilities of Geo. A. Hormel & Co., at Scottsbluff, NE, to points in CA, (2) from the facilities of Geo. A. Hormel & Co., at (a) Scottsbluff and Fremont, NE, and (b) Ottumwa, IA, to points in WI, IL, MI, NC, PA, NJ, NY, and CT, and (3) Schuyler, NE, to points in PA. (Hearing site: Minneapolis, MN.)

MC 145136 (Sub-2F), filed March 8, 1979. Applicant: JOHN H. UTSINGER, dba NICK'S CARTAGE CO., 100 Summit St., West Alexandria, OH 45381. Representative: Norbert B. Flick, 715 Executive Bldg., Cincinnati, OH 45202. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *polyester vinyl resins, in containers, plastic vinyl gloves, and latex gloves*, between Eaton, OH, and Richmond, IN, under continuing contract(s) with Dayton Flexible Products, of Eaton, OH. (Hearing site: Cincinnati, OH.)

MC 145186 (Sub-1F), filed March 1, 1979. Applicant: GERALD E. EIDAM, SR., dba SINGLE TOWING, P.O. Box 9057, Salem, OR 97305. Representative: Gerald E. Eidam Sr., 2092 Northtree Dr., NE, Salem, OR 97303. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *travel trailers and trailers equipped with fifth wheels*, in initial and secondary movements, in tow-away service, between points in AZ, CA, CO, ID, MT,

NV, OR, UT, WA, and WY. (Hearing site: Portland, OR, or Boise, ID.)

MC 145406 (Sub-32F), filed March 29, 1979. Applicant: MIDWEST EXPRESS, INC., 380 East Fourth Street, Dubuque, IA 52001. Representative: Richard A. Westley, 4506 Regent Street, Suite 100, Madison, WI 53705. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *such commodities* as are manufactured or distributed or used by manufacturers or distributors of plastic and wooden products, and health care products, between the facilities of Bemis Mfg. Co., at points in WI, on the one hand, and, on the other, points in AZ, CA, FL, ID, MT, NE, NM, OR, UT and WA. (Hearing site: Milwaukee, WI or Chicago, IL.)

MC 146116 (Sub-3F), filed March 29, 1979. Applicant: LOCUST HARDWARE CO., INC., P.O. Box 265, Highway 27, Locust, NC 28097. Representative: Webster S. Medlin, 43 Union Street, South, Concord, NC 28025. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *brick*, (1) from the facilities of Ashe Brick Company at or near Van Wyck, SC, and (2) from the facilities of Boren Clay Products at or near Monroe, NC, to points in FL, GA, NC, SC, TN and VA. (Hearing site: Charlotte, NC.)

MC 146176 (Sub-5F), filed March 29, 1979. Applicant: J & L TRANSPORT, INC., Route 1, Box 306, Almond, WI 54509. Representative: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *paper and paper products*, from the facilities of Fox River Paper Company Division, Fox Valley Corporation, at Appleton, WI, to points in AZ, CA, OR and WA. (Hearing site: Appleton, WI or Madison, WI.)

MC 146187 (Sub-4F), filed March 28, 1979. Applicant: THE TEN WHEELERS, INC., Route 2, Gregory Rd., Greenback, TN 37742. Representative: Edward C. Blank, II, P.O. Box 1004, Columbia, TN 38401. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *automotive parts*, from the facilities of Holley Replacement Parts Division of Colt Industries, at Nashville, TN, to points in NJ, NY, and PA. (Hearing site: Nashville or Knoxville, TN.)

MC 146216 (Sub-1F), filed March 12, 1979. Applicant: ROAD COMMERCE CORPORATION, 807 Chestnut Street, Chattanooga, TN 37401. Representative:

Joel M. Merren, 295 Cities Service Bldg., 3445 Peachtree Road, N.E., Atlanta, GA 30326. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *scrap metals*, between points in AL, AR, DE, FL, GA, IN, IL, KY, LA, MA, MI, MS, MO, NC, NJ, NY, OK, OH, PA, TN, TX, VA, WV and DC, under continuing contract(s) with Southern Foundry Supply, Inc. of Chattanooga, TN. (Hearing site: Atlanta, GA.)

MC 146316 (Sub-2F), filed March 9, 1979. Applicant: EUGENE F. MAINOR, d.b.a. GENE MAINOR, P.O. Box G, Tifton, GA, 31794. Representative: C. E. Walker, P.O. Box 1085, Columbus, GA 31902. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *soft drinks*, from Orlando, FL, to Tifton, GA, and (2) *soft drinks*, from Tifton, GA, to Live Oak and Tallahassee, FL. (Hearing site: Tifton or Atlanta, GA.)

MC 146327 (Sub-2F), filed March 14, 1979. Applicant: UNITED TRUCKING COMPANY, P.O. Box 1158, Miles City, MT 59001. Representative: Joe Gerbase, 100 Transwestern Bldg., Billings, MT 59101. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *wine, champagne, and brandy*, from the facilities of E. and J. Gallo winery at or near Modesto, CA, to points in MT. (Hearing site: Billings, MT.)

MC 14616 (Sub-4F), filed March 26, 1979. Applicant: HERITAGE TRANSPORTATION COMPANY, a corporation, 155 N. Eucla Ave., P.O. Box 476, San Dimas, CA 91773. Representative: R. Y. Schureman, 1545 Wilshire Blvd., Los Angeles, CA 90017. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *such commodities as are dealt in or used by manufacturers or distributors of sound recordings*, (except commodities in bulk), (1) from Danbury, CT, New York, NY, and points in NJ, to Terre Haute, IN, and points in CA, (2) from Terre Haute, IN, to Danbury, CT, New York, NY, and points in NJ and CA, and (3) from points in CA, to Danbury, CT, Terre Haute, IN, New York, NY, and points in NJ, restricted, in (1) through (3) inclusive, to the transportation of traffic originating at or destined to the facilities of CBS, Inc. (Hearing site: Los Angeles, CA.)

MC 148567 (Sub-3F), filed March 22, 1979. Applicant: COAST TRANSPORT, INC., 4667 Somerton Rd., Trevoise, PA

19047. Representative: Ira G. Megdal, 499 Cooper Landing Rd., Cherry Hill, NJ 08002. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in containers, (1) between Philadelphia, PA, on the one hand, and, on the other, Baltimore, MD, New York, NY, and Norfolk, VA, and (2) between points in Philadelphia, PA. (Hearing site: Philadelphia, PA, or Camden, NJ.)

MC 146736 (Sub-1F), filed March 12, 1979. Applicant: THEISEN BROTHERS, INC., Route 4, Norfolk, NE 68701. Representative: Paul G. Matt, 214 Sharp Building, Lincoln, NE 68508. To operate as a *contract carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *flue dust and fertilizers* (1) between Norfolk, NE, and Humboldt, IA, under continuing contract(s) with Nucor Steel of Norfolk, NE and Frit Industries, Inc. of Ozark, AL. (Hearing site: Omaha, NE.)

MC 146956 (Sub-1F), filed April 2, 1979. Applicant: WEST EXPRESS TRUCKING COMPANY, General Delivery, Island, KY 42350. Representative: Ed Hodskins, 209 West Fourth Street, Owensboro, KY 42301. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *steel bars, rods and bolts*, from the facilities of Illinois Birmingham Bolt Company at or near Kankakee, IL, to points in KY. (Hearing site: Owensboro, KY or Kankakee, IL.)

MC 147336F, filed March 21, 1979. Applicant: LAUDERDALE MOVING & STORAGE CO., INC., 2108 A St., Meridian, MS 39301. Representative: Alan F. Wohlstetter, 1700 K St., NW, Washington, DC 20006. To operate as a *common carrier*, by motor vehicle in interstate or foreign commerce, over irregular routes, transporting *used household goods*, between points in Pickens, Greene, Hale, Sumter, Marengo, Choctaw, Clarke, and Washington Counties, AL, and Oktibbeha, Lowndes, Noxubee, Winston, Attala, Scott, Kemper, Neshoba, Leake, Newton, Rankin, Jones, Smith, Lauderdale, Covington, Wayne, Forrest, Jasper, and Clarke Counties, MS, restricted to the transportation of traffic having a prior or subsequent movement, in containers, beyond the points authorized, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and

containerization or unpacking, uncrating, and decontainerization of such traffic. (Hearing site: Meridian, MS.)

[Volume No. 28]

Petitions, Applications, Finance Matters (Including Temporary Authorities), Alternate Route Deviations, Intrastate Applications, Gateways, and Pack & Crate.

August 8, 1979.

Petitions for Modification, Interpretation, or Reinstatement of Motor Carrier Operating Rights Authority

The following petitions seek modification or interpretation of existing motor carrier operating rights authority, or reinstatement of terminated motor carrier operating rights authority.

All pleadings and documents must clearly specify the suffix numbers (e.g., M1 F, M2 F) where the docket is so identified in this notice.

The following petitions, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a *petition to intervene either with or without leave* must be filed with the Commission within 30 days after the date of publication in the Federal Register with a copy being furnished the applicant. Protests to these applications will be *rejected*.

A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that if (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(1). In deciding whether to grant leave to intervene, the Commission considers, among other things, whether petitioner has (a) solicited the traffic or business of those persons supporting the application, or, (b) where the identity of those supporting the application is not included in the published application

notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace. Another factor considered is the effects of any decision on petitioner's interests.

Samples of petitions and the text and explanation of the intervention rules can be found at 43 FR 50908, as modified at 43 FR 60277. Petitions not in reasonable compliance with these rules may be rejected. Note that Rule 247(e), where not inconsistent with the intervention rules, still applies. Especially refer to Rule 247(e) for requirements as to supplying a copy of conflicting authority, serving the petition on applicant's representative, and oral hearing requests.

MC 29960 (Sub-6) (M1F) (notice of filing of petition to modify certificate), filed January 4, 1979. Petitioner: GRESHAM TRANSFER, INC., 12008 NE. Inverness Drive, Portland, OR 97220. Representative: David C. White 2400 SW. Fourth Avenue, Portland, OR 97201. Petitioner holds motor *common carrier* certificate in MC 29960 Sub-6 issued July 17, 1972. MC 29960 Sub-6 authorizes transportation, over irregular routes, as pertinent, of *Dry bulk commodities* (except cement, fertilizer, lime, wood chips, sugar, and animal or poultry feed), between points in OR and WA. By the instant petition, petitioner seeks to modify the authority as follows: Delete the restrictions against the transportation of cement, fertilizer, and lime.

MC 59583 (M1F) (notice of filing of petition to modify certificate, filed December 7, 1978. Petitioner: THE MASON AND DIXON LINES, INCORPORATED, P.O. Box 969, Kingsport, TN 37662. Representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. Petitioner holds authority as a motor *common carrier* in its lead certificate MC 59583 issued November 5, 1957, authorizing transportation, over regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Nashville, TN, and Knoxville, TN, serving the intermediate points of Lebanon, Carthage, and Chestnut Mound, TN, restricted against pick-up or delivery of eastbound traffic; Kingston and Rockwood, TN, restricted against pick-up or delivery of westbound traffic; and all others between Nashville and Crossville, TN, inclusive, unrestricted; and the off-route points of Byington,

Wheat, and Oak Ridge, TN, and the site of the Clinton Engineering Works at or near Blair, TN, restricted against the transportation of livestock: from Nashville over U.S. Hwy 70N to Crossville, TN, and then over U.S. Hwy 70 to Knoxville, and return over the same route. By the instant petition, petitioners seek to modify the authority as follows: delete Lebanon, TN from the restriction against picking up or delivering eastbound traffic at the specified intermediate points.

MC 114552 (Sub-135F)(M1F) (notice of filing of petition to modify certificate), filed April 23, 1979. Petitioner: SENN TRUCKING COMPANY, a Corporation, P.O. Drawer 220, Newberry, SC 29108. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210. Petitioner holds motor *common carrier* certificate in MC 114552 Sub-135, issued August 11, 1978, to transport in interstate or foreign commerce, over irregular routes, (1) *roofing asphalt* (except in bulk), from Memphis, TN, to points in AL, GA, IL, KY, MS, MO, NC, and SC, and (2) *Commodities used in the manufacture and distribution of roofing asphalt* (except commodities in bulk), from points in AL, GA, IL, KY, MS, MO, NC, and SC, to Memphis, TN. Restriction: The operations authorized herein are restricted to the transportation of shipments originating at or destined to the facilities of the Trumbull Asphalt Company at Memphis, TN. This certificate may not be tacked or joined with the carrier's other irregular route authority. By the instant petition, petitioner seeks to modify the authority as follows: delete the originating at or destined to in the restriction in this certificate.

MC 114552 (Sub-139F)(M1F) (notice of filing of petition to modify certificate), filed April 17, 1979. Petitioner: SENN TRUCKING COMPANY, a Corporation, P.O. Drawer 220, Newberry, SC 29108. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210. Petitioner holds motor *common carrier* certificate in MC 114552 Sub-139, issued June 6, 1978, to transport in interstate or foreign commerce, over irregular routes, *wood fiber insulation sheathing, hardboard siding, wallboard, particleboard, composition board, and lumber*, from the facilities of Temple Industries, at Diboll and Pineland, TX, and West Memphis, AR, to those points in the United States in and east of ND, SD, NE, KS, OK, and TX. Any duplication in this document of authority presently held by carrier does not confer more than one

operating right. This certificate may not be joined or tacked with the carrier's other irregular-route authority. By the instant petition, petitioner seeks to modify the authority as follows: add the transportation of urethane and urethane products to the commodity description, and to allow service from West Memphis, AR, as part of the territorial description.

MC 115182 (Sub-399)(M1F) (notice of filing of petition to modify certificate), filed February 14, 1979. Petitioner: POOLE TRUCK LINE, INC., P.O. Drawer 500, Evergreen, AL 36401. Representative: Robert E. Tate (same address as applicant). Petitioner holds motor common carrier certificate in MC 115182 Sub-399 issued January 3, 1979, authorizing transportation in interstate or foreign commerce, over irregular routes, of *plastic, plastic articles, plastic pipe, tubing, fittings, connections, and materials, supplies and accessories*, used in the manufacture and installation thereof, between the facilities utilized by Robintech Incorporated, at or near Grinnell, IA, Rolla, MO, and Wichita Falls, TX, on the one hand, and, on the other, points in the United States (except AK and HI). Restriction: The authority granted herein is restricted against the transportation of commodities in bulk, in tank vehicles. By the instant petition, petitioner seeks to modify the authority as follows: delete Hillsboro, TX and substitute Wichita Falls, TX as an origin point.

MC 134183 (Sub-2)(M-1)F (notice of filing of petition to modify permit to add contracting shipper and origin point, filed March 6, 1979.) Petitioner: C&E TRANSPORT, INC., d.b.a. C.E. ZUMSTEIN CO., P.O. Box 27, Lewisburg, OH 45338. Representative: E. STEPHEN HEISLEY, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, DC 20001. Petitioner holds a motor contract carrier permit in No. MC 134183 (Sub-2), issued November 15, 1977, authorizing transportation, over irregular routes, as follows: (1) *Animal and poultry feed additives and supplements*, from the plant site and facilities of Henwood Feed Additives, Inc., at or near Lewisburg, OH, to points in the United States (except AK and HI); and (2) *Materials, equipment and supplies*, used in the manufacture, sale, distribution and production of the commodities in (1) above, from points in the United States (except AK and HI), to the plant site and facilities of Henwood Feed Additives, Inc., at or near Lewisburg, OH. Restriction: The operations authorized herein are subject to the following conditions: said

operations are restricted against the transportation of commodities in bulk, said operations are limited to a transportation service to be performed, under a continuing contract, or contracts, with Henwood Feed Additives, Inc., of Lewisburg, OH. By the instant petition, petitioner seeks to modify the permit as follows: Add as an additional contracting shipper Rachelle Laboratories, Inc., of Long Beach, CA, and in part (1) add the additional origin point of Dayton Terminal Cold Storage, at Dayton, OH.

MC 134183 (Sub-4)(M-1)F (notice of filing of petition to modify permit to add additional commodity), filed March 6, 1979. Petitioner: C&E TRANSPORT, INC., d.b.a. C.E. ZUMSTEIN CO., P.O. Box 27, Lewisburg, OH 45338. Representative: E. STEPHEN HEISLEY, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, DC 20001. Petitioner holds a motor contract carrier permit in No. MC 134183 (Sub-4), issued January 19, 1979, authorizing transportation, over irregular routes, as follows: *Building materials*, from the facilities of Clark Industries, a Division of Clark Grave Vault Co., at Columbus, OH, to points in the United States (except OH, AK and HI). Restriction: The authority granted herein is limited to a transportation service to be performed, under a continuing contract(s) with Clark Industries, a Division of Clark Grave Vault Co., of Columbus, OH. By the instant petition, petitioner seeks to modify the above permit as follows: Add "caskets" to the commodity description.

Permanent Authority Decisions

Decided: August 7, 1979.

The following broker, freight forwarder or water carrier applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the *Federal Register*. Failure to file a protest within 30 days will be considered as a waiver of opposition to the application. A protest under these rules shall comply with Rule 247(e)(3) of the *Rules of Practice* which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, as specifically noted below, and specify with particularity the facts, matters, and things relied upon. The protest shall not include issues or allegations phrased

generally. A protestant shall include a copy of the specific portion of its authority which it believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use this authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission. A copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, the request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an application which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service is either (a) required by the public convenience and necessity, or (b) will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Hill, and Fortier. Member Fortier not participating.

MC 12660 (Sub-1F), filed June 25, 1979. Applicant: THRIFTY TOURS, INC., 438 Woodward Bldg., Washington, DC 20005. Representative: Gary E. Thompson, 4304 East-West Highway, Washington, DC 20014. To engage in operations, in interstate or foreign commerce, as a *broker*, at Washington, DC, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, in special and charter operations, (a) beginning and ending at points in the United States, including AK and HI, and extending to points in MD, VA, and DC, and (b) beginning and ending at points in MD, VA, and DC, and extending to points in the United States, including AK and HI. Condition: Prior cancellation, at applicant's written request, of its authority in MC 12660, issued September 25, 1975.

MC 135068, filed May 2, 1979. Applicant: J. LEO BURCH, JR., d.b.a. BURCH TRAFFIC SERVICE, 10205 Oasis, Suite 101, San Antonio, TX 78216. Representative: Kenneth R. Hoffman, 801 Vaughn Bldg., Austin, TX 78701. To engage in operations, in interstate or foreign commerce, as a *broker*, at San Antonio, TX, in arranging for the transportation, by motor vehicle, of *general commodities*, between points in the United States, including AK and HI. (Hearing site: San Antonio, TX.)

Permanent Authority Decisions

Decided: August 7, 1979.

The following applications filed on or before February 28, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247).

For applications filed before March 1, 1979, these rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the *Federal Register*. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the *Rules of Practice* which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed.

Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

On cases filed on or after March 1, 1979, petitions for intervention either with or without leave are appropriate.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If applicant has introduced rates as an issue it is noted. Upon request an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the

Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contracts carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient protest, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Hill, and Fortier. Member Fortier not participating.

MC 145315 (Sub-2F), filed January 12, 1979. Applicant: CHARLES LINCOLN VICKERS, d.b.a. C. L. VICKERS TRANSFER, Route 2, Albermarle, NC 28001. Representative: Charles Lincoln Vickers (same address as applicant). To operate as a *common carrier*, by motor vehicle in interstate or foreign commerce, over irregular routes, transporting *unground petroleum coke*, in bulk, from Badin, NC, to Piney River, VA. (Hearing site: Charlotte, NC.)

MC 146489F, filed February 28, 1979. Applicant: BROWN WRECKER SERVICE, INC., d.b.a. BROWN & BROWN, 3854 North Peachtree Road, Chamblee, GA 30341. Representative: Ariel V. Conlin, 53 Sixth St. M.W. N.E., Atlanta, GA 30308. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *wrecked, disabled, and repossessed motor vehicles*, (2) *replacement vehicles* for wrecked and disabled vehicles, (3) *salvage*, requiring the use of wrecker equipment, and (4) *empty motor freight trailers*, between points in GA, on the one hand, and, on the other, points in TN, AL, FL, MS, LA, NC, SC, VA, and KY. (Hearing site: Atlanta, Ga.)

Permanent Authority Decisions; Substitution Applications: Single-Line Service for Existing Joint-Line Service

Decided: August 7, 1979.

The following applications, filed on or after April 1, 1979, are governed by the special procedures set forth in Part 1062.2 of Title 49 of the Code of Federal Regulations (49 CFR 1062.2).

The rules provide, in part, that carriers may file petitions with this Commission for the purpose of seeking intervention in these proceedings. Such petitions may seek intervention either with or without leave as discussed below. However, all such petitions must be filed in the form of verified statements, and contain all of the information offered by the submitting party in opposition. Petitions must be filed with the Commission within 30 days of publication of this decision-notice.

Petitions for intervention without leave (i.e. automatic intervention), may be filed only by carriers which are, or have been, participating in the joint-line service sought to be replaced by applicant's single-line proposal, and then only if such participation has occurred within the one-year period immediately proceeding the

application's filing. Only carriers which fall within this filing category can base their opposition upon the issue of the public need for the proposed service.

Petitions for intervention with leave may be filed by any carrier. The nature of the opposition; however, must be limited to issues other than the public need for the proposed service. The appropriate basis for opposition, i.e. applicant's fitness, may include challenges concerning the veracity of the applicant's supporting information, and the bona-fides of the joint-line service sought to be replaced (including the issue of its substantiality). Petitions containing only unsupported and undocumented allegations will be rejected.

Petitions not in reasonable compliance with the requirements of the rules may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are

consistent with the public interest and the transportation policy of 49 U.S.C. 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930(a) (formerly section 210 of the Interstate Commerce Act).

In the absence of legally sufficient petitions for intervention, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Hill, and Fortier. Member Fortier not participating.

MC 20582 (Sub-7F), filed April 30, 1979. Applicant: HENRY H. STEVENS, INC., 1273 Broadway, Flint, MI 48506. Representative: Arthur P. Boynton, 1600 First Federal Bldg., Detroit, MI 48226. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *household goods*, as defined by the Commission, between points in AZ, CA, OR, and WA, on the one hand, and, on the other, points in AR, CO, CT, DE, FL, GA, IL, IN, IA, KS, LA, MD, MA, MI, MN, MS, MO, NH, NJ, NY, OH, PA, TN, TX, VT, VA, WV, WI, and DC. (Hearing site: Detroit, MI, or Washington, DC.)

Note.—The purpose of this application is to substitute single-line service for existing joint-line operations.

MC 45134 (Sub-13F), filed April 12, 1979. Applicant: COLLINS TRUCK LINES, INC., 129 Osborne Rd., Minneapolis, MN 55432. Representative: John B. Van de North, Jr., 2200 First National Bank Bldg., St. Paul, MN 55101. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except automobiles, and household

goods as defined by the Commission), from Wahpeton, ND, to points in ND. (Hearing site: Minneapolis, MN, or Fargo, ND.)

Note.—(1) To the extent the certificate granted in this proceeding authorizes the transportation of classes A and B explosives it will expire 5 years from the date of issuance. (2) The purpose of this application is to substitute single line for joint-line operations.

Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 11343 (formerly Section 5(2)) or 11349 (formerly Section 210a(b)) of the Interstate Commerce Act.

An original and one copy of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this Federal Register notice. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

Transfer Proceedings

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before September 20, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

Finance Docket No. 29042, filed May 1, 1979. Transferee: PAULY LINES, INC., 57th Floor—600 Grant St., Pittsburgh, PA 15222. Transferor: The Union National Bank of Pittsburgh as successor in interest of Central States Forwarding Corp., 4th Ave. & Wood St., Pittsburgh, PA 15222. Representatives: William A. Chesnutt, 1776 F St. NW, Washington, DC 20006. M. Bruce McCullough, 5700—600 Grant St., Pittsburgh, PA 15219. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Second Amended Permit and Order in FF-38 issued to ABC Freight Forwarding Corporation on December 20, 1949 and purchased by Central States Forwarding Corporation, pursuant to Commission order in Finance Docket No. 27544 dated December 20, 1973, authorizing operations as a Freight Forwarder of commodities generally, in interstate commerce, between Baltimore, MD, Philadelphia, PA, Wilmington, DE, District of Columbia, and points in Bronx, Kings, Nassau, New York, Queens, Richmond, and Westchester Counties, NY, Bergen, Essex, Hudson, Middlesex, Passaic, and Union Counties, NJ, Cook, DuPage, Kane, Lake, and Will Counties, IL, and Lake County, IN, on the one hand, and, on the other, points in CO, IL, IN, KY, MI, MN, MO, NJ, NY, OH, PA, and WI. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

Finance Docket 29084 F. Filed June 29, 1979. Transferor: CONTINENTAL FORWARDERS, INC., 350 Broadway, New York, NY 10013. Transferee: Sam's Vans, Inc., 1948 Marina Boulevard, San Leandro, California 94577. Representative: Alan F. Wohlstetter, 1700 K Street, N.W., Washington, D.C. 20006. Authority sought for purchase by transferee of the operating rights of

transferor as set forth in Permit NO. FF-422 (Sub-No.2) issued December 2, 1977, as follows: (a) Used Household Goods and Unaccompanied Baggage, and (b) Used Automobiles, between points in the United States (including HI and AK), restricted in (b) to the transportation of export-import traffic. Transferee presently holds no authority from this Commission.

MC-FC-78077, filed April 9, 1979. Transferee: TOLEDO-DETROIT EXPRESS, INC., 6180 Benora Rd., Toledo, OH 43612. Transferor: The Service Transport Company, a Corporation, 114½ E. Main St., Ravenna, OH 44266. Representative: William P. Jackson, Jr., P.O. Box 1240, Arlington, VA 22210. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC-106373, issued April 9, 1948, as changed by order of the Commission, Division 5, by order dated January 19, 1949, as follows: *General commodities*, except articles of size or weight that makes handling by motor vehicle impractical, bank bills, coins currency, drafts, notes, or other valuable papers, precious metals or articles manufactured therefrom, dangerous explosives, liquid bulk commodities, and household goods, between Toledo, OH and Detroit, MI, over U.S. Hwy 25. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78078 filed March 16, 1979. Transferee: CHAS. LEVY TRANSPORTATION CO., INC., 1200 No. Branch St., Chicago, IL 60622. Transferor: Chas. Leby Circulating Company, same address as Transferee. Representative: Carl L. Steiner, 30 South LaSalle St., Chicago, IL 60603. Authority sought for purchase by transferee of all operating authority held by transferor in Permits No. MC 18037 Subs 3, 5, and 7, issued April 13, 1951, November 14, 1978, and November 3, 1978. Sub 3: Newspapers and related commodities, from Chicago, IL, to points in portions of IL, IN, IA, WI, and MI; magazines, and such books and other periodical publications as are normally distributed to news dealers, and related commodities, from Chicago, IL, to points in portions of IL, IN, IA, WI, and MI, with a restriction; from Kokomo, IN, to points in portions of IL, IN, IA, WI, and MI, with a restriction; from Kokomo, IN, to Chicago, IL, with a restriction, and from Chicago, IL, to Kokomo, IN. Sub 5: newspapers, magazines, books, periodicals, publications, and calendars.

from Chicago, IL, to points in IL, IN, points in IA on and east of Interstate Hwy 35, points in WI on and south of U.S. Hwy 10, under contract with printing houses, publishing houses, or new dealers. Sub 7: magazines, from Brookfield, WI, to Chicago, IL, and South Bend, IN, under contract with Newsweek, Inc. Transferee is not a carrier and temporary lease is not sought.

MC-FC-78065, filed March 15, 1979. Transferee: EDWARD RABEL 800 E. Scott St., Olyphant, PA 18447. Transferor: D. Steinman, d.b.a. N. Steinman Trucking Company, S. Washington Ave. and River St., Scranton, PA 18505. Representative: Joseph F. Hoary 121 S. Main St., Taylor, PA 18517. Authority sought for the purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC-9071, issued December 18, 1978, as follows: *Household goods*, as defined by the Commission, between Scranton, PA, on the one hand, and, on the other, points in NY and NJ. Transferee presently holds authority from this Commission in MC-67402. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78088 filed March 26, 1979. Transferee: B. L. CARTAGE CO., 10735 South Cicero Ave., Oak Lawn, IL 60453. Transferor: Rogers Cartage Co., Same address as Transferee. Authority sought for purchase by transferee of operating rights of transferor in Certificate No. MC 64932 (portion) issued May 28, 1976, and in Certificate No. MC 64932 Sub 123, issued January 22, 1953 (entire), as follows: petroleum and petroleum products, in bulk, in tank vehicles, (1) from East Chicago, IN, and points in IN within ten miles of East Chicago, to points on that part of IL on and north of U.S. Highway 40; from points in IL within ten miles of East Chicago, IN, to points in a defined portion of IL; from a point in Center Township (St. Joseph) County, IN, to points in MI within 150 miles of such origin point; from Blue Island, IL, and points within one and one-half miles of Blue Island, to points in IN; and from points in the Chicago, IL Commercial Zone (except within 1 1/2 miles of Blue Island, IL, including Blue Island), to points in IN on and north of U.S. Highway 50. Transferee holds no authority from this Commission. An application for temporary lease has not been filed. Representative: Leonard R. Kofkin, 39 S. LaSalle St., Chicago, IL 60603.

MC-FC-78106, filed May 1, 1979. Transferee: CAROL BOWMAN, R.D. 2,

Box 75, Milford, DE 19963. Transferor: Kent-Sussex Tours, Inc., R.D. 2, Box 114C, Greenwood, DE 19950. Representative: Chester A. Zyblut, 366 Executive Bldg., 1030-15th St. NW, Washington, DC 20005. Authority sought for acquisition of control by transferee of transferor, including the operating rights of transferor, as set forth in Brokers License No. MC 12969, issued August 17, 1978 as follows: Operations as *broker*, at Greenwood, DE, in arranging for the transportation by motor vehicle, of *passengers and their baggage*, in special and charter operations, beginning and ending at points in Kent and Sussex Counties, DE, those in New Castle County, DE south of the Chesapeake and Delaware Canal, and Caroline and Queen Annes Counties, MD, and extending to points in the United States, including the ports of entry on the United States-Canada Boundary line and the United States-Mexico Boundary line. Transferee presently holds no authority from this Commission. Applications has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78111 filed April 20, 1979. Transferee: DENISE, INC., d.b.a. TRAVEL TIME, 277 Newbury St., Peabody, MA 01960. Transferor: A.B.C., Inc., d.b.a. A.B.C. Bus lines, 375 Promenade St., Providence, RI 02940. Authority sought for purchase by transferee of operating rights held by transferor in Certificate No. MC 107264 Sub-4, issued December 7, 1960, as follows: *passengers and their baggage*, and *express and newspapers* in the same vehicle with *passengers*, between Worcester, MA, and Putnam, CT, serving all intermediate points, over a specified regular route. Transferee holds authority under MC 143438. An application for temporary lease authority has been filed. Representative: Robert M. Santaniello, 95 State St., Suite 1010, Springfield, MA 01103.

MC-FC-78118 filed April 11, 1979. By decision dated July 17, 1979, the Motor Carrier Board approved the below-described transfer application. Transferee: D.C. MOTOR TOURS, INC., 326 Madison Street, N.W., Washington, DC 20001. Transferor: The Colonial Transit Company, Incorporated, P.O. Box 508, Fredericksburg, VA 22401. Representative: L. C. Major, Jr., Suite 400, Overlook Building, 6121 Lincolnia Road, Alexandria, VA 22312. Authority granted for the purchase by Transferee of the Certificate of Public Convenience and Necessity issued to Transferor in Docket No. MC 61802 Sub-No. 12 authorizing the transportation of

passengers and their baggage, and express and newspapers in the same vehicle with passengers as set forth below: Regular routes: Between Washington, DC, and Indian Head, MD, serving all intermediate points: From Washington over city streets to the District of Columbia-Maryland State line, then over MD Hwy 210 to Bryans Road, MD, then over MD Hwy 227 to Pomomkey, MD, then over MD Hwy 224 to Mason Springs, MD, and then over MD Hwy 225 to Indian Head, MD, and return over the same route. From Washington over Alternate MD Hwy 224 to Indian Head, MD and return over the same route. Between Fort Washington MD, and Silesia, MD, serving all intermediate points: From Fort Washington, over MD Hwy 549 to Silesia, and return over the same route. Incidental charter operations in interstate or foreign commerce may be conducted. Transferee holds no authority from the Commission. An application for temporary lease authority has not been filed.

MC-FC-78146, filed May 17, 1979. Transferee: ROSS TRANSPORT CO., INC., 518 Parlin St., Philadelphia, PA 19116. Transferor: ATSL, Inc., Bldg. A, 10 E. Oregon Ave., Philadelphia, PA 19148. Representative: Richard Rueda, 135 N. 4th St., Philadelphia, PA 19106. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificates MC-35706 (Sub-Nos. 4, 5, 6, and 9), issued January 31, 1978, May 3, 1978, May 3, 1978, and June 6, 1979, respectively, as follows: (A) *Juvenile furniture and juvenile vehicles*, (1) from the facilities of Hedstrom Company, at Bedford, PA, to the facilities of ATSL, Inc., at or near Philadelphia, PA, restricted to the transportation of traffic originating at the named origin, and (2) from the facilities of ATSL, Inc., at or near Philadelphia, PA, to points in DE, MD, and NJ. (B) (1) *Juvenile furniture and children's vehicles*, and (2) *materials, supplies and parts* used in the manufacture and packaging of the commodities in (B)(1) above (except commodities in bulk), between the facilities of Graco Children's Products, at Elverson and Hellam, PA, on the one hand, and, on the other, points in NJ, DE, MD, NY, CT, VA, and DC. (C) *New furniture*, from the facilities of Home Line Furniture Industries, Inc., in Philadelphia, PA, to points in VA, NY, CT, MA, RI, VT, NH, ME, and MD. and (D) *New furniture*, from the facilities of Telescope Folding Furniture Co., Inc., at Granville, NY, to points in DE, MD, NJ, NC, PA, SC, VA, and DC. Transferee

presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78147, filed May 14, 1979. Transferee: MALLAK LEASING CO., INC., P.O. Box 11241, Charlotte, NC 28209. Transferor: Billings Transfer Corp., Inc., Green Needles Rd., Lexington, NC 27292. Representative: Paul F. Sullivan, 711 Washington Bldg., Washington, DC 20005. Authority sought for the purchase by transferee of a portion of the operating rights of transferor, as set forth in certificate MC-2473, issued July 13, 1943, as follows: *Household goods* as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, between Lexington, NC, and points within 40 miles of Lexington, on the one hand, and, on the other, points in SC, VA, MD, PA, NJ, and DC. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78156, filed May 22, 1979. Transferee: DAVID BONAGUIDE, d.b.a. MERIDEN TRANSFER AND STORAGE, 81 Colt Avenue, Torrington, CT 06790. Transferor: Anthony Cuccaro, d.b.a. Meriden Transfer and Storage, Camp and North George Streets, Meriden, CT 06450. Applicant's representative: Sidney L. Goldstein, 109 Church Street, New Haven, CT 06510. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 110424, issued June 18, 1975, authorizing the transportation of household goods as defined by the Commission (1) between points in CT, (2) between Meriden, CT, on the one hand, and on the other, points in NH, MA, RI, NY, PA and NJ. Authority is sought to tack at Meriden, CT, for points where distance is 300 miles or less. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

MC-FC-78185, filed June 7, 1979. Transferee: VARRA COMPANIES, INC., 2130 S. 96th St., Broomfield, CO 80020. Transferor: Raymond L. Pherson and Patricia M. Pherson, a partnership, d.b.a. Pherson Trucking Company, 3200 Bluff St., Boulder, CO 80302. Representative: Thomas J. Burke, Jr., Suite 1660, 1660 Lincoln St., Denver, CO 80264. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC-98719 (Sub-No. 1), issued January 19, 1965, as follows: *Farm products, farm*

supplies and farm equipment (including furniture only in connection with a movement of farmers' or miners' equipment), and *coal*, between points in the south half of Boulder County, CO; and between points in the south half of Boulder County, CO, on the one hand, and, on the other, points in CO. *Ore and concentrates, mining equipment, supplies, and machinery*, between points in the following described area: Commencing at Boulder; then up Boulder Canyon to Four Mile Canyon to Sunset, then due west to the west Boulder County Line, to a point west of Raymond, then south along the St. Vrain Canyon Road to Lyons, then along the foothill road (CO Hwy 7), to Boulder, on the one hand, and, on the other points in CO, subject to restrictions. *General commodities* (except household goods, and fluid milk as a farm pickup), between points within a fifty-mile radius of Boulder (except the city and County of Denver, and that part of said fifty-mile radius lying west of U.S. Hwy 87 and south of the south line of Township 2 South); and between points in the immediately above-described area, on the one hand, and, on the other, points in CO, subject to restrictions. *Express packages* that can be handled in a passenger bus, between points in the metal mining area of Boulder County, CO and that part of Gilpin County, CO, north of South Boulder Creek, and between those points on the one hand, and, on the other, Boulder and Longmont, CO, subject to a restriction. Transferee presently holds no authority from this Commission, however, a subsidiary of transferee, Varra Enterprises, Inc., holds authority under MC 141135 (Sub-Nos. 1 and 4). Application has been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78186, filed June 7, 1979. Transferee: VARRA COMPANIES, INC., 2130 S. 96th St., Broomfield, CO 80020. Transferor: VARRA ENTERPRISES, INC., 2130 S. 96th St., Broomfield, CO 80020. Representative: Thomas J. Burke, Jr., 1660 Lincoln St., Suite 1600, Denver, CO 80264. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificates MC-141135 (Sub-Nos. 1 and 4), issued June 3, 1977, and March 22, 1978, respectively, as follows: *Silica sand*, in bulk, in dump vehicles, from Denver, Brighton, and Pueblo, CO, to points in UT and WY; and from Hauck, AZ, Farmington, NM, Enid, Lindsay, and Woodward, OK, and Borger and Perryton, TX, to Commerce City and Brighton, CO. Transferee presently holds no authority from this

Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78191, filed June 13, 1979. Transferee: JAMES J. BAYLISS AND ELLEN BAYLISS, a partnership, d.b.a. CONNORS BROS., 370 Cole Ave., Williamstown, MA 01267. Transferor: OSWALD TOWER, JR., doing business as CONNORS BROS., 370 Cole Ave., Williamstown, MA 01267. Representative: Lawrence B. Urbano, 78 Spring St., Williamstown, MA 01267. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificate MC 98245 (Sub-No. 1), issued December 11, 1974, as follows: *Household goods*, as defined by the Commission, between Williamstown, MA, and points within 10 miles thereof, on the one hand, and, on the other, points in ME, NH, VT, MA, CT, RI, NY, NJ, PA, MD, DE, and DC. *Building materials*, as described in Appendix VI to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, between Williamstown and North Adams, MA, on the one hand, and, on the other, points in NY and VT within 15 miles of Williamstown. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78197, filed June 13, 1979. Transferee: SMYTH MOVING SERVICE, INC., 6307 Arctic Spur Road, Anchorage, AK 99509. Transferor: Smyth Overseas Van Lines, Inc., 2510 Post Road, Anchorage, AK 99501. Representative: Alan F. Wohlstetter, 1700 K Street, N.W., Washington, D.C. 20006. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificate Nos. MC-118482 (Sub-Nos. 2, 3, 6 and 8), respectively, as follows: *Household Goods*, as defined by the Commission between points in Alaska except those east of an imaginary line constituting a southward extension of the United States-Canada Boundary Line (Alaska-Yukon Territory); *Household Goods as defined by the Commission* between Haines, Alaska, on the one hand, and, on the other, points in Alaska west of an imaginary line constituting a southward extension of the United States-Canada Boundary Line (Alaska-Yukon Territory). *Restriction*: The authority granted herein is restricted solely to the transportation of household goods received from or delivered to other carriers in interline service at Haines, and against the transportation of shipments originating at or destined to

Haines; *Household Goods*, as defined by the Commission between Seattle, WA, on the one hand, and, on the other, points in Alaska; and *New furniture*, between points in Alaska. Transferee presently holds no authority from the Commission. Application has been filed for temporary authority under Section 210a(b).

MC-FC-78205, filed June 22, 1979. Transferee: RAIL HIGHWAY TRANSPORTATION, INC., 2850 East River Rd., Dayton, OH 45439. Transferor: The Klug-Direct Transportation Co., a corporation, P.O. Box 417, Hamilton, OH 45012. Representative: David A. Turano, 100 E. Broad St., Columbus, OH 43215. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate of Registration No. MC-99031 (Sub-No. 5); issued January 27, 1978, as follows: Property, from and to the site of the Atomic Energy Commission's plant near Fernald, OH, restricted against the use of dump trucks and the transportation of such commodities as are usually transported in dump trucks and unloaded by dumping. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78207, filed June 15, 1979. Transferee: A & A TRANSPORT, INC., Route 87, Franklin, CT 06254. Transferor: Max Rogovin and Samuel Rogovin, d.b.a. Rogovin Express Company, 354 Coleman St., New London, CT 06320. Representative: William J. Meuser, 88 Cherry St., P.O. Box 507, Milford, CT 06460. Authority sought for the purchase by transferee of transferor's operating rights in Certificate No. MC-75593, issued July 13, 1955, as follows: General commodities (with exceptions), from New London, CT, to points in RI and CT within 30 miles of New London; furnaces and furnace equipment from New London, CT to Westerly and Hope Valley, RI; used furnaces and furnace equipment and parts, from Westerly and Hope Valley, RI, to New London, CT. Transferee is a non-carrier, and no application for temporary lease has been filed.

MC-FC-78208, filed June 25, 1979. Transferee: LAMBERT TRANSFER CO., INC., 1505 Huntsville Road, Florence, Alabama 35630. Transferor: Four Winds Van Lines, Inc., 7035 Convoy Court, P.O. Box 81985, San Diego, California 92138. Representative: Robert J. Gallagher, Esq., 1000 Connecticut Avenue, N.W., Suite 1200, Washington, D.C. 20036. Authority sought to purchase a portion of the operating rights of transferor as

set forth in Certificate of Public Convenience and Necessity No. MC-15643 Sub 5, issued December 5, 1968, as follows: Irregular routes: *Household goods*, as defined by the Commission. Between points in Alabama, on the one hand, and, on the other, North Carolina, South Carolina, Tennessee, Georgia, and Florida. Transferee holds authority from the Commission under docket number MC-62658. An application for temporary lease has been filed.

MC-FC-78215, filed July 5, 1979. Transferee: STEWCO, INC., P.O. Box 566, Waskom, TX 75692. Transferor: R. A. Corbett Transport, Inc., P.O. Box 125, Rockwall, TX 75082. Representative: Clayte Binion 1108 Continental Life Bldg., Ft. Worth, TX 76102. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificates MC-127253, issued April 18, 1967, MC-127253 (Sub-Nos. 11, 20, 25, and 26) all issued April 28, 1967, MC-127253 (Sub-Nos. 28, 30, 33, 34, 35, 38, 40, 41, 43, 44, 45, 46, 47, 48, and 53) issued May 12, 1967, February 27, 1968, May 17, 1967, December 12, 1967, July 10, 1970, March 15, 1968, August 7, 1968, April 26, 1968, June 18, 1969, April 23, 1969, August 31, 1970, February 4, 1971, January 15, 1971, September 25, 1974, and May 5, 1977, respectively, and MC-127253 (Sub-No. E2) published in the FR issue of June 20, 1975, authorizing the transportation of (1) *petroleum products*, in bulk, in tank vehicles, generally between points in LA, TX, and AR; (2) *lacquer thinner, sulphur, coal tar, coal tar pitch, creosote oil, molasses, synthetic resins, insecticides, herbicides, fungicides, fertilizer, fertilizer materials, fertilizer ingredients, anhydrous ammonia, acids, ammonium nitrate, urea, corn syrup, animal feed and animal feed ingredients, sodium chlorate and sodium chlorate solutions, fertilizer solutions, chemicals, formaldehyde, and sulphuric acid*, generally from specified points in AR, LA, and TX, to points in AL, AZ, AR, CO, FL, GA, IL, IN, KS, KY, LA, MS, MO, NM, OK, TN, and TX. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78216, filed July 2, 1979. Transferee: BETTENDORF TRANSFER, INC., Route 2, Box 261, River Falls, WI 54022. Transferor: Warren L. Bader, d.b.a. Bader Truck Line, Route 1, New Richmond, WI 54017. Representative: James R. Flescher, 1745 University Ave., St. Paul, MN 55104. Authority sought for the purchase by transferee of the operating rights of transferor, as set

forth in Certificate MC 35602 and MC 35602 (Sub-No. 1), issued February 20, 1959, and September 22, 1960, respectively, as follows: *Livestock*, from points in the Towns of Richmond, Somerset, Saint Joseph, Warren, Erin, and Hudson, WI, to South St. Paul, MN. *Form Machinery, farm supplies, books, school supplies, and furniture*, from South St. Paul, St. Paul, Minneapolis, and Stillwater, MN, to points in the above-specified Wisconsin towns. *Livestock, agricultural commodities, and empty containers* for petroleum products and beverages, from points in the Towns of Cylon, Forest, Stanton, Richmond, Erin, and Emerald, WI, to South St. Paul, Newport, St. Paul, and Minneapolis, MN. *General commodities* except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment, between points in the Towns of Erin, Emerald, Cylon, Forest, Stanton, and Richmond, WI, on the one hand, and, on the other, South St. Paul, St. Paul, Minneapolis, and Stillwater, MN. *Fertilizer*, from Winona, MN, to New Richmond, WI and points in WI within 25 miles of New Richmond. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78217, filed June 21, 1979. Transferee: EXPLOSIVES CARRIER, INC., 8212 S. Bryant, Oklahoma City, OK 73129. Transferor: Marlatt Transfer and Storage Company, a Corporation, 8212 S. Bryant, Oklahoma City, OK 73129. Representative: C. L. Phillips, Room 248-Clasmen Terrace Bldg., 1411 N. Clasmen, Oklahoma City, OK 73106. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in 114252, issued March 27, 1958, as follows: *Spirituuous liquors, new furniture, sash and fixtures, stoves, hardware, ammunition, and toys*, from Joplin, MO, and points within 100 miles thereof, to points in OK. Transferee presently holds authority from this Commission in MC 121087 (Sub-No. 1). Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78218, filed July 2, 1979. Transferee: SAFE-WAY MOVING & STORAGE, INC., 499 N. York Rd., Warminster, PA 18974. Transferor: Carl G. Corson, d.b.a. Safe-Way Moving & Storage, 499 N. York Rd., Warminster, PA 18974. Representative: Harry J. Liederbach, 892 Second St. Pike Richboro, PA 18954. Authority sought for the purchase by transferee of the

operating rights of transferor, as set forth in Certificate MC 10653, issued December 3, 1963, as follows: *Household goods*, as defined by the Commission, (a) Between Philadelphia, PA, on the one hand, and, on the other, points in DE and NJ, within 25 miles of Philadelphia, PA; (b) Between points in Bucks and Montgomery Counties, PA, on the one hand, and, on the other, points in CT, MD, MA, NY, RI, VA, and DC; (c) Between Bristol, PA, and points within 25 miles of Bristol, on the one hand, and, on the other, points in PA, NY, NJ, and DE. Transferee presently holds no authority from this Commission, however, sole owner of transferee is sole owner of Town & County Van Lines, Inc., which holds authority under MC 25433. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78220, filed June 29, 1979. Transferee: GARY STUFFO, d.b.a. Jersey City Transfer, 3 Lancelot Lane, Mount Laurel, NJ 08054. Transferor: Railway Motor Trucking, Inc., 317 Observer Hwy., Hoboken, NJ 07030. Representative: Robert B. Pepper, 168 Woodbridge Ave., Highland Park, NJ 08904. Authority sought for the purchase by transferee of the operating rights of transferor, as set forth in Certificates MC 26644 and MC 26644 (Sub-No. 1), issued December 21, 1940, and August 25, 1942, respectively, as follows: (1) *General commodities*, except those of unusual value, dangerous explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between points in Morris, Union, Hudson, Middlesex, Essex, Bergen, and Passaic Counties, NJ, on the one hand, and, on the other, New York, NY. (2) *General commodities*, except those of unusual value, dangerous explosives, household goods as defined by the Commission, and commodities in bulk, between Jersey City, NJ, on the one hand, and, on the other, points in Hudson, Essex, Bergen, Passaic, Union, Middlesex, Somerset, and Morris Counties, NJ. (3) *Damaged, refused, or rejected shipments* of the commodities in (2) above, between Jersey City, NJ, on the one hand, and, on the other, points in the New Jersey Counties named in (2) above. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78222, filed July 2, 1979. Transferee: AERO DELIVERIES, INC., 208 S. Kidd St. Ionia, MI 48846. Transferor: Aero Distributing Co., Inc.,

4814 Fulton Industrial Blvd., Atlanta, GA 30336. Representative: K. Edward Wolcott, 1200 Gas Light Tower, 235 Peachtree St. NE, Atlanta, GA 30303. Authority sought for the purchase by transferee of a portion of the operating rights of transferor, as set forth in Permits MC 142668, and MC 142668 (Sub-Nos. 5, and 13), issued October 28, 1977, January 31, 1979, May 2, 1979, respectively, as follows: *Such merchandise* as is dealt in by home products distributors, for the plant site of Amway Corporation, at or near Ada, MI, to points in NE, ND, SD, and those points in that part of IA on and west of U.S. Hwy 218, under continuing contract(s) with Amway Corporation, of ADA, MI. *Such merchandise* as is dealt in by home products distributors, (except commodities in bulk), (1) from Chicago, IL, to points in MI (except Huron, Sanilac, Lapeer, St. Clair, Oakland, McComb, Wayne, Lenawee, and Monroe Counties), and (2) from Dubuque, IA, to points in ND, SD, and those points in MN on and west of U.S. Hwy 71, under continuing contract with Stanley Home Products, Inc., of Easthampton, MA. *Such commodities* as are dealt in by retail department stores, from Fargo, ND, to points in ND and SD, under continuing contract with Spiegel, Inc., of Chicago, IL. Transferee also has authority pending in MC 142668 (Sub-No. 18), the portion of which it desires to sell to transferee, as follows: *Such merchandise*, as is marketed by home products distributors (except commodities in bulk), from Chicago, IL, to points in IA, KS, MI, MO, NE, ND, and SD, under continuing contract with Shaklee Corporation, of Hayward, CA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78224, filed July 3, 1979. Transferee: THOMAS J. McHUGH AND HOWARD J. BRENNAN, JR., a partnership, d.b.a. SUBURBAN EXPRESS COMPANY, P.O. Box 251, Brookside, NJ 07926. Transferor: John Charles Clackworthy, d.b.a. Suburban Express Company, 187 Whippany Rd., Whippany, NJ 07981. Representative: Louis T. Urbanczyk, 1750 New York Ave. NW, Suite 210, Washington, DC 20006. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC 19112 (Sub-No. 2), issued March 28, 1958, as follows: *Household goods*, between Morristown, NJ, on the hand, and, on the other, points in CT, MD, MA, NY, PA, RI, and DC. Transferee presently holds no authority from this Commission. Application has not been

filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78229 filed July 10, 1979. Transferee: ARCHIE HOLT, 502 W. State St., Vandalia, MO 63382. Transferor: Hazel F. Kersting, Martinsburg, MO 65264. Representative: Thomas P. Rose, P.O. Box 205, Jefferson City, MO 65102. Authority sought for purchase by transferee of operating rights held by transferor in Permit No. MC 142358 Sub 3, issued March 23, 1978, acquired by transferor pursuant to No. MC-FC-77842, authorizing coal, in bulk, in dump vehicles, from points in MO to points in IL and IA, under contract with Universal Coal and Energy Company, Inc., of Columbia, MO. Transferee holds no authority from this Commission. An application for temporary lease has not been filed.

MC-FC-78234, filed July 17, 1979. Transferee: KUEHL TRANSIT, INC., Storden, MN 56178. Transferor: Refrigerated Foods, Inc., 1420 33rd St., Denver, CO 80201. Representative: Donald L. Stern, Suite 610-7171 Mercy Rd., Omaha, NE 68106. Authority sought for the purchase by transferee of a portion of the operating rights of transferor as set forth in Certificate MC 134068, issued April 24, 1970, as follows: (1) *Cheese, dry dietary mix, and dessert preparations*, from Wanamingo, MN, to points in AZ, CA, CO, MT, and NM, and (2) *butter*, from Wanamingo and Ogilvie, MN, to points in AZ, CA, CO, MT, and NM; RESTRICTION: In connection with the authority granted in (2) above, service to points in AZ and NM is restricted to the transportation of shipments moving in the same vehicle and at the same time with a commodity described in (1) above. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78239, filed July 19, 1979. Transferee: Gary E. Mowery and Connie E. Mowery, a partnership, d.b.a. MOWERY TRANSFER, Route 1 Box 46, Upper Tract, WV 26866. Transferor: Carl Warner, Galen Warner and Darel Warner, a partnership, d.b.a. Warner's Transfer, Route 4 Box 24, Franklin, WV 26807. Representative: Gary E. Mowery, Rte. 1 Box 46, Upper Tract, WV 26866. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificate MC 101898 (Sub-No. 3), issued July 17, 1974, as follows: *Poultry feeds and livestock feeds*, in bulk, from Harrisonburg, VA, to points in Pendleton, Hardy and Grant Counties, WV. Transferee presently holds no authority from this

Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78241, filed July 17, 1979. Transferee: COLLINS TRANSPORT, INC., Route 7, Box 365, Spartanburg, SC 29303. Transferor: Cox Refrigerated Express, Inc., 10606 Goodnight Lane, Dallas, TX 75220. Representative: Scott E. Daniel, 800 Nebraska Savings Building, 1623 Farnam, Omaha, NE 68102. Authority sought for the purchase by transferee of a portion of the operating rights of transferor as set forth in Certificate No. MC 140033 (Sub-No. 65F), issued February 15, 1979, authorizing the transportation of *copper and aluminum magnet wire*, from Abingdon, VA, to El Paso, Beaumont, Dallas and Houston, TX. Transferee presently holds no authority from the Commission and has sought temporary authority under section 210a(b).

MC-FC-78249, filed July 17, 1979. Transferee: RADAMES FIGUEROA, 6819 3rd. Ave., Brooklyn, NY 11220. Transferor: Arthur Bongiorno, 6934 53rd Ave., Maspeth, NY 11378. Representative: Truman O. Murrell, 1871 Victory Blvd., Staten Island, NY 10314. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificate MC 119437, issued September 30, 1974, as follows: *Homing pigeons, and feed and crates* incidental to the care and transportation thereof, during the season March 1 through October 31 of each year, between New York, NY, on the one hand, and, on the other, Bristol, PA and points in NJ. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78250, filed July 30, 1979. Transferee: James Brunsen, d.b.a. JIM'S FREIGHT LINE, 71 2nd St., SE, Britt, IA 50423. Transferor: Robert H. Lewerke, d.b.a. BOB'S FREIGHT LINE, P.O. Box 209, Britt, IA 50423. Representative: James M. Hodge, 1980 Financial Center, Des Moines, IA 50309. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC 124056, issued January 24, 1963, as follows: *General commodities*, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, over a specified regular route between Mason City, and Kanawha, IA, serving the intermediate points of Duncan and Britt, IA; and over a specified regular route between

junction IA Hwy 111 and unnumbered hwy and Corwith, IA, serving no intermediate points. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78251, filed July 30, 1979. Transferee: Joseph H. Ellis, d.b.a. BUS-PAK, Box 219, Route 2, Wellford, SC 29385. Transferor: W. Earl Humphries, d.b.a. BUS-PAK, 212 E. Daniel Morgan Ave., Spartanburg, SC 29301. Representative: George W. Clapp, P.O. Box 836, Taylors, SC 29687. Authority sought for the purchase by transferee of the entire operating rights of transferor, as set forth in Certificate MC 142227 (Sub-No. 2), issued June 20, 1977, as follows: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in Spartanburg County, SC, subject to restrictions. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC-FC-78254, filed July 30, 1979. Transferee: BEEHIVE TOURS & TRAVEL, INC., 1325 S. Main St., Salt Lake City, UT 84115. Transferor: Anne Marie James, d.b.a. James Travel Tours, 2230 Scenic Drive, Salt Lake City, UT 84109. Representative: Irene Warr, 430 Judge Bldg., Salt Lake City, UT 84111. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in brokers license MC 12697, issued June 25, 1979, as follows: Operations as a broker at Salt Lake City, UT, in arranging for the transportation by motor vehicle, of passengers and their baggage, in special and charter operations, in round-trip all-expense tours, beginning and ending at Salt Lake City, UT, and extending to points in the United States (including HI but excluding AK), and beginning and ending at points in UT (except Salt Lake City), ID, AZ, NV, and CA and extending to points in the United States (including AK and HI). Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MOTOR CARRIER ALTERNATE ROUTE DEVIATIONS

The following letter-notice to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation

Rules—Motor Carrier of Property (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed on or before September 20, 1979.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

MOTOR CARRIERS OF PROPERTY

MC 11220 (Deviation No. 48), GORDON'S TRANSPORTS, INC., 185 West McLemore Ave., Memphis, TN 38101, filed August 1, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exception, over a deviation route as follows: From Houston, TX, over Interstate Hwy 10 to Junction Interstate Hwy 12, then over Interstate Hwy 12 to Junction Interstate Hwy 55, then over Interstate Hwy 55 to Jackson, MS, then over Interstate Hwy 20 to Birmingham, AL, and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Houston, TX, over U.S. Hwy 75 to Durant, OK, then over U.S. Hwy 70 to Junction Interstate Hwy 30, west of Benton, AR, then over Interstate Hwy 30 to Little Rock, AR, then over U.S. Hwy 70 to Memphis, TN, then over U.S. Hwy 72 to Junction Alternate U.S. Hwy 72, then over Alternate U.S. Hwy 72 to Junction U.S. Hwy 31, then over U.S. Hwy 31 to Birmingham, AL, and return over the same route.

MC 29555 (Deviation No. 35), BRIGGS TRANSPORTATION CO., North 400 Griggs-Midway Bldg., St. Paul, MN 55104, filed July 31, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Rockford, IL, over U.S. Hwy 20 to Junction Interstate Hwy 90, then over Interstate Hwy 90 to Junction Wisconsin Hwy 15, then over Wisconsin Hwy 15 to Milwaukee, WI, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Rockford, IL, over U.S. Hwy 20 to Chicago, IL, then over Illinois Hwy 21 to Junction U.S. Hwy 45, then over U.S. Hwy 45 to West Allis, WI, and return

over the same route. NOTE: A portion of this deviation is premised on a grant of temporary authority under Section 210(a)(b). If applicant's right to operate all or part of the leased authority expires, this deviation, if authorized, will likewise expire.

MC 35320 (Deviation No. 24), T.I.M.E.-DC, INC., P.O. Box 2550, Lubbock, TX 79408, filed June 29, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Paris, TN, over U.S. Hwy 79 to Clarksville, TN, then over U.S. Alternate Hwy 41 to Nashville, TN, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Paris, TN, over U.S. Hwy 79 to McKenzie, TN, then over Tennessee Hwy 22 to Huntingdon, TN, then over U.S. Hwy 70 to Nashville, TN, and return over the same route.

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's *General Rules of Practice* (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

California Docket No. 59000, filed July 17, 1979. Applicant: KERN VALLEY TRUCKING, 1272 Gossage Avenue, Petaluma, CA 94952. Representative: Martin J. Rosen, Michael S. Rubin, 256 Montgomery Street, San Francisco, CA 94104. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities*, except those pursuant to the authority herein granted, carrier shall not transport any shipments of: (1) used household goods, personal effects and office, store and institution furniture, fixtures and equipment not packed in

salesmen's hand sample cases, suitcases, overnight or boston bags, brief cases, hat boxes, valises, traveling bags, trunks, life vans, barrels, boxes, cartons, crates, cases, baskets, pails, kits, tubs, drums, bags (jute, cotton, burlap or gunny) or bundles (completely wrapped in jute, cotton, burlap, gunny, fibreboard, or straw matting); (2) automobiles, trucks and buses, viz.: new and used, finished or unfinished passenger automobiles (including jeeps), ambulances, hearses and taxis; freight automobiles, automobile chassis, trucks, truck chassis, truck trailers, trucks and trailers combined, buses and bus chassis; (3) livestock, viz.: barrows, boars, bulls, butcher hogs, calves, cattle, cows, dairy cattle, ewes, feeder pigs, gilts, goats, heifers, hogs, kids, lambs, oxen, pigs, rams (bucks), sheep, sheep camp outfits, sows, steers, stags, swine or wethers; (4) liquids, compressed gases, commodities in semi-plastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semitrailers or a combination of such highway vehicles; (5) commodities when transported in bulk in dump-type trucks or trailers or in hopper-type trucks or trailers; (6) commodities when transported in motor vehicles equipped for mechanical mixing in transit; (7) portland or similar cements, in bulk or packages, when loaded substantially to capacity of motor vehicle; (8) logs; (9) articles of extraordinary value; (10) commodities requiring the use of special refrigeration or temperature control in specially designed and constructed refrigerator equipment, via the following routes: 1. On and within 20 miles of the following named highways: (1) State Highway 1 between San Francisco and Carmel; (2) U.S. Highway 99 between its junction with Interstate Highway 5 near Roseville and its junction with Interstate Highway 5 near Red Bluff; (3) Interstate Highway 5 between Sacramento and Redding; (4) U.S. Highway 80 between Sacramento and Floriston; (5) State Highway 505 between Vacaville and Dunnigan; and 2. On and within 10 miles of the following named highways: (1) Interstate Highway 5 between Los Angeles and the California-Mexico Boundary Line, including points in the San Diego Territory, as described in Note below. (2) U.S. Highway 395 and interstate Highway 15 between the San Diego Territory, as described in Note below, and San Bernardino; (3) State Highway 101 between Los Angeles and Ventura; (4) Interstate Highway 10 between Los Angeles and Blythe; (5) U.S. Highway 101 between San Francisco and Salinas; (6) U.S. Highway

17 between San Francisco and Santa Cruz; (7) State Highway 156 between Castroville and Hollister; (8) State Highway 68 between State Highway 1 and Salinas; (9) State Highway 680 between Vallejo and San Jose; (10) Interstate Highway 780 between its junction with Interstate Highway 680 near Benicia and its junction with Interstate Highway 80 near Vallejo; (11) Interstate Highway 8 between the San Diego Territory, as described in Note below, and Winterhaven; (12) State Highway 86 between its junction with Interstate Highway 10 near Indio and its junction with Interstate Highway 8 near El Centro. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to California Public Utilities Commission, State Building, Civic Center, San Francisco, CA 94102, and should not be direct to the Interstate Commerce Commission.

Note.—San Diego Territory is defined as follows: Between points in California within an area bounded by a line beginning at the northerly junction of U.S. Highways Nos. 101-E and 101-W (4 miles north of LaJolla); thence easterly to Miramar on U.S. Highway No. 395; thence southeasterly to Lakeside on the El Cajon-Ramona Highway (State Highway No. 67); thence southerly to Bostonia on U.S. Highway No. 80; thence southeasterly to Jamul on State Highway No. 94; thence due south to the International Boundary Line, west to the Pacific Ocean and north along the coast to point of beginning, and serving points within 5 miles of the boundaries of the above described area.

Montana Docket No. T-4529, filed July 9, 1979. Applicant: DARRYL L. BARKER AND ROBERT L. BARKER, d.b.a. BARKER TRUCKING, 107 South 23rd Street, P.O. Box 31651, Billings, MT 59107. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *Dental, medical and surgical supplies and equipment*, between Billings & Bozeman, Glendive, Great Falls, Wolf Point, Choteau, Columbus, Glasgow, Deer Lodge, Lewistown, Conrad, Red Lodge, Plentywood, Hardin, Livingston, Big Timber, Baker, Jordan, Chester, Butte and Helena. Applicant desires to be able to transport shipments of this commodity having an immediate prior interstate haul by truck between these same points. Intrastate, interstate, and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to Montana Public Service Commission.

1227 11th Avenue, Helena, MT 59601, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T-1851, filed July 23, 1979. Applicant: P. J. GARVEY CARTING & STORAGE, INC., 465 Cornwall Avenue, Buffalo, NY 14215. Representative: James P. Burgio, Esq., 3350 Marine Midland Center, Buffalo, NY 14203. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities* between all points in Erie County and all points in Allegany County, Cattaraugus County, Genesee County, Niagara County, Orleans County, Wyoming County and Chautauqua County. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to Department of Transportation, 1220 Washington Ave., State Campus, Building #4, Room G-21, Albany, NY 12232, and should not be direct to the Interstate Commerce Commission.

Transportation of "Waste" Products for Reuse or Recycling

Special Certificate Letter Notice(s)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity for the transportation of "waste" products for reuse or recycling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in "Waste" Products, Ex Parte No. MC-85, 124 M.C.C. 583 (1976). Requests are processed as seeking authority between all points in the United States.

An original and one copy of protests (including protestant's complete argument and evidence) against applicant's participation may be filed with the Interstate Commerce Commission on or before September 10, 1979. A copy must also be served upon applicant or its representative. Protests against the applicant's participation will not operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence *within 30 days* of the date of its notice in the *Federal Register*, subject to its tariff publication effective date.

P-6-79 (special certificate—waste products), filed July 23, 1979. Applicant: FARLEY H. WILLIAMS, 503 Willow Lane, Bridgeport, WV. Representative: James D. Gray, Steptoe & Johnson, P.O. Box 2190, Clarksburg, WV 26301.

Sponsor: Anchor Hocking Corporation, of Clarksburg, WV, South Connelssville, PA, and Lancaster, OH. Commodity: Cullet.

P-7-79 (special certificate—waste products), filed July 20, 1979. Applicant: EARL W. NORRIS, 3654 Gertrude St., Omaha, NE 68107. Representative: Paul D. Kratz, Stern & Becker, P.C., Suite 810, 7171 Mercy Rd., Omaha, NE 68106. Sponsor: Midland Auto Creusher, Inc., Council Bluffs, IA. Commodity: Wrecker auto bodies.

By the Commission.

Agatha L. Mergenovich,
Secretary.

Released Value Rates

AGENCY: Interstate Commerce Commission.

ACTION: Notice. Released Rates Application No. MC 1503.

SUMMARY: Dependable Car Travel Service, Inc. seeks authority to amend Released Rates Order No. MC 630, as amended, to include additional operating authority, which was granted to the applicant in Docket No. MC 125978 (Sub-8 and Sub-9). The additional operating authority is in connection with single driveway service between points in MA, CT, RI, NY, NJ and PA. Also, between points in FL with certain restrictions. Also, in connection with truckaway service between New York, NY, on the one hand, and, on the other, points in Dade, Broward, and Palm Beach Counties, FL. The released rates authority is to apply on baggage, sporting equipment, and personal effects of owners of used passenger automobiles, when moving in such vehicles, in driveway or truckaway service.

ADDRESSES: Anyone seeking copies of this application should contact: Mr. Edward M. Alfano (or) Mr. John L. Alfano, Alfano & Alfano, P.C., 550 Mamaroneck Avenue, Harrison, NY 10528.

FOR FURTHER INFORMATION CONTACT: Mr. Harold Ward, Bureau of Traffic, Interstate Commerce Commission, Washington, D.C. 20423, Telephone: (202) 275-7447.

SUPPLEMENTARY INFORMATION: Relief is sought from 49 U.S.C. 10730, formerly Section 20(11) of the Interstate Commerce Act, to publish released

value rates in the tariffs of Dependable Car Travel Service, Inc.

Agatha L. Mergenovich,
Secretary.

Burlington Northern, Inc.—Merger—Spokane, Portland and Seattle Railway Co., Exemption Under 49 U.S.C. 10505 From 49 U.S.C. 11343-11347

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: The Interstate Commerce Commission exempts the merger of the Spokane, Portland and Seattle Railway Company into the Burlington Northern, Inc., from the requirements of 49 U.S.C. 11343-11347, which requires prior consideration and approval of the transaction by the Commission.

DATE: Effective August 21, 1979.

FOR FURTHER INFORMATION CONTACT: Michael Erenberg (202) 275-7546.

SUPPLEMENTARY INFORMATION:

Procedural Background

Burlington Northern, Inc. (BN) and the Spokane, Portland and Seattle Railway Company (SP&S) filed a petition for exemption under 49 U.S.C. 10505 on March 2, 1979, requesting that their proposed merger be exempted from the requirements of obtaining prior Commission approval under 49 U.S.C. 11343-11347. In response to this petition we published a notice in the *Federal Register* on May 21, 1979, 44 FR 29554 (1979) requesting comments on the proposed exemption. Comments in favor of the exemption were filed by the Southern Railway System (Southern) the Union Pacific Railroad Company (UP). No comments have been received opposing the proposed exemption.

The notice of proposed exemption set forth the facts in this proceeding. No comments have been filed controverting or otherwise questioning the facts presented in our notice. We will adopt the facts presented in the notice and refer to them as needed in our discussion. The notice is attached as an Appendix to this decision.

Rail Exemption Authority

BN seeks exemption of its merger with SP&S under 49 U.S.C. 10505. This section provides:

(a) In a matter related to a rail carrier providing transportation subject to the jurisdiction of the Interstate Commerce

Commission under this subchapter, the Commission shall exempt a person, class or persons, or a transaction or service because of the limited scope of the transaction or service, when the Commission finds that the application of a provision of this subtitle—

(1) is not necessary to carry out the transportation policy of section 10101 of this title;

(2) would be an unreasonable burden on a person, class of persons, or interstate or foreign commerce; and

(3) would serve little or no useful public purpose.

(b) The Commission may begin a proceeding under this section on its own initiative or on application by the Secretary of Transportation or an interested party. The Commission may specify the period of time during which the exemption is effective.

(c) The Commission may revoke an exemption, to the extent it specifies, when it finds that application of a provision of this subtitle to the person, class, or transportation is necessary—

(1) to carry out the transportation policy of section 10101 of this title;

(2) to achieve effective regulation by the Commission; and

(3) to serve a useful public purpose.

(d) The Commission may act under this section only after an opportunity for a proceeding.

This proposed exemption involves sections (a), (b), and (d).

The statutory requirements for exempting a transaction can be broken down into four parts: (1) whether the transaction is of a limited scope, (2) whether it is necessary to carry out the national transportation policy, (3) whether the provisions of 49 U.S.C. 11343-11347 would be an unreasonable burden on the BN and SP&S or interstate or foreign commerce, and (4) whether or not our application of 49 U.S.C. 11343-11347 would serve little or no useful public purpose.

Limited Scope

BN currently controls SP&S. BN also leases all of SP&S's assets, except for SP&S's franchise to be a corporation and corporate books and records. The proposed merger is solely within the corporate family and is actually a paper transaction. The merger is limited in scope since it is within a corporate family.

Additionally, the merger is of limited geographic scope. BN is a carrier with approximately 24,950 miles of lines in 19 States and two Canadian provinces. SP&S on the other hand is a non-operating, lessor railroad with

approximately 600 miles of track limited to the States of Oregon and Washington.

The transaction is also limited in scope because no employees are involved. SP&S has no rail employees. Its officers and directors are all employed by BN. Additionally BN employees conduct all operations over SP&S facilities.

Finally, the transaction is limited in scope as it affects competitors of BN and SP&S. BN has stated that there will be no change in operations, and that the only purposes of the merger are to avoid renewing a lease, fulfill the goals of *Great Northern Pac & B. Lines, Merger—Great Northern 331 I.C.C. 228 (1967) (The Northern Lines Merger)*, and to avoid the burden of complying with the *I.C.C. Railroad Acquisition, Control, Merger, Consolidation, Coordination Project, Trackage Rights, and Lease Procedures*, 49 C.F.R. Part 1111 (1978) (*Consolidation Procedures*). SP&S has no actual independent existence from BN as far as competition for freight traffic is concerned. There will be no change in rail competition resulting from the merger.

The exemption proposed by BN and SP&S is of a limited scope. It is limited to (1) a merger within a corporate family, (2) a geographic region, (3) no impact on employees, and (4) no effect on the competitive balance for freight traffic.

Since the proposed transaction is of a limited scope, we will now consider the other criteria.

Necessity to carry out the national transportation policy. The Transportation Policy of 49 U.S.C. 10101 is to provide impartial regulation of modes of transportation subject to subtitle IV. Impartial regulation is achieved through recognizing and preserving inherent advantage of each mode; promoting safe, adequate, economical, and efficient transportation; encouraging sound economic conditions in transportation, including sound economic condition among carriers; encouraging the establishment and maintenance of reasonable rates for transportation without unreasonable discrimination or unfair or destructive competitive practices; cooperating with each State and officials of each State on transportation matters; and encouraging fair wages and working conditions in the transportation industry.

The regulation of the BN and SP&S merger is not necessary to carry out the goals of the national transportation policy. It is a merger within a corporate family, and will not effect the considerations of the transportation policy since the elimination of a

corporate entity will be the only change resulting from the transaction.

Elimination of SP&S will only reduce duplicative reporting and bookkeeping. It will also simplify the corporate structure of BN. Commission regulation of this merger is not necessary to carry out the national transportation policy.

Unreasonable burden on a person. The Commission's *Consolidation Procedures* require a complete application to be filed so that a decision may be reached within the time constraints of 49 U.S.C. 11345. Compilation of all the material necessary to comply with the *Consolidation Procedures* is a time consuming task. Where there has been no public opposition to the proposal, the establishment of a massive record on which to base a decision would appear an unreasonable burden upon the BN and SP&S.

Southern points out the cost of filing an application with the Commission and maintaining SP&S's separate corporate existence are unreasonable in light of the fact that there is no compensatory advantage to BN, the Commission, shippers, or the public. UP points out that it strongly supports the use of the exemption when there will be an unreasonable burden on a carrier without any offsetting benefit to the public.

Requiring BN and SP&S to submit a complete application and then comply with the time requirements imposed by 49 U.S.C. 11345 would place an unreasonable burden on BN and SP&S. *Little or no useful public purpose.*

In determining whether or not to approve a merger, the Commission's function is to decide if it is within the public interest. In reaching this determination we rely upon the application submitted pursuant to the *Consolidation Procedures* and the comments of parties. Since we have provided the opportunity for comments on the proposal and no one has opposed it, we would rely upon the application to determine the public interest. As we have stated, the filing of an application under 49 U.S.C. 11343-11347 would be an unreasonable burden in this situation. Additionally, the Commission's review of the application would not be a beneficial use of public resources.

Southern points out that shippers and the public would not be able to reasonably object to the merger since service will be unaffected and no one connected with SP&S will suffer any injury. Southern also states that the merger appears to be a purely internal decision within the discretion of BN. UP

indicates its only concern with the proposed exemption is that the conditions imposed in the *Northern Lines Merger* remain in effect. There is no proposal before us to alter the conditions imposed in the *Northern Lines Merger*. The BN and SP&S merger will not alter those conditions.

Because this is a merger within a corporate family, involving merely a paper transaction, our review of it would serve little or no useful public purpose.

Conclusion

Our analysis leads us to conclude that the exemption of the merger between BN and SP&S from 49 U.S.C. section 11343-11347 meets the statutory requirements of 49 U.S.C. 10505. Congress itself has stated that "an exemption power in the Commission is very desirable". H.R. Rep. No. 94-499, p. 53 (1975). It has also stated that "the power to exempt from regulation in whole or in part will enable the Commission to commit its limited resources in areas where they are most needed, by enabling it to deregulate those areas which have no significant bearing on the overall regulatory scheme." *Id.* Congress also indicated that the exemption provision was consistent with the other provisions of the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. Law 94-210. H.R. Rep. No. 94-725, p. 75 (1975). In enacting 49 U.S.C. 10505, Congress clearly intended us to exempt specific limited transactions from our regulatory power. This is one such transaction.

Procedural Matter

Accompanying its petition for exemption, under 49 U.S.C. 10505, BN alternatively requested waiver of the Commission's Consolidation Procedures. We have held the decision on the proposed waiver in abeyance until a decision was made on the exemption. Since we have determined to grant the exemption, the waiver need not be considered, and will be dismissed.

We find: (1) The application of the requirements of 49 U.S.C. 1143-1147 to the merger of the Spokane, Portland and Seattle Railway Company into Burlington Northern, Inc., is of a limited scope and (a) is not necessary to carry out the transportation policy of section 10101, (b) would be an unreasonable burden on BN and SP&S, and (c) would serve little or no useful public purpose. (2) This decision is not a major Federal action significantly affecting energy consumption or the quality of the human environment.

It is ordered: (1) Burlington Northern, Inc., and the Spokane, Portland and Seattle Railway Company are exempted under 49 U.S.C. 10505 from the requirements of 49 U.S.C. 11343-11347 for the limited purpose of merging the SP&S into BN.

(2) If SP&S is merged in BN, BN shall, within 60 days of the merger submit three copies of a sworn statement showing all general entries required to record the transaction.

(3) The petition for waiver is dismissed.

(4) Public notice of our action shall be given to the general public by delivery of a copy of this decision to the Director, Federal Register, for publication therein.

(5) This exemption will continue in effect for 90 days from the effective date of this decision. BN and SP&S must consummate this merger during that time in order to take advantage of the exemption which we have granted.

(6) This decision shall be effective August 21, 1979.

Dated: August 8, 1979.

By the Commission, Chairman O'Neal, Commissioners Stafford, Gresham, Clapp, Christian, Trantum, and Gaskins. Commissioner Christian not participating. Agatha L. Mergenovich, Secretary.

BILLING CODE 7035-01-M

[Exemption No. 170]

Exemption Under Provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241

August 15, 1979

There is an emergency movement of military supplies from Crane, Indiana, to Leland, North Carolina. The originating carrier has insufficient system cars of suitable dimensions immediately available for loading with this traffic. Sufficient cars of other ownerships having suitable dimensions are available on the lines of the originating carrier and on its connections, and compliance with Car Service Rules 1 and 2 would prevent the timely assembly and use of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the Car Service Division of the Association of American Railroads is authorized to direct the movement to the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (Milwaukee), the railroads designated by the Car Service Division are authorized to move to, and the Milwaukee is authorized to accept, assemble, and load not to exceed 50 empty plain boxcars with military supplies from Crane, Indiana, to Leland, North Carolina, regardless of the provisions of Car Service Rules 1 and 2.

Effective August 3, 1979.

Expires August 31, 1979.

Interstate Commerce Commission.

BILLING CODE 7035-01-M

[Exception No. 11 to Rev. Service Order No. 1312]

Soo Line Railroad Co.

August 15, 1979.

Because of the inability of the railroad to assemble the cars, a movement of thirty-seven (37) loaded covered hopper cars will be seriously delayed on Soo Line Railroad Company enroute to Buffalo, New York, for unloading. General Mills desires to ship a sixty (60) car unit-grain-train of wheat to Buffalo, New York, routed Soo Line-ConRail. The consignee at Buffalo is badly in need of the wheat, but only 37 covered hoppers have arrived at Duluth. Section (a) of Revised Service Order No. 1312 authorizes any railroad which is unable to supply the number of covered hopper cars required by its tariffs to transport unit-grain-trains of fewer cars in accordance with the scale in Section (b).

Pursuant to the authority vested in the Director, Bureau of Operations, by section (h) of Revised Service Order No. 1312, Soo Line Railroad Company is authorized to operate a sixty (60) car unit-grain-train from Duluth, Minnesota,

to Buffalo, New York, comprised of sixty (60) railroad owned covered hoppers, on a one trip basis, with a minimum of 37 loaded cars operated in the first movement, and the remaining cars of the unit-train operated together in the final movement of this unit-grain-train. The total tariff minimum weight will be transported as required except if the railroad is unable to move all of the empty covered hoppers to the loading point on the final movement, the train can be reduced by the allowable number of cars or allowable weight percentage, as set forth in Section (b) of this Service Order.

This exception applies to railroad owned covered hopper cars.

The bills of lading and waybills shall bear the following endorsement: "Unit-grain-train of () tons or () cars. Partial movement of () tons or () cars forwarded authority Exception No. 11 to ICC Revised Service Order No. 1312. () tons or () cars to follow."

Demurrage rules will be treated as if each of the movements of the unit-train is a complete movement in itself.

Effective August 6, 1979.

Expires 11:59 p.m., August 10, 1979.

Issued at Washington, D.C., August 6, 1979.

Joel E. Burns,

Director.

PLACE: Room 1027 (open); room 1011 (closed); 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.
2. Docket 36126, Application of Tradewinds Airways Limited for an exemption to perform split-cargo charters between New York and London. (BIA, OGC)
3. Dockets 32851, 30373, 32161, 30777, 33159, and 35732; Staff-initiated review of pricing freedom and the intercarrier agreements affecting marketing via travel agencies. (BDA)
4. Docket 29198, *Alaska Fares Investigation*—Draft Order and Notice of Proposed Rulemaking. (OGC)
5. Docket 30790, *United States-Benelux Low-Fare Route Proceeding*. Opinion and Order. (Memo No. 9052, OGC)
6. Docket 31574, *California-Nevada Low-Fare route Investigation*, Order on Reconsideration. (Memo No. 7433-H, OGC)
7. Docket 35883, Application of Command Airways, Inc. for an exemption to permit it to suspend service at Pittsfield, Massachusetts, on less than the 90 days' notice required by Section 37(c) of the Airline Deregulation Act. (Memo No. 9051, BDA)
8. Docket 36244, Pioneer's 30-day notice of intent to suspend service at McCook, Kearney, Hastings, and Columbus, Nebraska. (BDA, OCCR, OC, OGC, BALJ, BIA)
9. Docket 34591, Essential Air Service at Hot Springs, VA (BDA, OCCR)
10. Docket 35734, USAir's notice to terminate all service at White Plains, N.Y., and the petition of various New York parties to prohibit USAir from terminating service as proposed until a replacement carrier is found. (BDA, OCCR)
11. Dockets 35464 and 34650; Final guidelines and procedures for essential air service determinations. (OGC, BDA)
12. Docket 34965, Direct marketing of charters by air carriers. (OGC, BDA)
13. Docket 35662, Direct sale of charter air transportation. Update report to Congress. (OGC)
14. Docket 31788, Split all-cargo and split passenger/cargo charters. (OGC, BDA, BIA)
15. Dockets 35708, 34753, 34604, 35900, 35903, 35905, 35907, 35910, 35916, 35921, and 35923; *Philadelphia-Pittsburgh Show-Cause Proceeding*. (BDA)
16. Dockets 35155, 35444, 35481, 35682, 35692, and 35833; Applications of TWA, US Air (Allegheny), Northwest, Ozark, Airwest, and United for Minneapolis-Denver authority. (Memo No. 9050, BDA)
17. Dockets 35932, 35998, 36127, and 36178; Applications of Air California, Airwest, USAir, and Western for Portland-San Jose/Sacramento/San Francisco/Oakland/Reno Authority. (BDA, BALJ, OGC)
18. Dockets 35851, 36032, 36023, 36039, 36029, 36026, 36034, 36046, 34990, 36055, and 36042; *Philadelphia-California-Nevada Show-Cause Proceeding*. U.S. Air, Continental, Eastern, Frontier, Western, Northwest, National, Texas International, Republic, and American. (Memo No. 8902-A, BDA)
19. Dockets 35659, 35861, 35857, and 35865; *Norfolk-Washington Show Cause Proceeding*. (Memo No. 8812-A, BDA)
20. Dockets 32705 and 34564; Application of Popular Latin Travel Agency, Inc., for reexamination of ATC agreements on declaration of travel agent default by individual carriers and liability for lost or stolen tickets; ATC agreements amending rules on default declaration by individual carriers. (Memo No. 8209-A, BDA, OGC, BCP)
21. Dockets 32497, Application of Wright Airlines, et al., for approval of control and interlocking relationships under sections 408 and 409 of the Act. (Memo No. 8938-A, BDA)
22. Discussion on IATA Show Cause Proceeding. (BDA, BIA)

STATUS: Open (items 1-21), closed (item 22).

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, (202) 673-5068.

SUPPLEMENTAL INFORMATION: Public disclosures, particularly to foreign governments, of opinions, evaluations, and strategies relating to the issues could seriously compromise the ability of the United States Delegation to achieve agreements which would be in the best interests of the United States. Accordingly, the following Members have voted that the meeting on this

Federal Register

Vol. 44, No. 163

Tuesday, August 21, 1979

subject would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action within the meaning of the exemption provided under 5 U.S.C. 552(c)(9)(B) and 14 CFR Section 310b.5(9)(B) and that the meeting will be closed:

Chairman, Marvin S. Cohen, Member, Richard J. O'Melia, Member, Gloria Schaffer

Persons Expected To Attend

Board Members.—Chairman, Marvin S. Cohen; Member, Richard J. O'Melia; Member, Elizabeth E. Bailey; and Member, Gloria Schaffer.

Assistants to Board Members.—Mr. David Kirstein, Mr. James L. Deegan, Mr. Richard H. Klem, and Mr. Steven H. Lachter.

Managing Director.—Mr. Cressworth Lander.

Executive Assistant to the Managing Director.—Mr. John R. Hancock.

Office of the General Counsel.—Mr. Philip J. Bakes, Jr. and Mr. Gary J. Edles.

Bureau of International Aviation.—Mr. Sanford Rederer, Mr. Rosario J. Scibilia, Mr. Jerry Nelson, Mr. Ivars V. Mellups, Mr. Richard M. Loughlin, Mr. Regis P. Milan, Ms. Patricia A. Depuy, Mr. Herbert P. Aswall, Mr. Donald Litton, Mr. Francis S. Murphy, and Ms. Mary L. Pett.

Office of the General Director.—Mr. Michael E. Levine.

Bureau of Domestic Aviation.—Ms. Barbara A. Clark, Mr. Paul L. Gretch, Mr. Steven Baron, Mr. Paul Karlsson, and Mr. Charles McNagny.

Part II

Department of Housing and Urban Development

Office of the Assistant Secretary for
Housing—Federal Housing Commissioner

General Prototype Costs for One-to-Four
Family Dwelling Units

**DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENT**

Office of the Assistant Secretary for
Housing—Federal Housing
Commissioner

[Docket No. N-79-942]

**General Prototype Housing Costs for
One-to-Four Family Dwelling Units**

AGENCY: Office of the Assistant
Secretary for Housing—Federal Housing
Commissioner/Department of Housing
and Urban Development.

ACTION: Notice.

SUMMARY: This Notice sets forth general
prototype costs for one-to-four family
dwelling units for each market area of
the country. The costs cover a broad
range of housing and are intended to
provide guidance and assistance to the
public pursuant to Section 904 of the
Housing and Community Development
Act of 1977.

DATE: These prototype costs will be
effective from publication until
publication of new cost figures in 1980.

FOR FURTHER INFORMATION CONTACT:
William L. Halpern, Director, Single
Family Development Division, Office of
Single Family Housing, Department of
Housing and Urban Development,
Washington, D.C. 20410, telephone (202)
755-6720.

SUPPLEMENTARY INFORMATION: Section
904 of the Housing and Community
Development Act of 1977 requires HUD,
starting in calendar year 1979, to publish
prototype housing costs for a broad
variety of one-to-four family housing in
each market area. These particular
prototype figures serve merely as an aid
to the general public and are not
applicable to prototype determinations
required for public housing under the
United States Housing Act of 1937. The
costs for land and site improvements are
included in the Section 904 prototype
cost figures.

In order to cover various economic
situations, prototype costs are divided
into three cost ranges: low, moderate
and high. The information sources for
developing the figures include data from
HUD field offices, the public, and the
basic Section 203(b) mortgage insurance
program. The prototype costs are
representative sales prices.

Due to the lack of information on two,
three, and four-family dwelling units,
generally costs shown are for one-family
dwellings. The prototype costs have
been developed showing a low, medium
and high range of costs in each market

area. The market areas, as designated,
are the Base and Key Localities used in
HUD's determination of Locality
Adjustment Percentages for Single
Family cost processing and cover both
the urban and rural areas of each
market area. Every Field Office has
maps of these designated areas. The
typical low range, one-family dwelling
will contain three bedrooms and one full
bath. The medium range one-family
dwelling will contain three or four
bedrooms and two full baths. The high
range one-family dwelling will contain

three to five bedrooms and two or three
full baths.

The figures shown below the cost
range designations are the typical
square-foot areas of a one-family
dwelling in the captioned market areas.

(Sec. 7(d), Department of HUD Act (42 U.S.C.
3535(d); sec. 904, Housing and Community
Development Act of 1977 (42 U.S.C. 354))

Issued at Washington, D.C., on August 6,
1979.

Lawrence B. Simons,
Assistant Secretary for Housing—Federal
Housing Commissioner.

Part III

**Civil Aeronautics
Board**

Removal of Certificate Restrictions

CIVIL AERONAUTICS BOARD

14 CFR Part 203

[Regulation ER-1139; Docket 34291]

Removal of Certificate Restrictions

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

AGENCY: Civil Aeronautics Board.

ACTION: Issuance of New Part.

SUMMARY: The CAB is establishing a program for the gradual elimination of almost all operating market restrictions included in air carrier certificates for domestic flights, except for those wholly within Alaska or Hawaii. After the first stage, the restrictions will be removed at 6-month intervals, concluding by December 31, 1980.

DATES: Effective: August 21, 1979, Adopted: August 15, 1979.

FOR FURTHER INFORMATION CONTACT: Roy Pulsifer, Associate Director, Licensing Programs and Policy Development, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 673-5448.

SUPPLEMENTARY INFORMATION: In ERD-379 (44 FR 30104, May 24, 1979) the Board proposed a phased elimination of virtually all domestic operating restrictions attached to air carrier certificates, except for restrictions in intra-Alaska and intra-Hawaii markets. The proposal was to rewrite certificates in a new format, and remove operating restrictions, beginning with the smallest markets, in five steps starting on August 1, 1979, and ending on June 30, 1981.

This program is based on the policy of the Board and Congress to promote competition, and to allow economic efficiency, rather than government regulation, to guide carriers' service option decisions. The route realignment program, which was begun in 1970, has largely eliminated stop and long-haul restrictions in smaller markets. Larger markets, however, remain highly restricted, except for those carriers authorized to provide nonstop service. The phased program adopted in this rule eliminates restrictions in the larger markets, thus leading to more competition and greater reliance on market demand. These forces can meet the air transportation needs within the United States better than can Board regulatory decisions.

Comments were filed USAir (Allegheny) Airlines, American Airlines, Delta Air Lines, Pacific Southwest Airlines, Piedmont Aviation, Republic Airlines, United, Western, the Dallas/Fort Worth Parties, the State of Hawaii and the State of Maryland. After careful analysis of these comments, and in view of the Congressional mandate expressed in the Airline Deregulation Act of 1978 (P.L. 95-504), the Board has decided, for the above reasons and for those stated in EDR-379, to eliminate operating restrictions for domestic flights as set forth in the proposed rule, with one modification.

Several commenters asked for clarification of certain terms of the rule. USAir and United requested that the Board make clear that the "operating restrictions" to be removed include stops that result from segment junction points, as well as those included as specific conditions in the carriers' certificates. Since this is our intent, we are revising the rule to state specifically that the restrictions to be lifted include both those contained as conditions and those that are the result of joining segments or routes.

USAir also requested that all restrictions in minor markets be lifted in phase one of the program, regardless of the fact that restricted authority in some minor markets was given to the carrier in recent awards. The Board intends to do this to the extent that it is administratively possible. The revised certificates issued in phase one of the program reflect all authority that has been granted through June 15, 1979, and restrictions on all markets in these certificates have been lifted or revised in accordance with the rule. We will then update the certificates in each succeeding phase.

United also requested that all restrictions in minor and monopoly markets identified in the Northwest, United, and TWA realignment applications, for which a show cause order has been issued, be lifted whether or not they qualify under this rule. The action taken to realign these carriers' routes has already granted them unrestricted nonstop authority in these markets (See Dockets 29449, 28755, 30909; Orders 79-6-180, 79-7-69, 79-7-179). Since the realignments were completed after June 15, 1979, however, some of this authority may not be shown

in the certificates issued in phase one of the restriction removal program. The carriers do have the authority granted in those cases, and it will be included in the revised certificates issued in phase two of the program.

Western argued that the proposed new certificate format is unclear and can be improved by the use of a matrix to show restrictions on various markets. We have reviewed the format. We find that our proposed certificate format will clearly and correctly show all present authority, and correctly incorporate new authority, without the need to design a matrix system. The revised certificates have one linear segment, and for simplicity, differ from present certificates only in that points on a carrier's route and restricted markets are listed in alphabetical order. Certificates can thus be easily revised at each phase of the program to incorporate all new authority gained since the certificates were last issued. This type of format will make clear that between the time of issuing new certificates, authority granted to new points will be treated as new segments and require a stop at a segment junction point. This procedure for handling new authority granted between the issuance of new certificates conforms to present Board practice. We believe that this type of linear format is better than a matrix system to accomplish the program's goals in a clear and concise manner.

Western also requested Board clarification as to whether the program applies to all domestic markets except for those being wholly within the States of Alaska and Hawaii. We have revised the rule to show more clearly that this is our intent.

Some commenters requested more substantive changes in the rule. USAir requested that authority to new points reflect, at the time of granting authority to serve such new points, changes involving markets that have been unrestricted in previous phases of the program. Since the first phase of the program will contain a complete list of restricted markets, USAir sees no reason not to grant nonstop rights in these additional markets at the time of the new award. While there is some merit in this proposal, we find that its potential disadvantages outweigh its limited advantages. If adopted, carriers would gain nonstop authority in a

limited number of markets involving new points only up to 6 months ahead of the dates in subsequent phases of the program. For this reason, we see USAir's request as having only limited advantage to the carriers. Finally, the administrative procedures that would have to be developed for this change would delay implementing the entire program. Conferring the authority sought by USAir would include all markets in a carrier's system in each show cause application.

Delta and United requested that the timetable for removing restrictions be changed so that the program would be completed before June 30, 1981, as was proposed. USAir, Republic, and Piedmont opposed such a change. The carriers in favor of the speed-up in removing restrictions claimed that the date for completing the program, 6 months before the Board loses its jurisdiction over route entry under the Airline Deregulation Act, is unnecessarily prolonged, and that such an extended timetable is inconsistent with the procompetitive policies and procedures of the Act. Further, they argued that, if the Board continues its liberal policy of granting multi-carrier authority in major markets, there is no valid reason to delay the lifting of market restrictions.

Carriers opposed to the speed-up in the program claimed that such a change in dates for lifting restrictions would be contrary to the desires of Congress for a "gradual and phased transition to a deregulated system" (H. Rep. 95-1779, p. 56). Further, they see the small carriers being put at an economic disadvantage if such a change is made, since they do not have the financial resources or equipment to exploit such massive amounts of new authority.

We have decided to shorten the transition period so that the last phase of the program will occur on December 31, 1980. Since enactment of the Deregulation Act, the Board has been liberal in granting improved, less restricted authority. In addition, markets with dormant authority are open to new carriers, and new authority is available by automatic entry on January 1, 1980, and January 1, 1981, under sections 401(d)(5) and 401(d)(7) of the Act, respectively. We agree with Delta and United that a shorter, yet still phased, transition period would further both Board and Congressional policy toward

freer entry and a gradually decreasing regulatory restriction on market supply and demand in passenger air transportation. By ending the transition to unrestricted market operations 6 months earlier than proposed, we will also have a longer period to evaluate operations in an unrestricted environment before all of our entry and route authority is ended on December 31, 1981. Step five of the proposed rule has thus been eliminated so that all stop restrictions are lifted by December 31, 1980. We are also modifying accordingly the percentage of markets in which restrictions are lifted in the other steps to 25 percent in step two, 35 percent in step three, and 40 percent in step four.

The State of Hawaii requested that Hilo not be removed as an intermediate point in carrier certificates. This was not proposed in the rule, and Hilo is still listed as an intermediate point in the certificates of all carriers that have authority to serve that point.

United claimed that the proposal to replace restrictions prohibiting single-plane service with one-stop restrictions is unnecessary since the former were declared null and void by the Airline Deregulation Act of 1978. It claimed that section 401(e)(7)(A) of the Act lifts all closed door restrictions, and single-plane restrictions fall within this category. As stated in detail in our order completing United's realignment (Order 79-7-69, July 12, 1979), we are not convinced by this argument. We are therefore continuing to replace single-plane restrictions in the manner that was proposed in EDR-379.

Western commented that since the Airline Deregulation Act in section 406(b) has prevented use of revenues from non-subsidized operations in determining a carrier's need for subsidy until after January 1, 1983, throughout the period during which this rule will be in effect, proposed § 203.7 is "surplusage." That section declares any nonstop authority granted under the part in markets of more than 20 passengers daily to be category II subsidy ineligible under section 406. Western is correct in its interpretation of the Deregulation Act. However, after this period, revenue-sharing will be applicable, thus there is a need for the guideline in § 203.7 to label the authority for future subsidy determinations in these markets.

In the proposed rule we stated that we

intended to treat hyphenated points as individual points in determining when they will become unrestricted. Western did not oppose such a handling of hyphenated points, but argued that section 401(g) of the Act requires that before the Board can alter, amend or modify any certificate, it must first either grant a hearing on the matter or handle it under section 401(p) of the Act by using the expedited procedures of Subpart Q of the Board's Rules of Practice (14 CFR Part 302). We are no more compelled to refrain from handling hyphenated points as individual points in this rule than we are to refrain from lifting stop and long-haul restrictions. The basic certificate authority for the carrier is not being changed; only the restrictions on service to a particular market are being removed. Since we are only eliminating hyphenation of points where different airports serve separate communities, and separately listing them, we are not altering certificate authority. The carriers should be alert to the fact that listing hyphenated points individually does open them up to being treated as dormant markets, and also that carriers providing service to these points may have to file section 401(j) applications if they eliminate service that they now provide.

The State of Maryland requested that Baltimore-Washington International airport (BWI) be included in certificates containing Washington, D.C., authority if individual airports are designated. This proceeding does not contemplate designating new airport authority; such authority may be requested through expedited certificate procedures. However, we have decided to designate service at BWI as service to Baltimore, Md./Washington, D.C. to be served through BWI, in accordance with current practice. The State also requested a change in the Board's policy to interpret section 401(d)(5), concerning dormant authority, to refer to individual airports instead of points. The Board has already decided against such an interpretation in another case, since this would contradict the Board's traditional rules of certificate construction and the apparent intention of Congress in drafting the unused authority provisions (see Order 78-11-41, issued November 9, 1978).

American and the Dallas/Fort Worth parties opposed the inclusion of Love Field as an alternate airport to Dallas/Fort Worth Regional Airport for flights

serving the Dallas/Fort Worth area. They stated that this issue is already under consideration in current proceedings, the *Dallas/Fort Worth-Florida Service Investigation*, (Docket 32711), the *Southwest Airlines Co. Automatic Entry Case*, (Docket 34582), and the *Chicago-Midway Expanded Service Proceeding*, (Docket 33019). For this reason, we are not including Love Field as an alternate point for service to the Dallas/Fort Worth area.

For the reason stated in EDR-379 (pp. 7-8), we are affirming our tentative conclusion that the first phase of the restriction removal program does not constitute a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*), or a major regulatory action requiring an energy statement under the Energy Policy and Conservation Act (24 U.S.C. 6201, *et seq.*). This first phase of the program is designed to increase scheduling flexibility and equipment utilization, thereby resulting in more opportunities for reduction in fuel consumption, air pollution and ambient noise levels. The overall net environmental impact of this phase should be favorable. Also, by enabling carriers more management flexibility in responding to the flow of supply and demand in their service options, the removal of multi-stop and on-line connecting requirements should lead to more efficient use of fuel.

As stated in the *Improved Authority to Wichita Case*, Order 78-12-106, December 14, 1978 (p. 13), the Board is preparing a draft environmental impact statement (see notice of preparation at 43 FR 59864, December 22, 1978) to consider the consequences of our general regulatory policy of essentially open entry. This draft statement will cover the environmental issues contained in subsequent phases of the restriction removal program. If a final impact statement has not been issued before subsequent phases take effect, or if it appears that a general free entry policy will have a significant adverse environmental impact, the Board will consider the specific impact, if any, of each phase of the program before it is implemented.

By OR-155, issued simultaneously, the Board is delegating authority to the Director, Bureau of Domestic Aviation (formerly the Bureau of Pricing and Domestic Aviation) to issue revised certificates at each step of the program.

Initially, revised certificates will be issued only for trunkline and local service carriers; certificates for other

carriers will be issued shortly. We will include in this docket a list of all minor and monopoly markets where restrictions are being lifted.

The Board is making this rule effective immediately. The program is relieving a substantial number of operating restrictions on carriers of all classes. To delay the effectiveness of this rule would prolong the burden and operating inefficiencies of the present system, and would unnecessarily deprive the domestic air traveler of the benefits of such deregulation. It is therefore found, for good cause, that making this final rule effective upon publication in the *Federal Register* is in the public interest.

For the reasons discussed above the Board amends 14 CFR Chapter II by adding a new Part 203 to read as follows:

PART 203—REMOVAL OF CERTIFICATE RESTRICTIONS

Sec.

203.1 Scope.

203.2 Applicability.

203.3 Timetable for automatic removal of restrictions.

203.4 Issuance of revised certificate.

203.5 Individual air carrier applications.

203.6 Effective date for new authority.

203.7 Subsidy ineligibility.

203.8 Sunset provision.

Authority.—Sec. 102, 204, 401 of the Federal Aviation Act of 1958, as amended, 72 Stat. 740, 743, 92 Stat. 1710, 49 U.S.C. 1302, 1324, 1371.

§ 203.1 Scope.

This part establishes a procedure for the gradual elimination of operating restrictions in the certificates of air carriers for domestic scheduled service flights, except for those for markets wholly within Alaska and Hawaii, by December 31, 1980.

§ 203.2 Applicability.

The procedures in this part apply to all air carrier certificates under section 401 of the Act, and to any operating restrictions attached to a certificate authorizing flights between points within the United States, except for those wholly within Alaska or Hawaii.

§ 203.3 Timetable for automatic removal of restrictions.

Effective on the dates indicated in this section, the Board removes the restrictions contained in certificates of public convenience and necessity granted to air carriers under section 401 of the Act.

(a) On August 21, 1979:

(1) All operating restrictions attached to air carrier certificates imposing a

long-haul requirement shall cease to be in effect.

(2) All operating restrictions precluding single-plane service or specifying more than one stop on a route, or a required stop at a segment junction point, shall be changed to specify only one stop.

(3) All operating restrictions specifying one stop in minor markets that enplane not more than 7,300 origin/destination and connecting passengers each year, and in monopoly markets, shall cease to be in effect:

(b) On December 31, 1979, all operating restrictions attached to certificates for the following markets shall cease to be in effect: The smallest 25 percent of the markets listed in Appendix A, from Fresno-Sacramento (p. 18), to Harrisburg/York-Washington, D.C. (p. 24), inclusive.

(c) On June 30, 1980, all operating restrictions attached to certificates for the following markets shall cease to be in effect. The next smallest 35 percent of markets listed in Appendix A, from Houston-Jacksonville (p. 10), to Keene-New York (p. 18), inclusive.

(d) On December 31, 1980, all remaining one-stop operating restrictions attached to certificates shall cease to be in effect.

(e) Restrictions contained in any new market authority shall be removed in the phase that includes markets of equivalent size, except that where the date for removing restrictions in that market is already past, any such restrictions will be removed in the phase following the award of new authority.

§ 203.4 Issuance of revised certificate.

At each stage specified in § 203.3, the Board will issue a revised certificate reflecting any changes in an air carrier's authority, and listing authorized points and any remaining restricted markets in alphabetical order. Revised certificates shall be issued first to trunkline and local service carriers, and then to other air carriers. Delay in issuance of a revised certificate, however, shall not affect the removal of restrictions under § 203.3.

§ 203.5 Individual air carrier applications.

Nothing in this part limits the right of an air carrier at any time to file an application for removal of any term, condition, or limitation in an individual market or of any single restrictions. Procedures for the filing of such applications and answers shall be governed by Subpart Q of Part 302 of this chapter, unless the application is accompanied by a petition for show-cause procedures or a motion to

consolidate with an application accompanied by such a petition.

§ 203.6 Effective date of new authority.

For purposes of determining the start of a period of unused authority under section 401(d)(5) of the Act, any new authority received by an air carrier under this part shall be effective on the date the restriction is removed under § 203.3 or by order of the Board under § 203.5.

§ 203.7 Subsidy ineligibility.

Any nonstop authority given an air carrier under this part for markets with more than 20 passengers enplaned each day shall be considered Category II subsidy-ineligible under section 406 of the Act.

§ 203.8 Sunset provision.

This part shall cease to be in effect on January 1, 1982, unless the Board takes further action.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

Part IV

**Department of the
Interior**

Fish and Wildlife Service

**Listing of Grevy's Zebra and Hartmann's
Mountain Zebra as Threatened Species;
Final Rule**

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Listing of Grevy's Zebra and Hartmann's Mountain Zebra as Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: Pursuant to the Endangered Species Act of 1973, as amended, the Service determines that Grevy's zebra (*Equus grevyi*) and Hartmann's mountain zebra (*Equus zebra hartmannae*) are Threatened species. Both of these species were originally proposed for listing as Endangered, but data received during the comment period of the proposal indicate that a Threatened listing is more appropriate. This rule will provide needed protection for both Grevy's zebra and Hartmann's mountain zebra and will contribute to their continued survival and recovery in the wild.

DATES: This rule will become effective on September 20, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Harold J. O'Connor, Acting Associate Director, Federal Assistance, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202/343-4646.

SUPPLEMENTARY INFORMATION:

Background

Grevy's zebra is distributed in northern Kenya; it formerly occurred in southern Ethiopia and Somalia, but is probably extirpated there at the present time. It is the largest of the zebras and because of some structural and behavioral differences from other zebras, it is placed in a separate subgenus (*Dolichohippus*).

The Cape Mountain zebra (*Equus zebra zebra*) is already on the Endangered list. The present rulemaking therefore deals only with the other subspecies of this species, Hartmann's mountain zebra (*E. z. hartmannae*). Hartmann's mountain zebra lives in the mountainous escarpment zone which forms the eastern boundary of the Namib Desert. Its range formerly extended north into Angola and south to Namaqualand, Cape Province, South Africa.

On December 23, 1977, the Service published a proposed rulemaking in the Federal Register (42 FR 64382) to list

Grevy's zebra and Hartmann's mountain zebra as Endangered species under the Endangered Species Act of 1973. Since that proposal, the Endangered Species Act Amendments of 1978 have been enacted. The amendments did not effect the status of the proposal and the Service is now proceeding with a final rulemaking relative to these two species. This final rulemaking determines Hartmann's mountain zebra and Grevy's zebra to be Threatened rather than Endangered. The reason for this change is that new data, obtained during the comment period of the proposal, have shown that neither species is in danger of extinction throughout all or a significant portion of its range as was believed at the time of the proposal. The decrease in the known magnitude of the threat to these species is discussed in detail later in this rulemaking in the section titled "Summary of Factors Affecting the Species". The Service is permitting importation and other activities involving Grevy's zebra (parts, products or live animals) only under the provisions of 50 CFR 17.32, i.e., under a permit for scientific purposes, or the enhancement or propagation or survival, economic hardship, zoological exhibition, educational purposes, or special purposes consistent with the purposes of the Act. It should be noted that since Grevy's zebra is listed in Appendix I to the Convention on International Trade in Endangered Species of Wild Fauna and Flora there can be no importation of sport-hunting trophies.

With the Hartmann's mountain zebra, the Service is likewise requiring permits under 50 CFR 17.32. However, because the Hartmann's zebra is listed in Appendix II to the Convention, legally-taken, sport hunting trophies of this species may be imported. Importation of trophies must be consistent with the Act, including the provisions of Section 9(c)(2) and the definition of conservation, 16 U.S.C. 1532(3), 1538(c)(2). The Service is willing to allow the importation of legally taken sport hunting trophies because it is convinced that to do otherwise would be detrimental to the survival of the species. Hartmann's mountain zebra occurs over vast areas of privately owned ranches. On these private ranches, the zebras compete directly with the rancher's cattle and sheep. Comments received from knowledgeable individuals emphasize that almost without exception these ranchers would not permit the zebras to exist on their property if they could not derive a profit from their presence by permitting sportsmen to hunt them. These ranchers

have allowed the zebras to survive and breed on their property in order to provide a trophy for visiting sport hunters. One correspondent relates that the sportman boards with the rancher, is usually guided by the rancher, pays the rancher a daily fee, and also pays the rancher a substantial fee for each animal taken. This revenue makes up an important part of the rancher's income, and the survival of the zebra in South West Africa/Namibia may very well depend upon the ranchers maintaining this income. It should be emphasized that the South West African/Namibian government strictly controls the hunts on the private ranches and will issue permits for a hunt only if a rancher demonstrates excessive populations that are damaging his property.

Summary of Comments

A total of 21 letters and telegrams was received in response to the December 23, 1977, Proposed Rulemaking. Of these responses, 10 supported a listing as proposed, and the remainder recommended modifications to the proposal. Organizations that wholly supported the proposal were: African Equids Group, International Union for the Conservation of Nature and Natural Resources' Survival Service Commission; Elsa Wildlife Animal Appeal, North Hollywood, California; American Association of Zoological Parks and Aquariums; National Health and Human Services, Inc., Las Vegas, Nevada; and Ecology Center of Southern California, Los Angeles, California. Five individuals also supported the proposal.

Three organizations generally supported the proposal (Catskill Game Farm, Inc.; Mount Kenya Game Ranch, Nanyuki, Kenya; and Riverbanks Zoological Park, Columbia, South Carolina), but felt that some sort of measures should be adopted to ease restrictions on captive stocks so that captive propagation could be facilitated. Such measures have been adopted in the present rulemaking.

Four letters from two individuals and one organization (Basie Maartens Safari, Windhoek, South West Africa/Namibia) had reservations about Hartmann's mountain zebra while approving of, or not mentioning, the Grevy's zebra proposal. Basically the reservations on Hartmann's mountain zebra concerned the fact that the population of these species has remained stable since 1968, and that it is totally protected in game reserves covering large regions. In areas where Hartmann's mountain zebra occurs on private lands, the animals cause damage to fences and crops, and are generally unwanted. Ranchers,

however, tolerate and breed the zebras because government regulated hunting brings them revenue. The three respondents to the proposal expressed grave concern that a ban on import of sport-hunted trophies into the United States would remove this economic value and would lead the ranchers to destroy zebras on sight. This possible repercussion is addressed in the present rulemaking.

Safari Club International, in a letter dated February 14, 1978, endorsed the proposal to list Grevy's zebra as Endangered, but did not agree with the proposal on Hartmann's mountain zebra. This organization claimed that listing this zebra as Endangered would remove the primary incentive for conserving the animals by eliminating economic benefits to the ranchers of sport hunting. It further questioned the population estimates for this species used in our proposal; this has been corrected in the present rulemaking.

In a letter dated March 7, 1978, Safari Club International contacted the Service again and reported that new information had become available to it which indicated that the population of Grevy's zebra might be as high as 20,000 animals, and therefore, a Threatened rather than Endangered status might be more appropriate for the species. The Service has now obtained this new information from Kenya and it is discussed in detail below and in the "Summary of Factors Affecting the Species" section of this rulemaking.

The Service, at the time of the proposed rulemaking, contacted the countries in which these zebras are resident, and requested any data, views or comments on the proposed listing; only the Government of Kenya responded. That Government reported that it put the population of Grevy's zebra at 14,000 animals which indicated considerable potential for the species' conservation. However, Kenya cautioned that the rate of decline of this zebra over the past seven years is sufficient to demand strong conservation action; it recommended Endangered status for Grevy's zebra. The Service, however, is listing the species as Threatened for reasons outlined elsewhere in this rulemaking.

Only a single letter was received which was entirely negative to the proposed rulemaking. This letter, however, contained no data or pertinent comments and is not considered further in this rulemaking.

Section 4(a) of the Act states: "General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a

threatened species because of any of the following factors:

- (1) The present or threatened destruction, modification or curtailment of its habitat or range;
- (2) Overutilization for commercial, sporting, scientific or educational purposes;
- (3) Disease or predation;
- (4) The inadequacy of existing regulatory mechanisms; or
- (5) Other natural or manmade factors affecting its continued existence."

This authority has been delegated to the Director.

Summary of Factors Affecting the Species

Grevy's Zebra

With the Grevy's zebra, factors (2) and (4) above are operational, but the threat to the species is not as great as had been believed at the time of the proposal. The major factors that have moved the Service to designate this species as Threatened rather than Endangered are new and more accurate census data, and recent moves on the part of Kenya to conserve its game animals.

When the Service proposed Grevy's zebra as Endangered, it was believed that the species had been reduced through legal and illegal hunting for hides to less than 1,500 animals (Thornback and Burton, New Scientist, July 28, 1977). This estimate, however, was based on only minimal information. Recently, through a survey by the Kenya Rangeland Ecological Monitoring Unit (Aerial Survey Technical Report Series No. 4, February, 1978), it has been shown that the numbers of these zebras are actually in the neighborhood of some 13,718 individuals scattered thinly throughout the northeastern third of the country. This new and more accurate figure indicates considerable potential for the species' conservation. The Kenya Minister for Tourism and Wildlife, however, points out, in a February 28, 1978, press release, that while the number of Grevy's zebra is far greater than had been believed, there is still need for urgent action. He states that the Kenya Wildlife Planning Unit was able to show through a comparison of past and present figures from Samburu District, a key part of the Grevy's range, that the species had declined from 7000 in 1976 to 2,500 in 1977. The Kenya Minister of Tourism and Wildlife further states that: "While the remaining numbers give greater scope for conserving the species than was realized, there is little time left".

The second factor that leads the Service to believe that Grevy's zebra is Threatened rather than Endangered is that Kenya, now conscious of the plight of the species, is determined to institute conservation measures, and has banned sport hunting since May of 1977. One of the major purposes of this rulemaking is to provide assistance to Kenya in conserving the Grevy's zebra by assuring that illegally taken hides and other zebra products do not find a market in the United States.

Hartmann's Mountain Zebra

With regard to Hartmann's mountain zebra, the Service incorrectly cited Joubert (Modoqua, ser. 1, No. 7, p. 5, 1973) as stating that there were only 2000 animals in South West Africa/Namibia; actually, Joubert gave a population estimate of 7,000 as of 1967. The South West African/Namibian Director of Nature Conservation and Tourism (Communication dated July 26, 1977), estimates that there are 7000 Hartmann's mountain zebra in the country as of 1977. Therefore, the species has shown no decline in numbers during the past decade.

The Director of Nature Conservation and Tourism states that of the 7000 Hartmann's mountain zebra, 4200 are protected in game reserves; the remainder occur on privately owned ranches. These zebra would not be tolerated on the privately owned ranches if there were not incentive to keep them since they directly compete with cattle and sheep. Such an incentive is provided by sport hunting; other alternatives to relieve the population pressure have proved too costly to be practical.

Sport hunting of Hartmann's mountain zebra is controlled by the South West African/Namibian Government which issues a small number of permits to hunt a restricted number. The South West African/Namibian Government feels that if this zebra did not have an economic value to the ranchers, they would destroy them on sight; given, however, the economic value of the species, the ranchers themselves are protecting them.

The facts that (1) Hartmann's mountain zebra has maintained its population level over the past decade, and that (2) it is strictly protected by the South West African/Namibian Government, lead the Service to believe that an Endangered classification is not warranted. However, the numbers remaining are quite small (7,000 animals left from a population that once numbered between 50,000 and 75,000) and the political stability of the region is

uncertain. Therefore, the Service feels that a Threatened determination under the Act is justifiable.

Effects of the rulemaking

This rulemaking will prohibit the importation and other activities involving Grevy's zebra (live animals or parts and products) into the United States except under permit for scientific purposes, or the enhancement of propagation or survival, economic hardship, zoological exhibition, educational purposes, or special purposes consistent with the purposes of the Act (50 CFR 17.31(a), 17.32). Importation and other activities involving Hartmann's mountain zebra (live animals or parts and products) will be prohibited as with the Grevy's zebra

except importation of legally taken sport hunting trophies shall be allowed.

This rulemaking may also make funds and expertise available, if requested, to assist in conservation programs for both Hartmann's mountain zebra and Grevy's zebra. Under Section 7 of the Act, no Federal agency may authorize, fund, or carry out any action which would jeopardize the survival of either species.

Endangered Species Act Amendments of 1978

The Endangered Species Act Amendments of 1978 specify that the following be added at the end of subsection 9(a)(1) of the Endangered Species Act of 1973, as amended:

At the time any such regulation (any proposal to determine a species to be an Endangered or Threatened species) is

proposed, the Secretary shall by regulation, to the maximum extent prudent, specify any habitat of such species which is then considered to be critical habitat.

Since the two species under consideration in this rulemaking are foreign species no critical habitat designation is appropriate, and this amendment does not apply.

Dated: August 10, 1979.

Robert S. Cook,

Acting Director, Fish and Wildlife Service.

1. Accordingly, § 17.11 of Part 17 of Chapter I of Title 50 of the Code of Federal Regulations is amended by adding Grevy's zebra and Hartmann's mountain zebra alphabetically under "Mammals", as follows:

§ 17.11 [Amended]

National Environmental Policy Act

An environmental assessment has been prepared and is on file in the Service's Washington Office of Endangered Species. It addresses this

action as it involves Grevy's zebra and Hartmann's mountain zebra. The assessment is the basis for a decision that issuance of these regulations is not a major Federal action which would significantly affect the quality of the

human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

Environmental Protection Agency

Priority List and Additions
to the List of Categories of Stationary
Sources

federal register

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 60**

(FRL 1276-3)

Priority List and Additions to the List of Categories of Stationary Sources**AGENCY:** Environmental Protection Agency.**ACTION:** Final rule.

SUMMARY: This action contains EPA's promulgated list of major source categories for which standards of performance for new stationary sources are to be promulgated by August 1982. The Clean Air Act Amendments of 1977 specify that the Administrator publish a list of the categories of major stationary sources which have not been previously listed as source categories for which standards of performance will be established. The promulgated list implements the Clean Air Act and reflects the Administrator's determination that, based on preliminary assessments, emissions from the listed source categories contribute significantly to air pollution. The intended effect of this promulgation is to identify major source categories for which standards of performance are to be promulgated. The standards would apply only to new or modified stationary sources of air pollution.

EFFECTIVE DATE: August 21, 1979.

ADDRESSES: The background document for the promulgated priority list may be obtained from the U.S. EPA Library (MD-35), Research Triangle Park, North Carolina 27711, telephone number 919-541-2777. Please refer to "Revised Prioritized List of Source Categories for New Source Performance Standards," EPA-450/3-79-023. The prioritization methodology is explained in the background document for the proposed priority list. This document, "Priorities for New Source Performance Standards under the Clean Air Act Amendments of 1977," EPA-450/3-78-019, can also be obtained from the Research Triangle Park EPA Library. Copies of all comment letters received from interested persons participating in this rulemaking, a summary of these comments, and a summary of the September 29, 1978, public hearing are available for inspection and copying during normal business hours at EPA's Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Gary D. McCutchen, Emission Standards and Engineering Division (MD-13), Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone number (919) 541-5421.

SUPPLEMENTARY INFORMATION: On August 31, 1978 (43 FR 38872), EPA proposed a priority list of major source categories for which standards of performance would be promulgated by August 1982, and invited public comment on the list and the methodology used to prioritize the source categories. Promulgation of this list is required by section 111(f) of the Clean Air Act as amended August 7, 1977. The significant comments that were received during the public comment period, including those made at a September 29, 1978, public hearing, have been carefully reviewed and considered and, where determined by the Administrator to be appropriate, changes have been included in this notice of final rulemaking.

Background

The program to establish standards of performance for new stationary sources (also called New Source Performance Standards or NSPS) began on December 1970, when the Clean Air Act was signed into law. Authorized under section 111 of the Act, NSPS were to require the best control system (considering cost) for new facilities, and were intended to complement the other air quality management approaches authorized by the 1970 Act. A total of 27 source categories are regulated by NSPS, with NSPS for an additional 25 source categories under development.

During the 1977 hearings on the Clean Air Act, Congress received testimony on the need for more rapid development of NSPS. There was concern that not all sources which had the potential to endanger public health or welfare were controlled by NSPS and that the potential existed for "environmental blackmail" from source categories not subject to NSPS. These concerns were reflected in the Clean Air Act Amendments of 1977, specifically in section 111(f).

Section 111(f) requires that the Administrator publish a list of major stationary sources of air pollution not listed, as of August 7, 1977, under section 111(b)(1)(A), which in effect meant those sources for which NSPS had not yet been proposed or promulgated. Before promulgating this list, the Administrator was to provide notice of and opportunity for a public hearing and consult with Governors and State air pollution control agencies. In

developing priorities, section 111(f) specifies that the Administrator consider (1) the quantity of emissions from each source category, (2) the extent to which each pollutant endangers public health or welfare, and (3) the mobility and competitive nature of each stationary source category, e.g., the capability of a new or existing source to locate in areas with less stringent air pollution control regulations. Governors may at any time submit applications under section 111(g) to add major source categories to the list, add any source category to the list which may endanger public health or welfare, change the priority ranking, or revise promulgated NSPS.

Development of the Priority List

Development of the priority list was initiated by compiling data on a large number of source categories from literature resources. The data were first analyzed to determine major source categories, those categories for which an average size plant has the potential to emit 100 tons or more per year of any one pollutant. These major source categories were then subjected to a priority ranking procedure using the three criteria specified in section 111(f) of the Act.

The procedure used first ranks source categories on a pollutant by pollutant basis. This resulted in nine lists (one for each pollutant—volatile organic compounds (VOC), nitrogen oxides, particulate matter, sulfur dioxide, carbon monoxide, lead, fluorides, acid mist, and hydrogen sulfide) with each list ranked using the criteria in the Act. In this ranking, first priority was given to quantity of emissions, second priority to potential impact on health or welfare, and third priority to mobility. Thus, sources with the greatest growth rates and emission reduction potential were high on each list; sources with limited choice of location, low growth and small emission reduction potential were low on each list.

The nine lists were combined into one by selecting pollutant goals—a procedure which, in effect, assigned a relative priority to pollutants based upon the potential impact of NSPS. After the pollutant goals were selected, the final priority list was established through the selection of source categories which have maximum impact on attaining the selected goals. The effect of this procedure was to emphasize control of all criteria pollutants except carbon monoxide and to give carbon monoxide and non-criteria pollutants a lower priority.

In the background reports and in the preamble to the proposed priority list, the term "hydrocarbon" was used even though the emissions referred to were VOC which, unlike hydrocarbon compounds, can contain elements other than carbon and hydrogen. A VOC is defined by EPA as any organic compound that, when released to the atmosphere, can remain long enough to participate in photochemical reactions. Since VOC contribute to ambient levels of photochemical oxidants, they are considered a criteria pollutant.

The ranking of source categories on the list and the differentiation between major and minor sources was sensitive to the accuracy of the data utilized. The data base used to establish the priority list was obtained from a number of literature sources including EPA screening studies. However, screening studies were not available for all source categories. Therefore, if new information becomes available after promulgation of the list, the Administrator may delete from or add to the list in response to this new information.

Additional detail on the prioritization methodology, the input factors used, and the ranking of individual source categories is available in the two background documents (see "ADDRESSES").

Significance of Priority List

The promulgated list is essentially an advance notice of future standard development activity. It identifies major source categories and the approximate order in which NSPS development would be initiated. However, if further study indicates that an NSPS would have little or no effect on emissions, or that an NSPS would be impractical, a source category would be given a lower priority or removed from the list. Similarly, new information may increase the priority of a source category. The Administrator may also concurrently develop standards for sources which are not on the priority list, especially certain "minor" sources which, in aggregate, represent a large quantity of emissions.

The distinction between major and minor source categories is defined only for the purpose of determining NSPS priorities and should not be used to determine sources subject to New Source Review, which is conducted on a case-by-case basis. Moreover, some New Source Review programs, such as prevention of significant deterioration, have separate and distinct criteria for defining a major source (e.g., 100 tons per year potential for certain source types and 250 tons per year for others).

Identification of Source Categories

Two groups of sources in addition to minor sources are not included on the promulgated list. One group includes sources which could not be evaluated due to insufficient information. This lack of data suggests that these sources, which are identified in the background report, "Priorities for NSPS under the Clean Air Act of 1977," have not previously been regulated or studied and, therefore, are probably not major sources. Nevertheless, the Administrator will continue to investigate these sources and will consider development of NSPS for any which are identified as being significant sources of air pollution.

The second group of source categories not on the priority list consists of those listed under section 111(b)(1)(A) on or before August 7, 1977. These are:

Fossil-fuel-fired steam generators
Incinerators
Portland Cement Plants
Nitric Acid Plants
Sulfuric Acid Plants
Asphalt Concrete Plants
Petroleum Refineries
Storage Vessels for Petroleum Liquids
Secondary Lead Smelters
Secondary Brass and Bronze Ingot Production Plants
Iron and Steel Plants
Sewage Treatment Plants
Primary Copper Smelters
Primary Zinc Smelters
Primary Lead Smelters
Primary Aluminum Reduction Plants
Phosphate Fertilizer Industry: Wet Process
Phosphoric Acid Plants
Phosphate Fertilizer Industry:
Superphosphoric Acid Plants
Phosphate Fertilizer Industry: Diammonium Phosphate Plants
Phosphate Fertilizer Industry: Triple Superphosphate Plants
Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities
Coal Preparation Plants
Ferroalloy Production Facilities
Steel Plants: Electric Arc Furnaces
Kraft Pulp Mills
Lime Plants
Grain Elevators

There are, however, some facilities (or subcategories) within these source categories for which NSPS have not been developed, but which may by themselves be significant sources of air pollution. A number of these facilities were evaluated as if they were separate source categories; three which rank high in priority are included on the promulgated list to indicate that the Administrator plans to develop standards for them: Petroleum refinery fugitive emissions, industrial fossil-fuel-fired steam generators, and non-municipal incinerators. In addition to these, the Administrator will continue to

evaluate affected facilities within listed source categories and may from time to time develop NSPS for such facilities. The iron and steel industry provides an example of a category which is already listed (so does not appear on the priority list), but in which an active interest remains. Although the growth rate for new sintering capacity is presently very low, the Administrator is continuing to assess emission control and measurement technology with a view toward possible development of an NSPS for sintering plants at a later date. A project is also underway to update emission factors for all steelmaking processes, including fugitive emissions, in an effort to determine the relative significance of emissions from each process. In addition, byproduct coke ovens, nearly always associated with steel mills, are included on the priority list and are undergoing standard development studies.

There are some differences between the format of the list in the background report, "Revised Prioritized List of Source Categories for NSPS Promulgation" and the format of the list which appears here. These differences are primarily a result of aggregation of subcategories which had been subdivided for size classification and priority ranking analysis. Non-metallic mineral processing, for example, had been subdivided into nine subcategories for prioritization, eight of which were analyzed separately (stone, sand and gravel, clay, gypsum lime, borax, fluorspar, and phosphate rock mining) and one of which is considered a minor source (mica mining). EPA plans to study the entire non-metallic mineral processing industry at one time, since many of the processes and control techniques are similar. For this reason, the industry is identified by a single aggregated listing. This does not necessarily imply that a single standard would apply to all sources within the listed category. Rather, as described below in the case of the synthetic organic chemical manufacturing industry, the nature and scope of standards will be determined only after a detailed study of sources within the category.

In addition to the major sources, three source categories not identified as being major source categories have been added to the list: organic solvent cleaning, industrial surface coating of metal furniture, and lead acid battery manufacture.

Organic solvent cleaning was chosen for study because this source category accounts for some 5 percent of stationary source VOC emissions.

typical air quality control region. Thus, although individual facilities typically emit less than 100 tons per year, this is a significant source of VOC emissions and the Administrator considers it prudent to continue the development of a standard for this source category.

The metal furniture coating industry is also a significant source of VOC emissions, and there are over 300 existing facilities with the potential to emit more than 100 tons per year.

Lead acid battery manufacture is a significant source of lead emissions. An NSPS for this source category is expected to assist in attainment of the National Ambient Air Quality Standard for lead.

Stationary gas turbines are included on this list because this source category had not been listed by August 7, 1977, when the Clean Air Act Amendments were enacted. However, this source category has not been prioritized, since it was listed under section 111(b)(1)(A) and NSPS were proposed October 3, 1977.

One listed source category which deserves special attention is the synthetic organic chemical manufacturing industry (SOCMI). Preliminary estimates indicate that there may be over 600 different processes included in this source category, but only 27 of these processes have been evaluated. For the others, there was not enough information available. As is the case with several other aggregated source categories, generic standards will be used to cover as many of the sources as possible, so separate NSPS for each of the 600 processes are unlikely.

Based on an effort which has been underway within EPA for two years to study this complex source category, the generic standards could regulate nearly all emissions by covering four broad areas: Process facilities, storage facilities, leakage, and transport and handling losses. Also, since a number of the pollutants emitted are potentially toxic or carcinogenic, regulation under section 112, National Emission Standards for Hazardous Air Pollutants (NESHAP), rather than NSPS may be more appropriate. Therefore, SOCMI is listed as a single source category. The 27 processes considered the most likely candidates for NSPS or NESHAP coverage through generic standards are listed in the preamble to the proposed priority list and discussed in the background documents.

Additional information has resulted in the exclusion from the list of some source categories which are shown in the background reports. Mixed fuel boilers and feed and grain milling are

regulated by the NSPS for fossil-fuel steam generators and grain elevators, respectively. Beer manufacture has a much lower emission level than had been assumed in the background report, and whiskey manufacture was deleted due to a lack of any demonstrated control technology.

Public Participation

The Clean Air Act requires that the Administrator, prior to promulgating this list of source categories, consult with Governors and State air pollution control agencies. An invitation was extended on February 28, 1978, to the State and Territorial Air Pollution Program Administrators (STAPPA) and the National Governors' Association (NGA) to attend the first Working Group meeting, March 16, 1978, and review the draft background report and the methods used to apply the priority criteria. On March 24, 1978, each Governor and the director of each State air pollution control agency was notified by letter of this project, including an invitation to participate or comment:

(1) At the April 5-6, 1978, National Air Pollution Control Techniques Advisory Committee (NAPCTAC) meeting in Alexandria, Virginia;

(2) When the final background report was mailed to them;

(3) When the list was proposed in the Federal Register; or

(4) At a public hearing to be held on the proposed list. The draft background report for the proposed list was mailed to all NAPCTAC members, five of which represent State or local agencies, two of which represent environmental groups, and eight of which represent industry. Copies were mailed to six environmental groups and three consumer groups at the same time, and to a representative of the NGA. Copies of the final background report for the proposed list were sent to the Governors, State and local air pollution control agencies, NAPCTAC members, environmental groups, the NGA, and other requesters in July 1978.

The public comment period on the proposed list, published in the August 31, 1978, Federal Register, extended through October 30, 1978. There were 18 comment letters received, 10 from industry and 8 from various regulatory agencies. Several comments resulted in changes to the proposed priority list.

A public hearing was held on September 29, 1978, to discuss the proposed priority list in accordance with section 111(g)(8) of the Clean Air Act. There were no written comments and only one verbal statement resulting from the public hearing.

Significant Comments and Changes to the Proposed Priority List

As a result of public comments and the availability of new screening studies and reports, 34 major and 11 minor source category data sets were reevaluated. This reexamination resulted in data changes for 29 major and 9 minor source categories.

Ten source categories have been removed from the proposed priority list. Eight of these source category deletions are a result of new data indicating that NSPS would have little or no effect. These source categories are: Varnish, carbon black, explosives, acid sulfite wood pulping, NSSC wood pulping, gasoline additives manufacturing, alfalfa dehydrating, and hydrofluoric acid manufacturing. Printing ink manufacturing was reclassified from a major to a minor source category. In addition, two source categories, gray iron and steel foundries, were combined into one source category. Finally, fuel conversion was removed from the list due to uncertainties regarding the approach and scheduled involved in developing environmental standards for the various processes. Likely candidates for NSPS include coal gasification (both low and high pressure), coal liquefaction, and oil shale and tar sand processing. These actions reduce the final priority list to 59 source categories.

The most significant comments and changes made to the proposed regulations are discussed below:

1. *Definition of "Mobility."* Several commenters felt that the treatment of source category mobility (movability) was too broad. Mobility in the prioritization analysis refers to the feasibility a stationary source has to relocate to, or locate new facilities in, areas with less stringent air pollution control regulations. Non-movable stationary source categories were identified on the basis of being firmly tied either to the market (e.g., dry cleaners) or to a supply of materials (e.g., mining operations). The Administrator recognizes that there are many other factors which would be considered in plant siting situations, but considers the approach used in determining the priority list sufficient for the purposes of this study.

2. *Source Category Aggregation.* Several commenters indicated that there were discrepancies between the source categories named in the priority list and those in the background document. The differences between the priority listing in the Federal Register and the background document list is a result of aggregation of sources which had been

subcategorized for size classification and priority ranking analysis in the background document. Aggregation indicates that all source categories under a generic industry heading, such as non-metallic mineral processing, will be evaluated at the same time, although this does not necessarily imply that a single standard would apply to all sources within the listed category.

3. *Control Costs.* Two commenters felt that the cost of pollution control to meet NSPS limitations should have been included in the criteria for prioritization. The Clean Air Act priority list criteria do not include the cost of pollution control, but pollution control costs were considered during the determination of control technology assumed for the priority list study. Control costs are examined in more detail during NSPS development studies for each source category, and must be considered in determining each NSPS.

4. *Minor Source Categories.* One commenter felt that the Administrator lacks statutory authority to make a policy decision to develop NSPS for a minor source category until after the major sources have been dealt with, since Congress indicated major sources must be given priority. The Administrator, in promulgating this list, is placing an almost exclusive emphasis on NSPS for major source categories. However, the Clean Air Act does not prohibit concurrent promulgation of NSPS for minor, but significant, source categories. For the three minor source categories listed in this regulation, NSPS development had been initiated before the priority list was available, and completion of standards development for these sources is considered justified.

5. *Stationary Fuel Combustion/Waste Incineration.* Two State agencies felt that stationary fuel combustion and waste incineration should have a high priority because of source activity growth in their respective States. In the promulgated list, both of these source categories are given high priority based on the most recent growth rates available. Given the concern expressed by these agencies, the Administrator has already initiated standard development studies for these source categories.

6. *Chemical Products Manufacture/Fuel Conversion.* One commenter felt that the growth rate and, therefore, the need for coal gasification plant NSPS is overestimated. High Btu coal gasification was reexamined; although no commercial-scale plants currently exist in this country, environmental programs need to keep pace with the emphasis on energy programs. The fuel conversion processes have been

removed from the priority list for special study.

7. *Chemical Products Manufacture/Printing Ink Manufacture.* One commenter indicated that neither existing conditions within the printing ink industry nor projections of future growth of the industry justify its categorization as a major source. The Administrator has examined the new data provided, and has reclassified printing ink manufacturing plants as a minor source category. As was discussed earlier, however, the Administrator may still develop standards for "minor" source categories, especially those which, in aggregate, represent a significant quantity of emissions.

8. *Wood Processing/NSSC and Acid Sulfite Pulping.* One commenter indicated that acid sulfite pulp production is a declining growth industry and therefore should not be included in the priority list. The Administrator agrees with this comment, based on examination of acid sulfite pulp production projections in a new screening study. In addition, the screening study indicates that NSSC pulping is, in effect, controlled by the promulgated NSPS for Kraft pulp mills, resulting in little or no further emission reduction from promulgation of an NSSC NSPS. Therefore, both acid sulfite and NSSC pulping have been removed from the list.

Development of Standards

The Administrator has undertaken a program to promulgate NSPS for the source categories on this priority list by August 7, 1982. Development of standards has already been initiated for nearly two-thirds of the source categories listed; work on the remaining source categories will be initiated within the next year.

The priority ranking is indicated by the number to the left of each source category and will be used to decide the order in which new projects are initiated, although this is not necessarily an indication of the order in which projects will be completed. In fact, higher priority source categories often present difficult technical and regulatory problems, and may be among the later source categories for which standards are promulgated.

It should be pointed out that several of the source categories listed could be subject to standards which may be adopted under section 112 of the Clean Air Act, national emission standards for hazardous air pollutants (NESHAP). Included are byproduct coke ovens and several source categories within the

petroleum transport and marketing industry. If standards are developed under section 112 for these or any other source categories on the promulgated list, then standards may not be developed for those source categories under section 111.

Promulgation of this list not only fulfills the section 111(f) requirements concerning establishment of priorities, but also constitutes notice that all source categories on the priority list are considered significant sources of air pollution and are hereby listed in accordance with section 111(b)(1)(A). It should be noted, however, that the source categories identified on this priority list, even though listed in accordance with section 111(b)(1)(A), are not subject to the provisions of section 111(b)(1)(B), which would require proposal of an NSPS for each listed source category within 120 days of adoption of the list. Rather, the promulgation of standards for sources contained on this priority list will be undertaken in accordance with the time schedule prescribed in section 111(f)(1) of the Clean Air Act Amendments. That is, NSPS for 25 percent of these source categories are to be promulgated by August 1980, 75 percent by August 1981, and all of the NSPS by August 1982.

Dated: August 15, 1979.

Douglas M. Costle,
Administrator.

Part 60 of Chapter I of Title 40 of the Code of Federal Regulations is amended by adding § 60.16 to Subpart A as follows:

§ 60.16 Priority list.

Prioritized Major Source Categories

Priority Number*

Source Category

1. Synthetic Organic Chemical Manufacturing
 - (a) Unit processes
 - (b) Storage and handling equipment
 - (c) Fugitive emission sources
 - (d) Secondary sources
2. Industrial Surface Coating: Cans
3. Petroleum Refineries: Fugitive Sources
4. Industrial Surface Coating: Paper
5. Dry Cleaning
 - (a) Perchloroethylene
 - (b) Petroleum solvent
6. Graphic Arts
7. Polymers and Resins: Acrylic Resins
8. Mineral Wool
9. Stationary Internal Combustion Engines
10. Industrial Surface Coating: Fabric
11. Fossil-Fuel-Fired Steam Generators: Industrial Boilers
12. Incineration: Non-Municipal
13. Non-Metallic Mineral Processing
14. Metallic Mineral Processing

* Low numbers have highest priority; e.g., No. 1 is high priority, No. 59 is low priority.

15. Secondary Copper
16. Phosphate Rock Preparation
17. Foundries: Steel and Gray Iron
18. Polymers and Resins: Polyethylene
19. Charcoal Production
20. Synthetic Rubber
 - (a) Tire manufacture
 - (b) SBR production
21. Vegetable Oil
22. Industrial Surface Coating: Metal Coil
23. Petroleum Transportation and Marketing
24. By-Product Coke Ovens
25. Synthetic Fibers
26. Plywood Manufacture
27. Industrial Surface Coating: Automobiles
28. Industrial Surface Coating: Large Appliances
29. Crude Oil and Natural Gas Production
30. Secondary Aluminum
31. Potash
32. Sintering: Clay and Fly Ash
33. Glass
34. Gypsum
35. Sodium Carbonate
36. Secondary Zinc
37. Polymers and Resins: Phenolic
38. Polymers and Resins: Urea—Melamine
39. Ammonia
40. Polymers and Resins: Polystyrene
41. Polymers and Resins: ABS—SAN Resins
42. Fiberglass
43. Polymers and Resins: Polypropylene
44. Textile Processing
45. Asphalt Roofing Plants
46. Brick and Related Clay Products
47. Ceramic Clay Manufacturing
48. Ammonium Nitrate Fertilizer
49. Castable Refractories
50. Borax and Boric Acid
51. Polymers and Resins: Polyester Resins
52. Ammonium Sulfate
53. Starch
54. Perlite
55. Phosphoric Acid: Thermal Process
56. Uranium Refining
57. Animal Feed Defluorination
58. Urea (for fertilizer and polymers)
59. Detergent

Other Source Categories

OFFICE OF MANAGEMENT AND BUDGET

Budget Deferrals and Rescissions

To The Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals of budget authority totalling \$204.5 million. These items involve economic support fund assistance for Egypt, the White House Conference on Aging, the National Alcohol Fuels Commission, and the National Commission on the International Year of the Child.

The details of the deferrals are contained in the attached reports.

Jimmy Carter.

The White House, August 16, 1979.

BILLING CODE 3110-01-M

CONTENTS OF SPECIAL MESSAGE
(in thousands of dollars)

Deferral No.	Item	Budget Authority
	Funds Appropriated to the President:	
D79-59	International Security Assistance Economic Support Fund.....	200,000
	Department of Health, Education and Welfare:	
D79-60	Human Development Services White House Conference on Aging.....	2,700
	Other Independent Agencies:	
D79-61	National Alcohol Fuels Commission.....	1,350
D79-62	National Commission on the International Year of the Child.....	485
	Total, deferrals....	204,535

SUMMARY OF SPECIAL MESSAGES
FOR FY 1979

Effect of eleventh special message.....	---	204,535
Previous special messages.....	908,692	4,380,010
Total amount proposed in special messages.....	908,692	4,584,545 ^{1/}
	(in 11 rescission proposals)	(in 62 deferrals)

^{1/} This amount represents budget authority except for \$15,809,478 in two Treasury Department deferrals of outlays only (D79-40A and D79-25B).

Deferral No: D79-59

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency Funds Appropriated to the President	New budget authority (P.L. 96-38)	\$ 300,000,000
Bureau International Security Assistance	Other budgetary resources	2,021,158,000
Appropriation title & symbol	Total budgetary resources	2,321,158,000
Economic Support Fund 11X1037	Amount to be deferred: Part of year	\$ ---
	Entire year	200,000,000
OMB identification code: 11-1006-0-1-151	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act	
Grant program ☐ Yes ☒ No	☐ Other	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other	

Justification:

Pursuant to the Foreign Assistance Act of 1961, as amended, the President is authorized to "furnish assistance to friendly countries.... on such terms as he may determine, in order to support or promote economic or political stability."

The Supplemental Appropriations Act, 1979, (P.L. 96-38) provided \$300 million in economic assistance for Egypt as part of a package in support of the Treaty of Peace between Egypt and Israel. As presented to the Congress in testimony on the peace package, the special assistance for Egypt would be programmed for delivery over a three-year period. Thus, the \$300 million will be obligated in equal annual installments of \$100 million through FY 1981. Accordingly, \$200 million is deferred for the remainder of FY 1979.

This deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665).

Estimated Effects:

This deferral will have no budgetary or programmatic impact.

Outlay Effects:

There is no outlay effect resulting from this deferral.

Deferral No: D79-60

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency Department of Health, Education & Welfare	New budget authority (P.L. 96-38)	\$ 3,000,000
Bureau Human Development Services	Other budgetary resources	---
Appropriation title & symbol	Total budgetary resources	3,000,000
75X1636 - Human Development Services (White House Conference on Aging)	Amount to be deferred: Part of year	\$ ---
	Entire year	2,700,000
OMB identification code: 75-1636-0-1-500	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act	
Grant program ☐ Yes ☒ No	☐ Other	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other	

Justification: The 1981 White House Conference on Aging Act (P.L. 95-478) was enacted on October 18, 1978, authorizing the President to call a conference in 1981 for the purpose of developing recommendations for a comprehensive national policy on aging. The conference is scheduled to be held in December, 1981. Public Law 96-38, the Supplemental Appropriations Act, 1979, enacted on July 25, 1979, included a supplemental appropriation of \$3,000,000 which is to remain available until expended for the White House Conference on Aging. These funds are intended to cover the entire costs of planning and carrying out the conference through 1981. Start-up costs of the conference during the remainder of FY 1979 are estimated to be \$300,000, with the remaining \$2.7 million deferred for obligation in subsequent years.

This deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665).

Estimated Effects: There is no programmatic or budgetary effect resulting from this deferral.

Outlay Effect: There is no outlay effect resulting from this deferral.

Deferral No: D79-61

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency National Alcohol Fuels Commission	New budget authority (P.L. 96-38)	\$ 1,500,000
Bureau	Other budgetary resources	---
Appropriation title & symbol Salaries and expenses 48X1700	Total budgetary resources	1,500,000
	Amount to be deferred: Part of year	\$ ---
	Entire year	1,350,000
OMB identification code: 48-1700-0-1-271	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act	
Grant program ☐ Yes ☒ No	☐ Other	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other	

Justification: Authorized by P.L. 95-599, the Federal-Aid Highway Act of 1978, the National Alcohol Fuels Commission will undertake a thorough investigation of the long and short-term potential of alcohol fuels from various sources as a way to meet the nation's energy needs. The Commission will recommend policies and assess the associated costs and benefits of these policies.

The Supplemental Appropriations Act, 1979 (P.L. 96-38) provided \$1.5 million to establish the Commission and begin its operations. Of this amount, only \$150,000 is necessary for obligation in FY 1979 to establish the Commission. Therefore, \$1,350,000 is deferred for the remainder of this fiscal year.

This deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665).

Estimated Effects: This deferral will have no budgetary or programmatic impact.

Outlay Effects: There is no outlay effect resulting from this deferral.

Deferral No: D79-62

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency National Commission on the International Year of the Child	New budget authority (P.L. 96-38)	\$ 685,000
Bureau	Other budgetary resources	---
Appropriation title & symbol Salaries and Expenses 48X2000	Total budgetary resources	685,000
	Amount to be deferred: Part of year	\$ ---
	Entire year	\$485,000
OMB identification code: 48-2000-0-1-506	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act	
Grant program ☐ Yes ☒ No	☐ Other	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other	

The National Commission on the International Year of the Child is authorized by the Education Amendments of 1978 (P.L. 95-561) to promote in the United States the observance of the International Year of the Child (calendar year 1979).

The Supplemental Appropriations Act, 1979 (P.L. 96-38), enacted on July 25, 1979, appropriated \$685,000 to remain available until expended for the salaries and expenses of the Commission. Of this amount, \$200,000 will be needed by the Commission in FY 1979. The remaining \$485,000 will be needed to support Commission activities in the first two quarters of 1980, at the end of which the Commission expires. This obligation pattern is in keeping with the intent of Congress as expressed in Senate Report No. 96-224 accompanying the Supplemental Appropriations Act, 1979.

This deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665).

Estimated Effects:

There is no programmatic or budgetary effect resulting from this deferral.

Outlay Effect:

There is no outlay effect resulting from this deferral.

- 49287 Air Carriers** CAB institutes informal nonpublic investigation of airline reservations, bumping, and compensation action during the grounding of the DC-10 aircraft
- 49239 Aliens** Justice/INS establishes application to accept or continue employment by A-1 and A-2 nonimmigrants; effective 9-21-79
- 49288 Skateboards** CPSC provides a notice of denial of petition

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202-523-5240

Highlights

- 49245 Customs Duties** Treasury/Customs amends procedures relating to the entry of merchandise; effective 8-22-79
- 49239 Freedom of Information** Agriculture/SEA provides revised regulations on availability of public records; effective 9-21-79

Presidential Documents

Title 3—

The President

Proclamation 4674 of August 20, 1979

Women's Equality Day, 1979

By the President of the United States of America

A Proclamation

On August 26, 1920, fifty-nine years ago, the 19th Amendment became a part of the United States Constitution, guaranteeing women the right to vote.

As we celebrate the anniversary of that victory for all Americans, we applaud the courage of the women and men who struggled for generations to achieve it. But the 19th Amendment was only one step on the long journey toward full equality for women.

Through persistent and dedicated effort, women have made great strides toward achieving that equality in recent years. But the need for the Equal Rights Amendment is still compelling. Today, I reiterate my continued commitment to make the ERA a part of our Constitution.

The ERA does not legislate that men and women are the same. It simply says that the law cannot penalize women because they are female. Nor does the ERA impose new, unwanted roles on women. Rather, it safeguards their opportunity to develop their full potential in the directions they choose. As women are freed from arbitrary barriers and stereotypes, men are liberated as well.

When passed, the ERA will provide a single, clear, comprehensive standard against which discrimination can be measured. Legal equality for women must be made a part of the Constitution.

The ERA is not a recent idea. It was first introduced in Congress in 1923. After lengthy and careful debate, Congress submitted it to the States for ratification on March 22, 1972. Now all but three of the necessary thirty-eight states have ratified it. The deadline is June 30, 1982.

The ratification of the ERA may be the single most important step in assuring American women their full equality. Gaining ratification in the remaining states will not be easy—but it will mean our country can tap the full resources and abilities of all its citizens.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim August 26, 1979, as Women's Equality Day and do hereby urge all Americans to work to guarantee full equality for women before the 1982 deadline.

UM

I hope that, as a part of future celebrations for Women's Equality Day, we can celebrate the passage of the 19th Amendment and the passage of the Equal Rights Amendment.

IN WITNESS WHEREOF, I have hereunto set my hand this twentieth day of August, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and fourth.

Proclamation 4675 of August 20, 1979

Fifteenth Anniversary of the Signing of the Economic Opportunity Act

By the President of the United States of America

A Proclamation

On August 20, 1964, our Nation embarked upon its most altruistic enterprise since the Marshall Plan. President Lyndon B. Johnson signed into law an Act "to mobilize the human and financial resources of the Nation to combat poverty in the United States."

The ideal envisioned in the Economic Opportunity Act of 1964 was a Nation in which "every individual has the opportunity to contribute to the full extent of his capabilities and to participate in the workings of our society."

The proud litany of bold innovations which this legislation introduced into the Nation's vocabulary included Community Action, Head Start, Job Corps, Legal Services, VISTA, New Careers, Foster Grandparents, Upward Bound, Follow Through, Emergency Food and Medical Services, and Senior Opportunities and Services.

The experimental concepts tested in these many programs have long since left the laboratory. Along the way, we have made some important discoveries—about poverty, about ourselves and about our country. We have learned from these programs that poverty is not an isolated problem that can be overcome without changes in the larger economy. We have learned that the poor of America are by no means alone in their deep-seated desire for institutional change; in their desire for government responsiveness at all levels; in their desire for opportunities for genuine participation as members of our society. We have discovered along the way that poor and non-poor alike long for a sense of community, a share in decision-making, a feeling that the individual can be heard—in the councils of government, in corporate meetings, and in the marketplace.

All Americans should have learned in these 15 tumultuous years that changing circumstances may place any one of us in the path of common enemies: obsolete skills in an age of technological revolution; the danger of disability through injury or disease in a hazardous environment; mutual vulnerability to shrinking energy, housing, and food resources. All of us have learned that our country cannot afford to allow differences—in income, in social status, in geography, in age, in intellect or health, in color, accent, or religion—to divide and polarize us.

This generation has learned also that poverty is not a question of income alone—we can be energy-poor, even though wealthy as a Nation; we can be spiritually impoverished, even when we are materially satiated.

Let us take this occasion, then, to rededicate ourselves and our country to the ideals of the Economic Opportunity Act with a renewed commitment to our Nation's goal of securing the opportunity for every individual to "attain the skills, knowledge, and motivations . . . to become fully self-sufficient."

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim and designate the next 12 months as a year of rekindled effort to open to everyone in our land "the opportunity to live in decency and dignity."

IN WITNESS WHEREOF, I have hereunto set my hand this twentieth day of August, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America, the two hundred and fourth.

Rules and Regulations

Federal Register

Vol. 44, No. 164

Wednesday, August 22, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Science and Education Administration¹

7 CFR Part 510

Public Information

AGENCY: Science and Education Administration.

ACTION: Final rule.

SUMMARY: This amendment revises the regulations on how the Science and Education Administration will make available to the public the records of the Department of Agriculture according to the Freedom of Information Act.

EFFECTIVE DATE: September 21, 1979.

FOR FURTHER INFORMATION CONTACT: Robert M. Nelson, FOIA Coordinator, USDA-SEA-Information Staff, Room 3143, South Building, 14th and Independence Ave., S.W., Washington, D.C. 20250. Telephone: (202) 447-2076.

SUPPLEMENTARY INFORMATION: The regulations on the availability of records maintained by the Science and Education Administration, 7 CFR Part 510, are revised to read as follows:

PART 510—PUBLIC INFORMATION

- Sec.
- 510.1 General Statement.
 - 510.2 Public Inspection and Copying.
 - 510.3 Indexes.
 - 510.4 Requests for Records.
 - 510.5 Appeals.

Authority.—5 U.S.C. 301.552; 7 CFR 1.1-1.16.

§ 510.1 General Statement.

This part is issued according to the regulations of the Secretary of

¹ 7 CFR Chapter V is currently designated Agricultural Research Service. A document in a future Federal Register will redesignate this Chapter Science and Education Administration.

Agriculture in Part 1, Subpart A of Subtitle A of this title (7 CFR 1.1-1.16), implementing the Freedom of Information Act (5 U.S.C. 552) including Appendix A thereto (Fee Schedule). The Secretary's regulations, as implemented by the regulations in this part, govern the availability of records of the Science and Education Administration to the public.

§ 510.2 Public Inspection and Copying.

5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying. Members of the public may request access to such materials maintained by Science and Education Administration at five offices—one national office and four regional offices.

Information Staff, Room 3143, South Building, 14th and Independence Ave., S.W., Science and Education Administration, U.S. Department of Agriculture, Washington, D.C. 20250. Office hours: 8:30 a.m. to 5 p.m.

Regional Information Office, USDA-SEA-AR Northeastern Region, Room 251, Building 003, Beltsville, Agricultural Research Center-West, Beltsville, Maryland 20705. Office hours: 8 a.m. to 4:30 p.m.

Regional Information Office, USDA-SEA-AR North Central Region, 2000 W. Pioneer Parkway, Peoria, Illinois 61615. Office hours: 8 a.m. to 4:30 p.m.

Regional Information Office, USDA-SEA-AR Southern Region, 701 Loyola Avenue, P.O. Box 53328, New Orleans, Louisiana 70153. Office hours: 8 a.m. to 4:30 p.m.

Regional Information Office, USDA-SEA-AR Western Region, 1333 Broadway, Suite 400, Oakland, California 94612. Office hours: 7:30 a.m. to 4 p.m.

§ 510.3 Indexes.

In compliance with 5 U.S.C. 552(a)(2) the most current issues of the agency's indexes will be made available for public inspection and copying at the five locations cited in 510.2. Single copies may be obtained free by visiting, telephoning, or writing to these locations. Extra copies may be procured at a cost not to exceed the direct cost of duplication from the Administrative Operations Division, Room 203A, National Agricultural Library Building, Beltsville, Maryland 20705.

§ 510.4 Requests for Records.

Requests for records under 5 U.S.C. 552(a)(3) shall be made according to 7 CFR 1.3(a) and addressed to one of the five offices listed in 510.2 The SEA FOIA Coordinator and the Regional

Information Officers are hereby delegated authority to make determinations regarding such requests according to 7 CFR 1.4(c).

§ 510.5 Appeals.

Any person whose request under 510.4 is denied shall have the right to appeal such denial. Appeals shall be submitted according to 7 CFR 1.3(e) and addressed to Director, Science and Education Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Done at Washington, D.C. this 15th day of August 1979.

Anson R. Bertrand,
Director, Science and Education.

BILLING CODE 3410-03-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

Application To Accept or Continue Employment by A-1 and A-2 Nonimmigrants

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations of the Immigration and Naturalization Service to establish a formal procedure under which the spouses and unmarried dependent sons and unmarried dependent daughters of aliens classified as A-1 and A-2 nonimmigrants and serving as officers or employees of diplomatic or consular establishments may apply for permission to accept or continue employment.

Currently, spouses and dependents of these nonimmigrants apply under an informal procedure to the Office of Protocol of the Department of State for permission to accept or continue employment.

These regulations are necessary because section 401(a) of the Foreign Relations Authorization Act of 1979 provides that the President shall seek to conclude bilateral and multilateral agreements with foreign countries to facilitate the expansion of employment opportunities for family members of U.S. Government personnel stationed

abroad. Thus, under this statutory provision, permission to work which is granted under this regulation must be on a basis of reciprocity. Eligibility for employment under this regulation will extend to family members of foreign diplomatic and consular officials stationed in this country whose governments extend similar employment opportunities to members of families of United States diplomatic and consular officials.

The rule is intended to incorporate existing informal procedures into the regulations, and to ensure compliance with the employment reciprocity requirement of section 401(a) of the Foreign Relations Authorization Act of 1979.

EFFECTIVE DATE: September 21, 1979.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service. Telephone: (202) 633-3048; or Joseph F. Fagan, Visa Office, Department of State. Telephone: (202) 632-2903.

SUPPLEMENTARY INFORMATION: On January 29, 1979, the Service published a Notice of Proposed Rulemaking in the Federal Register in which it was proposed to set forth formal regulations for the employment of spouses and unmarried dependent sons and daughters of aliens classified as A-1 and A-2 nonimmigrants serving in the United States as officers or employees of diplomatic or consular establishments. See 44 FR 5669. The Assistant Secretary of State for Consular Affairs concurred in the proposed rule.

In response to our notice, we received representations from the Embassy of Great Britain, the Embassy of Canada, the Embassy of Switzerland, and the Association of American Foreign Service Women. These representations have been carefully considered by this Service and by the Department of State. The pertinent objections raised, along with our responses, are discussed below.

Virtually all of the objections raised in the Embassies' representations concerned the restricted applicability of the proposed rule, both with regard to the classes of aliens who would be able to apply for employment authorization and to the type of employment they would be permitted to accept. All three Embassies expressed concern about the dependents of their A-1 and A-2 nationals who would not qualify for employment authorization because they are not assigned to diplomatic or consular offices in the U.S. The British and Canadian Embassies wish to include the dependents of G-1 aliens.

The Embassies of Switzerland and Great Britain object to prohibiting employment in Schedule B occupations. All of the commenting Embassies indicated, explicitly or otherwise, that implementing the proposed rule on the basis of reciprocity would actually limit rather than expand the employment opportunities for the dependents of U.S. officials residing in their countries, since their Governments presently impose fewer restrictions on the employment of dependents of foreign diplomats than does the proposed rule.

With regard to the Embassies' proposal that the classes of eligible A-1 and A-2 dependents be expanded to include dependents of officials in non-diplomatic or non-consular establishments, it is not possible at this time to permit such expansion. It has been determined that there would be no adverse impact on the American labor market if the nonimmigrant A-1 and A-2 dependents assigned to diplomatic and consular posts were permitted to take jobs in this country. However, there has been no analysis made of the impact on the American labor market which would arise by permitting expansion of the class to include A-1 and A-2 nonimmigrants who are not assigned to diplomatic or consular establishments. Until that impact is determined, we are not in a position to expand the class beyond that included in the proposed rule.

We must also retain the restriction against employment in jobs appearing in Schedule B of the Department of Labor. As indicated above one of our responsibilities when promulgating this rule was to ensure that there was no adverse impact on the American labor market. The jobs listed on Schedule B are those for which the Secretary of Labor has determined there are sufficient American workers to occupy those positions and that employment of aliens in those jobs would adversely affect the American job market. Under these circumstances we cannot delete the proposed restrictions against employment in Schedule B jobs.

The Association of American Foreign Service Women asks that the rules be interpreted liberally, in a manner which will expand work opportunities for American dependents overseas; that the system not be set up to only parcel out job on a one-to-one basis because such process would be slow moving and costly, and that the two-year exception to the Schedule B job prohibition be extended to the overseas job markets.

We have no desire to apply a restrictive interpretation to these rules, nor do we wish to see the procedure become complex and cumbersome. The

primary consideration in determining whether an A-1 or A-2 nonimmigrant may work in this country will be whether the foreign country affords similar employment opportunities to dependents stationed at United States diplomatic and consular establishments in those countries. Also, the Association cites the two-year exemption provided in the proposed regulations for A-1 and A-2 aliens working in this country on the effective date of the regulation, and urges that foreign countries provide a similar waiver of their "Schedule B" requirements to make the new work permission system truly reciprocal. The reason the two-year exemption was provided was to avoid the hardship to the A-1 or A-2 employee and his employer which would result by applying these requirements without a transition period. The result of a literal interpretation would be that the individuals with Schedule B jobs would have to resign their position immediately upon this regulation becoming effective. We do not feel that such hardship is warranted or justified. Therefore, the two year Schedule B exemption will be retained for those A-1 and A-2 nonimmigrants who accepted those jobs in good faith and with the proper approval, prior to the promulgation of these regulations restricting employment in Schedule B jobs.

During our review of the proposed regulation for final publication, we considered again the proposal to require a sworn statement from the applicant that his earnings from this employment would be taxable. We note that G-4 nonimmigrant dependents of aliens stationed in this country as officers or employees of international organizations are not subject to this requirement. In addition, it has been determined that the sworn statement serves no real purpose, since a copy of the notification of approval is furnished the IRS in any case. Therefore, the sworn statement requirement will be deleted from the final rule.

In the light of the foregoing, Chapter I of Title 8 of the Code of Federal Regulations is hereby amended as set forth below.

PART 214—NONIMMIGRANT CLASSES

Part 214 is amended by redesignating the existing paragraph of 8 CFR 214.2(a) as subparagraph (1) *General* and by adding a new subparagraph (2) *Employment*. As amended, 8 CFR 214.2(a) reads as follows:

§ 214.2 Special requirements for admission, extension and maintenance of status.

(a) *Foreign government officials.*

(1) *General.*

(2) *Employment.* The spouse, unmarried dependent son or unmarried dependent daughter habitually residing with a foreign government official classified as a nonimmigrant under section 101(a)(15)(A)(i) or (ii) of the Act as an officer or employee assigned to a diplomatic or consular office in the United States may be granted permission to accept or continue employment in the United States if an application to do so has first been favorably recommended by an authorized representative of the Department of State and approved by the District Director of the Service as indicated below. To apply, the spouse or unmarried dependent son or unmarried dependent daughter shall first submit Form I-566 to the Office of Protocol of the Department of State for transmission to the Visa Office. The form shall be accompanied by a certification by the diplomatic mission of the Government employing the principal alien that the applicant is the spouse or unmarried dependent son or unmarried dependent daughter of an official of that Government whose assignment is expected to last more than six months. The applicant shall also submit with the application a statement from the prospective employer describing the position and salary offered, the duties of the position and verification that the applicant possesses the necessary qualifications for the position. The application may be approved if both the authorized representative of the Department of State and the District Director of this Service at Washington, DC are satisfied that: (i) both the principal alien and the applicant desiring employment are maintaining A-1 or A-2 status; (ii) the proposed employment is not in an occupation listed in the Department of Labor Schedule B (20 CFR 656) or otherwise determined by the Department of Labor to be one for which there is an oversupply of qualified U.S. workers in the area of proposed employment, except in the case of the employment of an unmarried dependent son or unmarried dependent daughter in A-1 or A-2 status who is a full-time student, if the employment is part-time, consisting of not more than 20 hours per week and/or if it is temporary employment of not more than 12 weeks at a time during school holiday periods; *Provided*, That if an A-1 or A-2 alien was authorized to accept full-time employment in a

Schedule B occupation prior to the effective date of this regulation he/she may continue in that employment for a period of 2 years following the effective date of this regulation; (iii) employment of a similar nature for family members of United States Government officials assigned to a diplomatic or consular office in the country employing the principal alien is not prohibited by the host country government; and (iv) the proposed employment would not be contrary to the interests of the United States. Employment of A-1 or A-2 aliens who have criminal records, or who have violated the immigration and nationality laws or regulations or who worked illegally or who cannot establish that they paid taxes on income from previous U.S. employment may be considered contrary to the interests of the United States. However, an A-1 or A-2 alien who is working without authorization on the effective date of this regulation must apply for authority to continue that work within 90 days of the effective date of this regulation. He/she must comply with the terms of this regulation in all respects except for the provision relating to illegal employment, and the fact of such illegal employment will not be construed against him/her in considering that application for employment. Permission to accept employment may not be granted to A-1 or A-2 spouses, unmarried dependent sons or unmarried dependent daughters if the principal alien will be stationed in this country for a definite period of six months or less. Permission to accept or continue employment under this section shall be granted in increments of not more than two years each. There shall be no appeal from a denial of permission to accept or continue employment under this section. The Service will inform the A-1 or A-2 applicant by letter whether the application has been granted or denied and if denied, of the reasons therefor. When an application is approved, the Service shall inform the Internal Revenue Service and Department of Labor. A family member of a principal alien classified A-3 may not be employed in the United States under these regulations.

(Secs. 103 and 214; 8 U.S.C. 1103 and 1184; Interpret or apply sec. 401(a) of the Foreign Relations Authorization Act of 1979)

Effective date: The amendments contained in this order become effective on September 21, 1979.

BILLING CODE 4410-10-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 552

(79-445)

Stock Associations; Mergers and Consolidations

August 16, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: These regulations authorize the combination by means of merger or consolidation of federally-chartered stock associations with savings and loan associations the accounts of which are insured by the Federal Savings and Loan Insurance Corporation. These rules authorize corporate actions which the Bank Board believes, must be extended to Federal stock associations.

EFFECTIVE DATE: September 30, 1979.

FOR FURTHER INFORMATION CONTACT: Douglas P. Faucette, Associate General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Telephone Number (202) 377-6410.

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board, by Resolution No. 78-605, proposed to amend Part 552 of the Rules and Regulations for the Federal Savings and Loan System to provide merger and consolidation rules for federally-chartered stock savings and loan associations. Notice of such proposed rulemaking was published in the Federal Register on November 17, 1978, (43 FR 53762), with an invitation to interested persons to submit written comments by January 15, 1979.

Fifteen responses were received on Resolution No. 78-605. Eight of the respondents recommended adoption of the proposed regulations, four of whom also recommended technical modifications in the regulations. Of the remaining seven respondents three simply acknowledged publication of the proposed rules offering no comment, two recommended technical changes without offering a recommendation, and two recommended technical

modifications while expressing no serious objections.

Reasons for Amendments

By resolution No. 75-414, dated May 9, 1975, the Federal Home Loan Bank Board adopted Part 552 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 552). It was intended that Part 552 would constitute the minimum regulations necessary for the operation of Federal stock associations. Accordingly, the Board stated in the preamble to its March 7, 1975, proposal of Part 552 (Board Resolution No. 75-226) that regulations relating to corporate actions such as mergers would be proposed at a later date.

Promulgation of merger regulations was deferred primarily for two reasons. In May of 1975 merger regulations were not needed, therefore, the Board decided to concentrate its staff resources on converting mutuals. It also decided to afford the staff the opportunity to gather experience with Federal stock associations and thereby promulgate regulations which are more responsive to the practical needs of associations.

There are now eighteen Federal stock associations in operation. As one of them once was and could again be the subject of a proposed merger the necessity for merger regulations has arisen. In order to meet this necessity the Board proposes to amend Part 552 of the Federal Regulations, as discussed herein.

Discussion of Major Comments

Respondents were most concerned with ability of Federal stock associations to combine with other corporate entities. The proposed regulations authorize the merger of Federal stock associations only with institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation and consolidations only with other Federal associations. Respondents are of the opinion that the regulations are too restrictive. It is their belief that Federal stock associations should have the authority to combine with non-Federal Savings and Loan Insurance Corporation insured state associations and non-Federal Savings and Loan Insurance Corporation insured corporations such as, real estate investment trusts and shell corporations. Such expansion of the proposed regulations is impermissible for the limitations imposed by these regulations reflect limitations which are expressly stated in the Home Owners' Loan Act of 1933. Specifically, Section 5(d)(11) of the Act limits combinations to institutions

the accounts of which are insured by the Federal Savings and Loan Insurance Corporation.

The proposed regulations would require that consolidation or merger of a Federal Stock association be approved by a two-thirds vote of its entire board of directors and voting stockholders. Several commenters believe that these voting requirements are overly restrictive and protectionist.

The proposed two-thirds of outstanding shares requirements was chosen after careful consideration by the Board. The Board recognizes that the National Bank Act and a substantial majority of the states including New York, California, and Illinois require a two-thirds vote, whereas Delaware and the Model Business Corporation Act require only a majority vote. After full consideration of respondents' comments the state of the law, and the nature of the savings and loan industry, the Board deemed it appropriate to retain the two-thirds voting requirement. The Board has also determined to retain a required affirmative vote of two-thirds of the board of directors of a Federal stock association, on the grounds that extraordinary corporate actions such as merger should be pursued only if there is substantial unanimity among the directorate of the institution. In this regard, it should be noted that Federal mutuals must receive an affirmative vote of two-thirds of the entire board of directors to merge.

Two respondents were primarily concerned with the proposed requirement that a combination involving a Federal stock and mutual association must result in a mutual association. This limitation is based on the requirement of Part 563b of the Rules and Regulations for Insurance of Accounts (12 CFR Part 563b), which exclusively governs the conversion of institutions from the mutual to stock form. It is the opinion of the Board that a combination of a mutual and stock institution resulting in a stock institution is a *de facto* conversion, and as such is subject to the provisions of Part 563b. However, the Board considers this issue to be worthy of further study.

Three respondents believed the right to appraisal granted by proposed § 552.14 adequately protected the proprietary rights of dissenting stockholders, while two respondents were of the opinion that the rights extended to dissenters were too liberal.

The right of appraisal is granted to stockholders of associations other than associations listed on a national securities exchange. Two respondents believe the right of appraisal should accrue only if a viable trading market

for dissenters' shares does not exist. The Board has determined, however, that use of a viable trading market standard or other similar concept model is not feasible due to the inherent vagueness and ambiguity of such concepts. The viability of a trading market is contingent upon the number of shares as to which the right of appraisal will be exercised. Since the determination of this number can be made only after the stockholders vote, a fundamental question for stockholders, that of whether the right of appraisal shall exist, will not be known at the time of the stockholders' meeting. The Board believes stockholders should know in advance whether or not the right of appraisal shall exist. The use of the listed on a national securities exchange standard further assures dissenting stockholders of a viable alternative market for their shares. However, the Board will monitor the experience of associations under the Section to determine if a more liberal test can be adopted in the future.

The advisability of the Board's participation in the appraisal process has been questioned by several respondents. Upon determination that a proper demand for appraisal has been made, the Board may either direct its Office of Economic Research, or if it so elects appoint one or more independent persons, to appraise the shares of dissenting stockholders. An appraisal report is prepared and submitted to the Board for its consideration and concurrence. As structured, the proposed process of appraisal affords the Board the flexibility needed in determining who shall conduct the appraisal while retaining the authority to review the report for adequacy and fairness.

One respondent expressed concern over the possible use of the proposed appraisal procedures to harass the merging association. The particular concern was that the merging association would be required to bear the cost of an appraisal where the dissenting stockholders refuse reasonable offers of settlement. The respondent recommended that the Board follow the procedures of the Model Business Corporation Act. In considering this comment and the trend in various State statutes, the Board has determined that the proposal should be revised to encourage informal resolution of any differences between stockholders and the association, and to deter vexatious appraisal demands. Revised § 552.14 as included in the amendment requires that the merging association make a written offer to dissenting

stockholders for the dissenting shares. Section 552.14(c) gives the association and dissenter sixty days in which to agree on a fair value, after which an appraisal demand may be made. The final amendment further provides that the Board may apportion costs of the appraisal. While the merging associations would normally bear the cost, this provision has been added so that in a case where the appraisal demand is made in bad faith the Board may assess dissenting stockholders for all or part of the costs.

The amendments also contain two revisions to § 552.15 that are of a clarifying nature. The basis for waiver of stockholder rights in supervisory mergers has been clarified to include insolvency situations, and the definition of the term insolvency is stated in the revision. The remaining revisions to the proposal are intended to conform to the substantive changes discussed above or are of a clarifying nature.

PART 552—STOCK ASSOCIATIONS

Accordingly, the Federal Home Loan Bank Board hereby amends Part 552 of its Rules and Regulations for the Federal Savings and Loan System by adding new §§ 552.13, 552.14, and 552.15 thereto, to read as set forth below:

§ 552.13 Combinations Involving Charter S associations.

(a) *Scope and authority.* Charter S associations may enter into combinations only in accordance with the provisions of this section.

(b) *Definitions.* The following definitions apply to §§ 552.13 and 552.14 of this Part:

(1) *Association.* Any building and loan, savings and loan, or homestead association, or cooperative bank, organized under Federal or State law.

(2) *Consolidation.* Fusion of two or more associations into a newly-created association having the combined powers and rights of all its constituents.

(3) *Constituent association.* Resulting or disappearing association.

(4) *Disappearing association.*—(i) Any association whose corporate existence does not continue after a merger effected under this section, (ii) any constituent association consolidating under this section, or (iii) the selling association in the case of a bulk sale of assets in exchange for assumption of liabilities.

(5) *Merger.* Uniting two or more associations by the transfer of all property rights and franchises to one, which retains its name and corporate identity.

(6) *Mutual association.* Any association organized in a form not

requiring nonwithdrawable stock under Federal or State law.

(7) *Stock association.* Any association organized in a form requiring nonwithdrawable stock.

(8) *Resulting association.* An association that continues its corporate existence after, or is created by, a combination effected under this section.

(9) *State.* Includes the District of Columbia, Commonwealth of Puerto Rico, and States, territories, and possessions of the United States.

(c) *Forms of combination.* Charter S associations may combine with other associations in the following ways:

(1) Mergers or bulk purchases of assets in exchange for assumption of liabilities: *Provided*, that (i) all constituent associations have accounts insured by the Federal Savings and Loan Insurance Corporation, and (ii) if any constituent is a mutual association, the resulting association shall be mutually held.

(2) Consolidations among Federal associations resulting in Federal mutual associations.

(d) *Board approval.* Prior written approval of the Board is required for every combination. In determining whether to confer such approval, the Board shall apply the criteria set forth in § 571.5 of this Chapter.

(e) *Approval of board of directors.* Before filing for Board approval, the combination shall be approved by each constituent association's board of directors: (1) By a two-thirds vote of the entire board of each Federal association, and (2) as required by State law for other constituents.

(f) *Combination agreement.* (1) All terms, conditions, agreements or understandings, or other provisions with respect to the combination, shall be set forth fully in a written combination agreement.

(2) The combination agreement shall state: (i) That the combination shall not be effective unless and until approved by the Board; (ii) which constituent association is to be the resulting association; (iii) the name of the resulting association; (iv) the location of the home office and any other offices of the resulting association; (v) the terms and conditions of the combination and method of effectuation; (vi) any charter amendments, or the new charter in the event of consolidation; (vii) the manner of converting or exchanging the stock of each constituent association into stock, savings accounts, or other securities of the resulting association or cash, property, rights, or securities of any other entity in connection with the combination; (viii) the basis upon which the savings accounts of the resulting

association shall be issued; (ix) the number, names and residence addresses, and terms of directors; (x) the effect upon and assumption of any liquidation account of a disappearing association by the resulting association; and (xi) such other provisions, agreements, or understandings as relate to the combination.

(g) *Application for Board approval.* (1) *Contents.* Applications shall be in a form prescribed by the Board and shall include appropriate information regarding fairness and legal, economic, managerial, financial, disclosure, accounting, and tax aspects of the combination:

(2) *Filing requirement.* Constituent associations shall file jointly and concurrently two copies of the application prepared pursuant to this section with their Principal Supervisory Agent, and two with the Board's Office of the Secretary.

(h) *Notice* (1) *Publication of Notice.* Constituent associations shall jointly publish notice within 15 days of filing an application with the Board. Notice shall be published on the same day of each of two consecutive weeks in a newspaper printed in the English language and having a general circulation in the community or communities served by the constituent associations. If the Supervisory Agent determines that the primary language of a significant number of the adult residents of the community is a language other than English, she/he may require that notice also be given in the appropriate language(s). The notice shall include: (i) a statement that an application under this section has been filed with the Board; (ii) the name and address of the home or principal office of each constituent association; (iii) a brief summary of the principal terms of the combination agreement; (iv) the name and address of the home office of the resulting association; (v) a statement as to which officers of constituent associations are to be maintained as home office or branches and which are to be discontinued; (vi) a statement that any person may file written comments concerning the application which will be considered by the Board if filed with the Office of the Principal Supervisory Agent and the Office of the Secretary (with addresses disclosed) within 10 days (or within 30 days if advice is filed within the first 10 days stating that more time is needed to furnish additional information) of publication or such later date as may be permitted by the Office of the Principal Supervisory Agent; and (vii) a statement that the application and all comments filed pursuant to the notice

shall be available for public inspection by any person at the above offices, except for any material exempt from disclosure pursuant to the Freedom of Information Act. Promptly after publication of the notice, the constituent associations shall jointly file with the Board two copies of the notice and publisher's affidavit of publication.

(2) *Notice to State officials and other interested persons.* The Supervisory Agent shall give notice of the application to the State official who supervises savings and loan associations in the State in which the constituent associations are located, and to persons whose requests for announcements under § 563e.8 of the Rules and Regulations for Insurance of Accounts have been received in time for such notification; these notices shall be in addition to legal notification as set forth in paragraph (h)(1) of this section. The Supervisory Agent may also give notice to any other persons she/he believes might have an interest in the application.

(3) *Notice to stockholders.* In addition to publication, constituent Charter S associations shall mail notice of the filing of applications to stockholders within ten days of filing. The contents of such notice shall include the information prescribed by paragraph (h)(1) of this section.

(4) *Republication.* In the event of a determination by the Board's Office of the General Counsel that at the time notice was published the application was materially incomplete, each constituent association shall, in accordance with the directions of that Office, republish or redeliver such notice.

(5) *Procedure.* Processing of an application under this section shall follow the procedures set forth in this paragraph and in § 543.2(e)(2)-(5) and § 543.2(f) of this subchapter.

(i) *Approval by stockholders (1) Prior Board approval.* No meeting for the purpose of voting on a combination agreement shall be held, and no proxies for such meeting of a stock association shall be solicited, prior to the approval of the combination agreement by the Board.

(2) *Charter S stockholder approval.* Except as provided below in this section, an affirmative vote of two-thirds of the outstanding voting stock shall be required for approval of the combination agreement. If any class of shares is entitled to vote as a class pursuant to § 552.4 of this Part, an affirmative vote of a majority of the shares of each voting class and two-thirds of the total voting shares shall be

required. The required votes shall be taken at a meeting of the association.

(3) *Exceptions.* Stockholders of the resulting association need not authorize a combination agreement if: (i) The association's charter is not changed; (ii) each share of stock outstanding immediately prior to the effective date of the combination is to be an identical outstanding share or a treasury share of the resulting association after such effective date; and (iii) either (A) no shares of voting stock of the resulting association and no securities convertible into such stock are to be issued or delivered under the plan of combination, or (B) the authorized unissued shares or the treasury shares of voting stock of the resulting association to be issued or delivered under the plan of combination, plus those initially issuable upon conversion of any securities to be issued or delivered under such plan, do not exceed 15% of the total shares of voting stock of such association outstanding immediately prior to the effective date of the combination.

(j) *Disclosure.* The Board may require, in connection with a combination under this section, such disclosure of information as it deems necessary or desirable for the protection of investors in any of the constituent associations.

(k) *Articles of combination.* (1) Following stockholder approval, articles of combination shall be executed in duplicate by each association, by its chief executive officer or executive vice president and by its secretary or an assistant secretary, and verified by one of the officers of each association signing such articles, and shall set forth: (i) The plan of combination; (ii) the number of shares outstanding in each association; and (iii) the number of shares in each association voted for and against such plan.

(2) Both sets of articles of combination shall be filed with the Office of the Secretary which shall, if it finds that such articles conform to the requirements of this regulation, endorse the articles and return one set to the resulting association.

(l) *Effective date.* No combination under this section shall be effective until approved by the Board. The effective date of a combination in which the resulting association is a Charter S association shall be the date of endorsement of the articles of combination by the Office of the Secretary. The effective date of a combination in which the resulting association is not a Federal association shall be a date subsequent to Board approval prescribed by the law of the state under which the resulting

association is chartered. If a disappearing association combining under this section is a Charter S association, its charter shall be deemed to be cancelled as of the effective date of the combination; such charter shall be surrendered to the Board at the time of filing of the articles of combination.

(m) *Mergers and consolidations: transfer of assets and liabilities to resulting association.* Upon the effective date of merger or consolidation under this section, if the resulting association is a Federal association, all assets and property (real, personal, and mixed, tangible and intangible, choses in action, rights, and credits) then owned by each constituent association or which would inure to any of them, shall immediately by operation of law and without any conveyance, transfer, or further action, become the property of the resulting association. The resulting association shall be deemed to be a continuation of the entity of each constituent association, the rights and obligations of which shall succeed to such rights and obligations and the duties and liabilities connected therewith.

§ 552.14 Dissenter and appraisal rights.

(a) *Right to demand payment of fair or appraised value.* Except as provided in paragraph (b) of this section, any stockholder of a Charter S association combining in accordance with § 552.13 of this Part shall have the right to demand payment of the fair or appraised value of his stock: *Provided*, that such stockholder has not voted in favor of the combination and complies with the provisions of paragraph (c) of this section.

(b) *Exceptions.* No stockholder required to accept only qualified consideration for his stock shall have the right under this section to demand payment of the stock's fair or appraised value, if (1) such stock was listed on a national securities exchange on the date of the meeting of stockholders at which the combination was acted upon; or (2) stockholder action is not required for a combination made pursuant to § 552.13(i)(3) of this Part. "Qualified consideration" means cash, shares of stock of any association or corporation which at the effective date of the combination will be listed on a national securities exchange, or any combination of shares of stock and cash described above.

(c) *Procedure—(1) Notice.* Each constituent Charter S association shall notify all stockholders entitled to rights under this section, not less than twenty days prior to the meeting at which the combination agreement is to be submitted for stockholder approval, of

the right to demand payment of appraised value of shares, and shall include in such notice a copy of this section. Such written notice shall be mailed to stockholders of record and may be part of management's proxy solicitation for such meeting.

(2) *Demand for appraisal and payment.* Each stockholder electing to make a demand under this section shall deliver to the Charter S association, before voting on the combination, a writing identifying himself and stating his intention thereby to demand appraisal of and payment for his shares. Such demand must be in addition to and separate from any proxy or vote against the combination by the stockholder.

(3) *Notification of effective date and written offer.* Within ten days after the effective date of the combination, the resulting association shall (i) give written notice by mail to stockholders of constituent Charter S associations who have complied with the provisions of paragraph (c)(2) of this section and have not voted in favor of the combination, of the effective date of the combination; (ii) make a written offer to each stockholder to pay for dissenting shares at a specified price deemed by the resulting association to be the fair value thereof; and (iii) inform them that, within sixty days of such date, the respective requirements of paragraphs (c) (5) and (8) of this section (set out in the notice) must be satisfied. *The notice and offer shall be accompanied by a balance sheet and statement of income of the association the shares of which the dissenting stockholder holds, for a fiscal year ending not more than sixteen months before the date of notice and offer, together with the latest available interim financial statements.*

(4) *Acceptance of offer.* If within sixty days of the effective date of the combination the fair value is agreed upon between the resulting association and any stockholder who has complied with the provisions of paragraph (c)(2) of this section, payment therefor shall be made within ninety days of the effective date of the combination.

(5) *Petition to be filed if offer not accepted.* If within sixty days of the effective date of the combination the resulting association and any stockholder who has complied with the provisions of paragraph (c)(2) of this section do not agree as to the fair value, then any such stockholder may file a petition with the Board, with a copy by registered or certified mail to the resulting association, demanding a determination of the fair market value of the stock of all such stockholders. A stockholder entitled to file a petition under this section who fails to file such

petition within sixty days of the effective date of the combination shall be deemed to have accepted the terms offered under the combination.

(6) *Stock certificates to be noted.* Within sixty days of the effective date of the combination, each stockholder demanding appraisal and payment under this section shall submit to the transfer agent his certificates of stock for notation thereon that an appraisal and payment have been demanded with respect to such stock and that appraisal proceedings are pending. Any stockholder who fails to submit his stock certificates for such notation shall no longer be entitled to appraisal rights under this section and shall be deemed to have accepted the terms offered under the combination.

(7) *Withdrawal of demand.* Notwithstanding the foregoing, at any time within sixty days after the effective date of the combination, any stockholder shall have the right to withdraw his demand for appraisal and to accept the terms offered upon the combination.

(8) *Valuation and payment.* The Board shall, as it may elect, either appoint one or more independent persons or direct an appropriate Office of the Board to appraise the shares to determine their fair market value, as of the effective date of the combination, exclusive of any element of value arising from the accomplishment or expectation of the combination. An appropriate Office of the Board shall review and provide an opinion on appraisals prepared by independent persons as to the suitability of the appraisal methodology and the adequacy of the analysis and supportive data. The Board after consideration of the appraisal report and the advice of the appropriate Office shall, if it concurs in the valuation of the shares, direct payment by the resulting association of the appraised fair market value of the shares, upon surrender of the certificates representing such stock. Payment shall be made, together with interest from the effective date of the combination, at a rate deemed equitable by the Board.

(9) *Costs and expenses.* The costs and expenses of any proceeding under this section may be apportioned and assessed by the Board as it may deem equitable against all or some of the parties. In making this determination the Board shall consider whether any party has acted arbitrarily, vexatiously, or not in good faith in respect to the rights provided by this section.

(10) *Voting and distribution.* Any stockholder who has demanded appraisal rights as provided in subparagraph (2) of this paragraph shall

thereafter neither be entitled to vote such stock for any purpose nor be entitled to the payment of dividends or other distributions on the stock (except dividends or other distribution payable to, or a vote to be taken by stockholders of record at a date which is on or prior to, the effective date of the combination): *Provided*, that if any stockholder becomes unentitled to appraisal and payment of appraised value with respect to such stock and accepts or is deemed to have accepted the terms offered upon the combination, such stockholder shall thereupon be entitled to vote and receive the distributions described above.

(11) *Status.* Shares of the resulting association into which shares of the stockholders demanding appraisal rights would have been converted or exchanged, had they assented to the combination, shall have the status of authorized and unissued shares of the resulting association.

§ 552.15 Supervisory combinations.

Notwithstanding the foregoing provisions of this Part, the Board may determine to waive or deem inapplicable any part of §§ 552.13 or 552.14 insofar as it is deemed necessary to avert insolvency or imminent failure of a Charter S association. For purposes of such action under subsection 5(d) of the Home Owners' Loan Act, the term "member" shall include stockholders of a Charter S association. The term "insolvency" shall mean that the assets of the association are less than its obligations to its creditors and others including its depositors.

[T.D. 79-231]

Special Classes of Merchandise and Customs Bonds; Unfair Practices or Method of Competition

AGENCY: U.S. Customs Service,
Department of the Treasury.

ACTION: Final rule.

SUMMARY: This rule amends the procedures relating to the entry of merchandise involving, or believed to involve, unfair practices or methods of competition. This rule is necessary to conform the Customs Regulations to changes made in section 337, Tariff Act of 1930, as amended, by the Trade Act of 1974.

DATES: Effective date: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: As to the exclusion of merchandise from entry: Darrell D. Kast, Entry Procedures and Penalties Division (202-566-5765); as to bond requirements: William G. Rosoff, Carriers, Drawback and Bonds Division (202-566-5856), U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:**Background***Expanded Authority of the International Trade Commission*

Section 341(a) of the Trade Act of 1974, Pub. L. 93-618, 88 Stat. 2053, amended section 337 of the Tariff Act of 1930 ("the Act") (19 U.S.C. 1337) to expand the decision-making powers of the United States International Trade Commission ("the Commission").

Prior to its amendment, section 337 of the Act authorized the Commission (then designated the United States Tariff Commission) to investigate alleged unfair methods of competition or unfair acts in the importation of articles into the United States in order to assist the President in making decisions under that section. The Commission determined whether unfair methods or acts were being practiced, and whether these methods or acts had the effect or tendency to destroy or substantially injure an efficiently and economically operated United States industry, to prevent the establishment of a United States industry, or to restrain or monopolize trade and commerce in the United States. The Commission reported its findings to the President, and when the existence of an unfair method or act was established to his satisfaction, he directed the Secretary of the Treasury to exclude from entry the articles involved. If the President believed that section 337 was being violated but did not have sufficient information for a final determination, he could order the exclusion of the articles, or permit their entry under bond while the matter was being investigated.

As amended, section 337 grants the Commission final authority, subject to limited review by the President, to determine whether section 337 has been

violated and, insofar as Customs is concerned, to order the exclusion from entry of articles involved in the violation. During the Presidential review of a final determination of the Commission, the excluded articles may enter under bond. The Commission also is empowered, pending its determination of whether section 337 is being violated, to order exclusion from entry of the articles involved if it has reason to believe a violation exists, unless the articles entered under bond. Before ordering exclusion, the Commission is required to consider the effect of its action on the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers.

Under section 337 as amended, the President is permitted to intervene and disapprove for policy reasons any Commission determination of a violation of section 337, or its determination that reason exists for believing the section is being violated, within 60 days of receipt. In the event of Presidential disapproval, the Commission's order either to exclude the articles from entry or to require entry under bond will have no force or effect.

Applicable Customs Regulations

Section 12.39, Customs Regulations (19 CFR 12.39), relates to the exclusion from entry and the entry under bond of articles with respect to which, under section 337 of the Act, unfair methods of competition or unfair acts in the importation thereof have been found to exist. Footnote 26 to § 12.39 sets forth the relevant provisions of section 337. Amendments to § 12.39 are necessary to conform that section to the amended provisions of section 337. It also has been determined that footnote 26 to § 12.39 may be deleted because the substance of section 337 is being incorporated in amended § 12.39.

It also is necessary to amend § 113.14(z), Customs Regulations (19 CFR 113.14(z)), relating to the bond required for the entry of merchandise involving, or believed to involve, unfair procedures or unfair methods of competition, to reflect the new authority of the Commission, under the amended provisions of section 337 of the Tariff Act, to set the amount of that bond.

Determinations by the International Trade Commission

Section 12.39(a), Customs Regulations (19 CFR 12.39(a)), describes the former authority of the President to determine whether section 337 was violated, to order the exclusion of any merchandise

found in violation, and to require bond before entry of any merchandise under investigation by the Commission for an alleged violation of section 337. The purpose of this bond is to guarantee the exportation or destruction of merchandise found in violation.

Amended § 12.39(a) describes the present authority of the Commission and the President. The amended section also details the Commission's authority to investigate and determine whether a violation of section 337 has occurred and notes that the Commission must publish its determination in the Federal Register to make it effective and refer the determination to the President for review.

The President may disapprove a Commission determination for policy reasons within 60 days after receipt. Amended section 12.39(a) outlines the effect of Presidential action. When the President disapproves a determination and informs the Commission of that disapproval, the determination ceases to be effective. On the other hand, if the President approves a determination before the 60-day period expires, or if the President permits the 60-day period to expire without taking any action, the determination becomes final.

Exclusion From Entry and Entry Under Bond

Amended § 12.39(b) describes the authority of the Commission to exclude from entry merchandise found or believed to be in violation of section 337 and to require a special rider to existing entry bonds to guarantee the merchandise's exportation or destruction upon a final determination that a violation exists.

Present § 12.39(b) describes the special entry bond requirement under former section 337 and contains instructions for setting the bond amount. Because the Commission now is authorized to set the bond amount, these instructions no longer are valid. However, the Secretary of the Treasury continues to have the authority to establish all other terms of the bond, including the bond format.

The applicable provisions of current law, including the Commission's authority to fix the bond amount, are set out in amended § 113.14(z) which also includes a rider to be attached to existing entry bonds. The cross-reference to Treasury Decision 45474 is eliminated because the bond format set out there does not reflect the changes made in section 337 by the Trade Act of 1974.

Notification to Importer

Amended § 12.39(b)(3) establishes procedures for disposing of imported merchandise determined to violate section 337 substantially similar to the procedures in present § 12.39(c).

These procedures included a requirement for a district director to notify an importer of any determination that the merchandise violates section 337 and to request the importer to export or destroy the merchandise under Customs supervision within 30 days from the date of notification. The provision for liquidated damages if he fails to do so within the 30-day period is continued.

Importations by the United States

Section 12.39(c) is new. The section incorporates a limited statutory exception to the general requirement for excluding imported merchandise that violates section 337. A violation based on a United States patent right normally requires the merchandise to be excluded from the United States. However, under § 12.39(c), merchandise otherwise prohibited from entry because it violates section 337 under a patent right may be imported if the merchandise is for United States Government use and the Government authorizes or consents to the importation.

Deletion of Footnote 26

Footnote 26 to Part 12, Customs Regulations (19 CFR Part 12), contains the relevant provisions of former section 337 of the Tariff Act of 1930, as amended. Because the relevant provisions of present section 337 are incorporated into the body of amended § 12.39, there no longer is any need to include the text of these provisions in a footnote. Accordingly, footnote 26 has been deleted.

Drafting Information

The principal authors of this document were William G. Rosoff, and John E. Elkins, Regulations and Legal Publication Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Inapplicability of Public Notice and Delayed Effective Date Requirements

Because these amendments merely conform the Customs Regulations to the current statutory language and require no public initiative, notice and public procedure thereon is found to be unnecessary, and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Amendments to the Regulations**PART 12—SPECIAL CLASSES OF MERCHANDISE**

Sections 12.39 and 113.14(z), Customs Regulations (19 CFR 12.39, 113.14(z)), are amended to read as follows:

1. Section 12.39 and its section heading are amended to read as follows:

§ 12.39 Imported articles involving unfair methods of competition or practices.

(a) *Determinations of the International Trade Commission.* Under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), unfair methods of competition and unfair practices in the importation or sale of articles, the effect or tendency of which is to destroy, substantially injure, or prevent the establishment of an efficiently and economically operated United States industry, or to restrain or monopolize trade and commerce in the United States, are unlawful. After an investigation of an alleged violation of section 337, the United States International Trade Commission ("the Commission") may determine that section 337 has been violated. The Commission also may determine during the course of its investigation that there is reason to believe that a violation of section 337 exists. The Commission's determination in either case is effective on the date of its publication in the Federal Register and is referred to the President, who may disapprove the determination for policy reasons on or before the close of a 60-day period beginning on the day after the day he receives a copy of the determination. A Commission determination disapproved by the President shall have no force or effect as of the date the Commission is notified of his disapproval. If the Commission's determination is not disapproved by the President during the 60-day period, or if he notifies the Commission before the close of the period that he approves the determination, the determination becomes final on the day after the close of the period or the day of the notification, whichever is earlier.

(b) *Exclusion from entry; entry under bond.* (1) If the Commission finds a violation of section 337, or reason to believe that a violation exists, it may direct the Secretary of the Treasury to exclude from entry into the United States the articles concerned which are imported by the person violating or suspected of violating section 337. The Commission's exclusion order remains in effect until the Commission determines, and notifies the Secretary of the Treasury, that the conditions which

led to the exclusion no longer exist, or until the determination of the Commission on which the order is based is disapproved by the President.

(2) During the period the Commission's exclusion order remains in effect, excluded articles may be entered under a special rider to existing entry bonds, as described in section 113.14(z) of this chapter. However, on or after the date that the Commission's determination of a violation of section 337 becomes final, as set forth in paragraph (a) of this section, articles covered by the determination shall be refused entry.

(3) District directors shall notify each importer or consignee of articles released under bond pursuant to paragraph (b)(2) of this section when the Commission's determination of a violation of section 337 becomes final and that entry of the articles is refused. The importer or consignee shall export or destroy the released articles under customs supervision within 30 days after the date of notification. The district director who released the articles shall assess liquidated damages in the full amount of the bond rider if the importer or consignee fails to export or destroy the released articles under Customs supervision within the 30-day period.

(c) *Certain importations by or for the United States.* Any exclusion from entry under section 337 based on claims of United States letters patent shall not apply to articles imported by and for the use of the United States, or imported for, and to be used for, the United States with the authorization or consent of the Government.

2. Footnote 26 to Part 12 is deleted.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624))

PART 113—CUSTOMS BONDS

Paragraph (z) of § 113.14 is amended to read:

§ 113.14 Bonds approved by the district director.

(z) *Special rider to existing entry bonds for entry of merchandise found or believed to involve unfair practices or methods of competition in violation of section 337, Tariff Act of 1930, as amended (19 U.S.C. 1337).* (1) A special rider to existing entry bonds for the entry of merchandise found or believed by the United States International Trade Commission ("the Commission") to involve unfair practices or methods of competition shall be taken under the provisions of section 337 (e) or (g)(3), Tariff Act of 1930, as amended (19

U.S.C. 1337 (e) or (g)(3)), in an amount determined by the Commission.

(2) The bond rider shall provide for the release of the merchandise pending a final determination of the question of its admissibility, and for its exportation or destruction under Customs supervision if it is determined finally that the merchandise shall be excluded from importation. The bond rider shall be in the following form:

Rider

Entry of merchandise believed to involve unfair practices or methods of competition in violation of section 337, Tariff Act of 1930, as amended (19 U.S.C. 1337)—To be added to Customs Forms 7551, 7553, 7595, 7601, and the General Bond for Smelting and Refining Warehouses.

In addition to any condition of the bond dated _____, in the amount of _____, executed

by _____, as principal, and _____, as surety, the principal and surety agree and stipulate the following condition also applies to that bond.

(1) The principal and surety recognize that the United States International Trade Commission prohibited entry into the United States of the following merchandise: _____, under the authority of section 337 of the Tariff Act of 1930, as amended.

(2) The principal and surety recognize that the Commission has prohibited entry of that merchandise until the investigation relating thereto is completed, or until its decision that there is a violation of section 337 has become final.

(3) The principal and surety recognize that certain merchandise prohibited from entry by the Commission was, or may be offered for entry into the United States while the Commission's prohibition is in effect.

(4) The principal and surety recognize that the principal desires to obtain a release of that merchandise pending a final determination of the merchandise's admissibility into the United States, as provided under section 337, and for that purpose, the principal and surety execute this stipulation:

If it is finally determined, as provided in section 337 of the Tariff Act of 1930, as amended, to exclude that merchandise from the United States then, on notification from the district director of Customs, the principal is obligated to export or destroy under Customs supervision the merchandise released under this stipulation within 30 days from the date of the district director's notification.

The principal and surety agree that if the principal defaults on that obligation, the principal and surety shall pay to the district director of Customs an amount as liquidated damages as may be demanded by him under the applicable law and regulations.

Witness our hands and seals

19 CFR Part 159

[TD 79-233]

Tomato Products From the European Community Final Countervailing Duty Determination

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Final Countervailing Duty Determination.

SUMMARY: This notice is to inform the public that a countervailing duty investigation has resulted in a final determination that the Commission of the European Community grants to producers and exporters of tomato products benefits which constitute bounties or grants within the meaning of the countervailing duty law. The deposit of countervailing duties in the amount of these benefits will be required at the time of entry in addition to duties normally collected on dutiable shipments of this merchandise.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: Edward Haley, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229, telephone (202) 566-5492.

SUPPLEMENTARY INFORMATION: On March 15, 1979, a notice of "Preliminary Countervailing Duty Determination" was published in the Federal Register (44 FR 15825). The notice stated that it had been preliminarily determined that benefits bestowed by the Commission of the European Community (EC) upon the manufacture, production, or exportation of tomato products constitute the payment of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to as the "Act").

For purposes of this notice, "tomato products" are canned tomatoes and tomato concentrates (paste and sauce,

including pulp), classified under item numbers 141.6520, 141.6540, and 141.6600 of the Tariff Schedules of the United States Annotated (TSUSA).

The preliminary determination stated that bounties or grants are paid under a program established by the EC which consists of production aid paid to processors of tomato products in order to support the price level of this merchandise and guarantee a remunerative income to tomato growers.

Interested parties were invited to submit relevant data, views or argument either orally or in writing with respect to the preliminary determination. After consideration of the available information, it is hereby determined that exports of tomato products from the EC benefit from bounties or grants within the meaning of section 303 of the Act.

Accordingly, notice is hereby given that tomato products which are imported directly from the EC, if entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the Federal Register, will be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed.

In accordance with section 303 of the Act and until further notice, the net amount of such bounties or grants has been ascertained and determined to be, in terms of the U.S. import value of the merchandise on a Customs valuation basis, 62.3 percent for goods imported under TSUSA item number 141.6520; 98.1 percent for goods imported under item number 141.6540; and 31.9 percent for goods imported under item number 141.6600.

Effective on or after the publication date of this notice, and until further notice, upon the entry, or withdrawal from warehouse, for consumption of such tomato products imported directly or indirectly from the EC, which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of tomato products from the EC are benefiting from a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be assessed and collected.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be credited or bestowed, directly or indirectly, upon the manufacture,

production or exportation of tomato products from the EC.

§ 159.49 [Amended]

The table in section 159.49(f), Customs Regulations (19 CFR 159.49(f)) is amended by inserting after the last entry for "European Community", the words "tomato products" in the column headed "Commodity"; the number of this Treasury Decision in the column headed "Treasury Decision"; and the words "Bounty Declared-Rate" in the column headed "Action".

(R.S. 251, as amended, secs. 303, as amended, 624, 46 Stat. 687, as amended, 759 (19 U.S.C. 66, 1303, 1624).)

This final determination is published pursuant to section 303(a), Tariff Act of 1930, as amended (19 U.S.C. 1303(a)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order No. 101-5, May 16, 1979, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and section 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

David R. Brennan,

Acting General Counsel of the Treasury.

BILLING CODE 4810-22-M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 561

[FAP 7H5156/T50; FRL 1302-1]

Profenofos; Renewal of Feed Additive Regulations

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule renews a feed additive regulation related to the experimental use of the pesticide profenofos in or on cottonseed hulls and soapstock. The renewal was requested by Ciba-Geigy Corp. This rule will permit the marketing of cottonseed hulls and soapstock while further data is collected on the subject pesticide.

EFFECTIVE DATE: Effective on August 22, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. William Miller, Product Manager (PM) 16, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460 (202/426-9458).

SUPPLEMENTARY INFORMATION: On July 31, 1978, the EPA announced (43 FR 33238) that in response to a petition (FAP 7H5156) submitted by Ciba-Geigy Corp., Agricultural Div., PO Box 11422, Greensboro, NC 27409, 21 CFR 561.53 was being established to permit residues of the insecticide profenofos (O-(4-bromo-2-chlorophenyl)-O-ethyl S-propyl phosphorothioate) and its metabolites converted to 4-bromo-2-chlorophenol (calculated as the parent compound) in cottonseed hulls at 6 parts per million (ppm) and soapstock at 15 ppm resulting from application of the insecticide to growing cotton in a proposed experimental program in accordance with an experimental use permit that was being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136). This experimental program expired August 1, 1979.

Ciba-Geigy Corp. has requested a one-year renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of food commodities affected by the application of the insecticide profenofos to cottonseed hulls and soapstock.

The scientific data reported and other material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permit which is being concurrently renewed under FIFRA. (A related document concerning the renewal of temporary tolerances for residues of the subject pesticide in or on the raw agricultural commodities cottonseed; eggs; and the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep appears elsewhere in today's Federal Register.) Accordingly, a feed additive regulation is renewed as set forth below.

Any person adversely affected by this regulation may, on or before September 21, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M St., SW, Washington, DC 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or

whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective on August 22, 1979, 21 CFR 561.53 is amended as set forth below.

Dated: August 16, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)))

21 CFR 561.53 is amended by revising the heading and paragraph (a) to read as follows:

§ 561.53 Profenofos.

(a) Tolerances are established for residues of the insecticide profenofos (O-(4-bromo-2-chlorophenyl)-O-ethyl S-propyl phosphorothioate) and its metabolites converted to 4-bromo-2-chlorophenol (calculated as the parent compound) in cottonseed hulls at 6 parts per million and soapstock at 15 parts per million resulting from application of the insecticide to growing cotton. Such residues may be present therein only as a result of application of the insecticide in accordance with the provisions of an experimental use permit that expires August 16, 1980.

BILLING CODE 6560-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 5677

Alaska; Modification of Public Land Order Nos. 5653 and 5654

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This public land order modifies Public Land Order Nos. 5653 and 5654 so that the Arctic Slope Region may receive conveyance of certain lands in the Killik River area of Alaska.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: Beau McClure 202-343-6511 or Bob Arnold—Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

It is hereby determined that obligations and responsibilities of the Department of the Interior to assure an

expeditions settlement of Alaska Native Claims under the Alaska Native Claims Settlement Act of December 18, 1971 (hereinafter referred to as "ANCSA"), 43 U.S.C. Sec. 1601 *et seq.*, would be best discharged by modifying Public Land Order No. 5653 of November 16, 1978, as amended by Public Land Order No. 5654 of November 17, 1978, to permit the conveyance of certain lands in the Killik River area identified for selection by the Arctic Slope Regional Corporation under Section 17(d)(2)(E) of ANCSA, 43 U.S.C. Sec. 1616(d)(2)(E).

Therefore, by virtue of the authority vested in me by sections 204 and 701 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 and Sec. 1701 note, it is ordered as follows:

1. Public Land Order No. 5653 of November 16, 1978, 43 FR 59756, as amended by Public Land Order No. 5654 of November 17, 1978, 43 FR 59757, withdrawing lands from settlement, sale, location, entry, or selection under the operation of the public land laws to preserve values that would otherwise be lost by involuntary land dispositions is hereby modified to the extent necessary to permit the conveyance of the following lands to the Arctic Slope Regional Corporation pursuant to section 17(d)(2)(E) of ANCSA:

The mainstem of the Killik River upstream from the confluence with the Colville River and 2 miles outward from the ordinary high water mark of each river bank.

2. It is hereby determined that the promulgation of this Public Land Order is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy

Act of 1969, 42 U.S.C. 4332(2)(C) is required.

Guy R. Martin,
Assistant Secretary of the Interior.
August 15, 1979.

BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket FI 5685] 44 CFR Part 64 List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Insurance
Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638-6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood

Insurance Program, (202) 755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows: Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State	County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
Louisiana	LaSalle	Olla, town of	220343	Aug. 8, 1979, emergency, Aug. 8, 1979, regular.	
Nebraska	Cass	Avoca, village	310247-A	Aug. 3, 1979, emergency, Aug. 3, 1979, regular.	May 1, 1978.

BILLING CODE 4210-23-M

44 CFR Part 65

[Docket FEMA 5684]

List of Communities with Special Hazard Areas Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA

ACTION: Final rule

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The date listed in the eighth column of the table or September 21, 1979, whichever is later.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance on and after March 2,

1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by federally regulated, insured, supervised, or approved lending institutions (1) to finance the acquisition of a residential dwelling occupied as a residence prior to March 1, 1976, or one year following identification of the area within which such dwelling is located as an area containing special flood hazards, whichever is later, or made to extend, renew, or increase the financing or refinancing in connection with such a dwelling, (2) to finance the acquisition of a building or structure completed and occupied by a small business concern, as defined by the Director, prior to January 1, 1976, (3) any loan or loans, which in the aggregate do not exceed \$5,000, to finance improvements to or rehabilitation of a building or structure

occupied as a residence prior to January 1, 1976, or (4) any loan or loans, which in the aggregate do not exceed an amount prescribed by the Director, to finance nonresidential additions or improvements to be used solely for agricultural purposes on a farm.

This 30 day period does not supersede the statutory requirements that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 64 of Title 44 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001-4128).

Section 65.3 is amended by adding in alphabetical sequence a new entry to the table:

§ 65.3 List of communities with special hazard areas (FHBMs in effect).

Issued: August 13, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 79-25618 Filed 8-21-79; 8:45 am]

BILLING CODE 4210-23-M

44 CFR Part 67

[Docket No. 5686]

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain

management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii call Toll Free (800) 424-9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of

flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Gloria M. Jimenez,
Federal Insurance Administrator.

[FR Doc. 79-25816 Filed 8-21-79; 8:45 am]
BILLING CODE 4210-23-M

44 CFR Part 67

[Docket No. 5687]

National Flood Insurance Program;
Final Flood Elevation Determinations

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified

for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESS: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii Call Toll Free (800) 424-9080), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

DEPARTMENT OF COMMERCE
Maritime Administration
46 CFR Part 282
Uniform System of Accounts for Maritime Carriers; Reference to Office of Management and Budget Approval of Recordkeeping Requirements
AGENCY: Maritime Administration, Department of Commerce.
ACTION: Final rule (clarification).

SUMMARY: In 39 FR 16445 (May 9, 1974), reference was made to OMB approval of reporting requirements contained therein. This statement was inadvertently omitted when the regulation was published in the *Code of Federal Regulations* (46 CFR Part 282).

To correct this omission, 46 CFR 282.1 is amended by the addition of a sentence clarifying this approval. A determination has been made that this clarification of Agency authority to establish recordkeeping requirements is not a significant regulation or one requiring a regulatory analysis under the criteria that have been established pursuant to E.O. 12044 (43 FR 12661) and implementing procedures contained in Department of Commerce Administrative Order 218-7 (44 FR 2082).
EFFECTIVE DATE: August 22, 1979.
FOR FURTHER INFORMATION CONTACT: Michael Feeney, Office of Financial Management, Maritime Administration, Washington, D.C. 20230, Telephone: (202) 377-5624.
Accordingly, 46 CFR 282.1(a) is

amended by adding a sentence at the end to read as follows:
§ 282.1 In general.
(a) *Purpose.* * * * The recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942. (Sec. 204(b), Merchant Marine Act, 1936, as amended (46 U.S.C. 1114(b)), sec. 801 of Pub. L. 74-835, as amended (46 U.S.C. 1211).)
Dated: August 15, 1979.
By Order of the Acting Assistant Secretary of Commerce for Maritime Affairs.
Robert J. Patton, Jr.,
Acting Secretary, Maritime Administration.

BILLING CODE 3510-15-M

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE
[7 CFR Part 14]
Implementing the Revenue Act of 1978; Determining the Primary Purpose of Certain Federal and State Payments
AGENCY: Department of Agriculture.
ACTION: Proposed rule.

SUMMARY: This action proposes criteria to be used by the Secretary of Agriculture in determining the primary purpose of certain Federal and State cost-sharing payments. When the criteria became final, the Secretary will apply them to Federal and State programs and propose determinations for public comment before making final determinations. After the final determinations of purpose are made, recipients may exclude cost-sharing payments from their gross income provided that the Secretary of the Treasury separately determines that these payments do not increase substantially their annual income.
DATE: Comments on the proposal must be received on or before September 21, 1979, in order to be assured of consideration in the final rule.
ADDRESS: Comments should be submitted to and are available for examination in the office of: Dr. Arnold Miller, Office of Budget, Planning and Evaluation, Office of the Secretary, Room 117-A Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250. [(202) 447-3465].
FOR FURTHER INFORMATION CONTACT: Dr. Arnold Miller, (202) 447-3465.
SUPPLEMENTARY INFORMATION: (1) *General.* Section 543 of the Revenue Act of 1978 (Pub. L. 95-600, hereafter referred to as the "Act") amends the Internal Revenue Code of 1954 to provide that certain payments, or portions thereof, received through Federal or State programs can be excluded from gross income for Federal income tax purposes. The exclusions

apply to the extent that the Secretary of Agriculture determines that such payments, or portions thereof, are made primarily for the purposes of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing wildlife habitat, and to the extent that the Secretary of the Treasury determines that such payments, or portions thereof, do not increase substantially the annual income derived from the property associated with the payments.
A deduction, depreciation, amortization, or investment credit may not be claimed with respect to amounts excluded from gross income by Section 543 of the Act. If associated property or improvements are disposed of within twenty years, some or all of any capital gain may be treated as ordinary income. Section 543 applies to payments made after September 30, 1979, and is incorporated into the Internal Revenue Code of 1954 as Section 126 (exclusion), and as Section 1255 (recapture).
The Department of Agriculture is working with the Department of the Treasury to implement Section 543 of the Act. This proposal, however, is limited to the responsibilities of the Secretary of Agriculture as prescribed in Section 543.
(2) *Form of Determinations.* After the proposed criteria have been promulgated as final rules, the Secretary of Agriculture will apply them to applicable Federal and State payments to determine the primary purpose for which the payments are made. Proposed determinations will be published in the *Federal Register* for public comment before final determinations are made. The determinations may be made on the basis of entire programs, categories of practices or measures within programs, or on the basis of individual payments.
(3) *Alternatives Considered.* The regulatory approach outlined in this proposal was selected from among three broad alternatives. Each broad alternative was composed of specific elements pertinent to eight areas of discretion.
The first broad alternative is embodied in the proposed rule. The specific elements of the proposal may be summarized as follows:
1. Invoke executive interpretation to extend applicability to payments received under State water conservation programs.

2. Limit soil conservation to the prevention of soil deterioration in the forms of erosion and chemical changes affecting the long-term productivity of the resource.
3. Define water conservation as actions which, for a given level of water supply, reduce the demand for or use of water by improving efficiency in use, reducing loss or waste, increasing recycling and reuse, and related land management practices.
4. Define environmental protection as those actions which will prevent man-caused or man-induced reductions in the natural complex of conditions in which people live.
5. Invoke executive interpretation to extend environmental restoration to include the reestablishment and enhancement of the quantity or quality of natural conditions which existed prior to man-caused or man-induced degradation.
6. Define forestry improvement to include the direct conservation or enhancement of the timber resource itself.
7. Include in wildlife habitat the physical and biological conditions in which non-domesticated and non-cultivated forms of animal and plant life, of value to the public apart from that which is realized as direct private economic gain, normally live in their natural state.
8. Define State payments as those received under programs authorized and funded, in whole or in part, by the legislative body of any of the 50 States or the District of Columbia.
The second broad alternative would involve the following specific elements:
1. Reject executive interpretation extending applicability to State payments for water conservation.
2. Restrict soil conservation to include only erosion reduction
3. Exclude related land management activities from the definition of water conservation.
4. Limit the recognized components of the environment to those involving immediate and direct threats to human health and safety.
5. Reject environmental enhancement from the definition of environmental restoration.
6. Constrain forestry improvement to the reestablishment of previously existing timber stands.

7. Limit wildlife habitat to only that of endangered or otherwise threatened species.

8. Restrict State programs to include only those authorized and funded, in total, by any of the 50 States and the District of Columbia.

The third broad alternative would involve the following specific elements.

1. Invoke executive interpretation extending applicability to State payments for water conservation.

2. Extend the definition of soil conservation to include land improvement.

3. Extend the definition of water conservation to include supply development.

4. Expand the definition of environmental protection to include not only prevention of man-caused or man-induced degradations in the natural environment but also damage to the physical environment brought about by natural occurrences.

5. Extend environmental restoration to include all forms of enhancement, including physical modifications, regardless of whether or not degradation has occurred.

6. Expand the definition of forestry improvement to include all aspects of timber production.

7. Expand the definition of wildlife habitat to include that of species husbanded for profit.

8. Extend the definition of State programs to include those of substate political entities.

(4) *State Programs.* In addition to Federal payments, payments received by persons under programs administered by State governments may qualify for exclusion from gross income for Federal tax purposes.

States that seek an exclusion from gross income with respect to payments made under their programs should notify the Secretary of Agriculture under the procedure specified in this proposal. States that have submitted materials in response to (1) the May 24, 1979 letter sent to all governors on this subject or, (2) to the advance notice of proposed rulemaking that appeared in the June 29, 1979 Federal Register (44 FR 37953) need not resubmit materials in response to this proposed rule.

Section 14.0(a) of the proposal defines State programs as those authorized directly by an act of the legislative body of any of the fifty States or the District of Columbia, and funded at least in part by appropriations made by the same legislative body. Generally, this definition would tend to exclude programs authorized and funded by substate entities. A number of comments, received in response to the

advance notice on this action (44 FR 37953-4, June 29, 1979), suggested that State programs be defined to include those of substate entities. The Department is considering these comments and remains open to further comment on this subject.

(5) *Pending Legislation.* This proposal reflects the pertinent amendments to the Internal Revenue Code of 1954 as contained in the Revenue Act of 1978. A current bill, H.R. 2797, would amend the Revenue Act of 1978 if enacted. As currently written, this bill would affect the proposed rule by making the provisions of Section 543 of the Act electable at the option of the taxpayer. Generally, this would not affect the responsibilities of the Secretary of Agriculture under Section 543 of the Act. However, reviewers of the proposal should be aware of the potential for further amendments to the authority on which the proposal is based.

Accordingly, it is proposed that 7 CFR, Subtitle A, Part 14 read as follows:

PART 14—DETERMINATION OF THE PRIMARY PURPOSE OF CERTAIN FEDERAL AND STATE COST-SHARING PAYMENTS FOR FEDERAL TAX PURPOSES

- Sec.
14.1 Purpose.
14.2 Applicability and scope.
14.3 Objective.
14.4 Policy.
14.5 Criteria for determining the primary purpose of Federal payments with respect to exclusion from gross income.
14.6 State payments.

Authority: Sec. 543, Pub. L. 95-600; 5 USC 301.

§ 14.1 Purpose.

(a) This part sets forth the Department's regulations for determining the primary purpose of certain Federal and State cost-sharing payments. Determining the primary purpose for which applicable cost-share payments are made is one step toward the exclusion of all or part of such payments from gross income for Federal income tax purposes.

(b) To be excluded from gross income, all or part of applicable cost-sharing payments must: (1) be determined by the Secretary of Agriculture to be made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing habitat for wildlife; and (2) be determined by the Secretary of the Treasury as not increasing substantially the annual income derived from the property associated with the payments.

(c) The regulations set forth in this part apply only to the determinations to be made by the Secretary of Agriculture.

§ 14.2 Applicability and scope.

(a) This part applies only to cost-sharing payments received under the Federal and State programs listed in paragraphs (1) through (10) below.

(1) The rural clean water program authorized by Section 208(j) of the Federal Water Pollution Control Act (33 U.S.C. 1288(j)).

(2) The rural abandoned mine program authorized by section 406 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1236).

(3) The water bank program authorized by the Water Bank Act (16 U.S.C. 1301 et seq.).

(4) The emergency conservation measures program authorized by title IV of the Agricultural Credit Act of 1978 (16 U.S.C. 2201 et seq.).

(5) The agricultural conservation program authorized by the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590a).

(6) The great plains conservation program authorized by Section 16 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590p(b)).

(7) The resource conservation and development program authorized by the Bankhead Jones Farm Tenant Act and by the Soil Conservation and Domestic Allotment Act (7 U.S.C. 1010; 16 U.S.C. 590a et seq.).

(8) The forestry incentives program authorized by section 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103).

(9) Any small watershed program administered by the Secretary of Agriculture which is determined by the Secretary of the Treasury to be substantially similar to the type of programs described in paragraphs (a)(1) through (8) of this section.

(10) Any State program under which payments are made to individuals primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife.

(b) Payments received under programs not listed in paragraphs (a)(1) through (10) of this section will not be considered as eligible for exclusion from gross income under this part.

(c) The criteria set forth in § 14.5 for determining the primary purpose of Federal cost-sharing payments shall also be used to determine the primary purpose of payments made under State programs with respect to the applicability of this part.

§ 14.3. Objective.

(a) The intent of determinations made pursuant to this part is to encourage participation in certain voluntary Federal and State cost-share programs yielding conservation and environmental benefits to the public beyond those which accrue to participating landowners and users by effectively helping to reduce the Federal income tax liability on all or part of cost-sharing payments commensurate with public benefits.

§ 14.4. Policy.

(a) Federal tax, conservation, natural resource, and environmental policies should complement rather than conflict with one another.

(b) The recipients of Federal and State cost-sharing payments for conserving soil and water resources, protecting or restoring the environment, improving forests, or providing habitat for wildlife, should be allowed to exclude them from gross income for Federal income tax purposes to the extent that such payments are determined not to increase substantially the annual income derived from the property associated with the payments.

§ 14.5. Criteria for determining the primary purpose of Federal payments with respect to exclusion from gross income.

(a) *Soil conservation.* (1) Payments shall be considered to be made primarily for the purpose of soil conservation if they are intended to finance activities, measures, or practices to reduce soil deterioration.

(2) Soil deterioration refers to those impairments of the physical or chemical properties of soil which are largely irreversible and which can be expected to result in a long-term or permanent reduction in the productive capacity of the resource regardless of the level of technology available or applied. Erosion by water and wind and those chemical changes which result in permanent or long-term reductions in the productive capacity of the soil are considered to be forms of soil deterioration.

(b) *Water conservation.* (1) Water conservation is defined to include those actions which, for a given level of water supply, will reduce the demand for or use of water by:

- (i) Improving efficiency in use;
- (ii) Reducing losses and waste;
- (iii) Increasing the recycling or reuse of water thereby making existing supplies available for alternative current or future uses;

(iv) Improving land management practices for the purpose of reducing water use, loss, waste, increasing the

efficiency of water use, or increasing the recycling or reuse of water.

(2) Payments shall be considered to be made primarily for the purpose of water conservation if they are intended to finance actions, measures, or practices that can be expected to result in impacts of the types listed in paragraphs (b)(1) (i) through (iv) of this section.

(c) *Protecting the Environment.* (1) Payments will be considered to be made primarily for the purpose of protecting the environment if they are intended to finance actions, measures, or practices undertaken to prevent man-caused or man-induced reductions or degradations in the quantity or quality of the natural external or extrinsic conditions directly or indirectly affecting people.

(2) External or extrinsic conditions refer to the complex of natural conditions or circumstances, including but not limited to, those affecting public health and safety, in which people reside or otherwise carry out their lives.

(d) *Restoring the Environment.* (1) Payments will be considered to be made primarily for the purpose of restoring the environment if they are intended to finance actions, measures, or practices undertaken to reestablish, return, or enhance the quantity or quality of the natural external or extrinsic conditions directly or indirectly affecting people which existed prior to man-caused or man-induced degradation.

(2) External or extrinsic conditions has the same meaning with respect to restoring the environment as it does for protecting the environment.

(e) *Improving Forests.* (1) Payments will be considered to be made primarily for the purpose of improving forests if they are intended to finance actions, measures, or practices undertaken for the direct conservation or enhancement of the quantity or quality of timber resources.

(2) Improving forests includes the generation and regeneration of timber stands as well as the silvicultural improvement of the condition of existing stands.

(f) *Providing Habitat for Wildlife.* (1) Payments will be considered to be made primarily for the purpose of providing habitat for wildlife if they are intended to finance actions, measures, or practices directly leading to the establishment of those physical and biological conditions or resources that can reasonably be expected to support primarily non-cultivated and non-domesticated animal and plant life of value to the public in their natural state apart from that which may be realized as private economic gain.

(2) Wildlife includes, but is not limited to, species of terrestrial or aquatic animals and plants.

(3) Habitat includes, but is not limited to, the food supply, water supply, nesting and escape cover necessary to support populations of wildlife species. Included in the definition of wildlife habitat are domestic crops raised for the primary purpose of providing food supply or cover for specific wildlife species.

§ 14.6 State payments.

(a) *Definition of State programs.* (1) State programs means those programs authorized directly by an act of the legislative body of any of the 50 States, and the District of Columbia, and funded at least in part by appropriations made by the same legislative body.

(b) *Applicability.* (1) Payments received through State programs under which payments are made to individuals primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife may be considered for exclusion from gross income.

(c) *Determining the purpose of payments.* (1) The determination of the primary purpose for which payments are made under State programs with respect to exclusion from gross income shall be made using the criteria as set forth in § 14.5.

(d) *Procedure for determining the primary purpose of payments made under State programs.* (1) to initiate consideration of the primary purpose of payments made under State programs, the Governor, or his delegate, should provide six copies of the following materials relating to such programs to the Secretary of Agriculture.

- (i) Authorizing legislation.
- (ii) Rules or regulations governing the programs.
- (iii) Current policies and procedures under which payments are made.
- (iv) A description of all practices or measures for which payments are made.

Determination

Note.—This proposal has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulation," and has been classified "significant." An approved draft impact analysis is available from Dr. Arnold Miller at the address specified above. *Note.*—Executive Order 12044 provides that a minimum comment period of 60 days be provided whenever possible. This proposal is not expected to be controversial. Delaying implementation of the proposal may result in a delay in realization of benefits under applicable Federal and State programs. Accordingly, it is determined that a 30-day period for public comment is adequate.

Signed at Washington, D.C., August 17, 1979.

Bob Bergland,
Secretary.

[FR Doc. 79-25900 Filed 8-21-79; 8:45 am]
BILLING CODE 3410-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[14 CFR Part 1214]

Authority of the Space Transportation System (STS) Commander

AGENCY: National Aeronautics and Space Administration.

ACTION: Proposed rule.

SUMMARY: The proposed regulations would set forth the authority of the Space Transportation System commander. The commander is ultimately responsible for maintaining order and discipline and for the safety of all personnel aboard a Space Shuttle flight, as well as for the safety of the Space Shuttle itself, STS elements and payloads. Under this regulation, the commander's authority applies to all persons aboard the Space Shuttle, including those persons engaged in extravehicular activity (EVA), and it includes the right to use any reasonable and necessary means, including the use of physical force, to ensure that such responsibility is fulfilled.

DATE: Written comments should be received not later than 60 days following publication in the Federal Register.

ADDRESS: Office of Space Transportation Systems, Mail Code MSP-2, NASA Headquarters, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Robert T. O'Neil, 202/755-2424.

SUPPLEMENTARY INFORMATION: In the past, all persons who have launched into outer space aboard United States spacecraft have been both nationals of the United States and employees of the United States Government.

On STS flights it is expected that some persons will be flown who will be neither United States nationals nor employees of the United States Government. The purpose of the proposed regulation is to make clear the fact that all persons aboard the Space Shuttle, including those participating in extravehicular activities (EVA), will be subject to the authority of the STS commander or a flight crew member who succeeds to the commander's authority. These proposed regulations will affect persons outside of NASA and, because of this, public comment is being invited on this proposal.

14 CFR Part 1214 is amended by adding a new Subpart 1214.7 reading as follows:

Subpart 1214.7—The Authority of the Space Transportation System (STS) Commander

Sec.

1214.700 Scope.

1214.701 Definitions.

1214.702 Authority and responsibility of STS commander.

1214.703 Chain of command.

1214.704 Violations.

Authority: Pub. L. 95-568; 72 Stat. 426; 42 USC 2473, 2455; 18 USC 799; Art. VIII, TIAS 6347 (18 UST 2410).

Subpart 1214.7—The Authority of the Space Transportation System Commander

§ 1214.700 Scope.

This Subpart establishes the authority of the STS commander to enforce order and discipline during all flight phases of an STS flight to take whatever action in his/her judgment is necessary for the protection, safety, and well-being of all personnel and on-board equipment, including the STS elements and payloads. During the final launch countdown, following crew ingress, the STS commander has the authority to enforce order and discipline among all on-board personnel. During emergency situations prior to liftoff, the STS commander has the authority to take whatever action in his/her judgment is necessary for the protection or security, safety, and well-being of all personnel on board.

§ 1214.701 Definitions.

(a) *STS Elements* consists of the Orbiter, an External Tank, two Solid Rocket Boosters, Spacelab, Upper Stage Boosters (Solid Spinning Upper Stage and Interim Upper Stages) and others as specified in NASA Management Instruction 8040.3.

(b) The *Flight Crew* consists of the commander, pilot, and mission specialist(s).

(c) A *Flight* is the period from launch to landing of a Space Shuttle—a single round trip. (In the case of a forced landing the STS commander's authority continues until a competent authority takes over the responsibility for the Orbiter and for the persons and property aboard.)

(d) The *Flight-Phases* consist of launch, in orbit, deorbit, entry, landing, and postlanding.

(e) A *Payload* is a specific complement of instruments, space equipment, and support hardware/software carried into space to accomplish a scientific mission or discrete activity.

(f) *Personnel On Board* refers to those astronauts or other persons actually in the Orbiter or Spacelab during any flight phase of an STS flight (including any persons who may have transferred from another vehicle) and including any persons performing extra-vehicular activity associated with the mission.

§ 1214.702 Authority and responsibility of the STS commander.

(a) During all flight phases of an STS flight, the STS commander shall have the absolute authority to take whatever action is in his/her discretion necessary to (1) enforce order and discipline, (2) provide for the safety and well-being of all personnel on board, and (3) provide for the protection of the STS elements and any payload carried or serviced by the STS. The commander shall have authority throughout the flight to use any reasonable and necessary means, including the use of physical force, to achieve this end.

(b) The authority of the commander extends to any and all personnel on board the Orbiter including Federal officers and employees and all other persons whether or not they are U.S. nationals.

(c) The authority of the commander extends to all STS elements and payloads.

(d) The commander may, when he/she deems such action to be necessary for the safety of the STS elements and personnel on board, subject any of the personnel on board to such restraint as the circumstances require until such time as delivery of such individual or individuals to the proper authorities is possible.

§ 1214.703 Chain of command.

(a) The *Commander* is a career NASA astronaut who has been designated to serve as commander on a particular flight, and who shall have the authority and responsibility described in section 1214.702 of this Subpart. Under normal flight conditions (other than emergencies) the STS commander is responsible to the Flight Director, Johnson Space Center, Houston, TX.

(b) The *Pilot* is a career NASA astronaut who has been designated to serve as the pilot on a particular flight and is second in command of the flight. If the commander is unable to carry out the requirements of this Subpart, then the pilot shall succeed to the duties and authority of the commander.

(c) Before each flight, the other flight crew members (Mission Specialists) will be designated by the Director of Flight Operations, Johnson Space Center, Houston, TX, in the order in which they will assume the responsibilities and

authority of the commander under this Subpart in the event that the commander and pilot are both not able to carry out their duties.

§ 1214.704 Violations.

(a) All personnel on board an STS flight are subject to the authority of the commander and shall conform to his/her orders and direction as authorized by this Subpart.

(b) This regulation is a regulation within the meaning of 18 U.S.C. 799, and whoever willfully violates, attempts to violate, or conspires to violate any provision of this Subpart or any order or direction issued under this Subpart shall be fined not more than \$5,000 or imprisoned not more than 1 year, or both.

Robert A. Frosch,

Administrator.

August 13, 1979.

BILLING CODE 7510-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Parts 1, 20, and 25]

(EE-53-79)

Income Tax; Exemption for Certain Amateur Athletic Organizations; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the exemption of certain amateur athletic organizations from tax and the deductibility of contributions to organizations that qualify for the exemption.

DATES: The public hearing will be held on October 9, 1979, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by September 24, 1979.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE-53-79), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: George Bradley or Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111

Constitution Avenue, N.W., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 170 and 501 of the Internal Revenue Code of 1954. The proposed regulations appeared in the Federal Register for Thursday, May 10, 1979, at page 27446 (44 FR 27446).

The rules of § 601.601(a)(3) of the Statement of Procedural Rules (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and also desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by September 24, 1979. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the Federal Register for Wednesday, November 8, 1978.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Director, Employee Plans and Exempt Organizations Division.

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: EPA proposes a rule requiring that States wishing to receive or maintain authority to administer the Hazardous Waste Management Program

under the Resource Conservation and Recovery Act; the Underground Injection Control program under the Safe Drinking Water Act; or the National Pollutant Discharge Elimination System, or section 404 programs under the Clean Water Act allow citizens to intervene as of right in State enforcement actions.

DATE: Comments must be received by October 9, 1979.

ADDRESS: Comments should be submitted to David Schnapf, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, (202) 755-0750.

A copy of all comments received will be available for review during normal business hours at the Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: David Schnapf, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, (202) 755-0750.

SUPPLEMENTARY INFORMATION: On June 14, 1979, EPA proposed consolidated permit regulations which included, as 40 CFR Part 123, minimum requirements for States wishing to receive or maintain authority to administer the Hazardous Waste Management Program under the Resource Conservation and Recovery Act (RCRA); the Underground Injection Control (UIC) program under the Safe Drinking Water Act (SDWA); or the National Pollutant Discharge Elimination System (NPDES), or section 404 programs under the Clean Water Act. As part of these minimum requirements EPA specified a range of mechanisms to ensure that States have both adequate enforcement authority and allow adequate public participation in the administration of the program. In that proposal, however, EPA indicated that it did not believe it was necessary to provide a right of citizen intervention in State enforcement actions to satisfy these objectives.

EPA has reassessed the necessity for requiring the opportunity for citizen intervention in State enforcement in light of the opinion of the United States Court of Appeals for the Seventh Circuit in *Citizens for a Better Environment v. Environmental Protection Agency*, "CBE" (No. 78-1042, decided January 28, 1979; Petition for rehearing denied May 18, 1979; Stay of enforcement of order granted May 30, 1979). In that opinion, the Court, ruling on a challenge to the Administrator's approval of the Illinois NPDES program, held that the Agency

had not adequately implemented the requirements of public participation contained in section 101(e) of the Clean Water Act. That section provides that:

Public participation in the . . . enforcement of any regulation, standard, effluent limitation, plan or any program established by the Administrator or any State under this Act shall be provided for, encouraged, and assisted by the Administrator and the States. The Administrator, in cooperation with the States, shall develop and publish regulations specifying minimum guidelines for public participation in such processes.

The Court concluded that the Agency's existing regulations, which require among other things that States have provisions for receipt of citizen complaints and provide the public with access to NPDES permit data, do not ensure public participation in the enforcement process itself. The Court, however, did not specify what provisions might be required. Although the Court invalidated the Administrator's approval of the Illinois NPDES program, it has stayed the enforcement of its order until February 23, 1980, in order to provide EPA an opportunity to revise its regulations.

In response to the *CBE* decision, EPA is today proposing a rule which will require that States wishing to receive or maintain authority to administer the NPDES, section 404, UIC or hazardous waste programs allow citizens to intervene as of right in any civil action brought in State court to enforce elements of the program. Although *CBE* dealt with provisions of the Clean Water Act, similarity in statutory language and congressional intent may warrant extension of the Courts holding to RCRA and SDWA. This proposed revision of the proposed consolidated permit regulations would apply this requirement to programs under all three Acts. One purpose of the consolidated regulations is to establish consistent requirements for State programs.

Under this proposal, citizens would be allowed to intervene in actions brought in State court to recover civil penalties for violation(s) of any applicable permit term or condition, any notice or reporting requirement, any duty to allow inspection, entry or other monitoring requirement, or any rule, regulation or order issued by the State. This provision will give citizens a right of participation in State enforcement actions in most respects comparable to that which they now enjoy in Federal court pursuant to section 505(b) of the Clean Water Act, section 7002(c) of RCRA and section 1449(b) of SDWA. A similar right of intervention was recently enacted by

the State of Alabama in amendments to its water pollution control statute.

EPA is also evaluating a number of other mechanisms to ensure public participation in enforcement.

The alternatives under consideration by EPA include requirements that:

- (1) Citizens be allowed to directly initiate enforcement actions in State court;
- (2) States authorize the award of attorney's fees to citizen intervenors where appropriate;
- (3) Citizens be allowed to initiate or intervene as a right in any administrative proceeding brought to enforce elements of the program; and
- (4) States publish for public comment any proposed settlement of an action brought for violation of a State program.

Since approved NPDES States may not now satisfy the Agency's proposed regulation, they will be provided one year from the date of promulgation of these regulations to comply. This period will be extended to two years for those States in which statutory changes are required. The proposal would require all new programs, whether under NPDES, hazardous waste, UIC or section 404 to comply with this requirement upon approval. States seeking interim authorization to administer a hazardous waste program would not need to provide citizen intervention to show "substantial compliance" with § 123.10.

Congress, in addition to its concern for public participation, has expressed its intention to preserve the primary responsibilities and rights of the States to prevent, reduce and eliminate pollution within their borders. The Agency is seeking to balance these objectives by ensuring meaningful public participation in a manner consistent with the State's management of its governmental operations.

To assist the Agency in this task, public comment on the regulation and additional provisions proposed today are solicited. These comments will play an important role in arriving at a final regulation. The Agency specifically requests that States submit information on whether statutory changes would be required to implement these provisions and the alternatives being considered. Information on the effect of a State's rules of civil procedure or other specific intervention statutes on the right of citizens to intervene in State enforcement actions or administrative proceedings is solicited. Comments are also requested on the decision to extend this requirement to the 404 dredge or fill program under CWA and to programs under RCRA and SDWA. Finally, comments suggesting additional alternatives that would promote public

participation in enforcement are welcome. Comments should be submitted by October 9, 1979.

Note.—The Environmental Protection Agency has determined that this document does not constitute a major regulation requiring preparation of an economic impact statement under Executive Order 12044.

Dated: August 15, 1979.

Douglas Costle,
Administrator.

Subpart A—General Program Requirements

Proposed 40 CFR 123.10 [44 FR 34301-02 (June 14, 1979)] is proposed to be amended by adding a new paragraph (d) as follows:

§ 123.10 Enforcement authority.

(d)(1) Any State administering a program shall have authority which allows citizens to intervene as a right in any suit brought in State court to recover civil penalties for any of the violations specified in paragraph (a)(3) of this section.

(2) All new programs must comply with this paragraph upon approval. Any approved State NPDES program which requires modification to conform to this paragraph shall be so modified within one year of this date of promulgation of this paragraph, unless the State must amend or enact a statute in order to make the required modification in which case such modification shall take place within two years.

Pesticide Programs; Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Proposed Tolerances for the Pesticide Chemical Chlorpyrifos

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).
ACTION: Proposed rule.

SUMMARY: This notice proposes that tolerances be established for residues of the insecticide chlorpyrifos on radishes and rutabagas at 3 parts per million (ppm). The proposal was submitted by the Interregional Research Project No. 4. This regulation would establish maximum permissible levels for residues of chlorpyrifos on radishes and rutabagas.

DATE: Comments must be received on or before September 21, 1979.

ADDRESSES: SEND COMMENTS TO: Mrs. Patricia Critchlow, Office of Pesticide Programs, Registration Division (TS-767), EPA, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mrs. Patricia Critchlow (202/426-0223).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Colorado, Hawaii, Idaho, Michigan, New York, Oregon, Utah, Washington and Wisconsin, has submitted a pesticide petition (PP 8E2038) to the EPA. This petition requests that the Administrator propose that 40 CFR 180.342 be amended by the establishment of tolerances for combined residues of the insecticide chlorpyrifos (*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate) and its metabolite 3,5,6-trichloro-2-pyridinol in or on the raw agricultural commodities radishes and rutabagas at 3 ppm.

The data submitted in the petition and all other relevant material have been evaluated. The toxicology data included in support of the proposed tolerances were a two-year rat feeding/oncogenicity study, which showed negative oncogenic potential with a no-observed-effect level (NOEL) of greater than 3 and 0.1 milligram (mg)/kilogram (kg) of body weight (bw)/day based on systemic and anticholinesterase effects, respectively; a two-year dog feeding/study with an NOEL of greater than 3 and 0.1 mg/kg bw/day based on systemic and anticholinesterase effects, respectively; a three-generation rat reproduction study (no maternal toxic signs up to 1 mg/kg bw/day); a hen neurotoxicity study, negative at 100 mg/kg; a rat acute oral lethal dose (LD₅₀) study; a rabbit acute dermal (LD₅₀) study; an acute inhalation lethal concentration (LC₅₀) study; and primary eye and skin irritation studies. Data lacking include a teratology study and an oncogenicity study in a second mammalian species. Both studies are currently in progress, and the results will be submitted to the Agency by late 1979.

The acceptable daily intake (ADI) of chlorpyrifos has been calculated to be 0.01 mg/kg bw/day based on the two-year rat feeding study and anticholinesterase effects using a 10-fold safety factor. The maximum permissible intake (MPI) is 0.8 mg/day for a 60-kg man. The human exposure to this compound from previously

established tolerances has been calculated to be 0.26 mg/person/day. Established tolerances result in a theoretical maximum residue contribution (TMRC) of 50.1 percent of the ADI. Establishment of the proposed tolerances will not exceed the ADI and will not contribute a significant amount (approximately 0.0027 mg/day) to the daily diet. The nature of the residue is adequately understood, and an adequate analytical method (gas chromatography equipped with a flame photometric detector) is available for enforcement purposes. Tolerances have previously been established on a variety of raw agricultural commodities at levels ranging from 0.05 ppm to 1.5 ppm.

The established tolerances for residues of chlorpyrifos will be adequate to cover secondary residues that could result in meat and milk from the use of rutabagas as an animal feed as delineated in 40 CFR 180.6(a)(2). There is no reasonable expectation of secondary residues in eggs and poultry since rutabagas are not a poultry feed item. In addition, the proposed label prohibits the use of rutabaga-treated tops for food or feed.

The pesticide is considered useful for the purpose for which tolerances are being sought, and it is concluded that the tolerances on radishes and rutabagas at 3 ppm established by amending 40 CFR 180.342 will protect the public health. It is proposed, therefore, that the tolerances be established as set forth below.

Any person who has registered, or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, within 30 days after publication of this proposal in the *Federal Register*, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 8E2038/P117". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in Room 107, East Tower, from 8:30 a.m. to 4 p.m. Monday through Friday.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized".

This proposed rule has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Dated: August 13, 1979.

Herbert Harrison,
Acting Director, Registration Division.
Statutory Authority: Section 408(e) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 348a(e)].

It is proposed that Part 180, Subpart C, section 180.342 be amended by alphabetically inserting radishes and rutabagas at 3 ppm in the table to read as follows:

Section 180.342 Chlorpyrifos; tolerances for residues.

Commodity:	Parts per million
Radishes	3
Rutabagas	3

[FRL 1300-7]

Hazardous Waste and Hazardous Waste Management; Notice of Availability of Information

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of information on hazardous waste and hazardous waste management.

SUMMARY: The Environmental Protection Agency (EPA) is today making available to the public two final reports on hazardous waste and hazardous waste management which were completed after the close of the comment period on EPA's proposed regulations implementing Section 3001-3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (43 FR 18506-18512, April 28, 1978 and 43 FR 58948-59022, December 18, 1978).

DATES: Comments on this additional information are due no later than October 9, 1979.

ADDRESSES: Copies of the reports are available for reading at the EPA Public Information Reference Unit (Room 2404) and the Subtitle C Docket Room (Room 2439K), both located at 401 M Street, S.W., Washington, D.C., and at all EPA Regional Office libraries during the hours of 9:00 a.m. to 4:30 p.m., Monday through Friday. Copies of the reports may also be ordered from Ed Cox, Solid

Waste Information, U.S. Environmental Protection Agency, 28 West St. Clair Street, Cincinnati, Ohio 45268, (513) 681-8491.

FOR FURTHER INFORMATION CONTACT: Elise Kaplan, Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, (202) 755-8985.

SUPPLEMENTARY INFORMATION: During the development of its proposed Section 3001-3004 regulations, EPA initiated several studies on hazardous waste to obtain additional information on and/or analyze major issues raised by those regulations. In a number of cases written reports of those studies have only recently been completed or are not scheduled to be completed until some time between now and the end of the year. The purpose of this notice is to announce the availability of two of those reports for public comment and EPA's intent to make available several additional reports on hazardous waste before December 31, 1979.

The two reports which EPA is making available to the public today are:

(1) "Background Study on the Development of a Standard Leaching Test."

This 249 page report describes a study conducted to develop leaching tests which could be used to assess the leaching characteristics of industrial wastes under a variety of disposal environments. Test procedures were designed to provide information regarding the materials likely to be released, an estimate of the maximum concentrations of these materials, and an estimate of the maximum amount of material likely to be released per unit of waste.

(2) "Comparison of Three Waste Leaching Tests, Executive Summary."

This report is the executive summary of a report to be released within the next few weeks. This report provides a comparison of three waste leaching tests, which were performed with 13 industrial wastes to evaluate the potential of each test for use in EPA's proposed Section 3001 regulations. This 24 page study was done in conjunction with the above referenced "Background Study on the Development of a Standard Leaching Test."

Comments on these reports should be submitted to EPA no later than forty-five (45) days after the date of publication of this notice (October 9, 1979). Because EPA is currently under a court order to promulgate final Section 3001-3004 regulations by December 31, 1979 (*State of Illinois v. Costle*, 12 ERC 1597 (D.D.C. 1979)), a shorter comment period

(probably thirty (30) days) will be provided on reports released later this year in order to give EPA adequate time to evaluate and respond to public comments on the reports before those regulations are finalized.

The purpose of making these reports available to the public is to obtain comment on the accuracy of the data contained in the reports and the conclusions reached, not to reopen the comment period on EPA's proposed Section 3001-3004 regulations. Commenters should limit the scope of their written submissions accordingly.

Dated: August 15, 1979.

Thomas C. Jorling,
Assistant Administrator for Water and Waste Management.

BILLING CODE 6560-01-M

[40 CFR Part 250]

[FRL 1300-8]

Hazardous Waste Guidelines and Regulations; Availability of Information on Hazardous Waste and Hazardous Waste Management

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of information on hazardous waste and hazardous waste management.

SUMMARY: The Environmental Protection Agency (EPA) is today making available to the public additional information on hazardous waste and hazardous waste management which was obtained by EPA after the close of the comment period on its proposed regulations implementing Section 3001-3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA).

DATES: Comments on this additional information are due no later than October 9, 1979.

ADDRESSES: Copies of these materials are available for reading at the Public Information Reference Unit in the EPA Library (Room 2404) and the Subtitle C Docket Room (Room 2439K), both located at 401 M Street, S.W., Washington, D.C., and at all EPA Regional Office Libraries from 9:00 a.m. to 4:30 p.m., Monday through Friday. Copies are available from Elise Kaplan, Docket Clerk, Office of Solid Waste (WH-562), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Elise Kaplan, Docket Clerk, Office of Solid Waste (WH-562), U.S.

Environmental Protection Agency (202) 755-8985.

SUPPLEMENTARY INFORMATION: On April 28, 1978 (43 FR 18506-18512) and December 18, 1978 (43 FR 58948-59022), EPA proposed regulations implementing Section 3001-3004 of the Solid Waste Disposal Act, as amended by RCRA. As a result of its review of public comments on these proposed regulations, EPA identified a number of major issues which needed further documentation, study, or analysis, including, but not limited to: the composition of and hazards posed by various waste streams and the management of these wastes, particularly those generated by the petroleum, chemical and utility industries; establishing a hazardous waste management system based on degree of hazard; and the listing of specific wastes, waste streams and processes as hazardous.

To assist in resolving these issues, EPA made written requests for additional data to some of the commenters who raised these issues or indicated that they had data on these issues, and to other sources which EPA thought might have relevant data. To allow the public to have an opportunity to review the information received, EPA is today making available for a 45-day public inspection and comment period its requests for information and the information submitted in response to those requests.

The purpose of making this information available to the public is to obtain comment on the data received in response to EPA's requests for additional information, not to reopen the comment period on the proposed Section 3001-3004 regulations. Commenters should limit their written submissions accordingly.

Dated: August 15, 1979.

Thomas C. Jorling,
Assistant Administrator for Water and Waste Management.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1090]

[Ex Parte No. 230; Sub-No. 5]

Practices of Carriers Involved in the Intermodal Movement of Containerized Freight; Improvement of TOFC/COFC Regulation¹

AGENCY: Interstate Commerce Commission.

¹This proceeding includes the issues raised in NO. 37032, Processed Beef Express, Inc. Petition for Declaratory Order—TOFC Use By Motor Contract Carriers.

ACTION: Advance Notice of Proposed Rules

SUMMARY: In the interest of eliminating any unnecessary regulatory impediments to the use of trailer on flatcar and container on flatcar (TOFC/COFC) service, the Commission is considering the institution of a rulemaking proceeding which would: (1) exempt from regulation (under 49 USC 10505) rail transportation of TOFC/COFC shipments, either in whole or in part; (2) provide expedited and simplified procedures for licensing new TOFC/COFC service by motor carriers, including those affiliated with railroads; (3) establish a "zone of reasonableness" within which motor carrier TOFC/COFC rates could be raised or lowered; (4) modify existing regulations which prohibit motor common carriers from exchanging TOFC/COFC shipments with railroads at other than authorized service points; and (5) clarify the circumstances under which motor contract carriers can substitute rail service for all-motor service.

DATES: Comments must be filed by October 22, 1979.

ADDRESSES: An original and 10 copies, if possible, of comments should be sent to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

John Robinson (Rail Issues) (202) 275-7418, or
Jerald Muskin (Other Issues) (202) 275-7824.

This proceeding is to determine what the Commission can do, through modification of its regulations governing TOFC/COFC service, to improve the intermodal relationship between rail and motor transportation and to increase the amount of TOFC/COFC traffic. Increased use of TOFC/COFC services may contribute to conservation of energy, enhancement of the environment, and more efficient use of transportation resources. This proceeding is limited to rail-motor intermodal shipments and does not embrace TOFC or COFC shipments having a prior or subsequent movement by water.

There are five basic Commission-approved intermodal plans (see 322 ICC 301 (1964) and 49 CFR part 1090). Under Plan I a motor carrier may substitute rail for motor service between points which the motor carrier is authorized to serve. Under Plan II, a railroad may provide complete door-to-door service. (Plans II ¼ and II ½ are variations where the shipper performs the service to or from the rail terminal.) Under Plan III, the portion of the service performed by a railroad is limited to rail transportation

between TOFC ramps; the shipper must provide the trailers. The Commission's regulations require railroads offering Plan III or "open tariff" services to make it available to regulated motor carriers. Plan IV is comparable to Plan III, except that the shipper must also furnish the railroad car. Plan V involves coordinated through motor-rail or motor-rail-motor services at joint rates which may be originated by either mode on the originator's bill of lading. Unlike Plan I, the rail service need not be substituted service for the motor carrier haul. This plan facilitates coordination of rail and motor operations where the carriers serve different territories.

Data from the Commission's TOFC/COFC traffic reports show that more than 50 percent of TOFC/COFC traffic moves under Plan II (all rail) and that a significantly smaller share moves under Plans I and V (motor carrier participation). Plans III and IV are being used more often by shippers and freight forwarders, but they still constitute less than 15 percent of total TOFC/COFC traffic. We are not aware of any significant use Plan III service by regulated motor carriers.

The principal benefits ascribed to TOFC/COFC service are that it (1) combines the best characteristics of both rail and motor transportation by offering the long-haul cost and energy advantages of rail and the geographic operating flexibility of motor carriers; (2) offers containerized service as an alternative transportation service for shippers and adds a source of revenue for the financially ailing railroad industry; and (3) offers ecological and safety benefits primarily by reducing truck congestion on highways. In spite of these evident benefits, the growth of TOFC/COFC traffic has lagged far behind expectations.

Recent studies of intermodal coordination by the Federal Railroad Administration, the General Accounting Office, and the Commission suggest the following reasons for the sluggish pace of TOFC/COFC traffic growth:

(1) There has been poor coordination between regulated motor carriers and railroads because of many existing trucking labor agreements requiring a penalty payment when TOFC is substituted. Motor carriers claim that rail service is not as reliable as motor service; consequently they will not jeopardize their good relations with their shippers by using TOFC/COFC service. Some motor carriers have also admitted that they fear losing this traffic to all rail TOFC/COFC plans.

(2) TOFC/COFC represents a high capital investment risk to railroads because competitive low cost and

flexible unregulated motor carriage imposes a ceiling on rail TOFC/COFC profits. In addition, some railroads are concerned that TOFC/COFC growth may occur at the expense of boxcar traffic.

(3) Railroads have been reluctant to invade one another's territories.

(4) Restrictions imposed in certificates of motor carrier affiliates of railroads have restrained expansion of TOFC/COFC, especially Plan V.

(5) Significant operational changes are sometimes required for successful TOFC/COFC operations, such as use of dedicated "short trains" and modification of work rules. Rail management has been slow to implement these operational changes.

It has also been suggested that economic regulation has impeded TOFC/COFC growth. We hope to determine whether and how regulations should be adjusted to eliminate any impediments and, if possible to provide incentives. The success of our effort will depend in large measure on the active participation of the rail and motor carrier industry and of the shippers who have used TOFC/COFC service in the past or who would like to use it in the future.

The proposals in this notice are intended to stimulate thought and comment. We have attempted to indicate the direction which at this time seems the most logical to us, but we have in no way prejudged the issues involved. The decision to propose rules implementing the changes proposed in this advance notice will be based on the public response which we receive as well as staff research. Consequently, we encourage all parties who have an interest in this matter to study the proposals contained in this notice and to submit comments in support of or in opposition to them. Parties are also encouraged to address related issues not discussed in the notice and to suggest alternative proposals for stimulating the use of TOFC/COFC service.

General Proposals

Rail

Section 207 of the Railroad Revitalization and Regulatory Reform Act of 1976, Public Law 94-210, amended former section 12(1) ² of the Interstate Commerce Act by adding a new subdivision (b) which provides that the Commission, upon petition or on its own initiative, may exempt from regulation any person, class of person, services, or transactions relating to transportation by railroad if because of

² Now 49 USC 10505

its limited scope, it finds that regulation is not necessary to effectuate the national transportation policy, would be an undue burden on the persons or class of persons involved, or on interstate and foreign commerce, and would serve little or no useful public purpose. The Commission provided its interpretation of the new sub-section, particularly the circumstances under which it would exempt certain rail operations, in decisions in Ex Parte No. 346, *Rail General Exemption Authority*, served December 6, 1978, and in Ex Parte No. 346 (Sub-No. 1), *Rail General Exemption Authority—Fresh Fruits and Vegetables*, (Fresh Fruits and Vegetables), served December 6, 1978, March 22, 1979, and May 25, 1979. The fresh fruits and vegetables exemption was effective on May 28, 1979.

In this proceeding, we seek to determine whether some form of exemption for the rail portion of TOFC service is a feasible method of accomplishing our purpose of encouraging this intermodal service.

It is our initial impression that either a full or partial exemption could be helpful. To evaluate the scope of a possible exemption, we would like to receive comments on what aspects of regulation, if any, might be retained.

We must determine whether any exemption for TOFC/COFC traffic meets the statutory criteria cited above. It is our opinion at this time that an exemption along the lines described would meet the "limited scope" requirement. Containerized shipments in 1978 constituted approximately 7.9 percent of total rail carloadings. This represents a minor portion of total railroad operations which presumably could easily be absorbed by through rail or motor operations. It is also our impression that continued regulation of this class of traffic would not serve a useful public purpose, is not necessary to carry out the national transportation policy any may be a burden on interstate commerce. While it may be argued by some that regulation has not impeded TOFC/COFC growth, regulation does not appear to have stimulated or advanced it. Goals of energy conservation and transportation efficiency may well be better served in a less regulated environment. Comments on this issue are requested.

Motor

A limited amount of this traffic moves under the authority and on the billing of regulated motor common carriers in substituted rail-for-motor-service under Plan I and coordinated service under Plan V. In addition, motor common and contract carriers may substitute rail

service for line-haul motor service by using the rail open-tariff, Plan III service. To increase this energy and transportation efficient service, we must consider how these truly intermodal plans can be encouraged. One possibility is that the motor carrier portion of TOFC/COFC service might be exempted from regulation as service in "... a matter related to a rail carrier" under section 10505(c) (the rail exemption). We seek public comment on this approach. However, since it is by no means clear that the exemption can be construed to apply to "rail-related" motor services, we will explore the alternative approaches described below.

Entry

To use substituted rail service, the motor carrier must not only have authority to serve the ultimate origin and destination points between which its service is performed, it must also hold authority to perform service at the points at which it tenders traffic to, or receives it from the railroad. See 49 CFR 1090.3(e), governing open tariff (plan III) service, and 49 CFR 1090.4(d), governing joint intermodal (plans I and V) service. This requirement may be an impediment to motor carriers which would otherwise be able to substitute rail service for portions of their line haul movements. For motor carriers already participating in piggyback service, this means that new operating authority may be required should the railroad move or close the ramp which the motor carrier is authorized to serve. The substitution of rail for motor service could be fuel efficient, remove trucks from the highways in congested areas, and give the motor carrier added flexibility. We are considering applying the rationale of *Substituted Service—Water-for-Motor Service (Fishyback Service)—Alaskan Trade*, 361 I.C.C. 359 (1979). It was determined that carriers need not have authority to serve the interchange point if they wished to provide motor-water-motor service between Alaska and the continental U.S. Only authority from origin to ultimate destination was necessary. We proposed to make the same finding here. Additional support for this action is found in *National Auto. Transportation Assn.—Declaratory Order*, 91 M.C.C. 395 (1983).

For motor carriers which do not now have authority for TOFC/COFC service and those wishing to expand their operations, we are considering amendment of the existing public convenience and necessity/fit, willing and able test. This would involve a generalized, prospective nationwide finding of public convenience and necessity based on the foreseen benefits

of additional TOFC/COFC service and competition. Under this "master certificate" for TOFC/COFC, carriers would declare what areas they intended to serve. Should any geographical or other limitation be imposed upon applications for motor carrier authority to provide TOFC/COFC operations? At the time the carriers filed for inclusion within the master certificate, they would also have to demonstrate their compliance with minimum fitness standards governing such things as safety and insurance.

We are also considering actions which might encourage other motor carriers to participate in TOFC/COFC movements. 49 CFR Sections 1090.2 and 1090.3 permit regulated motor carriers, including contract motor carriers, to tender as shippers freight in trailers to a railroad for TOFC service. Section 1093.4 does not authorize contract carriers to enter into joint intermodal TOFC arrangements with railroads. Thus, some see a barrier to contract carrier participation. To resolve the matter, Processed Beef Express, Inc. filed a petition (No. 37032) seeking a declaratory order to allow it to enter into Plan I arrangements. Rather than resolve this controversy in the narrow confines of a declaratory order proceeding related only to Plan I, and because of the obvious relationship between the relief requested and this advance notice, we have, in a separate order in No. 37032 issued this date, declined to institute the requested proceeding. Instead, we will include here the broader question whether contract carriers can enter into substituted rail-for-motor TOFC service and participate in joint rates as necessary.

In Ex Parte No. 358, *Change of Policy, Railroad Contract Rates*, 361 I.C.C. 205 (1979), we set forth our position that contract rates between a railroad and a shipper should not be considered illegal, *per se*. This policy change, if reflected in appropriate TOFC/COFC regulations, may provide the contract motor carriers with all the flexibility they need to make effective use of substituted service. We seek comments on this issue. Are joint rail and truck rates necessary from an operating standpoint?

Another way to expand TOFC/COFC service geographically is to treat motor carrier affiliates of rail companies the same as independent motor carriers when granting operating authority for TOFC/COFC traffic having an immediate prior or subsequent move by rail or water. This would represent a departure from prior Commission and

court decisions ³ and assumes either that the Commission can properly depart from the longstanding administrative requirement that rail affiliated motor carriers must demonstrate "special circumstances" before they can be granted unrestricted operating rights or that the applicant's burden of meeting the test can be substantially eased. It is our tentative position that changed competitive conditions in the surface transportation industry, and the substantially reduced economic power of the nation's railroads, have rendered the special circumstances test—or at least its strict application—obsolete. We seek comment on this issue, and on the possible effects of allowing motor affiliates of rail carriers equal opportunity to compete (with or without the master certificate approach) with independent motor carriers.

Rates

It may be possible to encourage greater use of TOFC/COFC service by motor carriers by revising our rate regulation to complement or substitute for other ideas we have suggested here. Would greater rate flexibility convince carriers to institute these services? Should a zone of reasonableness for this traffic within which rates would not be subject to a test of reasonableness be adopted? If so, what would be the appropriate upward and downward changes to the existing rates? If ratemaking flexibility is allowed when rail service is substituted for motor service, it is possible that the same motor carrier might be offering the same service at two different rates. Would this be lawful or desirable? Is Plan V the only plan for which a zone of reasonableness should be considered? Are there other rate regulation changes that should be considered?

We do not now propose relaxation of our jurisdiction over motor carrier discrimination or predatory practices in offering TOFC service, as such practices could result in disruptions in service.

Conclusion

This proceeding represents an effort by the Commission to determine to what extent, if any, its regulations of rail and motor carriers can be improved to spur increased use of TOFC/COFC transportation. This advance notice presents many extremely complex and interrelated issues. We urge interested persons to participate and advise us as to the reasons they see for TOFC/

³ A number of these decisions are cited in *Pacific Motor Trucking Co. v. Interstate Commerce Commission*, 95 M.C.C. 53, 56, 57 (1964).

COFC's failure to meet expectations, and the possibilities for improvement using ideas suggested here. We welcome and will consider other alternatives presented by commentators and encourage presentation of any available relevant data.

1. Will any region of the United States, class of shippers, or commodities benefit by the expanded TOFC/COFC services to the detriment of another region, class of shippers, or commodities? Fully describe those instances, if any, and the nature of the injury.

2. Should the Commission prepare or recommend amendments to the Interstate Commerce Act which deal specifically with intermodal transportation?

3. What steps can be taken to increase freight forwarder and shipper association use of TOFC/COFC?

4. What are the jurisdictional effects of this proposal. For example, if one segment (rail) of a movement is deregulated and another segment (motor) is not, who will adjudicate rates and other similar problems that may arise.

5. If general licensing is approved, what will be the impact on smaller trucking companies who now will have to compete with the railroads' own trucking fleets? How could a small or medium size motor carrier bargain for a fair division on an equal basis with any of the Class I railroads?

6. How much of an increase in TOFC/COFC traffic could the railroads currently absorb without reducing other service? If the railroads do reduce some flat car service, which shippers and what kind of freight are most likely to suffer?

7. We have previously indicated that regulations does not appear to have impeded or stimulated the growth of TOFC/COFC. In view of the apparent railroad disfavor with this traffic (other than land bridge operations), is it not possible that this intermodal service will actually be reduced, not increased?

At this time it appears that the action under consideration in this proceeding may have beneficial effects on the human and natural environment. Should the action result in a shift of traffic from motor carriage to TOFC/COFC, we anticipate conservation of vital energy resources. Specific areas of concern which will enable us to measure the impacts to energy and environment include the extent to which the proposed action will: a) result in increasing use of TOFC/COFC; b) reduce empty backhauls; c) require expansion of existing terminal facilities; d) result in an increased need for flat cars,

locomotives, and specialized equipment which may be in short supply; and e) effect existing service.

We seek public comment on these matters and any other areas of environmental concern.

This advance notice is issued pursuant to the authority of 49 U.S.C. §§ 10321, 10505, 10701, 10702, 10705, 10921, 10922, 10923, 10927, 11101 (the Interstate Commerce Act) and § 5 U.S.C. §§ 553 and 559 (the Administrative Procedure Act).

Dated: August 8, 1979.

By the Commission. Chairman O'Neal, Commissioners Stafford, Gresham, Clapp, Christian, Trantum and Gaskins. Commissioner Stafford concurring. Commissioner Trantum not participating. Agatha L. Mergenovich, Secretary.

Commissioner Stafford (concurring)

Today's proposed rulemaking raises legitimate issues that need to be addressed. It seems to me, however, that anything worth doing is worth doing right. This rulemaking clearly has the potential for impact on the environment, yet there is no draft environmental impact statement, as required by our own rules, see 49 CFR 1108.14, and by the National Environmental Policy Act of 1969. This rulemaking was initially proposed to us as a way to save energy, yet there is no energy impact statement, as required by 49 CFR 11.06.6 and by the Energy Policy and Conservation Act, Pub. L. 94-163.

In *Chemical Leamon Tank Lines, Inc. v. United States*, 368 F. Supp. 925 (D. Del. 1973), the court ruled that the Commission is not relieved from the requirement of preparing a proper environmental impact statement, no matter how environmentally beneficial our action is. This principle applies doubly here, because both energy and environment are involved.

It is inappropriate to institute this proceeding until our own procedures have been followed. While attempting to cut corners and save the time for drafting proper impact statements, we may in the long run be jeopardizing the final result.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Agency Decisional Processes; Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Agency Decisional Processes of the Administrative Conference of the United States, to be held at 10:00 a.m., Friday, September 14, 1979, at the office of Ginsburg, Feldman, & Bress, 1700 Pennsylvania Avenue, N.W., Suite 300, Washington, D.C.

The Committee will meet to discuss Professor Peter L. Strauss' study of the problem of disqualification of agency heads and other decision-makers in rule-making.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact David M. Pritzker at the Office of the Chairman of the Administrative Conference at (202-254-7020). Minutes of the meeting will be available on request.

Richard K. Berg,

Executive Secretary.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Official Agency Geographical Area; Assignment of Geographic Area to the Guymon Grain Inspection, Inc., Guymon, Okla.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Guymon Grain Inspection, Inc., Guymon, Oklahoma, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, DC 20250, (202) 447-8262.

SUPPLEMENTARY INFORMATION: The Guymon Grain Inspection, Inc. (the "Agency"), Highway 54 East, P.O. Box Drawer E, Guymon, Oklahoma 73942, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on October 15, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the *Federal Register* (44 FR 2655). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is as follows: Beaver County, Cimarron County, and Texas County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for

Federal Register

Vol. 44, No. 164

Wednesday, August 22, 1979

the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service point within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, DC 20250, (202) 447-8525.

(Secs. 8, 9, Pub. L. 94-582, 90 Stat. 2870, 2875 (7 U.S.C. 79, 79a).)

Done in Washington, D.C. on: August 16, 1979.

L. E. Bartelt,
Administrator.

BILLING CODE 3410-02-M

Official Agency Geographical Area; Assignment of Geographic Area to the Alva Grain Inspection Department, Alva, Okla.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Alva Grain Inspection Department, Alva, Oklahoma, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447-8262.

SUPPLEMENTARY INFORMATION: The Alva Grain Inspection Department (the "Agency"), 129 College, P.O. Box 541, Alva, Oklahoma 73717, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on August 31, 1978. The designation also included an assignment of geographic area, on an interim basis,

within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the Federal Register (44 FR 2652). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed. The geographic area assigned to the Agency is composed of the following counties: Alfalfa, Beckham, Caddo, Custer, Dewey, Ellis, Greer, Harper, Kiowa, Major, Roger Mills, Washita, Woods, and Woodward, all located in Oklahoma.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service point within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, DC 20250, (202) 447-8525.

(Secs. 8, 9, Pub. L. 94-582, 90 Stat. 2870, 2875 (7 U.S.C. 79, 79a)). Done in Washington, D.C. on: August 18, 1979.)

Official Agency Geographic Area; Assignment of Geographic Area to the Enid Grain Inspection Co., Inc., Enid, Okla.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Enid Grain Inspection Co., Inc., Enid, Oklahoma, for the performance of

official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447-8262.

SUPPLEMENTARY INFORMATION: The Enid Grain Inspection Co., Inc. (the "Agency"), 2305 N. 10th Street P.O. Box 229, Enid, Oklahoma 73701, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on October 5, 1978. The designation also included an assignment of geographic area, on an interim basis, within this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the Federal Register (44 FR 2654). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is composed of the following counties: Grant, Kay, Osage, Washington, Nowata, Craig, Mayes, Wagoner, Okmulgee, Okfuskee, Hughes, Coal, Atoka, Bryan, Marshall, Love, Jefferson, Cotton, Tillman, Jackson, Harmon, Comanche, Grady, Canadian, Blaine, Kingfisher, and Garfield.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service point within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of

Agriculture, Washington, DC 20250, (202) 447-8525.

BILLING CODE 3410-02-M

Official Agency Geographic Area; Assignment of Geographic Area to the Ft. Smith-Van Buren Grain Inspection Service, Van Buren, Ark.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Ft. Smith-Van Buren Grain Inspection Service, Van Buren, Arkansas, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECT DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, DC 20250, (202) 447-8262.

SUPPLEMENTARY INFORMATION: The Ft. Smith-Van Buren Grain Inspection Service (the "Agency"), Kibler Road, P.O. Box 498, Van Buren, Arkansas 72956, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on September 30, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the Federal Register (44 FR 2653). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is composed of the following counties: In Arkansas: Benton, Boone,

Carroll, Crawford, Franklin, Johnson, Logan, Madison, Montgomery, Newton, Polk, Sebastian, Sevier, Scott, Washington, Yell. In Oklahoma: Adair, Cherokee, Choctaw, Delaware, Haskell, Latimer, Le Flore, McCurtain, McIntosh, Muskogee, Ottawa, Pittsburg, Pushmataha, and Sequoyah.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other area within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contracting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, DC 20250, (202) 447-8525.

(Secs. 8, 9, Pub. L. 94-582, 90 Stat. 2870, 2875 (7 U.S.C. 79, 79a)). Done in Washington, D.C. on: August 16, 1979.

BILLING CODE 3410-02-M

Forest Service

Mapleton Planning Unit Land Management Plan; Siuslaw National Forest Douglas and Lane Counties, Oreg.; Intent to Discontinue an Environmental Impact Statement

Pursuant to the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture has been preparing an Environmental Impact Statement on the Land Management Plan for the Mapleton Planning Unit, Siuslaw National Forest, located in Douglas and Lane Counties, Oregon. That effort has been discontinued.

The primary factor that entered into the decision to discontinue the Environmental Impact Statement for the Mapleton Planning Unit was the expected completion date of the Plan. The Final Environmental Impact Statement would not have been available until late 1980. The Siuslaw is beginning a Forest Land and Resource Management Plan in early 1980. Since allocations made in unit planning must be reevaluated in the Forest Plan, the timing for completion of the Mapleton

Unit Plan would not allow a final allocation decision to be made before allocations would be reexamined through the Forest planning process. The effort the Forest would have spent on the Mapleton Unit Plan will be more efficiently spent on the Forest Plan. Therefore, I have decided to discontinue the Environmental Impact Statement for the Mapleton Unit.

The Siuslaw National Forest appreciates the participation, interest, and hard work the public put into helping to identify issues, develop management strategies, and consider alternatives for this planning unit. The public involvement and interdisciplinary team work on this plan will be valuable information for the Forest Plan. Much of this work will serve as the basis for data collection analysis and techniques.

Comments on the Notice of Intent about the Mapleton Unit should be sent to Larry A. Fellows, Forest Supervisor, P.O. Box 1148, Corvallis, Oregon 97330. August 13, 1979.

Frank J. Kopecky,
Deputy Regional Forester.

[FR Doc. 79-25957 Filed 8-21-79; 8:45 am]
BILLING CODE 3410-11-M

Vegetation Management Along Diamond Lake Highway; Rogue River National Forest; Environmental Assessment; Finding of No Significant Impact

An Environmental Assessment that discusses proposed roadside vegetation management by the Oregon State Highway Division on National Forest Land beginning at Mile 0.00 in Section 35, T. 30 S., R. 3 E., W.M., in Jackson County and ending at mile 23.89 in Section 21, T. 28 S., R. 5 1/2 E., W.M., in Douglas County, Oregon, a distance of 23.89 miles covering a treatment area of approximately 175 acres, is available for public review at the Umpqua National Forest, Federal Office, Roseburg, Oregon 97470 and the Rogue River National Forest, P.O. Box 520, Medford, Oregon 97501.

No flood plains or wet lands are involved in this project. The Environmental Assessment does not indicate that there is a major federal action significantly affecting the quality of the human environment. Therefore, it has been determined that an environment impact statement is not needed.

This determination was based upon consideration of the following factors, which are discussed in detail in the Environmental Assessment: (a) That the treatment of existing and encroaching conifer seedlings, stumps and brush on

100 acres of road cut and fill slopes with 2,4,D/2,4,D-P, such as Anchen Weedone 170, EPA-222-AA or equal; that the treatment of weeds, grasses, forbs and other vegetation on 35 acres of road shoulders and ditches with Simazine, such as CIBA-GEIGY Princep 80W, EPA 100-437 ZB or equal and Bromacil and Diuron, such as Karmex (EPA 352-247-AA) or KROVAR #1 (EPA 352-352-AA) or equal as needed; that the hand brushing and mechanical chipping of vegetation on cut and fill slopes on 38 acres coinciding and adjacent to other areas of treatment, as needed, over the next five years will have only a slight effect on the ecosystem adjacent to the road within the project area; (b) there are no irreversible resources commitments; (c) there are no apparent adverse cumulative or secondary effects; (d) the physical and biological effects are limited to the area of planned development and use; and (e) there are no known threatened or endangered plants or animal resources that will be adversely affected within the project area.

No public concern has been expressed about possible effects of the project. No action will be taken prior to 30 days from the date of this finding is published in the Federal Register.

The responsible officials are Richard Swartzlender, Forest Supervisor, Umpqua National Forest, Federal Office Building, Roseburg, Oregon 97470 and Donald H. Smith, Forest Supervisor, Rogue River National Forest, P.O. Box 520, Medford, Oregon 97501.

Dated: August 6, 1979.

Kent T. Churchill,
Deputy Forest Supervisor, Umpqua National Forest.

Dated: July 31, 1979.

Donald H. Smith,
Forest Supervisor, Rogue River National Forest.

Soil and Water Resources; Distribution of Document

Pursuant to the Soil and Water Resources Conservation Act (RCA), Pub. L. 95-192, the U.S. Department of Agriculture (USDA) is appraising the Nation's soil, water, and related resources, developing a national soil and water conservation program, and preparing a statement of national policy concerning these resources during the 1979-1980 RCA process.

The formal 60-day RCA public review period of all RCA draft documents is tentatively scheduled to begin on

November 13, 1979. However, RCA Appraisal—Part I will be available for public review beginning September 4, 1979. Another Federal Register Notice will be published concurrent with the beginning of the official public review period. This notice will give exact dates of the public review period; dates and locations of public meetings; and the address to which written comments on the RCA draft documents should be sent.

Draft Appraisal—Part I is the first of four RCA draft documents being prepared for public review and comment. Part I of the Appraisal contains the status, condition, and trend of the Nation's soil, water and related resources.

Draft Appraisal—Part I will be available for public review in selected USDA field offices. Where USDA agencies are located together, the documents will be placed in the Soil Conservation Service (SCS) office. Where USDA agencies are not located together, the Appraisal—Part I will be located in the SCS and the Agricultural Stabilization and Conservation Service (ASCS) county office.

Comments on Draft Appraisal—Part I may be submitted at any time before the end of the official review period, tentatively scheduled for January 14, 1980. Comments are to be sent to the RCA Response Analysis Center, USDA Soil Conservation Service, Box 888, Athens, Georgia 30603.

For more information about this document, or to request a copy, contact Ernest V. Todd, RCA Manager, U.S. Department of Agriculture, Box 2890, Washington, DC 20013, phone (202) 447-2771.

Pub. L. 95-192, 91 Stat. 1407, 16 U.S.C. 2001 et seq. (November 18, 1977)

Dated: August 17, 1979.
David G. Unger,
Deputy Assistant Secretary for Conservation, Research, and Education.

Office of Equal Opportunity

Citizens' Advisory Committee on Equal Opportunity Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act, notice is hereby given of a public meeting of the USDA Citizens' Advisory Committee on Equal Opportunity, on September 5-7, 1979, in Room 218A, Administration Building, 14th and Independence Avenue, Washington, DC, commencing at 9 a.m.

The purpose of the meeting is to organize the Committee and plan its activities for the year.

The Committee was established by Secretary's Memorandum No. 1960, October 24, 1978, to review and advise the Secretary on ways to improve the Department's policies and procedures regarding equal opportunity.

The meeting is open to the public to observe Committee operations.

Interested persons may make written comments to and obtain further information regarding the Committee from: Jacqueline G. Sutton, Office of Equal Opportunity, Room 242E—Adm. Bldg., Washington, D.C. 20250, Phone: 202/447-7813.

Dated: August 17, 1979.
Joan S. Wallace,
Assistant Secretary for Administration.

ARMS CONTROL AND DISARMAMENT AGENCY

General Advisory Committee; Meeting

Notice is hereby given in accordance with Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I, (the Act) and paragraph 8b of Office of Management and Budget Circular No. A-63 (Revised March 27, 1974) (the OMB Circular), that a meeting of the General Advisory Committee (GAC) is scheduled to be held on September 13, 1979 from 9 a.m. to 8 p.m. and on September 14, 1979 from 9 a.m. to 6 p.m. at 2201 C Street, NW, Washington, D.C., in Room 7518.

The purpose of the meeting is for the GAC to receive briefings and hold discussions concerning arms control and related issues which will involve national security matters classified in accordance with Executive Order 12065, dated June 28, 1978.

The meeting will be closed to the public in accordance with the determination of August 14, 1979 made by the Director of the U.S. Arms Control and Disarmament Agency pursuant to Section 10(d) of the Act and paragraph 8d(2) of the OMB Circular that the meeting will be concerned with matters of the type described in 5 U.S.C. 552(b)(1). This determination was made pursuant to a delegation of authority from the Office of Management and Budget dated June 25, 1973, issued under the authority of Executive Order 11686 dated October 7, 1972 and continued by Executive Order 11769 dated February 21, 1974.

Dated: August 17, 1979.
Charles R. Oleszycki,
Advisory Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Docket 34226]

Eastern-National Acquisition Case

Notice to all parties: Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that oral argument in this proceeding is assigned to be held before the Board on September 12, 1979, at 10 a.m. (local time), in Room 1027, University Building, 1825 Connecticut Avenue, N.W., Washington, D.C.

Each party which wishes to participate in the oral argument shall so advise the Secretary, in writing, on or before August 30, 1979, together with the name of the person who will represent it at the argument.

Dated at Washington, D.C., August 16, 1979.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

[Order 79-8-94; Docket 36408]

Investigation of Airline Reservations, Bumping and Compensation Practices During the Grounding of DC-10 Aircraft; Order Instituting Informal Nonpublic Investigation Under Part 305 of the Board's Procedural Regulations

Issued under delegated authority August 17, 1979.

The Bureau of Consumer Protection has received informal complaints concerning the alleged practices of certain air carriers during the recent grounding of the DC-10 aircraft. Apparently, after the DC-10 had been indefinitely grounded, certain carriers continued to accept reservations based upon DC-10 seating capacity. On flights where the carriers had to provide service with equipment of lesser capacity because the DC-10 was still out of service, this practice sometimes resulted in numbers of passengers who had confirmed reservations not being provided with seats for their flights. Complaints received by the Bureau have alleged that in such situations the carriers refused to pay denied boarding compensation under the Board's regulations for the protection of consumers on oversold flights, 14 C.F.R. Part 250, apparently in the belief that the

requirement to pay compensation was inapplicable in these circumstances.¹

We are especially interested in determining the extent of these practices and their effect on the traveling public. In this connection, the Board had decided that the public interest requires the institution of an informal nonpublic investigation, in accordance with Part 305 of the Board's Procedural Regulations, to obtain information about the carriers' compliance with Part 250 and Section 411 of the Federal Aviation Act.

Petitions for review of this order may be filed by any person who discloses a substantial interest that would be adversely affected by the initiation of this investigation. Such petitions shall conform to the requirements of § 385.51 of the Regulations and shall be filed on or before September 4, 1979.

Accordingly: 1. We institute an informal nonpublic investigation under Part 305 of the Board's Procedural Regulations, for the purpose of obtaining information to determine:

a. Whether any air carrier or foreign air carrier has failed to comply with the Board's denied boarding compensation regulations in connection with the grounding of the DC-10; and
 b. Whether formal enforcement action or any other appropriate course of action should be undertaken.

2. We designate Charles L. Reischel, Paul W. Wallig, and Eleanor Minsky, staff attorneys of the Bureau of Consumer Protection, as Investigation Attorneys for the purpose of conducting this investigation.

3. This order shall be published in the Federal Register as provided in § 305.10 of the Board's Regulations.

By Reuben B. Robertson, Director, Bureau of Consumer Protection.

Phyllis T. Kaylor,
Secretary.

DEPARTMENT OF COMMERCE

Economic Development
AdministrationPetitions by Fifteen Producing Firms
for Determinations of Eligibility To
Apply for Trade Adjustment
Assistance

Petitions have been accepted for filing from fifteen firms: (1) Valley Nitrogen Producers, Inc., 12688 South Colorado, Helm, California 93623, a producer of fertilizer (accepted August 3, 1979); (2) Maryland Hampstead Company, Inc., 1024 Carroll Avenue, Hampstead, Maryland 21074, a producer of men's suits (accepted August 6, 1979); (3) Bedford Reinforced Plastics, Inc., R. D. #1 Box 657, Bedford, Pennsylvania 15522, a producer of fiberglass fence bars and posts (accepted August 8, 1979); (4) Billy The Kid, Inc., 4171 North Mesa, El Paso, Texas 79902, a producer of boys' pants (accepted August 7, 1979); (5) Scharf & Breit, Inc., 467 Troutman Street, Brooklyn, New York 11237, a producer of sweaters for men, boys and women (accepted August 7, 1979); (6) Robert Bruce, Inc., 'C' and Westmoreland Streets, Philadelphia, Pennsylvania 19134, a producer of boys' pants (accepted August 7, 1979); (7) Alpine Togs, Inc., 461 Frelinghuysen Avenue, Newark, New Jersey 07114, a producer of children's coats, jackets and snowsuits (accepted August 8, 1979); (8) Gotthelf Knitting Mills, Inc., 607 Myrtle Avenue, Boonton, New Jersey 07005, a producer of men's sweaters (accepted August 8, 1979); (9) Young Reflections Inc., 1375 Broadway, New York, New York 10018, a producer of women's dresses and pantsuits (accepted August 9, 1979); (10) Highlands Leather Company, Inc., P.O. Box 348, Sebring Air Terminal Building 902, Sebring, Florida 33870, a producer of leather (accepted August 9, 1979); (11) U & I Incorporated, 709 East South Temple, Salt Lake City, Utah, 84110, a processor of sugar (accepted August 9, 1979); (12) Charles H. Liebman & Bro., Inc., 1216-20 Arch Street, Philadelphia, Pennsylvania 19107, a producer of men's suits, sportcoats and slacks (accepted August 13, 1979); (13) Marble King, Inc., P.O. Box 195, Paden City, West Virginia 26159, a producer of glass marbles (accepted August 13, 1979); (14) Mark Industries, Inc., One University Drive, Arlington Heights, Illinois 60004, a producer of metal dies and stampings; and electronic components (accepted August 14, 1979); and (15) Southwest Footwear Corporation, 3151 East Drexel Road, Tucson, Arizona 85706, a producer of

children's sandals (accepted August 14, 1979).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (P.L. 93-618) and Section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers; or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

Jack W. Osburn, Jr.,
Chief, Trade Act Certification Division, Office
of Eligibility and Industry Studies.

BILLING CODE 3510-22-M

CONSUMER PRODUCT SAFETY
COMMISSION

[CP 79-3]

Skateboards; Denial of Petition

AGENCY: Consumer Product Safety
Commission.

ACTION: Denial of petition.

SUMMARY: The Commission denies a petition to ban skateboards. The Commission denies the petition because it has insufficient information to conclude that a mandatory banning regulation is necessary at this time.

FOR FURTHER INFORMATION CONTACT:
Douglas Noble, Office of Program
Management, Consumer Product Safety
Commission, Washington, DC 20207,
301-492-6453.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to begin a proceeding to issue, amend, or revoke a consumer product safety standard or ban. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the Federal Register.

On October 26, 1978 the Commission received a petition (CP 79-3) from the Consumer Affairs Committee of the Americans for Democratic Action requesting the issuance of a ban on skateboards. The petition contends that skateboards have been associated with many serious injuries, particularly to the head, internal organs, and joints and that the design of the skateboard itself cannot be improved in any way to make it safe.

Commission Evaluation of Petition

After considering the petitioner's request, the Commission staff analysis of the injury data, and Commission staff comments on the petition, the Commission has decided to deny this petition.

The Commission recognizes that skateboarding is the source of many injuries. However, the Commission believes, based on the injury information discussed below, that

injuries associated with skateboarding are primarily "use-related" rather than "product-related."

The 1978 *Hazard Analysis Report on Skateboards* prepared by Commission staff discusses the nature of the injuries that have been associated with skateboards.

The *Hazard Analysis* indicates that actual skateboard breakage, such as broken decks, fractured trucks, or wheels which fall off, were found to be causative factors in less than 2 percent of the skateboard-related injuries.¹ The main factors found to cause injuries were, in order of prominence: irregular riding surface, loss of balance, slipping from the board, jumping from the board, falling while turning, striking an obstacle, and the board slipping out from under the victim. The Commission concludes that the manner in which skateboards are used may be responsible for many skateboard-related injuries.

The *Hazard Analysis* also indicates that over one-half of skateboard-related injuries are sustained to the lower arm or leg. Fractures appear to be the most common type of injury, occurring in one-third of all injuries. In addition, a total of 25 deaths from skateboard-related accidents between 1975-77 have been reported through Commission files and newspaper articles. These accidents generally happened in one of two ways: victims either fell from the skateboards and struck their heads or victims were struck by automobiles while riding skateboards.

An analysis of injuries reported through the National Electronic Injury Surveillance System (NEISS) indicates that the incidence of skateboard associated injuries has decreased from an estimate of 140,000 in calendar year 1977 to an estimated 87,000 in calendar year 1978. The Commission notes that this is a reversal from the continuous rise in injuries from 1974 through 1977. While one of the reasons for the downward trend in injuries may be a decrease in the popularity of the sport, the Commission believes that an increased use of off-street skating sites and skate parks may have contributed to the decrease in injuries. In addition, while the Commission does not know how effective these items are in reducing injuries, there is an increased use of safety equipment such as helmets,

¹The Commission recognizes, however, that certain design or product features of skateboards (e.g., turning characteristics of boards, deck materials, truck width and placement, wheel diameter, etc.) are factors in skateboard associated accidents and that injuries might be reduced by improved product design in these areas.

knee pads, and elbow pads while skateboarding.

The Commission also believes that a ban is not necessary at this time because there appears to be an increased awareness of skateboarding safety on the part of state and local jurisdictions, which are promoting safety at the community level. As noted above, this awareness, along with an increased use of skateboard parks and safety equipment, may be partly responsible for the recent reduction in injuries.

Conclusion

In view of the foregoing, the Commission concludes that current information indicates that a mandatory banning regulation for skateboards is not needed at this time. The Commission, therefore, denies the petition.

The Commission notes, however, that it is concerned about the many serious injuries that have been associated with skateboarding. The Commission has instructed its staff to monitor any efforts to develop voluntary safety requirements for skateboards and to maintain continued liaison with national, state, and local organizations concerned with skateboard safety. The Commission also plans to continue its efforts in the area of consumer information and education relating to skateboarding.

Copies of the petition, the 1978 *Hazard Analysis Report on Skateboards*, and the Commission staff's briefing materials on the petition may be obtained from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th St., N.W., Washington, D.C. 20207.

Dated: August 15, 1979.

Robert C. Bledsoe, Jr.,
Acting Secretary, Consumer Product Safety
Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF ENERGY

Proposed Contract Award

AGENCY: Department of Energy.

ACTION: Notice of Proposed Contract
Award.

SUMMARY: In accordance with the Department of Energy Procurement Regulations, DOE gives public notice that a contract is being awarded, after taking into account the existence of potential organizational conflicts of interest, because this procurement is

determined to be in the best interests of the United States.

FOR FURTHER INFORMATION CONTACT:
Mr. James Binkley, Office of
Conservation and Solar Applications,
Room 2254, 20 Massachusetts Avenue,
NW, Washington, DC 20585.

Determination and Findings

Upon the basis of the following findings and determination, the proposed contract described below is being awarded, after taking into account the existence of potential Organizational Conflicts of Interest, because this procurement is determined to be in the best interests of the United States, pursuant to the authority of Department of Energy Procurement Regulation 41 CFR 9-1.5409(a)(3).

Findings

(1) The Department of Energy (DOE), Office of Conservation and Solar Applications is currently developing performance standards for new commercial buildings pursuant to section 304 of the Energy Conservation and Production Act (the "Act") (Pub. L. 94-385, 42 U.S.C. 6833). The Act provides deadlines for publication of the proposed standards by August 14, 1979. Final standards are to be promulgated within six months thereafter.

(2) In connection with the publication of these standards, it is necessary for the Office of Conservation and Solar Applications to retain skilled and experienced professionals to conduct research, collect information and perform analysis to enable DOE to develop the performance standards. For the past two years, AIA Research Corporation (AIA/RC), in conjunction with a team of subcontractors has performed the research under the direction of the Department of Housing and Urban Development ("HUD"), who had responsibility for instigation of this program initially. The subcontractors are: Syska & Hennessy, Bickle/CM, T.L.A. Lighting Consultants, Inc., Hanscomb Associates, Heery & Heery and NAHB Research Corporation.

DOE found that a timely issuance of performance standards would necessitate a continuation of the use of AIA/RC and its subcontractors to complete the work originally initiated by HUD.

(3) In accordance with 41 CFR 9-1.5405, AIA/RC and its team of subcontractors have provided disclosure of information concerning their interests related to the contract work to be performed. Specifically DOE was furnished with information concerning whether possible organizational conflicts of interest exist with respect to:

(1) A contractor's ability to render impartial technically sound and objective assistance or advice, or (2) whether an unfair competitive advantage may be conferred on a contractor as a result of performing specific tasks.

(4) In order to comply with the 41 CFR 9-1.5404 disclosure requirement, telephone conversations were made to AIA/RC and its team of subcontractors to be followed up by confirmation letters from the contractors. Numerous questions were asked which would aid in making the judgment (1) whether based on the relationship of the specific contractors' clients and business activities to the scope of the work to be performed under the contract, as well as the impact of the BEPS standards, it would be impossible for him to render impartial, technically sound and objective assistance or advice; and (2) whether contract performance would give the contractor an unfair competitive advantage. Then, analysis of this information and comparison to the task to be performed under the contract was made. Because of the contractors' affiliations with the architectural construction and engineering sectors of industry, the potential for bias was found to exist. In the case of the following contractors, potential organizational conflicts of interest were recognized: AIA/RC, Bickle/CM, T.L.A. Lighting Consultants, Syska & Hennessy, Hanscomb Associates, Heery & Heery, and NAHB Research Foundation.

(5) Because AIA/RC, and its team of subcontractors has the unique capabilities and staffs to perform the work for the Office of Conservation and Solar Applications within the time constraints allowed, it is not feasible to disqualify these contractors from contract award, in accordance with 41 CFR 9-1.5409(c)(1). Furthermore, it is not possible to avoid the potential organizational conflicts of interest by the inclusion of appropriate conditions in the resulting contract, in accordance with 41 CFR 9-1.5409(a)(2).

(6) The enactment of these performance standards will have far-reaching benefits in terms of energy conservation to the general public. The work performed by these contractors is critical to the development of these standards. Mitigation, to the extent feasible, under 9-1.5409(a)(3), will be obtained by (1) independent staff review by DOE officials; (2) use of existing methodology to cross-check and verify the material developed by the AIA/RC team; and (3) administrative procedures through which public distribution and the reception of public comment allow

mitigation of potential conflicts in the data and analysis.

Determination

In light of the above findings, I hereby determine in accordance with 41 CFR 9-1.5409(a)(3) that award of this contract would be in the best interests of the United States.

Dated: August 10, 1979.

Omi Walden,

Assistant Secretary, Office of Conservation and Solar Applications.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Application for Presidential Permit PP-70: Minnkota Power Cooperative, Inc.

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Application for Presidential Permit for a 12-kV International Transmission Line: Minnkota Power Cooperative, Inc.

SUMMARY: Minnkota Power Cooperative, Inc. filed an application for a Presidential Permit, PP-70, to construct, connect, operate and maintain a 75-foot, 12-kV international interconnection at the United States-Canadian boundary.

FOR FURTHER INFORMATION CONTACT:

James M. Brown, Jr., System Reliability and Emergency Response Branch, Department of Energy, Room 4110, 2000 M Street, N.W., Washington, D.C. 20461, (202) 254-8247. Lise Courtney Howe, Office of General Counsel, Department of Energy, Room 5113, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-9380.

SUPPLEMENTARY INFORMATION: On June 13, 1979 the Minnkota Power Cooperative, Inc. (Minnkota) filed an application with the Economic Regulatory Administration (ERA) for a presidential permit, pursuant to Executive Order No 10485, as amended. Minnkota requests authority to construct, connect, operate and maintain a 75-foot, 12-kilovolt interconnection at the United States-Canadian border. The 75-foot, 12-kV overhead transmission line will interconnect a 12-kV overhead line owned and operated by the Manitoba Hydro Electric Board with an underground cable to be laid by the Roseau Electric Cooperative in the Northwest Angle State Forest.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the System Reliability and Emergency Response Branch, Economic Regulatory

Administration, Room 4110, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with sections 1.8 or 1.10 of the Rules of Practice and Procedure (18 C.F.R. 1.8, 1.10).

Any such petitions and protests should be filed on or before September 18, 1979. Protests will be considered by ERA in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with ERA and will, upon request, be made available for public inspection and copying at the ERA Docket Room, Room B-210, 2000 M Street, N.W., Washington, D.C., and at the System Reliability and Emergency Response Branch, Room 4110, 2000 M Street, N.W., Washington, D.C.

Dated: August 16, 1979.

Jerry L. Pfeffer,

Assistant Administrator for Utility Systems, Economic Regulatory Administration.

ACTION: Notice of Issuance of Presidential Permit for 12.5 kV International Interconnection, PP-67; North Central Electric Cooperative, Inc.

SUMMARY: The Department of Energy gives notice of the issuance of a Presidential Permit, PP-67, to North Central Electric Cooperative, Inc. for a 12.5 kV International Interconnection at the United States-Canadian Border.

FOR FURTHER INFORMATION CONTACT:

James M. Brown, Jr., System Reliability and Emergency Response Branch, Department of Energy, Room 4110, 2000 M Street, N.W., Washington, D.C. 20461, (202) 254-8247. Lise Courtney Howe, Office of General Counsel, Department of Energy, Room 5113, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-9380.

SUPPLEMENTARY INFORMATION: On March 13, 1979, North Central Electric Cooperative, Inc. applied for authorization, pursuant to the Executive Order 10485, as amended by Executive Order 12038, to construct, connect, operate and maintain an underground international interconnection in the International Peace Gardens at the United States-Canadian border, near Dunseith, North Dakota.

The Department of Energy made a negative determination of environmental impacts resulting from this project. Accordingly, no environmental impact statement has been issued.

The Secretary of State by letter dated June 26, 1979 and the Secretary of Defense by letter dated June 25, 1979 favorably recommended that the Permit be granted.

Upon consideration of the matter, ERA found that issuance of the Permit was appropriate and consistent with the public interest. Accordingly, the Administrator of ERA issued the permit on June 27, 1979 authorizing North Central Electric Cooperative, Inc. to construct, connect, operate and maintain an electric transmission facility at the U.S.-Canadian border.

Copies of the order are on file with the Economic Regulatory Administration and will, upon request, be made available for public inspection and copying at the ERA Docket Room, Room B-210, 2000 M Street, N.W., Washington, D.C. and at the System Reliability and Emergency Response Branch, Room 4110, 2000 M Street, N.W., Washington, D.C.

Issued at Washington, D.C., August 16, 1979.

Jerry L. Pfeffer,

Assistant Administrator for Utility Systems, Economic Regulatory Administration.

[FR Doc. 79-25937 Filed 8-21-79; 8:45 am]

BILLING CODE 6450-01-M

Issuance of Presidential Permit for 120 kV International Interconnection, PP-66: Citizens Utilities Co.

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Issuance of Presidential Permit for 120 kV International Interconnection, PP-66: Citizens Utilities Company.

SUMMARY: The Department of Energy gives notice of the issuance of a Presidential Permit, PP-66, to Citizens Utilities Company for a 120 kV International Interconnection at the United States-Canadian Border.

FOR FURTHER INFORMATION CONTACT:

James M. Brown, Jr., System Reliability and Emergency Response Branch, Department of Energy, Room 4110, 2000 M Street, N.W., Washington, D.C. 20461, (202) 254-8247. Lise Courtney Howe, Office of General Counsel, Department of Energy, Room 5113-Federal Building, 12th & Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-9380.

SUPPLEMENTARY INFORMATION: On March 8, 1979, Citizens Utilities Company (Citizens) applied for authorization, pursuant to the Executive

Order No. 10485, as amended by Executive Order No. 12038, to construct, connect, operate and maintain an international interconnection at the United States-Canadian border, near Derby Line, Vermont. The three-phase, 60 hertz, 120 kilovolt overhead transmission line, approximately 565 feet in length, would interconnect with a similar transmission line owned by Hydro Quebec and located in the province of Quebec.

The Department of Energy made a negative determination of environmental impacts resulting from this project. Accordingly, no environmental impact statement has been issued.

The Secretary of State by letter dated May 30, 1979 and the Secretary of Defense by letter dated June 5, 1979 favorably recommended that the Permit be granted.

Upon consideration of the matter, ERA found that issuance of the Permit was appropriate and consistent with the public interest. Accordingly, the Administrator of ERA issued the Permit on June 21, 1979 authorizing Citizens Utilities Company to construct, connect, operate and maintain an electric transmission facility at the U.S.-Canadian border.

Copies of the order are on file with the Economic Regulatory Administration and will, upon request, be made available for public inspection and copying at the ERA Docket Room, Room B-210, 2000 M Street, N.W., Washington, D.C. and at the System Reliability and Emergency Response Branch, Room 4110, 2000 M Street, N.W., Washington, D.C.

Issued in Washington, D.C., August 16, 1979.

Jerry L. Pfeffer,

Assistant Administrator for Utility Systems, Economic Regulatory Administration.

[FR Doc. 79-25938 Filed 8-21-79; 8:45 am]

BILLING CODE 6450-01-M

Lundell's, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account

established pursuant to the Consent Order.

DATES: Effective Date: August 7, 1979.

COMMENTS BY: September 21, 1979.

ADDRESS: Send comments to: Wayne I. Tucker, District Manager of Enforcement, Southwest District, Department of Energy, P.O. Box 35228, Dallas, Texas 75235.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager of Enforcement, Southwest District, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, phone 214/767-7745.

SUPPLEMENTARY INFORMATION: On August 7, 1979, the Office of Enforcement of the ERA executed a Consent Order with Lundell's Inc. of Freer, Texas. Under 10 C.F.R. § 205.199(b), the Consent Order which involves a sum of less than \$500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

Lundell's Inc., with its office located in Freer, Texas, is a firm engaged in crude oil production, and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 C.F.R. Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of crude oil sales, the Office of Enforcement, ERA, and Lundell's Inc., entered into a Consent Order, the significant terms of which are as follows:

1. The period covered by the audit was September 1, 1973 through December 31, 1976, and it included all sales of crude oil which were made during that period.
2. Lundell's Inc. improperly applied the provisions of 6 C.F.R. Part 150, Subpart L, and 10 C.F.R. Part 212, Subpart D, when determining the prices to be charged for crude oil; and as a consequence, charged prices in excess of the maximum lawful sales prices resulting in overcharges to its customers.
3. In order to expedite resolution of the disputes involved, the DOE and Lundell's Inc. have agreed to a settlement in the amount of \$71,063.60. The negotiated settlement was determined to be in the public interest as well as the best interests of the DOE and Lundell's Inc.
4. Because the sales of crude oil were made to refiners and the ultimate consumers are not readily identifiable, the refund will be made through the DOE in accordance with C.F.R. Part 205, Subpart V as provided below.

5. The provisions of 10 C.F.R. § 205.199, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, Lundell's Inc. agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I.1. above, the sum of \$71,083.60 on or before November 5, 1979. Refunded overcharges will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 C.F.R. § 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 C.F.R. § 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 C.F.R. § 205.199(a).

III. Submission of Written Comments

A. Potential Claimants: Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing

the funds to other claimants or to the general public interest.

B. Other Comments: The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order. You should send your comments or written notification of a claim to Wayne I. Tucker, District Manager of Enforcement, Southwest District, Department of Energy, P.O. Box 35228, Dallas, Texas 75235. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/787-7745.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Lundell's Inc., Consent Order." We will consider all comments we received by 4:30 p.m., local time, on September 21, 1979. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 C.F.R. § 205.9(f).

Issued in Dallas, Texas on the 7th day of August, 1979.

Wayne I. Tucker,
District Manager, Southwest District
Enforcement, Economic Regulatory
Administration.

BILLING CODE 6450-01-M

[Docket No. EC79-1]

Town of Massena; Decision and Order Denying Petition, Complaint and Motion of Emergency Relief

Issued: August 15, 1979.

On August 7, 1979, the Town of Massena, New York (Petitioner or Massena) filed a petition, complaint, and motion for emergency relief pursuant to section 202(c) of the Federal Power Act. Massena requested an order (1) determining that pursuant to section 202(c) of the Act, an emergency exists; (2) authorizing and ordering that deliveries of Power Authority of the State of New York (PASNY) power and energy made to the Petitioner on or after August 9, 1979, may, during the existence of said emergency, be made, charged and accounted for pursuant to contract NS-1 between PASNY and Niagara Mohawk Power Corporation (Niagara); (3) ordering Niagara to cease interference with the delivery of PASNY power and energy to MASSENA during such emergency; (4) ordering PASNY to commence delivery of power of Petitioner pursuant to Petitioner's October 17, 1978, contract with PASNY at 12:01 p.m. on August 10, 1979, or at such time thereafter as all judicial restraints upon or affecting such

delivery are removed. This petition is closely related to proceedings before the Federal Energy Regulatory Commission in Docket No. E-9565, in which the Petitioner is seeking an order from the FERC confirming Niagara's legal obligation, pursuant to contract NS-1 with PASNY to transmit and transform PASNY power to Massena.

The Secretary of Energy has jurisdiction over this matter pursuant to section 402(a)(1)(B) of the Department of Energy Organization Act. On October 1, 1977, the Secretary issued DOE Delegation Order No. 0204-4 (42 FR 60726, November 29, 1977) which delegated to the Administrator, Economic Regulatory Administration, the authority to decide this matter. Authority has been further delegated to the Assistant Administrator for Utility Systems.

Section 202(c) of the Federal Power Act provides that whenever it is determined "that an emergency exists by reason of sudden increase in the demand for electric energy, or a shortage of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, [ERA] shall have authority . . . to require by order such temporary connections of facilities and such generation, delivery, interchange or transmission of electric energy as in its judgement will best meet the emergency and serve the public interest." Accordingly, the initial determination which must be made by ERA is that an emergency in fact exists.

In the instant proceeding, Niagara states, in its answer to the motion by Massena, that, "no emergency ever existed, *that no emergency exists now*, and that no emergency is foreseeable. Niagara Mohawk now provides the people of Massena with safe and reliable service and has no intention whatsoever of terminating that service." Answer of Respondent at 2, Town of Massena, New York v. Niagara Mohawk Power Corp., ERA Docket NO. EC79-1 (August 10, 1979).

ERA has reviewed the circumstances and technical factors associated with the electricity supply to the Town of Massena. Based on this review there is no information to support the contention of a current or pending emergency situation as defined under section 202(c) of the Federal Power Act.

Accordingly, ERA finds that no emergency, as required by section 202(c) of the Federal Powers Act, exists at this time. If the situation should change in the future, Massena may submit another petition.

Therefore, it is hereby ordered that the petition, complaint, and motion for emergency relief pursuant to section 202(c) of the Federal Power Act, filed by the Town of Massena, is denied without prejudice.

Issued in Washington, D.C., August 15, 1979.

Jerry L. Pfeffer,
Assistant Administrator for Utility Systems,
Economic Regulatory Administration.

BILLING CODE 6450-01-M

Southeastern Power Administration

[Rate Order No. SEPA-6]

Jim Woodruff Project; Order Confirming and Approving Power Rates on an Interim Basis

AGENCY: Department of Energy, Southeastern Power Administration (SEPA).

ACTION: Notice of Approval on Interim Basis of Jim Woodruff Project Rates.

SUMMARY: On August 15, 1979, the Assistant Secretary for Resource Applications under Delegation Order No. 0204-33, 43 FR 60636 (December 28, 1978) confirmed and approved, on an interim basis, Wholesale Power Rate Schedules JW-1 (Revised) and JW-2-B applicable to Jim Woodruff Project Power. The rates will produce a decrease of \$308,000 in annual revenue, which is equivalent to approximately 13 percent less than the amount produced by rates previously in effect. The rates are subject to confirmation and approval by the Federal Energy Regulatory Commission on a final basis.

EFFECTIVE DATES: The rates are confirmed and approved on an interim basis effective October 20, 1979.

FOR FURTHER INFORMATION CONTACT:

Julian T. Brown, Jr., Chief, Division of Fiscal Operations, Southeastern power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635.

Marlene A. Moody, Office of Power Marketing Coordination, Department of Energy, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION: Rate Schedule JW-1 (Revised), applicable to preference customers, is a continuation of rates and charges applicable to such customers approved by the Federal Power Commission on August 15, 1972. Rate Schedule JW-2-B, applicable to Florida Power Corporation, is a revision in previously approved rates and is reflected in a supplemental contract

between SEPA and the Company executed July 2, 1979. FPC approval of prior rate schedules expired August 20, 1977.

Issued in Washington, D.C. August 15, 1979.
George S. McIsaac,

Assistant Secretary, Resource Applications.

Assistant Secretary for Resource Applications

In the matter of Southeastern Power Administration, Jim Woodruff Project Power Rates; order confirming and approving power rates on an interim basis; August 15, 1979.

Pursuant to Sections 302(a) and 301(b) of the Department of Energy Organization Act, Pub. L. 95-91, the functions of the Secretary of the Interior and the Federal Power Commission under Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s, relating to the Southeastern Power Administration (SEPA) were transferred to and vested in the Secretary of Energy. By Delegation Order No. 0204-33, effective January 1, 1979, 43 FR 60636 (December 28, 1978) the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve, and place in effect such rates on an interim basis and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. This rate order is issued pursuant to the delegation to the Assistant Secretary.

Background

Contractual Arrangements and Existing Rates

Power from the Jim Woodruff Project is presently delivered into the Florida Power Corporation System. A wheeling contract with this utility enables SEPA to sell power from the Jim Woodruff Project to six preference customers, located within a radius of 150 miles of the project and to the Company. Since the Project is subject to floodout, it is partially supported by Federal projects in SEPA's Georgia-Alabama System and partially supported by power purchases from the Florida Power Corporation. Existing contracts, several times amended, were executed July 19, 1957, and terminate or may be terminated July 20, 1982. The Project has an installed generating capacity of 30,000 kilowatts and an estimated average annual energy production of 250,000,000 kilowatt-hours.

A total of 36,000 kilowatts of load factor power is sold to preference customers with remaining energy sold to the Company.

The power is presently sold under Rate Schedules JW-1 (Revised) and JW-2 (Revised). These rate schedules were previously confirmed and approved by the Federal Power Commission on August 15, 1972. Existing rates produce approximately \$2,338,000 annually.

On July 2, 1979, SEPA entered into a Supplemental Agreement with Florida Power Corporation in which, among other things, the revised rates to the Company which are the subject of this order were contractually agreed upon effective upon my approval thereof.

Public Notice and Comment

SEPA prepared a Power Repayment Study in May 1979 for the Jim Woodruff Project which showed that a decrease in existing rates would still allow the production of revenues sufficient to pay all power costs during the system repayment period as required to meet cost recovery criteria. Based on this Repayment Study, a decrease in average annual revenues of approximately \$300,000 was proposed for the period ending August 19, 1982, a decrease of approximately 13 percent.

Opportunities for public review and comments on the proposed decreased power rate to the Company (preference customers' rates remaining the same) was announced by Notice published in the Federal Register on June 8, 1979, 44 FR 33145, and all customers were notified by mail. A public comment forum was held in Tallahassee, Florida, on June 26, 1979, where an opportunity for oral presentation of views was afforded. Written comments were invited by the Notice through July 2, 1979. A transcript of the public comment forum was made. No oral presentations were offered at the well attended forum and no written comments were received.

Action by the Economic Regulatory Administration (ERA)

On July 11, 1977, the Department of the Interior, on behalf of SEPA, filed a request with the Federal Power Commission (FPC) for approval of an extension of the existing preference customer rate schedule and approval of a revised schedule (decrease) applicable to Florida Power Corporation based on a SEPA prepared April 1977 Repayment Study. Review of this matter passed to ERA on October 1, 1977, by the terms of the Secretary's Delegation Order No. 0204-4. On December 29, 1978, ERA in Docket No. SEPA 78-3 disapproved SEPA's proposed schedules on the ground that such rates were higher than

necessary to recover the cost of producing and transmitting the energy and power sold from the Jim Woodruff Project over the fifty-year repayment period. On December 28, 1978, the Secretary issued Delegation Order No. 0204-33, effective January 1, 1979, 43 FR 60636, transferring the authority to confirm and approve Federal rates to the undersigned and the Federal Energy Regulatory Commission.

Discussion

Project Repayment

In May 1979, SEPA prepared a revised Repayment Study which varies from the April 1977 Repayment Study in that it reflects subsequently announced capital additions to the project, an estimated two percent loss in energy generation due to welding the turbine blades in a fixed position in connection with removing the project from the Walter F. George Project and increases in costs of purchased energy.

The May 1979 Repayment Study indicates that the previously determined decreased revenue level was both proper and appropriate. A continuation of existing preference customer rates and the adjusted rate contained in SEPA's July 2, 1979, Supplemental Agreement with the Florida Power Corporation and reflected in Rate Schedule JW-2-B will produce revenues adequate but necessary to recover all proper system power costs. The rates here considered will decrease annual revenues by \$308,000, or a decrease of approximately 13 percent below revenues received under previous rates. Projected annual revenues will equal an estimated \$2,030,000 with the rate decrease.

Rate Design

The rate design here employed for preference customer rates is the same as has existed since 1967. The rate design applicable to monthly charges for energy sold the Florida Power Corporation has been revised in the following particulars: (1) different charges for on-peak and off-peak energy have been eliminated, (2) the application of a direct fuel adjustment provision has been eliminated, and (3) charges for energy have been set at 60 percent of the calculated savings in fuel costs to the Company. When applied to the available product, the rates will recover the total costs required to be recovered from power revenues as demonstrated by the May 1979 Repayment Study.

Environmental Impact

SEPA has reviewed the possible environmental impacts of the rate

adjustments under consideration and has concluded with Departmental concurrence that, because the decreased rates would not significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, the proposed action is not a major Federal action for which preparation of an Environmental Impact Statement is required.

Price Stability

The price standards of the President's Council on Wage and Price Stability are not applicable to the rate decrease approved herein.

Availability of Information

Information regarding these rates including studies, public comment forum transcript, and other supporting material are available for public review in the offices of Southeastern Power Administration, Samuel Elbert Building, Elberton, Georgia 30635, and in the Office of the Director of Power Marketing Coordination, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Submission to the Federal Energy Regulatory Commission

The rates herein confirmed and approved on an interim basis, together with supporting documents, will be submitted promptly to the Federal Energy Regulatory Commission for confirmation and approval on a final basis for a period ending no later than August 19, 1982.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective October 20, 1979, attached Wholesale Power Rate Schedules JW-1 (Revised) and JW-2-B. The rate schedules shall remain in effect on an interim basis through October 19, 1980, unless such period is extended or until the FERC confirms and approves them or substitute rate schedules on a final basis.

Issued at Washington, D.C. this 15th day of August, 1979.

George S. McIsaac,

Assistant Secretary Resource Applications.

Department of the Interior Southeastern Power Administration

Wholesale Power Rate Schedule JW-1 (Revised)

Availability:

This rate schedule shall be available to public bodies and cooperatives served by the Florida Power Corporation and having points of delivery within 150 miles of Jim Woodruff Project (hereinafter called the Project).

Applicability:

This rate schedule shall be applicable to firm power and accompanying energy made available by the Government from the Project and sold in wholesale quantities.

Character of Service:

The electric capacity and energy supplied hereunder will be three-phase alternating current at a nominal frequency of 60 cycles per second delivered at the delivery points of the customer.

Monthly Rate:

The monthly rate for capacity and energy made available or delivered under this rate schedule shall be:

Demand Charge:

\$1.50 per kilowatt of monthly billing demand.

Energy Charge:

4.5 mills per kilowatt-hour.

Billing Demand:

The monthly billing demand for any billing month shall be the lower of (a) the Customer's contract demand or (b) the sum of the maximum 30-minute integrated demands for the month at each of the Customer's points of delivery provided, that, if an allocation of contract demand to delivery points has become effective, the 30-minute maximum integrated demand for any point of delivery shall not be considered to be greater than the portion of the Customer's contract demand allocated to that point of delivery.

Capacity Made Available:

The capacity which the Government will supply to meet the demand of the Customer in any billing month will be the maximum amount of capacity required for that purpose up to the contract demand. Such maximum amount of capacity required will be determined by adding the maximum 30-minute integrated measured demands at all points of delivery of the Customer

located within 150 miles of the Project power station. At such time as the demand of the Customer approximates the contract demand, the Government will allocate the contract demand among the Customer's then existing delivery points on the basis of the demands recorded as of that time at each such point of delivery adjusted to round each point's allocation to the nearest 10 kilowatts. The allocation of contract demand to delivery points shall become effective the billing month that the Customer's total demand at said delivery points exceeds its contract demand.

Energy Made Available:

During any billing month in which the Government supplies all the Customer's capacity requirements, the Government will make available such energy as the Customer may require to supply its load. In any billing month when both the Government and the Florida Power Corporation are supplying capacity to a delivery point, each kilowatt of capacity supplied to such point during such month will be considered to be accompanied by an equal quantity of energy.

Billing Month:

The billing month for power sold under this schedule shall end at 12:00 midnight on the 20th day of each calendar month.

Conditions of Service:

The Customer shall at its own expense provide, install, and maintain on its side of each delivery point the equipment necessary to protect and control its own system. In so doing, the installation, adjustment, and setting of all such control and protective equipment at or near the point of delivery shall be coordinated with that which is installed by and at the expense of the Florida Power Corporation on its side of the delivery point.

Service Interruption:

When energy delivered to the Customer's system for the account of the Government is reduced or interrupted for 1 hour or longer, and such reduction or interruption is not due to conditions on the Customer's system or has not been planned and agreed to in advance, the demand charge for the month shall be appropriately reduced.

August 19, 1967.

Wholesale Power Rate Schedule JW-2-B

Availability:

This rate schedule shall be available to the Florida Power Corporation (hereinafter called the Company).

Applicability:

This rate schedule shall be applicable to electric energy generated at the Jim Woodruff Project (hereinafter called the Project) and sold to the Company in wholesale quantities.

Points of Delivery:

Power sold to the Company by the Government will be delivered at the connection of the Company's transmission system with the Project bus.

Character of Service:

Electric power delivered to the Company will be three-phase alternating current at a nominal frequency of 60 cycles per second.

Monthly Rate:

The monthly rate for energy sold under this schedule shall be equal to 60 percent of the calculated saving in the cost of fuel per KWH to the Company determined as follows:

Energy Rate = $60\% \times Fm/Sm$ (Computed to the nearest \$0.00001 (1/100 mill) per KWH)

Where:

Fm = Company fuel cost in the current period as defined in Federal Power Commission Order 517 issued November 13, 1974, Docket No. R-479.

Sm = Company sales in the current period reflecting only losses associated with wholesale sales for resale. Sale shall be equated to the sum of (a) generation, (b) purchases, (c) interchange-in, less (d) intersystem sales, less estimated wholesale losses (based on average transmission loss percentage for preceding calendar year).

Method of Application: The energy rate applied during the current billing month will be based on costs and equated sales for the second month preceding the billing month.

Determination of Energy Sold:

Energy will be furnished by the Company to supply any excess of Project use over Project generation. Energy so supplied by the Company will be deducted from the actual deliveries to the Company's system to determine the net deliveries for energy accounting and billing purposes. Energy for Project use shall consist of energy used for station service, lock operation, Project yard, village lighting, and similar uses.

The on-peak hours shall be the hours between 7:00 a.m. and 11:00 p.m., Monday through Sunday, inclusive. Off-peak hours shall be all other hours.

All energy made available to the Company, exclusive of transfers to the Georgia Power Company for the account of the Government, shall to the extent required be classified as energy transmitted to the Government's preference customers served from the Company's system. All energy made available to the Company from the Project shall be separated on the basis of the metered deliveries to it at the Project during on-peak and off-peak hours, respectively. Such on-peak energy as is made available to the Company at the points of interconnection with Georgia Power Company shall be determined from schedules of deliveries. Deliveries to preference customers of the Government shall be divided on the basis (with allowance for losses) of 77 percent being considered as on-peak energy and 23 percent being off-peak energy. Such percentages may by mutual consent be changed from time to time as further studies show to be appropriate. Deliveries made to the Georgia Power Company shall be on the basis (with allowances for losses) of schedules of deliveries. In the event that in classifying energy there is more than enough on-peak energy available to supply on-peak requirements of the Government's preference customers but less than enough off-peak energy available to supply such customers off-peak requirements, such excess on-peak energy may be applied to the extent necessary to meet off-peak requirements of such customers in lieu of purchasing deficiency energy to meet such off-peak requirements.

Any on-peak and off-peak Project energy made available in any billing month over and above that required for transfers to the Georgia Power Company for the account of the Government and to meet the above requirements of preference customers shall be classified as energy sold under this rate schedule.

The energy requirements of the Government's preference customers shall be the total energy requirements of such customers so long as the Government is supplying the total capacity required. In any month when both the Government and the Company are supplying capacity to a preference customer, each kilowatt of capacity shall be considered to be accompanied by an equal quantity of energy. The energy supplied by the Government shall come from its own resources or

from purchases from the Company and shall be accounted for as transmitted for the account of the Government. Energy delivered to preference customers by the Company shall be increased by 7 percent to provide for losses in transmission.

Billing Month:

The billing month under this schedule shall end at 12:00 midnight on the 20th day of each calendar month.

Power Factor:

The purchaser and seller under this rate schedule agree that they will both so operate their respective systems that neither party will impose an undue reactive burden on the other.

October 20, 1979.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

Acceptable Fuel Sampling Analysis Methods for Demonstrating Compliance by Sulfur Dioxide Sources in Ohio; Amendment

United States Environmental Protection Agency (EPA) is amending its policy statement of February 15, 1978 (43 FR 6646) concerning an acceptable alternate method of demonstrating compliance with the federally-promulgated Ohio sulfur dioxide regulations. 40 CFR 52.1882(a)(5) and (b)(5). That notice specifically authorized coal analysis conducted in accordance with ASTM methods D3176 based on a twenty-four (24) hour period of fuel averaging as an alternate means of demonstrating compliance.

EPA is now amending that policy in order to recognize the inherent variability in the sulfur content in coal and the fact that random exceedances of the 24 hour fuel averaging may occur. EPA will accept, as a demonstration of compliance, coal analysis conducted according to the above-noted methods based on a 24 hour period taking into account two exceedances, as determined by fuel sampling, at any single source in any consecutive thirty (30) day period, with each day completing a new 30 day period.

However, as was stated in the February 15, 1978 notice, acceptance of certifications of compliance based on fuel analysis does not preclude the Administrator from requiring stack tests at a later time or initiating enforcement actions based upon the results of a subsequent stack test. 40 CFR § 52.1881(b)(2).

Dated: August 1, 1979.

John McGuire,
Regional Administrator.

BILLING CODE 6560-01-M

[OPP-180348; FRL 1302-6]

Alabama, Florida, and New York; Issuance of Specific Exemptions To Use Permethrin in Poultry Houses To Control House Flies and Other Synanthropic Flies

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of specific exemptions.

SUMMARY: EPA has granted specific exemptions to the Alabama Department of Agriculture and Industries, the Florida Department of Agriculture and Consumer Services, and the New York State Department of Environmental Conservation (hereafter referred to as "Alabama," "Florida," "New York," or the "Applicants") to use permethrin to control the common house fly and other synanthropic flies in caged poultry houses. The specific exemptions expire on December 31, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW., Room: E-124, Washington, D.C. 20460, Telephone: 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: The house fly and stable fly have short life cycles. House flies pass through the egg, larva, pupa, and adult stages in two weeks in summer. The stable fly requires 25 to 30 days for a life cycle. The larva of the house fly breeds in animal manure and other decaying organic vegetation such as hay, silage, and manure mixed with hay. A female house fly can lay approximately 800 eggs during her life. House fly adults feed on sweets for energy as well as manure, while stable flies are blood feeders. The adults of both species tend to rest on structures, vegetation, and fences surrounding breeding areas. House flies tend to remain in large numbers within ½ mile of the breeding site, whereas stable flies have been known to migrate more than 70 miles.

House flies and stable flies are prevalent from March through November. Peak populations of house flies occur from June through September,

although cold weather synchronizes emergence of large numbers of adults from October through March. Stable flies are present in peak populations in livestock farms in spring from February to June. From August to November winds blow stable flies in large numbers from agricultural areas to areas where they attack humans.

The Applicants report that the house fly, stable fly, and other manure breeding flies have become increasingly important pests of poultry farms in recent years. The problem has become critical during the past four years. The current situation is a result of: (1) increasing levels of resistance to currently available insecticides for poultry use, (2) cancellation of insecticide registrations in recent years, (3) lack of new insecticide registrations in recent years, (4) shortage of synergized pyrethrins due to crop failures in Africa, and (5) urbanization of rural areas. No insecticides are currently registered for stable fly control in or around poultry houses. A range of insecticides are currently registered for the control of house flies. According to the Applicants, fly populations are resistant to all recommended insecticides except pyrethrins, which are in short supply.

The abundance of flies varies with rainfall, temperature, and pest management techniques. Even with the incorporation of recommended cultural control practices, the Applicants claim that the manipulation of moderate to heavy populations of flies is not always possible, and health departments often require insecticide spraying to alleviate fly outbreaks. Inundative releases of parasites have reduced fly populations around poultry farms; however, the Applicants report that it has been too costly to release enough parasites to control flies in most farms. The Applicants state that residual spraying of structural surfaces would not affect manure-inhabiting parasite populations on farms using biological controls. Data indicate that permethrin will control the common house fly and other synanthropic flies, when used according to label directions.

The Applicants claim that without permethrin in complement with other available methods of control, there is a high probability of serious economic losses to poultry producers in their States. Alabama estimates losses ranging from \$134,000 to \$402,000; Florida estimates losses ranging from \$132,530 to \$397,590; and New York estimates losses ranging from \$100 to \$2,500 to individual poultry producers from ineffective fly control. In addition,

under each State's laws, poultry producers may be fined or forced to close operations when excessive numbers of flies are found to be breeding.

The Applicants propose to make applications of permethrin on premises where either three complaints have been received by the local health department, or knowledgeable experts have determined that an emergency exists. The Applicants propose to apply permethrin as a 0.1 percent dilute spray at a rate of one gallon per 750 square feet, or as a 5.0 percent low volume spray at 4 fluid ounces per 1,000 square feet.

EPA has determined that residues of permethrin in poultry and eggs will most likely not exceed 0.5 part per million (ppm) from the proposed use. This residue level has been judged adequate to protect the public health. No unreasonable adverse effect to the environment is anticipated from this use.

After reviewing the applications and other available information, EPA has determined that (a) pest outbreaks of house flies and other synanthropic flies have occurred or are likely to occur; (b) there is no effective pesticide presently registered and available for use to control these flies in Alabama, Florida, and New York; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if these flies are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicants have been granted specific exemptions to use the pesticide noted above until December 31, 1979, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. The pesticide Ectiban (permethrin) may be applied as a 0.1 percent dilute spray at a rate of one gallon per 750 square feet, or as a 5.0 percent low volume spray at 4 fluid ounces per 1,000 square feet;

2. A maximum of 15 applications may be made per caged poultry house;

3. The following maximum pounds of active ingredients are authorized: 135 pounds in Alabama, 1,566 pounds in Florida, and 12 pounds in New York;

4. Applications are to be made by farm proprietors, or employees who are State-certified pesticide applicators or under the direct supervision of State-certified pesticide applicators;

5. Application may take place only in caged poultry houses where:

a. Three complaints are received by the local health department, and/or
b. A knowledgeable expert determines that an emergency exists or is imminent as specified in Alabama Regulation Title 22 Section 75 in Alabama, under Florida Statute 388 in Florida, or in New York State Sanitary Code (Part 8) in New York, and proper use of registered insecticides is not providing adequate control. The methods used to make this determination will include direct counts, scudder grill, speck cards, or sticky tapes.

6. Poultry and eggs from treated caged poultry houses should not have permethrin residues in excess of 0.5 ppm. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action. The Applicants are responsible for insuring that poultry and eggs from treated caged poultry houses are monitored for residues of permethrin. Poultry and eggs with residues of 0.5 ppm or less of permethrin may be shipped in interstate commerce;

7. All label restrictions and precautions for Ectiban 25 percent and 5.7 percent EC shall be observed;

8. The EPA shall be informed immediately of any adverse effects to man or the environment resulting from this program; and

9. A final report summarizing the results of this program in that State must be submitted to Alabama, Florida, and New York to EPA by April 30, 1980. The report must include residue data gathered during monitoring under the specific exemption.

(Statutory Authority: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136.)

Dated: August 16, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-01-M

[OPP-180347; FRL 1302-5]

Clemson University; Issuance of Specific Exemption To Use Permethrin in Poultry Houses To Control Common House Fly

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has granted a specific exemption to the College of Agricultural

Sciences, Division of Regulatory and Public Service Programs, Clemson University, South Carolina (hereafter referred to as the "Applicant"), to use a total of 500 pounds of permethrin on the housing for one million caged chickens to control the house fly (*Musca domestica*) in South Carolina. The specific exemption expires on December 31, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW., Room: E-124, Washington, D.C. 20460, Telephone 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: The house fly is the principal fly pest to poultrymen. The fly problem begins when the adult fly emerges from the pupa. A day or two later adult flies mate and egg laying begins from two to three days from then. Each female fly can deposit 400 to 900 eggs within several weeks, usually in batches of 100 to 500 eggs each. The eggs hatch in 8 to 24 hours, into small worm-like maggots. The larvae grow rapidly, passing through three instars over a period of 3 to 4 days. The last stage of the larval skin forms into the pupa, inside which the maggot transforms into the fly. Within 3 to 5 days the adult emerges from the pupa, completing the cycle. Under the most favorable conditions the house fly may complete a generation in 7 to 8 days.

The fertility and rapid life cycle of the house fly are the principal reasons that outbreaks can explode. Normally, the house fly will remain close to its breeding site unless population numbers force natural dispersal. The house fly is strongly attracted to fresh wastes (poultry or other animal) which give off ammonia and to feed, especially silage. The house fly is also strongly attracted to houses, barns, and animal housing which they prefer to use as resting areas when not feeding.

According to the Applicant, the house fly became a serious health pest rather than a nuisance when housing poultry in cages became popular. The situation deteriorated until the South Carolina Department of Health and Environmental Control instituted regulations governing sanitation of caged poultry houses in 1972. The regulations require that caged poultry operations in South Carolina be registered and that poultrymen maintain house fly control or suffer heavy

penalties. The failure to control the house fly can put poultrymen out of business. Poultry is a \$5.4 million industry in South Carolina. Also of concern to the health authorities is the possible transmission of disease and threat of epidemics in the vicinity of house fly outbreaks.

According to the Applicant, most poultry producers have relied on pyrethrum over the years as their standard house fly control chemical. The Applicant reported that with pyrethrum adulticides and correct management of water and waste, the producer can control the house fly, but pyrethrum is in short supply. While organophosphate insecticides (dichlorovos, naled, and dimethoate) are registered for house fly control, results with these materials have been less than satisfactory, the Applicant stated. The recommended bait adulticides are useful only as a supplemental treatment, and must be combined with an effective adulticide spray program to be of value. Larvicide treatments are recommended only as spot treatments in order to minimize harmful effects on beneficial insects and mites which inhabit the waste; they are also expensive and have low efficiency, the Applicant claimed.

There are other methods of control. The water flush system, which washes the wastes into lagoons, is effective, and poultry houses built with the flush system have no fly problem. Some cage layer farms employ mechanized scraper systems which remove the waste daily. Even these systems can have fly breeding problems if adverse weather prohibits removal of the accumulated waste for several days. Under ideal conditions, poultry waste maintained in a dry state will not breed sufficient house flies to cause problems. Waste maintained in a dry state encourages the build-up of parasites and predators of house fly eggs, larvae, and pupae in the wastes. Under ideal management and physical conditions of the facility, little chemical control is needed since dryness and biological agents will suppress breeding; however, few producers have developed water control and waste management techniques to the point that biological agents can be relied on for control.

The Applicant proposed to apply permethrin as a residual treatment at a rate of four ounces of product (Ectiban 5.7 EC) per 1,000 square feet or a 0.1% dilute spray (½ ounce of Ectiban 25% WP) per gallon per 750 square feet. Permethrin would not be applied directly to poultry, eggs, or rooms where eggs are stored. Data indicate that permethrin will control the common

house fly when used in accordance with label directions.

EPA has determined that residues of permethrin in poultry and eggs are not likely to exceed 0.5 part per million (ppm) from this use. This residue level has been judged adequate to protect the public health. The proposed use should not present a hazard to the environment.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of the house fly has occurred or is likely to occur; (b) there is no effective pesticide presently registered and available for use to control the house fly in South Carolina; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the house fly is not controlled; and (e) the time available for action to mitigate the problem posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until December 31, 1979, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The pesticide Ectiban (permethrin) may be applied as a 0.1% dilute spray at a rate of one gallon per 750 square feet, or as a 5.0% low volume spray at 4 fluid ounces per 1,000 square feet;

2. A maximum of 15 applications may be made per caged poultry house;

3. A maximum of 500 pounds of active ingredient is authorized;

4. Applications are to be made by farm proprietors or employees who are State-certified pesticide applicators or under the direct supervision of State-certified pesticide applicators;

5. Application may take place only in caged poultry houses where:

a. Three complaints are received by the local health department, and/or

b. A knowledgeable expert determines that an emergency exists or is imminent and proper use of registered insecticides is not providing adequate control. The methods used to make this determination will include direct counts, scudder grill, speck cards, or sticky tapes;

6. Residues in poultry and eggs from treated caged poultry houses should not exceed 0.5 ppm of permethrin. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action. College of Agricultural Science personnel, Clemson University, are

responsible for insuring that poultry and eggs from treated caged poultry houses are monitored for residues of permethrin. Poultry and eggs with residues of 0.5 ppm or less of permethrin may be shipped in interstate commerce;

7. All label restrictions and precautions for Ectiban 25% and 5.7% EC shall be observed;

8. The EPA shall be informed immediately of any adverse effects to man or the environment resulting from this program; and

9. A final report summarizing the results of this program shall be submitted to EPA by April 30, 1980. This must include residue data gathered during monitoring under the specific exemption.

Statutory Authority: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

Dated: August 16, 1979.

Kraft Pulp Mills; Final Guideline Document; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Correction of Emission Guideline in Notice of Availability.

SUMMARY: On May 22, 1979 (44 FR 29828), availability of a final guideline document for the control of total reduced sulfur (TRS) emissions from existing kraft pulp mills was announced. In the notice, the emission guideline for the smelt dissolving tank was inadvertently given as 0.084 gram of TRS per kilogram of black liquor solids (dry weight); this value should be corrected to read 0.0084 g/kg. The correct value appears in the final guideline document.

DATES: The dates given in the notice of availability remain unchanged.

FOR FURTHER INFORMATION CONTACT: Mr. Don R. Goodwin, Director, Emission Standards and Engineering Division (MD-13), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5271.

Dated: August 16, 1979.

BILLING CODE 6560-08-M

[Opp-180328; FRL 1302-8]

Massachusetts Department of Food and Agriculture; Issuance of Specific Exemption To Use BAAM (Amitraz) To Control Pear Psylla

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has issued a specific exemption to the Massachusetts Department of Food and Agriculture (hereafter referred to as the "Applicant") to use BAAM for the control of pear psylla on 210 acres of pears in Massachusetts. The specific exemption expires on September 30, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), EPA 401 M Street, S.W., Room: E-124, Washington, D.C. 20460, Telephone: 202/426-2691. It is suggested that interested persons telephone before visiting the EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: Pear Psylla (*Psylla pyricola*) appears to be one of the most serious and difficult to control pests on pears. The Applicant requested a specific exemption to use BAAM (contains 19.8% N'-[2,4-dimethylphenyl]-N-[[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide, which has the common name amitraz) to control this pest. Pear psylla is an aphid-like insect which causes economic damage both because of the honeydew which it secretes on the fruit and because it can act as a vector of pear decline, a serious and debilitating disease of pears. In the former instance, certain fungi grow upon the secreted honeydew causing a blackish appearance, which lowers the grade of the harvested fruit and results in a loss of profit to the growers. In the latter case, the production capability of a given orchard can be seriously impaired.

Although there are registered pesticides for controlling this pest, they are currently ineffective either because of developed resistance, phytotoxicity,

or inability to control certain stages of the insect, such as the later or "hard-shell" nymphal stages. In 1978, the insecticide chlordimeform, a highly effective pesticide for psylla control, was voluntarily withdrawn from the market by its manufacturers, because of findings which indicated that it may cause formation of tumors in mice. It should also be noted that a rebuttable presumption against registration (RPAR) of pesticide products containing amitraz was issued on April 6, 1977 (42 FR 18299). On Friday, January 12, 1979 (44 FR 2678), the Administrator's decision on the amitraz RPAR was published. This decision included a proposal to register amitraz conditionally for use on pears; however, EPA is not likely to do so in time for the early part of the 1979 growing season.

The Applicant requested use of a total of 945 pounds active ingredient (A.I.) to treat about 210 acres. The Applicant claimed a significant loss could occur to the pear industry of Massachusetts which is valued at \$350,000, without an effective means of pear psylla control.

EPA has determined that residues of amitraz in or on pears should not exceed 3.0 parts per million (ppm) from this use. This level has been judged adequate to protect the public health. The use of amitraz is not expected to result in any greater hazard to wildlife over that presented by currently employed pesticides for pear psylla control.

After reviewing the application and other available information, EPA determined that (a) a pest outbreak of pear psylla has occurred or is likely to occur; (b) there is no pesticide presently registered and available for use to control the pear psylla effectively in Massachusetts; (c) significant economic problems may result if the pest is not controlled; and (d) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the applicant has been granted a specific exemption to use the pesticide noted above until September 30, 1979, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The Upjohn product BAAM, which contains 1.5 pounds amitraz per gallon, will be used;

2. The dosage rate will be three to four quarts of product (1.0 to 1.5 pounds a.i.) per acre;

3. Applications are to be made by ground equipment only (air blast sprayers or handgun);

4. Only State-certified commercial or private applicators or personnel directly under their supervision may apply this pesticide;

5. The use of BAAM is authorized only when an emergency condition is found to exist. The criteria which may be used in making this determination are as follows:

a. The judicious use of currently registered pesticides for pear psylla are not providing adequate control of this pest, and

b. In a particular orchard, a majority of the trees sampled have ten percent or more of the shoots in the scaffolding infested with nymphs of the pear psylla. For each orchard, a minimum of ten trees must be sampled;

6. Only State-licensed pest control consultants are authorized to determine when an emergency condition exists (using the criteria above). Determinations will be made on an orchard-by-orchard basis. Upon a determination that an emergency condition is present, as defined by fulfilling the criteria above, the consultant will sign a State-approved form which authorizes the grower to purchase BAAM. This form will include the name of the grower, number of acres to be treated, amount of BAAM authorized to be purchased, and the dosage rate to be applied (1.0 to 1.5 pounds a.i. per acre);

7. Up to 210 acres of pears may be treated. Two applications are authorized. However, if in the judgment of the State, an extreme circumstance is present which warrants an additional application, this may be made. If a third application is made, the State shall inform EPA of this along with a brief description of the circumstances.

8. Up to 945 pounds of amitraz are authorized;

9. Pesticide dealers will not be allowed to sell BAAM to any grower or applicator unless the signed authorization form is presented;

10. Pesticide distributors will be responsible for keeping accurate records of the amount of BAAM received from Upjohn and the amounts which are sold to dealers. Dealers will also maintain accurate records of the amounts of BAAM received and sold;

11. Agricultural workers shall not re-enter any orchard sprayed with BAAM until the foliage is completely dry and at least 24 hours have elapsed after treatment with BAAM;

12. The following protective clothing must be worn during mixing, loading, and clean-up operations involving BAAM: a long sleeved, fine weave shirt, long, fine weave pants, rubber gloves, and boots. When applying BAAM, the same protective clothing must be worn;

13. The following precautions and safeguards must be taken when using BAAM:

a. Care must be taken to avoid getting it in eyes, on skin, or on clothing;
 b. Care must be taken to avoid breathing vapors or spray mist;
 c. In case of contact with skin, the skin must be washed as soon as possible with soap and plenty of water;
 d. If amitraz gets on clothing, contaminated clothing must be removed, and affected parts of the body washed with soap and water. If the extent of contamination is unknown, the entire body must be washed thoroughly. The affected person must change to clean clothing;

e. At the end of the work day, the entire body must be bathed with soap and plenty of water; and

f. Clean clothes must be worn each day and laundered before reuse;

14. There will be a pre-harvest interval of not less than seven days;

15. Pears with a residue level of amitraz not exceeding 3.0 ppm may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

16. A final report will be submitted to the Emergency Response Section, EPA, by the end of 1979; this report will outline the acreage that was treated, the total amounts of BAAM applied, the results of the program, and any adverse effects (such as phytotoxicity);

17. All applicable label precautions, directions, and restrictions shall be followed;

18. All unused, unopened containers of BAAM will be returned to the manufacturer at the end of the growing season. If conditional registration of BAAM is granted, arrangements may be made by the manufacturer to reliable existing containers;

19. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption; and

20. Extreme precautions must be taken to avoid contamination of lakes, streams, ponds, and rivers.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136)).

Dated: August 16, 1979.

Edwin L. Johnson,
 Deputy Assistant Administrator for Pesticide Programs.

 BILLING CODE 6560-01-M

[FRL 1301-5]

**Motor Vehicle Pollution Control;
 Waiver of Carbon Monoxide Emission
 Standards; Public Hearing**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public hearing to consider applications for waiver of 1981 and 1982 model year light-duty vehicle emission standard for carbon monoxide (CO).

SUMMARY: Toyo Kogyo Company submitted an application on August 3, 1979, requesting the Administrator to waive the effective date of the 1981 and 1982 CO standard under section 202(b)(5) of the Clean Air Act, as amended.

DATES: This notice announces that EPA will hold a public hearing in Washington, D.C. beginning on September 12, 1979, and continuing through September 13, 1979, if necessary, to consider Toyo Kogyo's waiver application and any other manufacturers' applications received by September 4, 1979. Interested parties also may submit written comments to the public docket on the waiver applications until September 20, 1979.

ADDRESS: All public portions of CO waiver applications and other relevant information are available for public inspection between 8 a.m. and 4 p.m., Monday through Friday, at: U.S. Environmental Protection Agency, Central Docket Section (A-130), Room 2903B Waterside Mall, 401 M Street SW., Washington, D.C. 20460 (Docket Number EN-79-17).

FOR FURTHER INFORMATION CONTACT: Mr. Glenn Unterberger, Mobile Source Enforcement Division (EN-340), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 472-9417.

SUPPLEMENTARY INFORMATION: Under section 202(b)(5)(A) of the Clean Air Act, as amended, 42 U.S.C. 7521(b)(5)(A) (1977) ("Act"), at any time after August 31, 1978, any manufacturer may file with the Administrator an application requesting the waiver of the effective date of the carbon monoxide (CO) emission standard applicable to any model of light-duty motor vehicles and engines manufactured by the applicant during model years 1981 and 1982. Section 202(b)(5)(C) requires the Administrator to issue a decision granting or denying such waiver within

60 days after receipt of the application and after public hearing. Guidelines for the submission of such waiver requests have been previously published in the Federal Register, 43 FR 47272, October 13, 1978.

Section 202(b)(1)(A) requires that emissions of CO from 1981 and later model year light-duty motor vehicles be reduced by 90% from 1970 CO emission standards. A CO emission standard of 3.4 grams per vehicle mile, determined to achieve such reduction and made applicable by regulation to 1981 and later year light-duty vehicles, has been published in the Federal Register, 43 FR 37972, August 24, 1978. If the Administrator determines that a waiver from the CO standard of 3.4 grams per vehicle mile (gpm) should be granted, he must simultaneously with such determination prescribed by regulation CO emission standards to apply to those model vehicles or engines to which the waiver applies. Under section 202(b)(5)(B), the maximum CO level for which a waiver may be granted is 7.0 gpm.

Under section 202(b)(5)(C), the Administrator may grant such a waiver only if he finds that protection of the public health does not require attainment of the statutory CO standard of 3.4 gpm for those model years and vehicles for which the waiver is sought. In addition, a waiver may be granted only if the Administrator determines that (1) such waiver is essential to the public interest or the public health and welfare of the United States, (2) all good faith efforts have been made to meet the established standards, (3) the applicant has established that effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideration costs, driveability, and fuel economy, and (4) studies and investigations of the National Academy of Sciences and other information available to him have not indicated that technology, processes, or other alternatives are available to meet such standards.

In order for a waiver to be granted, the Administrator must determine that the applicant has provided information sufficient to satisfy each of the waiver criteria set out above. However, the Administrator is not required to make his determination solely on the record of the hearing, and may consider any

additional information as well. All information considered by the Administrator will be included in the public docket.

EPA held four days of public hearings during the week of July 9, 1979, to consider CO waiver applications submitted by General Motors, Chrysler, American Motors, Volkswagen, Toyota, and British-Leyland. In addition to testimony provided by each waiver applicant, testimony was given by other automobile manufacturers, and by several emission control system part suppliers. The Clean Air Act requires the Administrator to decide on the General Motors application by August 24, 1979, and on the remaining five applications by September 4, 1979. Information considered for the decisions on these applications is contained in Public Docket EN-79-4 and will be considered by the EPA in all its subsequent application decisions. Accordingly, Public Docket EN-79-4 is incorporated by reference into EN-79-17.

Toyo Kogyo submitted a CO waiver application on August 3, 1979. The Act requires the Administrator to make a decision on Toyo Kogyo's application on or before October 3, 1979. A public hearing on this application and on applications received from any other motor vehicle manufacturers on or before September 4, 1979, will be held in the U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Room M2126, commencing at 9 a.m. on September 12, 1979. EPA encourages all manufacturers still planning to request a CO waiver to file their applications by the deadline so that all of the outstanding waiver applications can be reviewed in one consolidated proceeding. Submitting applications at a reasonable time before the scheduled proceedings will greatly facilitate the Administrator in making a timely decision.

PROCEDURES: The public hearing is intended to provide an opportunity for interested persons to state their views or arguments, or to provide pertinent information concerning the action requested of the Administrator by the applicant. Any person desiring to make an oral statement at the hearing should file a notice of such intention and 10 copies of the proposed testimony and other relevant material in the Central Docket Section at the address listed above not later than September 4, 1979. If feasible at least 75 copies of such statement or material for the hearing record and for general circulation should be submitted to the Presiding Officer at the time of the hearing. In addition, any

person may submit written questions at any time during the hearing to be propounded to the witnesses by the hearing panel to the extent practicable. Relevant statements and information not specifically required by the hearing panel may be filed in the public docket until September 20, 1979.

Under the subpoena authority of section 307(a)(1), appropriate representatives of the applicants will be required to attend the hearing and respond to questions propounded by the hearing panel. Moreover, representatives from other groups, in particular other automobile manufacturers, may also be subpoenaed to produce relevant information and provide testimony before the hearing panel. Section 307(a)(1) also authorizes the administration of oaths to testifying parties.

The Presiding Officer will have the responsibility for maintaining order, excluding irrelevant or repetitious material, scheduling presentations, directing that corroborative material be submitted in writing and, to the extent possible, notifying participants of the time at which they may appear.

Presentations by the participants should be addressed exclusively to the following considerations:

1. Whether protection of the public health requires attainment of the established CO standard of 3.4 gpm for the model years to which the waiver would apply.

2. Whether the requested waiver is essential to the public interest or public health and welfare of the United States.

3. Whether the applicants have made all good faith efforts to meet the CO standard for those model years and vehicles for which the waiver is sought.

4. Whether effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideration costs, driveability, and fuel economy.

5. Whether studies and investigations of the National Academy of Sciences and other information indicate that alternatives are available to meet such standards.

6. The level of CO emissions, not to exceed 7.0 gpm, which could be met in each of the model years for which a waiver is requested and which would reflect the greatest degree of emission control achievable by use of available technology, giving appropriate consideration to the cost of applying

such technology within the available time period.

A verbatim record of the proceedings will be made and will be available for public inspection. A copy of the transcript may be requested from the reporter during the hearing and will be made at the expense of the person so requesting. Copies of other documents in the public record also may be obtained in 40 CFR Part 2.

Dated: August 16, 1979.

Marvin B. Durning,
 Assistant Administrator for Enforcement.

 BILLING CODE 6560-01-M

[180325A; FRL 1302-4]

**North Carolina Department of
 Agriculture; Issuance of Specific
 Exemption To Use Captafol To Control
 Anthracnose in Strawberries**

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has granted a specific exemption to the North Carolina Department of Agriculture (hereafter referred to as the "Applicant") to use captafol to control anthracnose in 500 acres of strawberry transplant production fields in North Carolina. The specific exemption expires on October 1, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room E-124, Washington, D.C. 20460, Telephone: 202/426-0223. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: Anthracnose has been a destructive disease during the past three years for strawberry plant producers in North Carolina when high temperatures and rainfall favor disease development. Anthracnose (*Colletotrichum fragariae*) attacks the mature crown, runners, and runner plants. The fungus enters the crown at the soil line and causes reddish-brown discolored areas in the white tissues in the center of the crown. Infected mature plants wilt and die. The fungus is carried over from year to year in crowns that become infected in late summer. The fungus produces masses of spores on diseased plant tissues and

these spores are spread to nearby plants by splashing water or winds.

According to the Applicant, North Carolina produces more strawberry plants than any other state east of California. Plants grown in North Carolina are shipped to many states and foreign countries for fruit production. Approximately 75 percent of the strawberry transplants commercially produced in North Carolina are intended for export, 60 percent of which are shipped to Florida. The Applicant claims that this latter segment would be virtually lost if anthracnose is not controlled, since Florida would embargo shipments of plants that are not certified as being apparently free of anthracnose. Without an effective control program, the Applicant anticipates losses of approximately \$1.5 million.

Despite the use of repeated applications of benomyl, which is registered for control of anthracnose, the Applicant anticipates that emergency conditions will continue to exist in strawberry plant producing areas through September. No other fungicide registered for strawberry use will control anthracnose and there are no alternative control methods.

The Applicant availed itself of a crisis exemption for the use of Difolatan 4F (captan) on May 18, 1979, and so notified the Administrator. Notification of this crisis exemption was published in the *Federal Register* on July 30, 1979 (44 FR 44812). The Applicant had already requested a specific exemption.

The Applicant's treatment plan consists of using captan on up to 500 acres of strawberries being grown for plant production (no fruit will be harvested) at a rate of two pounds active ingredient per acre every 7 days, during periods of weather conditions favorable for pathogen dissemination, through September. The fungicide will be applied over the row with ground equipment. Data indicate that Difolatan should be effective in controlling anthracnose.

EPA has determined that residues of captan on strawberries should not exceed 5 parts per million (ppm) from the proposed use. This level has been judged adequate to protect the public health. Precautions on the Difolatan 4F label should be adequate to protect the environment.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of anthracnose has occurred; (b) there is no effective pesticide presently registered and available for use to control anthracnose in North Carolina; (c) there are no alternative means of control, taking into account the efficacy and

hazard; (d) significant economic problems may result if anthracnose is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until October 1, 1979, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The product Difolatan 4F, EPA Reg. No. 239-2211, manufactured by Chevron Chemical Co., is authorized;
2. Difolatan will be applied at a rate of 2.0 pounds active ingredient per acre every 7 to 10 days through September;
3. A maximum of 500 acres may be treated;

4. All applications will be made over the row with ground equipment in sufficient water to obtain thorough coverage of all plant parts;
5. No applications will be made within 90 days of any harvest of fruit;

6. Applications may be made by either private or commercial applicators;
7. All applicable label directions, precautions, and restrictions of the product label must be followed;

8. Strawberries with residues of captan not exceeding 5 ppm may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;
9. A full report summarizing the results of this program must be submitted to EPA by March 31, 1980;

10. The EPA shall be immediately informed of any adverse effects from the use of Difolatan in connection with this exemption; and
11. The Applicant shall be responsible for assuring that all of the provisions of this specific exemption are met.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 138))

Dated: August 16, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 5560-01-M

[PP 7G1888/T217; FRL 1302-2]

Renewal of Temporary Tolerances; Profenofos

On July 31, 1978, the Environmental Protection Agency (EPA) announced (43 FR 33315) the establishment of temporary tolerances for combined residues of the insecticide profenofos (O-(4-bromo-2-chlorophenyl)-O-ethyl S-

propyl phosphorothioate) and its metabolites converted to 4-bromo-2-chlorophenol and calculated as O-(4-bromo-2-chlorophenyl)-O-ethyl S-propyl phosphorothioate in or on the raw agricultural commodities cottonseed at 3 parts per million (ppm); eggs and the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm; and milk at 0.01 ppm. These tolerances were established in response to a Pesticide Petition (PP 7G1888) submitted by Ciba-Geigy Corp., Agricultural Div., P.O. Box 11422, Greensboro, N.C. 27409. These temporary tolerances expired August 1, 1979.

Ciba-Geigy Corp. has requested a one-year renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 100-EUP-55 that is being renewed concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 138). (A related document renewing feed additive tolerances for residues of profenofos in cottonseed hulls and soapstock appears elsewhere in today's *Federal Register*.)

The scientific data reported and all other relevant material have been evaluated, and it has been determined that renewal of the temporary tolerances will protect the public health. Therefore, the temporary tolerances are being renewed on condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the insecticide to be used will not exceed the quantity authorized by the experimental use permit.

2. Ciba-Geigy Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm will also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire August 16, 1980. Residues not in excess of 3 ppm remaining in or on cottonseed; 0.05 ppm remaining in eggs and the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep; and 0.01 ppm remaining in milk after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary

tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. William Miller, Product Manager 16, Registration Division (TS-767), Office of Pesticide Programs, 401 M St. SW., Washington, D.C. 20460 (202/426-9458).

(Sec. 408(j), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: August 16, 1979.

Herbert Harrison,

Acting Director, Registration Division.

Science Advisory Board: Environmental Health Committee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Environmental Health Committee of the Science Advisory Board will be held at 9 a.m. on September 12, 1979 in Room 3906-08, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C.

The principal purpose of the meeting will be to discuss health-related Agency and Science Advisory Board activities and Committee participation in these activities. This will include, in particular, (1) plans for periodic peer review of EPA's health effects research laboratories and programs; and (2) plans for review and evaluation, by a Subcommittee on Health Risk Assessment, of health risk assessment methodologies used or proposed by EPA for various health end points. The Agenda will also include briefings and discussions on other topics of current or future interest to the Committee.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper, or wishing further information should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460 by c.o.b. September 7, 1979. Please ask for Mr. Kenneth B. Goggin or Mrs. Ilene Stein. The telephone number is (202) 472-9444.

Richard M. Dowd,

Staff Director, Science Advisory Board.

Endrin; Intent To Cancel Registrations and Denial of Applications for Registration of Pesticide Products Containing Endrin, and Statement of Reasons

Correction

In FR Doc. 79-22708, appearing at page 43632 in the issue of Wednesday, July 25, 1979, the following changes should be made:

1. On Page 43632, second column, the area code in the last line of the paragraph headed "For Further Information Contact" should read, "703".

2. On page 43652, first column, first complete paragraph, the second word in the second line should read, "proposed," the next to last word in the ninth line should read, "that," and the seventeenth line should read, "Agency has proposed that a distance restriction be imposed, the purpose was to reduce drift to".

BILLING CODE 1505-01-M

[FRL 1301-6]

Grants for Construction of Treatment Works; Class Deviations

Under authority of 40 CFR 30.1000, EPA has issued two class deviations from the provisions of 40 CFR Part 35, Subpart E, Grants for Construction of Treatment Works, funded under section 201 of the Clean Water Act of 1977.

The regulations in 40 CFR 35.928-4 and 35.935-15 relate to the industrial cost recovery (ICR) moratorium and systems. Because of the clear Congressional intent to enact some postponement of the date on which ICR charges must be collected, EPA has approved a deviation extending the date for collecting of ICR payments to December 1, 1979.

The regulations in 40 CFR 35.935-13(a)(2)(i) and 35.935-13(b) require that payments not be made after June 30, 1979, to certain grantees who do not have approved user charge systems. Because of the backlog created by the influx of user charge systems received to meet the June 30, 1979, deadline, EPA has approved a class deviation to allow release of payments through December 31, 1979, for any grantee who submitted its user charge system to EPA for approval prior to May 1, 1979.

Under our policy to publish class deviations in the *Federal Register*, EPA is publishing these deviations as part of this notice.

FOR FURTHER INFORMATION CONTACT:
Mr. Alexander J. Greene, Director, Grants Administration Division (PM-216), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 (Tel. No. 202 755-0850).

Dated: August 13, 1979.

C. William Carter,

Associate Assistant Administrator for Planning and Management (PM-208).

Dated: August 13, 1979.

Thomas C. Jorling,

Assistant Administrator for Water and Waste Management (WH-556).

U.S. Environmental Protection Agency

Date: August 13, 1979.

Subject: Class Deviation from 40 CFR 35.928-4 and 35.935-15, Industrial Cost Recovery Moratorium and Systems.

From: Harvey Phippen, Acting Director, Grants Administration Division (PM-216).
To: Regional Administrators.

The Congress is considering legislation to extend the industrial cost recovery (ICR) moratorium enacted in the 1977 Clean Water Act. The House bill extends the deadline by two years; the Senate bill is one year. We expect that the two bills will be reconciled in conference shortly. At this time, we cannot predict what conditions or requirements may attach to any such extension.

In light of the expressed intention of Congress to enact some postponement, I am approving a class deviation from 40 CFR 35.928-4 and 35.935-15 for all Step 3 grantees and applicants as follows:

1. 40 CFR 35.928-4(a) and (b). The moratorium period for ICR payments is extended to December 1, 1979. EPA does not require industrial users to pay ICR for charges incurred during the period after December 31, 1977, and before December 1, 1979. Under the moratorium, the collection of payments is suspended, but the requirement to develop a system is not.

2. 40 CFR 35.935-15(a)(2). Grantees awarded Step 3 grant assistance under regulations promulgated on February 11, 1974, are required to obtain approval of ICR systems by December 1, 1979.

3. 40 CFR 35.935-15(b). Grantees awarded Step 3 grant assistance after April 24, 1978, but before December 1, 1979, are required to obtain approval of ICR systems, except for ordinances and rates, by December 1, 1979.

4. 40 CFR 35.935-15(c). Grantees awarded Step 3 assistance after November 30, 1979, are required to have approved ICR systems, except for ordinances and rates, before grant award.

After November 30, 1979, no further payments will be made in any of the above cases until the ICR system is approved.

Dated: August 13, 1979.

Concur:

C. W. Carter,
Associate Assistant Administrator for
Planning and Management (PM-208).

Dated: August 13, 1979.

Concur:

Thomas C. Jorling,
Assistant Administrator for Water and Waste
Management (WH-568).

U.S. Environmental Protection Agency

Date: August 13, 1979.

Subject: Class Deviation from 40 CFR
35.935-13(a)(2)(i) and 35.935-13(b), Payment
Restrictions on Construction Grants.

From: Harvey Pippen, Acting Director,
Grants Administration Division (PM-216).
To: Regional Administrators.

Sections 35.935-13(a)(2)(i) and 35.935-13(b) of the construction grant regulations provide that payments may not be made after June 30, 1979, to certain grantees whose user charge systems have not been approved. These provisions apply to two categories of grantees: grantees who have been found to satisfy the initial requirements for a dedicated ad valorem tax system, but who had not obtained approval by June 30, and grantees who have received Step 3 grant assistance between April 25, 1978, and June 30, 1979, but had not obtained approval by June 30.

We recognize that some Regional Offices may not have had sufficient time and resources to effect a prompt review of the relatively large number of user charge systems that have been submitted in anticipation of the June 30 date. We do not wish to penalize grantees when the failure to have an approved user charge system is due to lack of EPA resources to timely review systems which had been submitted in time for the grantee to have expected a response prior to June 30, 1979.

I am, therefore, approving a class deviation from sections 35.935-13(a)(2)(i) and 35.935-13(b) to allow the release of payments through December 31, 1979, for any grantee who submitted its user charge system to EPA for approval prior to May 1, 1979.

After December 31, 1979, no further payments will be made until the user charge system is approved.

Dated: August 13, 1979.

Concur:

C. W. Carter,
Associate Assistant Administrator for
Planning and Management (PM-208).

Dated: August 13, 1979.

Concur:

Thomas C. Jorling,
Assistant Administrator for Water and Waste
Management (WH-547).

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities; Correction

This notice corrects a previous Federal Register document appearing in the center column at page 47610 of the issue for Tuesday, August 14, 1979.

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 17, 1979.

A. Federal Reserve Bank of New York, 33 Liberty Street, New York, New York, 10045:

CITICORP, New York, New York (financing and insurance activities; Kansas, Missouri): to engage, through its subsidiaries Citicorp Person-to-Person Financial Center, Inc. and Nationwide Financial Corporation of Missouri in operating a finance company, including the extension of direct loans for consumer and other purposes; purchasing and servicing for its own account consumer installment sales

finance contracts; making loans for the accounts of others, such as one-to-four family unit mortgage loans; making loans to individuals and businesses secured by real and personal property, the proceeds of which may be for purposes other than personal, family or household usage; and acting as agent for the sale of life, accident, and health, property and casualty insurance directly related to its extensions of credit. The service area of the sales finance activities of the Overland Park, Kansas, office would be expanded to include Kansas, Iowa, Nebraska, South Dakota, Minnesota and the western half of Missouri. With respect to the mobile home/land package financing activity, the service area will be expanded to include Minnesota. The service area of the direct lending activities of the Kansas City, Missouri, office and of the Overland Park, Kansas, office will be expanded to include an area with a radius of 175 miles in each direction.

B. Other Federal Reserve Banks: None.

Board of Governors of the Federal Reserve System, August 16, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

[FR Doc. 79-25897 Filed 8-21-79; 8:45 am]
BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the

evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 17, 1979.

A. Federal Reserve Bank of New York: 33 Liberty Street, New York, New York 10045:

Addendum to notice of Citicorp, New York, New York (financing and insurance; Florida) published August 14, 1979 (44 F.R. 47611): the areas to be served by the Orlando office of Citicorp Person-to-Person Financial Center of Florida, Inc., are Orange County and contiguous portions of Brevard, Osceola, Lake, Volusia and Seminole Counties.

B. Other Federal Reserve Banks: None.

BILLING CODE 6210-01-M

Colorado National Bankshares, Inc.; Acquisition of Bank

Colorado National Bankshares, Inc., Denver, Colorado, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 100 per cent of the voting shares of Colorado Bank-Tech Center, Denver, Colorado. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than September 14, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 15, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

First National Charter Corp.; Acquisition of Bank

First National Charter Corporation, Kansas City, Missouri, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 51 percent or more of the voting shares of Farmers Bank of Clinton, Clinton, Missouri. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than September 14, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing

the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 15, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Mellon National Corp.; Proposed Acquisition of a branch of ITT Thorp Corp., New York, N.Y., located in Munster, Ind.

Mellon National Corporation, Pittsburgh, Pennsylvania, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire, through its subsidiary, Freedom Financial Services Corporation, Oak Brook, Illinois, the assets of and assume the lease on the premises of a branch of ITT Thorp Corporation, New York, New York, located in Munster, Indiana.

Applicant states that the proposed subsidiary would engage in the activities of making consumer loans and acting as an agent in the sale of credit life; credit accident and health; and credit property insurance. These activities would be performed from offices of Applicant's subsidiary in Munster, Indiana, and the geographic area to be served is the northwest portion of Indiana, including Dyer, East Chicago, Gary, Hammond, Highland, Munster, Schererville, and Whiting, Indiana. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 14, 1979.

Board of Governors of the Federal Reserve System, August 14, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Mid-Missouri Bancshares, Inc.; Formation of Bank Holding Company

Mid-Missouri Bancshares, Inc., Melle, Missouri, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company by acquiring 95.6 per cent of the voting shares of Belle State Bank, Belle, Missouri. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than September 14, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 15, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 16, 1979. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the Federal Register is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CAB request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before September 10, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Civil Aeronautics Board

The CAB requests an extension without change clearance of Form 41, Report of Financial and Operating Statistics for Certificated Air Carriers. This form contains the basic data which the Board uses in fulfilling its regulatory responsibilities under the Federal Aviation Act of 1958, as amended. Submission of CAB Form 41 by the certificated air carriers is mandatory under Section 407 of the Act. CAB estimates the reporting burden (which includes the burden for all monthly, quarterly, semiannual and annual filings of schedules in Form 41) to average 1,816 hours per respondent and that respondents will number approximately 55.

John M. Lovelady,
Assistant Director, Regulatory Reports
Review.

BILLING CODE 1610-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

Advisory Council and Subcommittee; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of September 1979:

Name: National Guidelines, Goals, Priorities, and Standards Subcommittee of the National Council on Health Planning and Development.

Date and Time: September 13, 1979, 10:00 a.m.-12:00 Noon.

Place: Hubert H. Humphrey Building, Conference Rooms 703A-705A, 200 Independence Avenue, SW, Washington, DC 20201.

Open for entire meeting.

Purpose: The objectives of the National Guidelines, Goals, Priorities, and Standards Subcommittee are to study the experience nationwide in the public and private sectors with the adoption and/or adjustment of the National Guidelines for Health Planning and their impact and recommend changes as appropriate; study the experience of the Health Systems Agencies and State Health Planning and Development Agencies nationwide in implementation of high priority goals and sub-goals and their impact; advise the Council in identifying additional high priority goals and sub-goals; investigate and coordinate information on demonstrations underway by provider, reimbursement, regulatory, labor, industry, and community groups on sub-goals, such as those on alcoholism and prevention; study, investigate and identify research needs appropriate to the formulation, adjustment and refinement of the National Guidelines, and study and develop improved indicators to assess the impact of the Guidelines or the need for revisions; and recommend to the Council on the need for further development and/or revision of the National Guidelines.

Agenda: Review of CT Scanner guidelines; review of the National Health Planning Goals; and planning for the Los Angeles Meeting in November.

Name: Technology and Productivity Subcommittee of the National Council on Health Planning and Development.

Date and Time: September 13, 1979, 3:00 p.m.-5:00 p.m.

Place: Hubert H. Humphrey Building, Conference Rooms 703A-705A, 200 Independence Avenue, SW Washington, DC 20201.

Open for entire meeting.

Purpose: The objective of the Technology and Productivity Subcommittee is to advise the full Council on matters related to the productivity of the health care delivery system and to the implications of new medical technology for the organization, delivery and equitable distribution of

health care services. "Technology" includes the drugs, devices and medical and surgical procedures used in medical care and the organizational and supportive systems within which such care is delivered. "Productivity" is the efficiency with which health care is delivered.

The Subcommittee is to deliberate and to make recommendations to the full Council on matters chosen from among those brought to it by Council members, HEW staff and advisory committees, other Federal departments, congressional committees and staff, provider groups and the public at large. The Subcommittee in addition will study and investigate the current needs for assistance of HSAs and SHPDAs in the area of evaluating productivity improvement and new medical technology, help transmit concerns of HSAs and SHPDAs to appropriate Federal agencies, and review the current resources both within the Federal Government and among the educational, research and other developmental agencies for providing needed assistance to HSAs and SHPDAs. In addition, it will review technology assessment activities within the Department in order to assure they are relevant to the needs of the HSAs and are useful in the development and implementation of national standards, goals, and guidelines, and for the establishment of priorities with those goals.

Agenda: Discussion of the initial draft of the Productivity Study and planning for the Los Angeles Meeting in November.

Name: Implementation and Administration Subcommittee of the National Council on Health Planning and Development

Date and Time: September 13, 1979, 4:00 p.m.-6:00 p.m.

Place: Hubert H. Humphrey Building, Conference Room 729G, 200 Independence Ave, SW, Washington, DC 20201.

Open for entire meeting.

Purpose: The objective of the Implementation and Administration Subcommittee is to study and make recommendations on the implementation and administration of Titles XV and XVI of the Public Health Service Act. Specific areas for the Subcommittee's consideration are (1) the impact of HEW's implementation/administration on the effectiveness of Health Systems Agencies and State Health Planning and Development Agencies; (2) the effectiveness of the interrelationships between health planning agencies and HEW, Central and Regional Offices; (3) the timing and strategy of implementation and of the dissemination and distribution of regulatory and technical material; (4) how to better meet the needs of HSAs and SHPDAs; and (5) the review of the Council's responsibilities under section 1122 of the Social Security Act.

Agenda: Review of 1122 Cases; review of 1122 Program Analysis; review of Workplans on subcommittee priority topics; and planning for the Los Angeles Meeting in November.

Name: National Council on Health Planning and Development

Date and Time: September 14, 1979, 8:45 a.m.-3:30 p.m.

Place: Main Auditorium, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Open for entire meeting.
Purpose: The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to (1) the development of national guidelines under section 1501 of Pub. L. 93-641, (2) the implementation and administration of Title XV and XVI of Pub. L. 93-641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda: Agency and Bureau Status Reports; Subcommittee Reports; Legislative Update; and Surgeon General's Report on Health Promotion/Health Prevention.

Anyone requiring information regarding the subject Council should contact Mrs. S. Judy Silsbee, Executive Secretary, National Council on Health Planning and Development, Room 10-27, Center Building, 3700 East-West Highway, Hyattsville, Maryland, 20782, Telephone (301) 436-1715. Agenda items are subject to change as priorities dictate.

Dated: August 16, 1979.

James A. Walsh,
Associate Administrator for Operations and Management.

National Institutes of Health

Division of Research Services; Meeting

Notice is hereby given that the Division of Research Services, Biomedical Engineering and Instrumentation Branch, National Institutes of Health, will hold a consensus development conference October 17-19, 1979, at the Sheraton Silver Spring Motor Hotel, 8727 Colesville Road, Silver Spring, Maryland. Topic of the conference is the role of "intelligent" microprocessor-based machines in patient care. The meeting is open to interested individuals and groups.

Machines are being developed that can handle many facets of patient care. Attendees will have the opportunity to assess the state of the art of microprocessor-based machines in patient care as well as to consider related legal, social, and ethical issues. The format will include invited speakers presenting papers and panel discussions.

Preliminary approval has been obtained for physicians who attend to receive 5 hours of AMA Category I credit. There will be no registration fee, but the total number of participants will be limited. Interested persons are encouraged to write to Henry S. Eden, M.D., Assistant to the Chief, Biomedical Engineering and Instrumentation Branch, Division of Research Services, National Institutes of Health, Building 13, Room 3W-13, Bethesda, Maryland 20205, or call 301/496-5771 for further information, including a set of working papers and an advance registration form.

Dated: August 13, 1979.

Meeting of National Advisory Environmental Health Sciences Council

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Environmental Health Sciences Council, National Institute of Environmental Health Sciences, October 12, 1979, in Building 18 conference room, National Institute of Environmental Health Sciences, Research Triangle Park, North Carolina.

This meeting will be open to the public on October 12, 1979, from 9 a.m. to approximately 9:30 a.m. for the report of the Director, NIEHS, and for discussion of the NIEHS budget and other items of interest. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on October 12, from 9:30 a.m. to adjournment on October 12, 1979, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which

would constitute a clearly unwarranted invasion of personal privacy.

Leota B. Staff, Committee Management Officer, NIEHS, Building 31, Room 4B31, National Institutes of Health, Bethesda, Maryland 20205, (301) 496-3511, will provide summaries of the meeting and rosters of council members. Dr. Wilford L. Nusser, Associate Director for Extramural Program, National Institute of Environmental Health Sciences, P.O. Box 12233, Research Triangle Park, North Carolina 27709, (919) 755-4015, will furnish substantive program information.

BILLING CODE 4110-08-M

Meeting of the Cardiology Advisory Committee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cardiology Advisory Committee, National Heart, Lung, and Blood Institute, October 1 and 2, 1979, in Conference Room 9, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

The entire meeting will be open to the public from 8:30 a.m. to 5 p.m. each day. Attendance by the public will be limited to space available. Topics for discussion will include a review of the programs in the Cardiology area and considerations of reports.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda, Maryland 20205, phone (301) 496-4236, will provide summaries of the meeting and rosters of the Committee members.

Barbara Krames Packard, M.D., Ph.D., Associate Director for Cardiology, Division of Heart and Vascular Diseases, National Heart, Lung, and Blood Institute, Federal Building, Room 320, Bethesda, Maryland 20205, phone (301) 496-5421, will furnish substantive program information upon request.

Dated: August 13, 1979.

Suzanne L. Freneau,
Committee Management Officer, NIH.

BILLING CODE 4110-08-M

Meeting of the Population Research Committee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Population Research Committee, National Institute of Child Health and Human Development, on November 14-16, 1979 in the Landow Building, Conference Room "A," 7910 Woodmont Avenue, Bethesda, Maryland.

This meeting will be open to the public on November 14 from 9:00 a.m. to 10:30 a.m. to discuss the program status, new developments and projections for population research centers, program projects and institutional fellowships. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Title 5, U.S. Code 552b(c)(4) and 552(c)(6) and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on November 14 from 10:30 a.m. to adjournment on November 16 for review, discussion and evaluation of individual grant applications.

The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Building 31, room 2A-04, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-1848, will provide a summary of the meeting and a roster of committee members. Dr. William A. Sadler, Executive Secretary of the Population Research Committee, NICHD, Landow Building, Room 7C-33, National

Institutes of Health, Bethesda, Maryland, Area Code 301, 496-6515, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.864, National Institutes of Health.)

Dated: August 13, 1979.

Suzanne L. Freneau,
Committee Management Officer, NIH.

Office of the Secretary

National Advisory Committee on the White House Conference on Families; Meeting

The National Advisory Committee on the White House Conference on Families was established to advise the Secretary, the Chair of the Conference, and the Conference staff on matters pertaining to the Conference, including the development, implementation and execution of overall plans and procedures for the Conference.

In accordance with Pub. L. 92-463, notice is hereby given of a meeting to be held Friday, September 7, 1979, at 9:30 a.m., in Room 800 of the Hubert H. Humphrey Building, located at 200 Independence Avenue SW., in Washington, DC.

The agenda will include review of the Conference process and specific discussion of state activities, hearings, national organization participation, media efforts and national activities. The agenda will also include discussion of issue development and a framework for the identification and generation of issues to be addressed by the Conference.

All sessions will be open to the public; however, seating capacity will be limited.

Further information on the meeting may be obtained from the White House Conference on Families at 330 Independence Avenue SW, Washington, DC 20201; telephone number: 202/472-4393.

Dated: August 17, 1979.

John L. Carr,
Executive Director, White House Conference on Families.

BILLING CODE 4110-12-M

Office of Public Affairs; Statement of Organizational Function and Delegation of Authority

This notice amends Part A of the Statement of Organizational Function

and Delegation of Authority of the Department of Health, Education, and Welfare by amending Chapter AP, "Office of Public Affairs," (43 FR 52602, 11/8/78) to transfer the functions of the Information Services Staff to the Editorial and Publications Management Division and delete the name of that office. This transfer requires the following changes in the functional statement:

Delete Paragraph AP.20 B1 pertaining to the Information Services Staff.
Add the following at the end of Paragraph AP.20 F, Editorial and Publications Management Division: "Manages the Public Affairs Resource Center which contains information on HEW programs and activities."

"Directs the preparation of the *Green Sheet*, a daily compilation of news concerning HEW programs and activities."

"Prepares analyses of current issues and programs."

Delete from Paragraph AP.20 F, Editorial and Publications Management Division, seventh item, the words, "such as *HEW Now*."

Dated: August 16, 1979.

Frederick M. Boben,
Assistant Secretary for Management and Budget.

BILLING CODE 4110-12-M

Office of Education

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Executive Committee of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, Sec. 10(a)(2)).

DATE: September 6, 1979, 7:00 p.m. to 10:00 p.m.; September 7, 1979, 8:00 a.m. to 3:00 p.m.

ADDRESS: Salt Lake City Hilton Hotel, 150 West 5th South, Salt Lake City, Utah.

FOR FURTHER INFORMATION CONTACT: Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St., NW., Washington, D.C. 20004 (202/376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult

Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 308 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee shall be open to the public.

The proposed agenda includes:

FY-79 Budget Adjustments.
Council and Committee Budgets, FY-80.
Urban Policy Strategies.
Orientation Procedures for New Members.

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the National Advisory Council on Adult Education, 425 13th St., NW., Suite 323, Washington, D.C. 20004.

Signed at Washington, D.C., on August 17, 1979.

Gary A. Eyre,
Executive Director, National Advisory Council on Adult Education.

[U-43547 and U-43548]

Utah; Application

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the

Northwest Pipeline Corporation has applied for two 4½-inch natural gas pipeline rights-of-way across the following lands:

Salt Lake Meridian, Utah
T. 20 S., R. 21 E.,
Sec. 10, W½SW¼.
T. 20 S., R. 22 E.,
Sec. 30, W½NE¼.

The needed right-of-way is a portion of applicant's gas gathering system located in Grand County, Utah.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532.

Dell T. Waddoups,
Chief, Branch of Lands and Minerals Operations.

Draft Interim Management Policy and Guidelines for Wilderness Study Areas

AGENCY: Bureau of Land Management; Interior.

ACTION: Notice of reopening of comment period.

SUMMARY: The comment period on the Draft Interim Management Policy and Guidelines for Wilderness Study Areas which was published in the Federal Register of January 12, 1979 (44 FR 29501), is reopened to allow the public to submit comments on a legal critique of the Solicitor's Opinion of September 5, 1978, construing section 603 of the Federal Land Policy and Management Act of 1976.

DATES: Comments by September 6, 1979.

ADDRESS: Comments should be sent to: Director (430), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

Comments will be available for public review in Room 5615 of the above address from 7:45 a.m. to 4:15 p.m. during regular work days.

FOR FURTHER INFORMATION CONTACT: Terry Sopher, 202-343-6064.

SUPPLEMENTARY INFORMATION: This notice reopens the comment period on the Draft Interim Management Policy and Guidelines for Wilderness Study Areas to accept comments from the public on a legal critique of the Solicitor's Opinion of September 5, 1978

(86 I.D. 91 (1979)), interpreting section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782), as it impacts the Draft Interim Policy and Guidelines for Wilderness Study Areas. The legal critique was received and considered by the Department of the Interior after the close of the comment period on the Draft Interim Management Policy and Guidelines for Wilderness Study Areas. In order to give the public an opportunity to study the critique and submit any comments it might have on the critique, the comment period is hereby reopened. Copies of the critique will be available to the public, upon request, at the following address:

Director (430), Bureau of Land Management,
1800 C Street, N.W., Washington, D.C.
20240, 202-343-6064.

Guy R. Martin,
Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

Bureau of Reclamation

Draft Supplement to the Final Environmental Statement for the San Luis Unit, Central Valley Project, California; Public Hearing

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft supplement to the final environmental statement for the San Luis Unit of the Central Valley Project in Solano, Contra Costa, Alameda, San Joaquin, Stanislaus, Fresno, and Kings Counties in California. The statement (INT DES 79-50) was filed with the Environmental Protection Agency on July 30, 1979.

The proposed action is to seek reauthorization of the San Luis Unit to allow for the following actions: (1) Amend the existing water service contract with Westlands Water District (WWD) to increase the long-term commitment of San Luis water to WWD by 250,000 acre-feet per year, and (2) To complete the San Luis Drain from Kesterson to the drain's discharge location in the western Sacramento-San Joaquin Delta near Chipps Island.

Two public hearing dates have been scheduled to receive comments on the draft supplement from interested individuals and organizations.

The locations, dates, and times for the hearings are as follows:

1. In Fresno, California, in the North Ballroom of the Fresno Hilton Hotel, 1055 Van Ness, on September 26, 1979, starting at 7 p.m.

2. In Concord, California, in the Board Room of the Contra Costa County Water District, at 1331 Concord Avenue, on September 27, 1979, starting at 7 p.m.

Each hearing will continue until all persons desiring to comment have been heard.

Individuals and representatives of organizations desiring to present their views at the hearing should contact the Regional Environmental Quality Officer, Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825 (telephone 916-484-4792).

Requests for scheduling of oral presentations will be accepted until 4 p.m., September 21, 1979. Requests to speak can also be made at the registration desk at the hearings. Insofar as practicable, speakers will be scheduled according to the time preferences indicated in their requests.

The time permitted for oral presentations at the hearing may be limited to 10 minutes per speaker, depending on the number of presentations scheduled. Speakers will not be permitted to trade or consolidate their scheduled times to make longer individual presentations. However, the person presiding at the hearing may allow additional oral comments by anyone after all scheduled speakers have been heard. Written statements by persons who desire to supplement their oral presentations and by those unable to attend the public hearing may be submitted to the Regional Environmental Quality Officer (address given above) through October 10, 1979, for inclusion in the hearing record. Please label comments submitted by mail as "Public Hearing" comments on the draft supplement.

Copies of the draft supplement are available for public examination at the Mid-Pacific Regional Office of the Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95828. Single copies of the statement may be obtained without charge by writing to the Regional Director, Bureau of Reclamation, at the address given above for the Mid-Pacific Regional Office.

Dated: August 16, 1979.

Orrin Ferris,
Acting Commissioner of Reclamation.
[FR Doc. 79-25984 Filed 8-21-79; 8:45 am]
BILLING CODE 4310-09-M

Office of Surface Mining—Reclamation and Enforcement

Receipt of Permanent Program Submission From the State of Wyoming

AGENCY: Office of Surface Mining—Reclamation and Enforcement ("OSM") U.S. Department of Interior.

ACTION: Notice of receipt of program submission from the State of Wyoming and procedures for public participation in review for determination of completeness of submission.

SUMMARY: On August 15, 1979, the State of Wyoming submitted to OSM its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 ("SMCRA"). OSM is seeking public comments on the completeness of the State program.

DATES: A public review meeting to discuss completeness of the submission will be held on September 20, 1979 from 9:00 a.m. to 2:00 p.m. or until all discussion has been completed. Written comments must be received on or before 5:00 p.m., September 20, 1979.

ADDRESSES: The public review meeting will be held at Hathaway Building, Cheyenne, Wyoming, in the Auditorium. Copies of the full text of the proposed Wyoming program are available for review during regular business hours at the following locations:

Office of Surface Mining—Reclamation & Enforcement, Region V, 1823 Stout Street, Denver, CO 80202.
Land Quality Division of the Wyoming Department of Environmental Quality, Hathaway Building, Cheyenne, Wyoming 82002.

and the district offices:

Land Quality Division, 30 East Grinnell Street, Sheridan, Wyoming 82801.
Land Quality Division, 933 Main Street, Lander, Wyoming 82520.

Written comments should be sent to: Mr. Donald A. Crane, Regional Director, Office of Surface Mining, 1823 Stout Street, Denver, CO 80202.

Written comments will be available for public review at the OSM Region V Office above, on Monday through Friday, 8:00 a.m.—4:30 p.m., excluding holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Donald A. Crane, Regional Director, or Ms. Mary Wright, Deputy Regional Director, Office of Surface Mining, 1823 Stout Street, Denver, CO 80202.

SUPPLEMENTARY INFORMATION: On August 15, 1979, OSM received a proposed permanent regulatory program from the State of Wyoming. The purpose of this submission is to demonstrate both the State's intent and its capability to assume responsibility for administering and enforcing the provisions of SMCRA and OSM's permanent regulatory program (30 CFR Chapter 7), as published in the Federal Register on March 13, 1979, (44 FR 15311-15463). This notice describes the nature of Wyoming's proposed program and sets forth information concerning public participation in the Regional Director's determination of whether or not the submission is complete. The public participation requirements for the consideration of a permanent State program are found in 30 CFR Sections 732.11 and 732.12 (44 FR 15326-15327). Additional information may be found under corresponding sections of the preamble to OSM's permanent program regulations (44 FR 14959-14960). The receipt of the Wyoming submission is the first step in a process which will result in the establishment of a comprehensive program for the regulation of surface coal mining and reclamation operations and coal exploration in Wyoming.

By submitting a proposed program, Wyoming has indicated that it wishes to be primarily responsible for this permanent program. If the submission, as hereafter modified, is approved by the Secretary of the Interior, the State of Wyoming will have primary jurisdiction for the regulation of coal mining and reclamation and coal exploration on non-Federal lands in Wyoming. If the program is disapproved, a Federal program will be implemented and OSM will have primary jurisdiction for the regulation of those activities.

Before OSM and the Secretary formally begin consideration of the substance of the program, the Regional Director must determine that the submission is complete. If the Regional Director determines the submission to be complete, consideration of the adequacy of the program will begin and the public will be informed of the decision and granted the opportunity to submit comments on the adequacy of the submission. If the submission is determined to be incomplete, the State will be given the opportunity to submit additional material. If the State fails to

provide the missing elements, or the submission is otherwise determined to be inadequate, the program will be initially disapproved. After initial disapproval the State may revise the program. If the resubmitted program is also found to be incomplete after opportunity for supplementing it has passed or is otherwise deficient, the State program will be given a final disapproval, and a Federal program will be implemented.

At this time, OSM is primarily concerned with whether the proposed program constitutes a complete submission. The decision on completeness will be made by Donald A. Crane, Regional Director, OSM Region V. To assist in obtaining information on the completeness of the Wyoming submission, the Regional Director is requesting written comments from the public and will hold a public review meeting on the issue of completeness.

The public review meeting on completeness will be conducted by the Regional Director and will be informal. This will provide members of the public, State and OSM opportunity to openly exchange thoughts concerning program completeness outside the more rigid structure of formal public hearing proceedings. Specific format procedures will be at the discretion of the Regional Director.

Written comments may supplement or be submitted in lieu of oral presentation at the public review meeting. All written comments must be mailed or handcarried to the Regional Director's Office above or may be handcarried to the public review meeting at the address above and submitted as exhibits to the proceeding. The comment period will close at the conclusion of the public review meeting or at 5:00 pm on September 20, 1979, whichever is later. Comments received after that time will not be considered in the Regional Director's completeness determination. Representatives of the Regional Director's Office will be available to meet between August 20, 1979 and September 19, 1979 at the request of members of the public to receive their advice and recommendations concerning the completeness of the proposed program.

Persons wishing to meet with representatives of the Regional Director's Office during this time period may place such request with Sylvia Sullivan, Public Information Office, telephone (303) 837-5966, at the Regional Director's Office above.

Meetings may be scheduled between 9:00 am and noon and 1:00 pm and 4:00

pm, Monday through Friday, excluding holidays at the Regional Director's Office.

No Environmental Impact Statement is being prepared in connection with the process leading to the approval or disapproval of the proposed Wyoming program. Under Section 1702(d) of SMCRA (30 USC Section 1292(d)), approval of State programs does not constitute a major action within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 USC 4332).

The following constitutes a summary of the contents of the Wyoming submission:

The Wyoming Department of Environmental Quality has been designated by the Governor of Wyoming to implement and enforce the Wyoming Environmental Quality Act, as amended, in accordance with the Surface Mining and Reclamation Act of 1977 (P.L. 95-87). The Department has developed State regulations to carry out the State mandate.

Contents of the State Program Submission include:

1. Wyoming's existing State laws and regulations and proposed laws and regulations
2. Attorney General opinions as to adequacy of existing and proposed State laws and rules and regulations to meet the requirements of PL 95-87
3. Designation of Land Quality Division Department of Environmental Quality as the State Regulatory Authority
4. Descriptions and organization charts for agencies involved in the State program
5. Description of the systems for the proposed permanent program
6. Description of mining, reclamation and exploration statistics for 1979-1983
7. Description of Land Quality Division existing and proposed staff
8. Staff adequacy for implementation of the State program
9. Description of use of other agencies by the State Regulatory Authority for the State program
10. Land Quality Division budget
11. Land Quality Division Offices and Equipment
12. Special environmental protection performance standards
13. Other programs administered by Land Quality Division
14. Proposed Cooperative Agreement

between Department of Interior and State of Wyoming

Donald A. Crane,
Regional Director, Region V, Office of Surface Mining.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-64]

Certain High-Voltage Circuit Interrupters and Components Thereof; Order and Notice Designating Investigation More Complicated

On August 7, 1979, the presiding officer in investigation No. 337-TA-64 certified to the Commission his recommendation that this investigation be designated more complicated. His recommendation arises from a motion filed on July 16, 1978, by respondents BBC Brown, Boveri and Co., Ltd., and Brown Boveri Corporation pursuant to § 210.15 of the Commission's rules of practice and procedure (19 CFR 210.15) (Motion Docket No. 64-29).

The Commission hereby accepts the recommendation of the presiding officer and, pursuant to section 337(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1337(b)(1)), declares this investigation to be more complicated.

The reason for such a declaration is that the investigation is of an involved nature owing to the subject matter, the difficulty in obtaining information, and the large number of parties involved. The patent in question in this investigation requires analysis of an unusually high number of patent references. Extensive depositions and document production are required to examine its validity and alleged infringement. Much information is located abroad and more time is needed to complete discovery. These problems have been exacerbated by the large number of parties involved.

In addition, the Commission hereby denies the motion of Westinghouse Electric Corporation, Docket No. 64-49, filed August 10, 1979, for leave to file a memorandum in opposition to the order recommending that this investigation be designated more complicated.

Issued: August 17, 1979.

By order of the Commission.

Kenneth R. Mason,
Secretary.

[FR Doc. 79-26000 Filed 8-21-79; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-52]

Certain Apparatus for the Continuous Production of Copper Rod; Commission Hearing on the Presiding Officer's Recommendation and on Relief, Bonding, and the Public Interest, and of the Schedule for Filing Written Submissions

Recommendation of the presiding officer

In connection with the U.S. International Trade Commission's investigation under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), of alleged unfair methods of competition and unfair acts in the importation and sale of certain apparatus for the continuous production of copper rod in the United States, the presiding officer filed her recommended determination on August 13, 1979, that the Commission determine that there is a violation of section 337. The presiding officer certified the evidentiary record to the Commission for its consideration. Interested persons may obtain copies of the presiding officer's recommendation (and all other public documents) by contacting the office of the Secretary to the Commission, 701 E Street NW., Washington, D.C. 20436, telephone (202) 523-0161.

Commission hearing scheduled

The Commission will hold a hearing beginning at 10:00 a.m., e.d.t., on September 25, 1979, in the Commission's Hearing Room (Room 331), 701 E Street NW., Washington, D.C. 20436, for two purposes. First, the Commission will hear oral arguments on the presiding officer's recommendation that there is a violation of section 337 of the Tariff Act of 1930, as amended. Second, the Commission will hear oral presentations concerning appropriate relief, bonding, and the public-interest factors for consideration in the event that the Commission determines that there is a violation of section 337. These matters are being heard on the same day in order to facilitate the completion of this investigation within time limits established under law and to minimize the burden of this hearing upon the parties to the investigation. The procedure for each portion of the hearing follows.

Oral argument concerning the presiding officer's recommendation

A party to the Commission's investigation or an interested agency wishing to present to the Commission an oral argument concerning the presiding officer's recommendation will be limited to no more than 30 minutes. A party or interested agency may reserve 10

minutes of its time for rebuttal. The oral arguments will be held in this order: complainants, respondents, interested agencies, and Commission investigative staff. Any rebuttals will be held in this order: respondents, complainants, interested agencies, and Commission investigative staff.

Oral presentations on relief, bonding, and the public interest

Following the oral arguments on the presiding officer's recommendation, a party to the investigation, an interested agency, a public-interest group, or any interested member of the public may make an oral presentation on relief, bonding, and the public interest.

1. *Relief.* If the Commission finds a violation of section 337, it may issue (1) an order which could result in the exclusion from entry of certain apparatus for the continuous production of copper rod into the United States or (2) an order which could result in requiring respondents to cease and desist from alleged unfair methods of competition or unfair acts in the importation and sale of such apparatus for the continuous production of copper rod. Accordingly, the Commission is interested in what relief should be ordered, if any.

2. *Bonding.* If the Commission finds a violation of section 337 and orders some form of relief, such relief would not become final for a 60-day period, during which the President would consider the Commission's report. During this period the certain apparatus for the continuous production of copper rod would be entitled to enter the United States under a bond determined by the Commission and prescribed by the Secretary of the Treasury. Accordingly, the Commission is interested in what bond should be determined, if any.

3. *The Public Interest.* If the Commission finds a violation of section 337 and orders some form of relief, it must consider the effect of that relief upon the public. Accordingly, the Commission is interested in the effect of any exclusion order or cease and desist order upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the production of like or directly competitive articles in the United States, and (4) U.S. consumers.

Those persons making an oral presentation on any or all of the above topics will be limited to 15 minutes, with an additional 5 minutes each for summation after all presentations have been made. Participants with similar interests may be required to share time. The order of oral presentations will be as follows: complainants, respondents,

interested agencies, public-interest groups, other interested members of the public, and Commission investigative staff. Summations will follow the same order.

How to participate in the hearing. Any person desiring to appear at the Commission's hearing must file a written request to appear with the Secretary to the U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, no later than the close of business (5:15 p.m., e.d.t.) on September 18, 1979. The written request must indicate whether such person wishes to present an oral argument concerning the presiding officer's recommendation and/or an oral presentation concerning relief, bonding, and the public interest. While only parties to the Commission's investigation, interested agencies, and the Commission investigative staff may present an oral argument concerning the presiding officer's recommended determination, public-interest groups and other interested members of the public are encouraged to make an oral presentation concerning the public interest.

Written submissions to the Commission

The Commission requests that written submissions of four types be filed in connection with these proceedings before the Commission.

1. *Briefs on the presiding officer's recommendation.* Parties to the Commission's investigation, interested agencies, and the Commission investigative staff are encouraged to file briefs concerning exceptions to the presiding officer's recommendation. Briefs must be served on all parties of record to the Commission's investigation on or before the date they are filed with the Secretary. Statements made in briefs should be supported by references to the record. Persons with the same positions on the issues are encouraged to consolidate their briefs, if possible. Briefs must be filed no later than the close of business on August 31, 1979. Parties are encouraged to consolidate the filing of exceptions to the presiding officer's recommended determination and alternative findings of fact and conclusions of law under section 210.54 of the rules with this briefing requirement in order to eliminate duplicative filings and to obtain the benefit of the August 31, 1979 filing date for such exceptions and alternative finding and conclusions.

2. *Reply briefs to briefs on the presiding officer's recommendation.* Parties to the Commission's investigation, interested agencies, and the Commission investigative staff are

encouraged to file reply briefs to the briefs of opposing parties concerning exceptions to the presiding officer's recommendation in order to give greater focus to the issues. Reply briefs must be filed no later than the close of business on September 7, 1979.

3. *Written comments and information concerning relief, bonding, and the public interest.* Parties to the Commission's investigation, interested agencies, public-interest groups, and any other interested members of the public are encouraged to file written comments and information concerning relief, bonding, and the public interest. These submissions should include a proposed remedy, a proposed determination of bonding, and a discussion of the effect of the proposals on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers. Such written comments and information must be filed no later than the close of business on September 7, 1979.

4. *Post-hearing briefs.* Parties to the Commission's investigation, interested agencies and the Commission investigative staff may be asked to respond to questions in writing or to brief particular issues in more detail during the September 25, 1979 hearing. Such responses and additional briefing should be incorporated in post-hearing briefs. Post-hearing briefs, must be filed no later than the close of business on October 9, 1979.

5. *Requests to participate in the hearing.* Written requests to appear at the Commission hearing must be filed by September 18, 1979, as described above.

Additional information

The original and 19 true copies of all briefs and written comments and any written request to participate must be filed with the Secretary to the Commission.

Any person desiring to discuss confidential information, or to submit a document (or a portion thereof) to the Commission in confidence, must request *in camera* treatment. Such request should be directed to the Chairman of the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Documents or arguments reflecting confidential information approved by the Commission for *in camera* treatment will be treated accordingly. All nonconfidential written submissions will be open to public inspection at the Secretary's Office.

Notice of the Commission's investigation was published in the

Federal Register of May 22, 1978 (43 FR 21951-52).

By order of the Commission.

Issued: August 17, 1979.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020-02-M

LEGAL SERVICES CORPORATION

Grants and Contracts

August 17, 1979.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355a, 88 Stat. 378, 42 U.S.C. 2996-2996f, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly . . . such grant, contract or project. . . ."

The Legal Services Corporation hereby announces publicly that it is considering the grant applications submitted by:

1. Utah Legal Services in Salt Lake City, Utah to serve Carbon, Daggett, Duchesne, Emery, Grand, San Juan, Uintah, Beaver, Garfield, Iron, Kane, Millard, Piute, Sanpete, Sevier, Wayne and Washington Counties.

2. Northern New Mexico Legal Services in Taos, New Mexico to serve McKinley, Valencia and Torrance Counties.

3. Gulf Coast Legal Foundation in Houston, Texas to serve Wharton and Matagorda Counties.

Interested persons are hereby invited to submit written comments or recommendations concerning the above applications to the Regional Office of the Legal Services Corporation at: Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, Colorado 80202.

Dan J. Bradley,
President.

BILLING CODE 6820-35-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Museum Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Museum Advisory Panel to the National Council

on the Arts will be held September 5 and 6, 1979, from 9:00 a.m. to 5:30 p.m., in room 1125, Columbia Plaza Office Building, 2401 E Street, N.W., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of March 17, 1977, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and 9(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Project No. M-4]

Availability of Final Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Power Reactor Fuel

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Final Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Power Reactor Fuel prepared by the Commission's Office of Nuclear Material Safety and Safeguards is available for inspection by the public

in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. The Final Generic Environmental Impact Statement is also being made available at local Public Document Rooms and at State Clearinghouses.

The notice of availability of the Draft Generic Environmental Impact Statement and requests for comments from interested persons was published in the Federal Register on March 24, 1978 (43 FR 12402). The comments received from Federal agencies, State and local officials, and interested members of the public have been included in Volume 3 to the Final Statement.

Copies of the Final Statement (Document No. NUREG-0575) may be purchased on or about August 31, 1979 from the National Technical Information Service, Springfield, Virginia 22161, as follows: Volume 1—\$7.25—Executive Summary and Text; Volume 2—\$11.75—Appendices; Volume 3—\$12.00—Comments on the Draft Statement and Staff Responses; microfiche—\$3.00 per volume.

Dated at Silver Spring, Md., this 3rd day of August 1979.

For the Nuclear Regulatory Commission.

Leland C. Rouse,
Chief, Advanced Fuel and Spent Fuel Licensing Branch, Division of Fuel Cycle and Material Safety.

BILLING CODE 7590-01-M

[Docket No. 50-293]

Boston Edison Co.; Granting of Relief From ASME Section XI Inservice Inspection (Testing) Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Boston Edison Company. The relief relates to the inservice inspection (testing) program for the Pilgrim Nuclear Power Station (the facility) located near Plymouth, Massachusetts. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief consists of relief requested under the provisions of 10 CFR 50.55a(g)(5)(iii) for certain pumps and valves and specific ASME Section XI requirements that are considered to be impractical.

The request for relief complies with the standards and requirements of the

Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief. Prior public notice of this action was not required since the granting of this relief from ASME Code requirements does not involve a significant hazards consideration.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the requests for relief dated April 13 and July 24, 1979, and (2) the Commission's letter to the licensee dated August 15, 1979.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated At Bethesda, Md., this 15th day of August 1979.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc. 79-25940 Filed 8-21-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-10]

Commonwealth Edison Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR-2 to Commonwealth Edison Company (the licensee), which amended the license for operation of the Dresden Nuclear Power Station, Unit No. 1 (the facility) located in Grundy County, Illinois. This amendment will become effective twenty days after issuance, unless a hearing has been requested.

This amendment adds license conditions relating to the completion of facility modifications for fire protection and the implementation of administrative controls.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the licensee's submittals dated October 8, 1976, November 30, 1976, December 28, 1976, March 17, 1977, March 29, 1977, July 19, 1977, March 20, 1979, May 30, 1979, and July 5, 1979, (2) Amendment No. 30 to License No. DPR-2, including the Commission's letter of transmittal, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Morris Public Library, 604 Liberty Street, Morris, Illinois 60451. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this August 9, 1979.
For the Nuclear Regulatory Commission.

Dennis L. Ziemann,
Chief, Operating Reactors Branch No. 2,
Division of Operating Reactors.

BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, SC 721-4, is entitled "Inservice Inspection Code Case Acceptability, ASME Section XI, Division 1," and is intended for Division 1, "Power Reactors." It lists those Section XI ASME Code Cases that are generally acceptable to the NRC staff for implementation in the inservice inspection of light-water-cooled nuclear power plants.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review, have not been reviewed by the NRC Regulatory Requirements Review Committee, and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by October 10, 1979.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides or the latest revision of published guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides or draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

Guy A. Arlotto,
Director, Division of Engineering Standards,
Office of Standards Development.

[FR Doc. 79-25949 Filed 8-21-79; 8:45 am]
BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft, temporarily identified by its task number, RS 902-4, is proposed Revision 3 to Regulatory Guide 1.33 and is entitled "Quality Assurance Program Requirements (Operation)." It describes a method for complying with the Commission's regulations with regard to overall quality assurance program requirements for the operation phase of nuclear power plants. The proposed revision to this guide will endorse ANSI N18.7-1967/ANS-3.2, "Administrative Controls and Quality Assurance for the Operational Phase of Nuclear Power Plants." Work on the proposed Revision 3 to Regulatory Guide 1.33 was initiated prior to the accident at the Three Mile Island (TMI) Nuclear Station Unit 2. The

improved guidance it contains was developed as a result of feedback from the NRC Office of Inspection and Enforcement to the Office of Standards Development. When the evaluation of the TMI accident has been completed, additional guidance will be incorporated into this regulatory guide. In the interim, specific comments that would improve the recommendations of this regulatory guide in light of the TMI accident are requested in the following areas:

1. Equipment control during the operational phase, including procedural controls for conducting surveillance tests and inspections.

2. Procedures for shift and relief turnover at operating nuclear power plants.

3. Quality assurance for maintenance, repair, and modification activities at nuclear power plants.

4. Preparation of operating and emergency procedures.

5. Independence of operating plant personnel performing inspections of operating activities.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review, have not been reviewed by the NRC Regulatory Requirements Review Committee, and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by October 12, 1979.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides or the latest revision of published guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides or draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of

Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

BILLING CODE 7590-01-M

[NUREG-0430 Vol. 1, No. 3]

Fuel Cycle Facilities; Issuance and Availability

The U.S. Nuclear Regulatory Commission has issued another in the series of reports titled "Licensed Fuel Facility Status Report" NUREG-0430, dated July 1979. The report contains (a) general facility data such as plant location, type of operation and Special Nuclear Material (SNM) authorization limits; (b) plant operating status; (c) a summary of NRC inspection results; and (d) licensee reports involving plant effluent data, inventory difference data, and reportable events.

This issue will represent the fourth public release of inventory difference data at NRC licensed facilities. The publication contains data from those licensees possessing more than one effective kilogram of highly enriched uranium, low enriched uranium, plutonium and uranium-233. The inventory difference data in this report covers the time period from July 1, 1978 through December 31, 1978.

The issue also contains information on licensed uranium mills, and conversion facilities as well as fuel fabrication plants.

NUREG-0430 is available for inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. Copies may be purchased for \$5.25 per copy from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Bethesda, Md., this 13th day of August 1979.

Georgia Power Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 70 to Facility Operating License No. DPR-57 issued to Georgia Power Company, Oglethorpe Electric Membership Corporation, Municipal Electric Association of Georgia, and City of Dalton, Georgia, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant, Unit No. 1 (the facility) located in Appling County, Georgia. The amendment is effective as of the date of issuance.

The amendment consists of changes to the Technical Specifications which modify the Limiting Conditions for Operation and the Surveillance Requirements associated with the reactor Protection System Power Supply to reflect the addition of redundant, Class 1E breakers on the output of each power supply.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 22, 1979, as supplemented by letters dated June 4 and 25, 1979, (2) Amendment No. 70 to License No. DPR-57, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the

Appling County Library, Parker Street, Baxley, Georgia 31513. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 14th day of August 1979.

BILLING CODE 7590-01-M

Proposed Revision to the Standard Review Plan (NUREG 75/087); Availability

As a part of the continual maintenance of the Standard Review Plan (SRP), the Nuclear Regulatory Commission's Division of System Safety, Office of Nuclear Reactor Regulation, proposes to revise SRP Section 3.9.3, "ASME Code Class 1, 2, and 3 Components, Component Supports, and Core Support Structures" and to add an Appendix A to SRP Section 3.9.3, "Stress Limits for ASME Class 1, 2, and 3 Components and Component Supports of Safety Related Systems and Class CS Core Support Structures Under Specified Service Loading Combinations." Value-impact statements have also been prepared in support of these proposed changes.

The Standard Review Plan is prepared for the guidance of staff reviewers in the Office of Nuclear Reactor Regulation in performing safety reviews of applications to construct or operate nuclear power plants. The principal purpose of the SRP is to assure the quality and uniformity of staff reviews, and to present a well-defined base from which to evaluate proposed changes in the scope and requirements of reviews. It is also a purpose of the SRP to make information about regulatory matters widely available and to improve communication and understanding of the staff review process by interested members of the public and the nuclear power industry.

This proposed revision of the Standard Review Plan and the supporting value/impact statements have not received a complete staff review and approval and do not represent an official NRC staff position. Public comments are being solicited on both the revision and the value/impact statements (including any implementation schedules) prior to a review by the Regulatory Requirements Review Committee and their

recommendation as to whether this revision should be approved. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. All comments received by November 1, 1979, will be considered by the Regulatory Requirements Review Committee.

A summary of the meeting of the Committee at which this revision is considered, the Committee recommendations and all of the associated documents and comments considered by the Committee will be made publicly available prior to a decision by the Director, Office of Nuclear Reactor Regulation on whether to implement this revision.

Copies of this proposed revision and addition to the SRP and the supporting value-impact statements will be available for public inspection at the NRC Public Document Room at 1717 H Street NW., Washington, D.C. 20555. Requests for single copies of this material or for placement on an automatic distribution list for single copies of future proposed revisions to the SRP should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Standard Review Plans are not copyrighted, and Commission approval is not required to reproduce them.

Dated at Bethesda, Md. this 9th day of August 1979.

For the U.S. Nuclear Regulatory Commission.
Frank Schroeder,
Acting Director, Division of Systems Safety,
Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

(Docket Nos. STN 50-546 and STN 50-547) Public Service Co. of Indiana (Marble Hill Nuclear Generating Station, Units 1 and 2)

Notice is hereby given that, by letters dated June 29, 1979, and July 27, 1979, the Sassafras Audubon Society, Nashville, Indiana, has requested that the Director of Nuclear Reactor Regulation suspend or revoke the construction permits for the Marble Hill Nuclear Generating Station, Units 1 & 2, on the basis of environmental, health and safety concerns relative to construction and operation of Marble Hill. An Order issued by the Director of

Inspection and Enforcement, dated August 15, 1979, had the effect of granting the Society's request as it related to alleged construction deficiencies at Marble Hill.

The remaining matters in the Society's request will be treated in accordance with 10 CFR § 2.206 of the Commission's regulations. Appropriate action will be taken on the request within a reasonable time.

Copies of the Society's letters are available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Madison-Jefferson County Public Library, 420 West Main Street, Madison, Indiana 47250.

Dated at Bethesda, Md., this 15th day of August 1979.

BILLING CODE 7590-01-M

(Dockets Nos. 50-259, 50-260 and 50-296)

Tennessee Valley Authority; Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 52 to Facility Operating License No. DPR-33, Amendment No. 47 to Facility Operating License No. DPR-52 and Amendment

No. 24 to Facility Operating License No. DPR-68, issued to Tennessee Valley Authority (the licensee), which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Units Nos. 1, 2 and 3, located in Limestone County, Alabama. The amendments are effective as of date of issuance.

The amendments change the Technical Specifications and authorize the licensee to substitute a computational thermal model for in-situ temperature monitoring stations to determine compliance with the mixing zone temperature limits and the State of Alabama water temperature standards.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for these amendments and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action other than that which has already been predicted and described in the Final Environmental Statement for the facility dated September 1, 1972.

For further details with respect to this action, see (1) the application for amendments dated January 5, 1979, (2) Amendment No. 52 to License No. DPR-33, Amendment No. 47 to License No. DPR-52, and Amendment No. 24 to License No. DPR-68, and (3) the Commission's related Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Alabama 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

BILLING CODE 7590-01-M

Regulatory Guide; Withdrawal of Regulatory Guide and Issuance of Technical Report

The Nuclear Regulatory Commission has withdrawn Regulatory Guide 1.104, "Overhead Crane Handling Systems for Nuclear Power Plants," which was issued for comment in February 1976. It was originally developed to describe the special features and safety devices that should be added to standard overhead crane systems to make them single-failure proof for use in reactor refueling and spent fuel handling operations. Since the guide was issued, there has been a change in the need for guidance on the single-failure-proof option for handling heavy loads over or near the spent fuel pool, and it was decided to withdraw the guide and publish the information it contained in a technical report. The report, NUREG-0554, "Single-Failure-Proof Cranes for Nuclear Power Plants," reflects the comments and suggestions received on the guide. NUREG-0554 is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., or may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161. (Paper copy: \$4.00; Microfiche: \$3.00)

Regulatory guides may be withdrawn when they are superseded by the Commission's regulations, when equivalent recommendations have been incorporated in applicable approved codes and standards, or when changes in methods and techniques or in the need for specific guidance have made them obsolete.

DEPARTMENT OF STATE

(Public Notice CM-81216)

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting on September 26 of the Working Group on Transborder Data Flows of the Advisory Committee on International Investment, Technology, and Development. The Working Group will meet from 9:30-12:00. The meeting will be held in Room 1912 of the State Department, 2201 C Street, NW., Washington, D.C. 20520. The meeting will be open to the public.

The topic of discussion for the meeting will be the "OECD Guidelines on Personal Data Protection in International Data Flows". The Working Group on Protection of Personal Data and the transmittal memorandum conveying to the OECD Council the Experts Group recommendations for the implementation of the Guidelines.

Requests for further information on the meeting should be directed to Richard Kauzlarich, Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may

be reached by telephone on (area code 202) 632-2728.

Members of the public wishing to attend the meeting must contact Mr. Kauzlarich's office in order to arrange entrance to the State Department building.

The Chairman of the working group, will as time permits, entertain oral comments from members of the public attending the meeting.

Dated: August 14, 1979.

BILLING CODE 4710-07-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

Antidumping: Marine Radar Systems From the United Kingdom; Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Determination of Sales at Less Than Fair Value.

SUMMARY: This notice is to advise the public that an antidumping investigation has resulted in a determination that certain marine radar systems from the United Kingdom are being sold at less than fair value within the meaning of the Antidumping Act, 1921. The case is being referred to the United States International Trade Commission for a determination concerning possible injury to an industry in the United States.

EFFECTIVE DATE: August 22, 1979.

FOR FURTHER INFORMATION CONTACT:

Leon McNeill, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW, Washington, DC 20229 (202) 566-5492.

SUPPLEMENTARY INFORMATION: On October 12, 1978, a petition in proper form was received pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel on behalf of Raytheon Marine Company, Manchester, New Hampshire, alleging that certain marine radar systems from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as the "Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the Federal Register of November 6, 1978 (43 FR 51744). A "Withholding of Appraisal Notice" was published in the Federal Register on May 17, 1979 (44 FR 28907).

For purposes of this notice "certain marine radar systems" means X-band radar systems provided for in item 685.60, Tariff Schedules of the United States Annotated, designed principally for boat or ship installation with direct current power supply from 6 to 60 volts, having a maximum viewable display dimension of less than 11 inches, and having an antenna assembly with transmitter-receiver permanently affixed, and parts thereof; all the foregoing, whether such radar system components are imported together as units or separately.

Determination of Sales at Less Than Fair Value

On the basis of the information developed in the Customs investigation and for the reasons noted below, I hereby determine that certain marine radar systems from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

Statement of Reasons on Which This Determination Is Based

a. *Scope of Investigation.* Virtually all of the imports of the subject merchandise from the United Kingdom were exported to the United States by Decca Radar Limited and Electronic Laboratories Limited. Therefore, the investigation has been limited to these manufacturers.

Respondent Decca has made a claim that certain models of the subject merchandise it sells in both the U.K. and U.S. markets should be excluded from the investigation as there are no similar models manufactured by petitioner in the United States. On the basis of the data provided, Treasury has concluded that the disputed models are within the same class or kind of merchandise under consideration in this investigation and their sales should be used in calculating fair value.

b. *Basis of Comparison.* For the purpose of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis for comparison is between the exporter's sales price and the home market price on all sales by Decca Radar Limited. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163) was used since all export sales to the United States were made to a related importer who resold the merchandise subsequent to its importation. On all sales by Electronic Laboratories Limited, the proper basis of comparison is between the purchase price as defined in section 203 of the Act (19 U.S.C. 162) and the home market price since all export sales were made to an unrelated importer. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide an adequate basis for comparison.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning exports and home market sales during the period June 1, 1978 through November 30, 1978.

A claim was made by petitioner for an extension of the period of investigation to include earlier dates that would have been examined had an earlier petition been found adequate for the initiation of the investigation. However, because sufficient sales to form a basis of comparison were made during the period actually selected for investigation consistent with § 153.31(b) of the Customs Regulations (19 CFR 153.31(b)), this claim was not allowed.

c. *Exporter's Sales Price.* For the purpose of this determination, the exporter's sales price has been calculated on the basis of the resale prices to unrelated United States customers. Adjustments have been made for ocean freight, marine insurance, discounts where applicable, United States Customs duty, brokerage, United States inland freight, warranty charges, rebates where applicable, and selling and administrative expenses incurred in the United States.

Adjustments for ocean freight, marine insurance, duty, brokerage and inland freight were made pursuant to section 204(1) of the Act since these costs and charges are incident to bringing the merchandise from the place of shipment in the United Kingdom to the place of delivery in the United States. The selling and administrative expenses incurred in the United States were deducted as charges incurred in the resale of the merchandise, pursuant to section 204(3) of the Act.

d. *Purchase Price.* For purposes of this determination, purchase price has been calculated on the basis of an ex-works price in the United States. No adjustments were made to the purchase price.

e. *Home Market Price.* For the purposes of this determination, the home market price on all sales by Decca Radar Ltd. was calculated on the basis of the selling price to unrelated purchasers in the home market. Deductions were made for inland freight, discounts where applicable, warranty, and selling expenses.

The selling expenses claimed in the home market were deducted as an offset not to exceed the amount of the selling and administrative expenses incurred in the United States market. This is in accordance with § 153.10(b), Customs Regulations (19 CFR 153.10(b)).

The home market price on all sales by Electronic Laboratories Ltd. was calculated on the basis of the selling price to unrelated purchasers in the home market. Deductions were made for discounts, warranty expenses, carriage, insurance and freight charges. An adjustment was made for the difference in credit costs between the home market

and export market. A claim for an adjustment for differences in circumstances of sale for advertising and technical expenses has not been allowed because information allegedly showing that such expenses are directly related to the sales under consideration was not received in time to be analyzed and verified prior to this determination. To the extent that such an adjustment is subsequently determined to be appropriate and its size is adequately established and verified, an adjustment will be considered in the event of a "Finding of Dumping" in the assessment of dumping duties.

Petitioner has made a claim that rebates should be deducted on all eligible models of marine radar systems exported by Decca Radar in calculating exporter's sales price. Since rebates were not granted on all models, it was considered appropriate to deduct rebates only on the applicable models.

Respondent Decca has claimed that the foreign market value should be based upon sales to dealers, disregarding sales to users. This claim was denied because user sales were in the "usual wholesale quantities" as defined by section 212(4) of the Act, and sales in the home market were compared to the same levels of trade in the United States.

A claim also was made by respondent Decca that the fair value should be based upon list price less qualifying discounts. Since the requirements set forth in § 153.9(b)(1) of the Customs Regulations (19 CFR 153.9(b)(1)) were not met, the claim has not been allowed.

Respondent Decca claimed that a weighted-average price should be calculated for U.S. sales and compared to the foreign market value to determine the existence of margins. It has been a long-standing practice of the Department to compare individual sales in the United States to the weighted-average of home market prices. Respondent's claim, consequently, was disallowed.

Respondent Decca made a claim that the United States Customs duty should be based on the invoice price rather than the price to distributors in third countries. However, it is inappropriate to address the proper basis of assessment for Customs duties within the context of an antidumping investigation. Section 204(1) of the Act (19 U.S.C. 163(1)) requires the use of the actual amount of Customs duty and, therefore, it was that amount which was deducted.

A claim was made by respondent Electronic Laboratories Ltd. for an adjustment under § 153.15 of the Customs Regulations (19 CFR 153.15) for

differences in levels of trade. This claim was not allowed. Comparisons between the price to the United States and those in the United Kingdom being used in this determination are made at the same or nearest level of trade in each market. If there are no sales in the foreign market at a particular level of trade at which sales to the United States are made, an adjustment could be made if cost differences to the seller could be demonstrated to result from the differences in the two levels of trade involved. In this case, no actual quantification of such differences was presented. Accordingly, sales to the nearest comparable level of trade in the United Kingdom have been used without adjustments for sales to purchasers in the United States.

f. *Result of Fair Value Comparisons.* Using the above criteria, the purchase price or exporter's sales price was less than the adjusted home market price of such or similar merchandise. Comparisons were made on 100 percent of the subject marine radar systems sold in the United States by the two manufacturers during the period of investigation. Margins were found ranging from 3.2 to 25.8 percent for sales made by Decca Radar. A margin of 7.3 percent was found on 72 percent of the sales made by Electronic Laboratories. The weighted-average margins over the total sales compared for each firm were approximately 4.4 percent for Decca Radar and 5.2 percent for Electronic Laboratories.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40 of the Customs Regulations (19 CFR 153.40).

The U.S. International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(b) of the Act (19 U.S.C. 160(b)).

David R. Brennan,

Acting General Counsel of the Treasury.

Motor Carrier Temporary Authority Applications; Notice

The following are notices of filing of applications for temporary authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

(Also from junction U.S. Hwy 40 and

Interstate Hwy 70 over Interstate Hwy 70 to St. Louis) and return over the same route. (26) Between Kansas City, MO and Hannibal, MO serving the intermediate points of Moberly, MO and Monroe City, MO: From Kansas City over U.S. Hwy 24 to junction U.S. Hwy 36, then over U.S. Hwy 36 to Hannibal and return over the same route. (27) Between Jefferson City, MO and El Dorado, KS serving no intermediate points and serving junction U.S. Hwy 54 and U.S. Hwy 71 for purposes of joinder only: From Jefferson City over U.S. Hwy 54 to El Dorado and return over the same route. (28) Between Oklahoma City, OK and Salina, KS serving the intermediate and off-route points of Enid, OK; Wichita, Newton and McPherson, KS: From Oklahoma City over Interstate Hwy 35 to junction Interstate Hwy 155, then over Interstate Hwy 155 to junction U.S. Hwy Alt. 61, then over U.S. Hwy Alt. 81 to Salina and return over the same route. (29) Between Ponca City, OK and Kansas City, MO serving the intermediate and off-route points of Arkansas City, Winfield, El Dorado, Topeka, Lawrence and Kansas City, KS: From Ponca City over U.S. Hwy 77 to junction Interstate Hwy 35, then over Interstate Hwy 35 to junction U.S. Hwy 40, then over U.S. Hwy 40 to Kansas City and return over the same route. (Also from junction U.S. Hwy 77 and Kansas Turnpike, over Kansas Turnpike to Kansas City) and return over the same route. (30) Between Kansas City, KS and junction U.S. Hwy 73 and U.S. Hwy 75 serving the intermediate point of Leavenworth, KS and serving junction for purposes of joinder only: From Kansas City over U.S. Hwy 73 to junction U.S. Hwy 75 and return over the same route. (31) Between junction U.S. Hwy 77 and U.S. Hwy 40 over U.S. Hwy 77 to junction U.S. Hwy 6, then over U.S. Hwy 6 to Omaha and return over the same route (also from junction U.S. Hwy 77 and Interstate Hwy 80 over Interstate Hwy 80 to Omaha) and return over the same route. (32) Between Kansas City, MO and junction Interstate Hwy 80 and Interstate Hwy 35 serving no intermediate points: From Kansas City over Interstate Hwy 35 to junction Interstate Hwy 80 and return over the same route. (33) Between Wichita, KS and McPherson, KS serving the intermediate point of Hutchinson, KS: From Wichita over KS Hwy 96 to junction KS Hwy 61, then over KS Hwy 61 to McPherson and return over the same route. (34) Between Salina, KS and Topeka, KS serving junction U.S. Hwy

40 and U.S. Hwy 77 for purposes of joinder only: From Salina over U.S. Hwy 40 to Topeka, and return over the same route. (35) Between El Dorado, KS and junction U.S. Hwy 77 and U.S. Hwy 40 serving no intermediate points: From El Dorado over U.S. Hwy 77 to junction U.S. Hwy 40 and return over the same route. (36) Between Memphis, TN and Kansas City, MO serving the intermediate points of Jonesboro, AR and Springfield, MO, and serving junction U.S. Hwy 71 and MO Hwy 7 for purposes of joinder only: From Memphis over Interstate Hwy 40 to junction Interstate Hwy 55, then over Interstate Hwy 55 to junction U.S. Hwy 63, then over U.S. Hwy 63 to junction U.S. Hwy 60 at or near Willow Springs, MO, then over U.S. Hwy 60 to Springfield, then over MO Hwy 13 to junction MO Hwy 7 at or near Clinton, MO then over MO Hwy 7 to junction U.S. Hwy 71, then over U.S. Hwy 71 to Kansas City and return over the same route. (37) Between St. Louis, MO and Muscatine, IA serving the intermediate and off-route points of Hannibal, Palmyra, MO; Quincy, IL; and Keokuk, Fort Madison and Burlington, IA: From St. Louis over Interstate Hwy 70 to junction U.S. Hwy 61 (also from St. Louis over U.S. Hwy 40 to junction U.S. Hwy 61 at or near Wentzville, MO) then over U.S. Hwy 61 to Muscatine and return over the same route. (38) Between Kansas City, MO and Council Bluffs, IA serving the intermediate and off-route points of St. Joseph, MO and Leavenworth, KS: From Kansas City over Interstate Hwy 29 to Council Bluffs and return over the same route. (39) Between Omaha, NE and Davenport, IA serving the intermediate and off-route points of Ames, Marshalltown, Des Moines, Tama, Council Bluffs, Amana, Cedar Rapids, Marion and Iowa City, IA: (a) From Omaha over Interstate Hwy 80 to junction U.S. Hwy 6, then over U.S. Hwy 6 to Davenport and return over the same route. (Also from Omaha over U.S. Hwy 6 to Davenport) and return over the same route; and (b) From Omaha over U.S. Hwy 6 to junction U.S. Hwy 75, then over U.S. Hwy 75 to junction U.S. Hwy 30, then over U.S. Hwy 30 to junction IA Hwy 38, then over IA Hwy 38 to junction IA Hwy 130, then over IA Hwy 130 to Davenport and return over the same route. (40) Between Marshalltown, IA and Dubuque, IA serving the intermediate and off-route points of Waterloo, Independence, Oelwein, and Dyersville, IA: From Marshalltown over IA Hwy 14 to junction IA Hwy 57 near Fern, IA, then over IA Hwy 57 to Waterloo, then over U.S. Hwy 20 to Dubuque and return over

the same route. (41) Between Stanwood, IA and Aurora, IL serving the intermediate points of Sterling and Rock Falls, IL and Clinton, IA: From Stanwood over U.S. Hwy 30 to Aurora and return over the same route. (42) Between Moline, IL and Rochelle, IL serving the intermediate and off-route points of Cordova, Sterling and Dixon, IL: From Moline over IL Hwy 92 to junction IL Hwy 5, then over IL Hwy 5 to junction IL Hwy 2, then over IL Hwy 2 to junction IL Hwy 38, then over IL Hwy 38 to Rochelle and return over the same route. (43) Between Moline, IL and junction Interstate Hwy 80 and Interstate Hwy 55 serving no intermediate points, and serving junction for the purpose of joinder only: From Moline over Interstate Hwy 80 to junction Interstate Hwy 80 and Interstate Hwy 55 and return over the same route. (44) Between Dubuque, IA and Freeport, IL serving no intermediate points: From Dubuque over U.S. Hwy 20 to Freeport and return over the same route. (45) Between Des Moines, IA and Minneapolis, MN serving the intermediate and off-route points of Ames, IA; Albert Lee, Owatonna and Faribault, MN: From Des Moines over Interstate Hwy 35 to junction Interstate Hwy 35W, then over Interstate Hwy 35W to Minneapolis and return over the same route. (46) Between Chicago, IL and Milwaukee, WI serving no intermediate points: From Chicago over U.S. Hwy 41 to Milwaukee and return over the same route. (47) Between Council Bluffs, IA and Minneapolis, MN serving the intermediate points of Sioux City and Le Mars, IA and Mankato, MN and serving junction U.S. Hwy 16 and MN Hwy 60 for purposes of joinder only: From Council Bluffs over Interstate Hwy 29 to junction U.S. Hwy 75 at or near Sioux City, IA then over U.S. Hwy 75 to junction IA Hwy 60, then over IA Hwy 60 to IA-MN State Line, then over MN Hwy 60 to junction U.S. Hwy 169, then over U.S. Hwy 169 to MN Hwy 101, then over MN Hwy 101 to junction MN Hwy 13, then over MN Hwy 13 to junction Interstate Hwy 35, then over Interstate Hwy 35 to junction Interstate Hwy 35W, then over Interstate Hwy 35W to Minneapolis and return over the same route.

(48) Between Burlington, IA and Monmouth, IL serving no intermediate points: From Burlington over U.S. Hwy 34 to Monmouth and return over the same route. (49) Between junction U.S. Hwy 61 and U.S. Hwy 218 near Summitville, IA and Owatonna, MN serving the intermediate and off-route points of Mt. Pleasant, Iowa City, Cedar Rapids, Cedar Falls, Waterloo, IA and

Austin, MN: From junction U.S. Hwy 61 and U.S. Hwy 218, over U.S. Hwy 218 to Owatonna and return over the same route. (50) Between Dubuque, IA and St. Paul, MN serving the intermediate point of Rochester, MN: From Dubuque over U.S. Hwy 52 to St. Paul and return over the same route. (51) Between Dubuque, IA and junction U.S. Hwy 61 and U.S. Hwy 14 serving no intermediate points: From Dubuque over U.S. Hwy 61 to junction U.S. Hwy 14 and return over the same route. (52) Between Rochester, MN and Janesville, WI serving no intermediate points: From Rochester over U.S. Hwy 14 to Janesville and return over the same route. (53) Between Dubuque, IA and Green Bay, WI serving no intermediate points: From Dubuque over U.S. Hwy 151 to junction U.S. Hwy 41, then over U.S. Hwy 41 to Green Bay and return over the same route. (54) Between St. Paul, MN and junction U.S. Hwy 14 and Interstate Hwy 90 serving no intermediate points: From St. Paul over U.S. Hwy 12 to junction Interstate Hwy 94, then over Interstate Hwy 94 to junction Interstate Hwy 90, then over Interstate Hwy 90 to junction U.S. Hwy 14 and return over the same route. (55) Between St. Paul, MN and Stevens Point, WI, serving no intermediate points and serving junction U.S. Hwy 10 and Interstate Hwy 94 for purposes of joinder only: From St. Paul over U.S. Hwy 10 to Stevens Point and return over the same route. (56) Between Milwaukee, WI and Green Bay, WI serving no intermediate points: From Milwaukee over U.S. Hwy 41 to junction U.S. Hwy 151, then over U.S. Hwy 151 to junction WI Hwy 55, then over WI Hwy 55 to junction U.S. Hwy 41, then over U.S. Hwy 41 to Green Bay and return over the same route. (57) Between Stevens Point, WI and Appleton, WI serving no intermediate points: From Stevens Point over U.S. Hwy 10 to Appleton and return over the same route. (58) Between Madison, WI and Stevens Point, WI serving no intermediate points: From Madison over U.S. Hwy 51 to Stevens Point and return over the same route. (59) Between Green Bay, WI and junction WI Hwy 29 and Interstate Hwy 94 serving the intermediate points of Wausau, WI and Chippewa Falls, WI: From Green Bay over WI Hwy 29 to junction WI Hwy 29 and Interstate Hwy 94 and return over the same route. (60) Between Milwaukee, WI and Beloit, WI serving no intermediate points: From Milwaukee over WI Hwy 15 to Beloit and return over the same route. (61) Between Milwaukee, WI and Madison, WI serving no intermediate points: From Milwaukee over Interstate Hwy 94 to

Madison and return over the same route. (62) Between junction U.S. Hwy 16 and MN Hwy 60 and junction U.S. Hwy 16 and U.S. Hwy 218 serving no intermediate points and serving junction U.S. Hwy 16 and Interstate Hwy 35 for purposes of joinder only: From junction U.S. Hwy 16 and MN Hwy 60 over U.S. Hwy 18 to junction U.S. Hwy 16 and U.S. Hwy 218 and return over the same route. (63) Between junction U.S. Hwy 18 and U.S. Hwy 218 and junction U.S. Hwy 63 and U.S. Hwy 52 serving no intermediate points: From junction U.S. Hwy 18 and U.S. Hwy 218 over U.S. Hwy 18 to junction U.S. Hwy 63, then over U.S. Hwy 63 to junction U.S. Hwy 52 and return over the same route. (64) Between Wichita Falls, TX and Ardmore, OK, serving no intermediate points and serving junction OK Hwy 79 and U.S. Hwy 81 at or near Waurika, OK for purposes of joinder only: From Wichita Falls over TX Hwy 79 to TX-OK State line, then over OK Hwy 79 to junction U.S. Hwy 70, then over U.S. Hwy 70 to Ardmore and return over the same route. (65) Between Dallas, TX and junction TX Hwy 24 and U.S. Hwy 82 at or near Paris, TX, serving no intermediate points and serving junction TX Hwy 24 and U.S. Hwy 82 for purposes of joinder only: From Dallas over Interstate Hwy 30 to junction TX Hwy 34, then over TX Hwy 34 to junction TX Hwy 24, then over TX Hwy 24 to junction U.S. Hwy 82 and return over the same route. (66) Between Fort Smith, AR and Texarkana, TX serving no intermediate points as an alternate route for operating convenience only: From Fort Smith over U.S. Hwy 71 to Texarkana and return over the same route. (67) Between junction U.S. Hwy 70 and Indian Nation Turnpike and Fort Smith, AR serving no intermediate points as an alternate route for operating convenience only: From junction U.S. Hwy 70 and Indian Nation Turnpike over Turnpike to junction U.S. Hwy 271, then over U.S. Hwy 271 to junction U.S. Hwy 71, then over U.S. Hwy 71 to Fort Smith and return over the same route. (68) Between Tulsa, OK and junction Interstate Hwy 35 and Cimarron Turnpike serving no intermediate points as an alternate route for operating convenience only: From Tulsa over the Cimarron Turnpike to junction Interstate Hwy 35 and return over the same route. (69) Between Wichita, KS and junction Interstate Hwy 35 and U.S. Hwy 77, serving no intermediate points, and serving junction Interstate Hwy 35 and U.S. Hwy 77, for purposes of joinder only: From Wichita over Interstate Hwy 35 to junction U.S. Hwy 77 and return over the

same route. (70) Between Newton KS and Hutchinson, KS serving no intermediate points as an alternate route for operating convenience only: From Newton over U.S. Hwy 50 to Hutchinson and return over the same route. (71) Between Hutchinson, KS and Kansas City, KS serving no intermediate points, serving junction U.S. Hwy 50 and Interstate Hwy 35 for purposes of joinder only: From Hutchinson over U.S. Hwy 50 to Kansas City and return over the same route. (Also from junction U.S. Hwy 50 and Interstate Hwy 35 over Interstate Hwy 35 to Kansas City) and return over the same route. (72) Between Kansas City, MO and junction MO Hwy 10 and U.S. Hwy 24, serving no intermediate points, and serving junction for purposes of joinder only: From Kansas City over U.S. Hwy 69 to junction MO Hwy 10, then over MO Hwy 10 to junction U.S. Hwy 24 and return over the same route. (73) Between Topeka, KS and Omaha, NE serving no intermediate points as an alternate route for operating convenience only: From Topeka over U.S. Hwy 75 to Omaha and return over the same route. (74) Between Des Moines, IA and junction U.S. Hwy 30 and IA Hwy 330, serving no intermediate points as an alternate route for operating convenience only: From Des Moines over U.S. Hwy 65 to junction IA Hwy 330, then over IA Hwy 330 to junction U.S. Hwy 30 and return over the same route. (75) Between Cedar Rapids, IA and Dubuque, IA serving no intermediate points as an alternate route for operating convenience only: From Cedar Rapids over U.S. Hwy 151 to Dubuque and return over the same route. (76) Between Davenport, IA and Dubuque, IA serving no intermediate points, and serving the junction U.S. Hwy 61 and U.S. Hwy 30 for purposes of joinder only: From Davenport over U.S. Hwy 61 to Dubuque and return over the same route. (77) Between Dixon, IL and Rockford, IL serving no intermediate points: From Dixon over IL Hwy 2 to Rockford, IL and return over the same route. (78) Between Hannibal, MO and Jacksonville, IL serving no intermediate points: From Hannibal over U.S. Hwy 36 to Jacksonville and return over the same route. (79) Between Portland, OR and Ogden, UT serving no intermediate points: From Portland over Interstate Hwy 80N to junction Interstate Hwy 15, then over Interstate Hwy 15 to Ogden and return over the same route. (80) Between Ogden, UT and Omaha, NE serving no intermediate points, serving junction Interstate Hwy 80N and Interstate Hwy 80 near Coalville, UT for purposes of joinder only: From Ogden over Interstate Hwy 80N to junction

Interstate Hwy 80, then over Interstate Hwy 80 to Omaha and return over the same route. (81) Between Sacramento, CA and junction Interstate Hwy 80N and Interstate Hwy 80, serving no intermediate points and serving junction Interstate Hwy 80 and Interstate Hwy 15, and junction Interstate Hwy 80 and Interstate Hwy 80N for purposes of joinder only: From Sacramento over Interstate Hwy 80 to junction Interstate Hwy 80N and return over the same route. (82) Between San Bernardino, CA and junction Interstate Hwy 60 and Interstate Hwy 15, serving no intermediate points and serving junction for purposes of joinder only: From San Bernardino over Interstate Hwy 15 to junction Interstate Hwy 80 and return over the same route. (83) Between San Bernardino, CA and junction U.S. Hwy 60 and U.S. Hwy 287 serving no intermediate points, serving junction Interstate Hwy 40 and U.S. Hwy 54 for purposes of joinder only: From San Bernardino over Interstate Hwy 15 to junction Interstate Hwy 40, then over Interstate Hwy 40 to junction U.S. Hwy 287 and U.S. Hwy 60 and return over the same route. (84) Between San Bernardino, CA and junction Interstate Hwy 76 and Interstate Hwy 80 serving no intermediate points, and serving junction for purposes of joinder only: From San Bernardino over Interstate Hwy 15 to junction UT Hwy 4, then over UT Hwy 4 to junction Interstate Hwy 70, then over Interstate Hwy 70 to junction U.S. Hwy 6, then over U.S. Hwy 6 to junction Interstate Hwy 76, then over Interstate Hwy 76 to junction Interstate Hwy 80 and return over the same route. (85) Between junction Interstate Hwy 40 and U.S. Hwy 54 and Wichita, KS, serving no intermediate points: From junction Interstate Hwy 40 and U.S. Hwy 54, over U.S. Hwy 54 to Wichita and return over the same route. (86) Between El Paso, TX and Wichita Falls, TX serving no intermediate points, serving junction U.S. Hwy 87 and U.S. Hwy 180 for purposes of joinder only: From El Paso over U.S. Hwy 180 to junction U.S. Hwy 277, then over U.S. Hwy 277 to Wichita Falls and return over the same route. (87) Serving: (a) All points in Collins, Cook, Fannin, Grayson, Lamar Counties, TX; Bryant, Caddo, Carter, Cleveland, Comanche, Creek, Garfield, Grady, Kay, Muskogee, Oklahoma, Okmulgee, Pittsburg, Pontotoc, Pottawatomie, Stephens, Seminole, Tulsa, Washington Counties, OK; as intermediate and off-route points in connection with routes (1) through (17) above, inclusive, and; (b) All points in Benton, Sebastian, Washington Counties, AR; as intermediate and off-

route points in connection with route (21) above, and; (c) All points in Ottawa County, OK; Bourbon, Crawford Counties, KS; Audrain, Boone, Buchanan, Cole, Cooper, Greene, Jackson, Jasper, Lawrence, Marion, Monroe, Newton, Pettis, Randolph Counties, MO; as intermediate and off-route points in connection with routes (22) through (26) above, inclusive, and; (d) All points in Butler, Cherokee, Cowley, Douglas, Harvey, McPherson, Reno, Sedgwick, Saline, Shawnee, Wyandotte Counties, KS; Dodge, Douglas, Sarpy, Washington Counties, NE; as intermediate and off-route points in connection with routes (28) through (35) above, inclusive, and; (e) All points in Marion County, MO; Adams County, IL; Des Moines and Lee Counties, IA; as intermediate and off-route points in connection with route (37) above, and; (f) All points in Buchanan County, MO; and Leavenworth County, KS; as intermediate and off-route points in connection with route (38) above, and; (g) All points in Buchanan, Clinton, Dubuque, Fayette, Humboldt, Iowa, Johnson, Linn, Marshall, Polk, Pottawatomie, Story, Tama, Webster Counties, IA; Lee, Rock Island and Whiteside Counties, IL; as intermediate and off-route points in connection with routes (39) through (42) above, inclusive, and; (h) All points in Black Hawk, Henry, Plymouth, Woodbury Counties, IA; Blue Earth, Brown, Dakota, Dodge, Freeborn, Fillmore, Houston, Hennepin, Le Sueur, Mower, Nicolett, Olmsted, Ramsey, Rice, Scott, Steele, Winona and Waseca Counties, MN; as intermediate and off-route points in connection with routes (44) through (50) above, inclusive. MC 114273 (Sub-NC 619TA), filed June 21, 1979. Applicant: CRST, INC., P.O. Box 68, Cedar Rapids, IA 52406. Representative: Kenneth L. Core (same address as applicant). (1) *Such commodities as are dealt in by wholesale, retail, or chain grocery stores (except in bulk, in tank vehicles) between points in IN and Louisville, KY, on the one hand, and, on the other, points in MN; Fargo, ND: points in MO on and north of U.S. Hwy 50 and on and west of U.S. Hwy 63 and Aurora, Bolivar, Carthage, Clinton, Joplin, Neosho, St. Louis, Springfield, and Webb City, MO; and points in KS on and east of U.S. Hwy 81; (2) General commodities (except those of unusual value, Class A and B explosives, household goods, commodities in bulk, in tank vehicles, and commodities which because of size or weight require special equipment) between points in IN and Louisville, KY, on the one hand, and, on the other, Ashton, Aurora, Berger, Bernice, Chicago, Comp. Corland, Creston, Dekalb, Dixon, Elburn, Franklin Grove, Fulton, Globe, Kaneville, Malta, Maple Lake, Morrison, N. Aurora, Rochelle, Rock Falls, St. Charles,*

Sterling, Union Grove, Unionville, IL; Adair, Adel, Altoona, Ames Ankeny, Arcadia, Aspinwall, Atlantic, Avon, Bagley, Bayard, Beaver, Belle Plaine, Benson, Berwick, Bondurant, Boone, Cambridge, Carlisle, Carroll, Casey, Cedar Falls, Cedar Rapids, Clinton, Collins, Colo, Coon Rapids, Council Bluffs, Dawson, Dedham, Denison, Des Moines, De Witt, Dewar, Dexter, Dow City, Dunlap, Eagle Center, Evansdale, Ferguson, Gardiner, Gilbertville, Gladstone, Glidden, Grand Junction, Grimes, Harverhill, Hudson, Huxley, Jamaica, Jefferson, Johnston, Kellogg, Le Grand, Lewis, Lisbon, Logan, Lowden, Madrid, Manning, Marion, Marshalltown, Maxwell, Mechanicville, Melbourne, Menlo, Missouri Valley, Mitchellville, Mt. Vernon, Nevada, Norwalk, Norwood, Oakland, Ogden, Orilla, Ortonville, Perry, Quick, Redfield, Rhodes, Scotch Ridge, Scranton, Slater, Stanwood, State Center, Stuart, Tampa, Templeton, Toledo, Underwood, Urbandale, Vail, Van Clevel, Washburn, Waterloo, Waukeg, West Branch, West Des Moines, West Side, Woodbine, Woodward, IA; Alda, Ames, Arlington, Ashland, Blair, Central City, Chapman, Clarks, Columbus, Duncan, Emerald, Exeter, Fairmont, Fremont, Friend, Gibbon, Grafton, Grand Island, Cretna, Hanson, Hastings, Kearney, Kennard, Lincoln, Milford, North Bend, Omaha, Richland, Rogers, Shuyler, Shelton, Silver Creek, Sutton, Valley, Waverly, Wood River, NE; (3) *General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities requiring special equipment, and commodities injurious or contaminating to other lading) from points in IN and Louisville, KY to points in IA within 100 miles of Cedar Rapids, IA. The purpose of this application is to obtain emergency temporary authority for CRST to continue to provide service into and out of Indiana. On May 24, 1979 an Order was served by the Commission denying CRST's purchase of Chi-Fli, Inc., Docket No. MC-F-12929. The Order became effective June 23, 1979. The instant application is merely an attempt by CRST to enable it to continue to provide service to the shipper and consignees in Indiana that CRST has served over at least the past two and one-half (2½) years. CRST filed a permanent application in this regard in Docket No. MC 114273 (Sub-No. 495F). The application was initially filed on or about December 13, 1978, yet it still has not been assigned for modified procedure or oral hearing and it is*

inconceivable that it will be resolved by the June 23, 1979 cease and desist date. Supporting shipper(s): There are 17 supporting shippers on file at headquarters or the office listed below. Send protest to: Herbert W. Allen, DS/ICC 518 Federal Bldg., Des Moines, IA 50309.

Milwaukee, WI, for 180 days. An underlying ETA seeks 90 days authority. Supporting shipper(s): Spencer Foods, Inc., Box 544, Schuyler, NE. Send protests to: Herbert W. Allen, DS, ICC, 518 Federal Bldg., Des Moines, IA 50309.

MC 147603 (Sub-2TA), filed May 9, 1979. Applicant: A & J TRANS PLUS, INC., 865 South 18th Street, Newark, NJ 07108. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *Contract carrier, irregular routes* for 180 days. Scrap Paper and Woodpulp, (1) From points in New York Harbor, NY, to points on Long Island, NY; Union, NJ; and Brewer Junction, ME; (2) From Versailles, CT, to Chester, PA; and Hightsville and Milford, NJ; (3) From New York, NY, to Buffalo, NY; (4) From Harrison, NJ, to Rochester, NH; (5) From Camden, NJ, to Boston, MA; (6) From Albany, NY, to Versailles, CT; Brooklyn, NY; Fitchburg, MA; and Brattleboro and Sheldon Springs, VT; (7) From Boston, MA piers, to Lawrence, Springfield, and Otter River, MA; and (8) From Philadelphia, PA piers, to Brooklyn, NY; Newark, NJ; and Wilmington, DE. Under a continuing contract or contracts with Perry H. Koplik & Sons, New York, NY. An underlying ETA seeks 90 days authority. Supporting shipper(s): Perry H. Koplik & Sons, Inc., 654 Madison Avenue, New York, NY 10021. Send protests to: Irwin Rosen, TS, ICC, 9 Clinton Street, Room 618, Newark, NJ 07102.

MC 147653 (Sub-1TA), filed July 9, 1979. Applicant: RAFELINA F. LA MAR d.b.a. STATEN SHUTTLE SERVICE, P.O. Box 264, Staten Island, NY 10308. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *Contract carrier, irregular routes: passengers and their baggage, in the same vehicle with passengers*, between points in Brooklyn and Staten Island, NY, on the one hand, and, on the other, the facilities of the U.S. Lines, Cranford, NJ; for 180 days; an underlying ETA seeks 90 days authority. Supporting shipper(s): There are 20 (twenty) employees of the U.S. Lines, Inc., supporting this application. Their statements may be examined at the office listed below and headquarters. Send protests to: Maria B. Keiss, Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

MC 2229 (Sub-206TA), filed April 16, 1979, and published in the Federal Register issue of May 18, 1979, and republished as corrected this issue. Applicant: RED BALL MOTOR FREIGHT, INC., 3177 Irving Boulevard, Dallas, TX 75247. Representative: Jackie Hill (Address same as applicant). *Common carrier, regular routes, general*

commodities (except Classes A and B explosives, articles of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Winslow, AZ and Nogales, AZ: From Winslow over I. S. Hwy 40 to its junction with I. S. Hwy 17, then over I. S. Hwy 17 to its junction with I. S. Hwy 10, then over I. S. Hwy 10 to its junction with I. S. Hwy 19, then over I. S. Hwy 19 to Nogales, and return over the same route, serving the intermediate points of Phoenix and Tucson, AZ, restricted against the transportation of traffic between Phoenix, Tucson and Nogales, AZ, for 180 days. An underlying ETA seeks 90 days authority. Applicant seeks to tack this authority with that issued in MC-2229 and subs thereto and to interline. Common control may be involved. Supporting shipper(s): There are approximately 75 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, DC, or copies thereof which may be examined at the field office named below. Send protests to: Opal M. Jones, ICC, 1100 Commerce Street, Room 13C12, Dallas, TX 75242. The purpose of this republication is to show intent to tack and interline as previously omitted.

MC 22278 (Sub-54TA), filed April 19, 1979, and published in the Federal Register issue of July 26, 1979, and republished as corrected this issue. Applicant: TAKIN BROS. FREIGHT LINE, INC., 2125 Commercial Street, Waterloo, IA 50702. Representative: John P. Rhodes, P.O. Box 5000, Waterloo, IA 50704. *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, by regular route. Between Chicago, IL, and Milwaukee, WI, serving all intermediate points in WI: From Chicago over IL Hwy 42A to jct U.S. Hwy 41, then over U.S. Hwy 41 to jct U.S. Hwy 41, then over U.S. Hwy 41 to jct IL Hwy 173, then over IL Hwy 173 to jct IL Hwy 42, then over IL Hwy 42 to the IL-WI State line, then over WI Hwy 32 to jct WI Hwy 100, then over WI Hwy 100 to jct WI Hwy 59, then over WI Hwy 59 to Milwaukee, and return over the same route. Between the jct U.S. Hwy 41 and IL Hwy 173 and Milwaukee, WI, serving no intermediate points: From the jct U.S. Hwy 41 and IL Hwy 173, U.S. Hwy 41 to Milwaukee, and return over the same route. Restriction: The service authorized in the two paragraphs next above to and from Milwaukee and intermediate points in WI is restricted to

traffic moving to and from points on said carrier's authorized routes other than points in the Chicago, IL, Commercial Zone, as defined by the Commission. Between Chicago, IL and Elkhart, IN, serving all intermediate points: From Chicago over U.S. Hwy 12 to Michigan City, IN, then over U.S. Hwy 35 to jct U.S. Hwy 20, then U.S. Hwy 20 to jct IN Hwy 2, then over IN Hwy 2 to South Bend, IN, and then over U.S. Hwy 33 to Elkhart, and return over the same route. Between Chicago, IL and Cleveland, OH, serving all intermediate points, and the off-route points of LaPorte, IN, and Painesville, OH: From Chicago over U.S. Hwy 20 to jct OH Hwy 120 (formerly OH Hwy 102), then over OH Hwy 120 to Toledo, OH, then over OH Hwy 2 to Port Clinton, OH (also from Toledo over OH Hwy 120 to jct OH Hwy 163, then over OH Hwy 163 to Port Clinton), then over OH Hwy 2 to Lorain, OH, then over OH Hwy 57 to jct OH Hwy 254, and then over OH Hwy 254 to Cleveland, and return over the same route. Between South Bend, IN, and Detroit, MI, serving all intermediate points: From South Bend over U.S. Hwy 20 to Elkhart, IN, then over IN Hwy 120 to Bristol, IN (also from South Bend over Hwy 20 to jct IN Hwy 112, then over IN Hwy 120 to jct U.S. Hwy 131, then over U.S. Hwy 131 to Mottville, MI, and then over U.S. Hwy 112 to Detroit, and return over the same route. Between Detroit, MI, and Toledo, OH, serving all intermediate points and the off-route point of Ecorse, MI: From Detroit over U.S. Hwy 25 to Toledo, and return over the same route. Between South Bend, IN, and Cleveland, OH, serving all intermediate points: From South Bend over U.S. Hwy 20 to jct OH Hwy 49, then over OH Hwy 49 to Edon, OH, then over OH Hwy 34 to Bryan, OH, then over OH Hwy 34 to jct U.S. Hwy 6, then over U.S. Hwy 6 to Sandusky, OH, then over U.S. Hwy 250 to Milan, OH, then over OH Hwy 113 to Elyria, OH, then over OH Hwy 57 to jct OH Hwy 254, and then over OH Hwy 254 to Cleveland, and return over the same route. Between Pittsburgh, PA, and Mansfield, OH, serving all intermediate points, and the off-route points of East Pittsburgh, Trafford, Carnegie and Derry, PA, Galion and Plymouth, OH: From Pittsburgh over PA Hwy 51 to Beaver, PA (also from Pittsburgh over PA Hwy 65 (formerly PA Hwy 88), to Rochester, PA, and then across the Beaver River to Beaver, PA), then over PA Hwy 51 to the PA-OH State line, then OH Hwy 14, via Unity, OH, to jct OH Hwy 14A, then over OH Hwy 14A to Salem, OH, then over U.S. Hwy 62 to Canton, OH, then over U.S. Hwy 30 to

Mansfield (also from Canton over U.S. Hwy 62 to jct unnumbered Hwy, then over unnumbered Hwy to Massillon, OH, then over U.S. Hwy 30 to Mansfield), and return over the same routes. From Pittsburgh to Salem, OH, as specified above, then over OH Hwy 14A to Deerfield, OH, then over OH Hwy 14 via Edinburg, OH, to Cleveland, OH, then over U.S. Hwy 42 to Mansfield, and return over the same route. From Pittsburgh as specified above to Unity, OH, then over OH Hwy 14 to jct OH Hwy 7, then over OH Hwy 7 to Youngstown, OH, then over OH Hwy 18 to Edinburg, OH, and then as specified above to Mansfield, and return over the same route. Between Pittsburgh, PA, and Baltimore, MD, serving all intermediate points, and the off-route points of Alexandria and Rosslyn, VA, points in Allegheny, Beaver, Fayette, Washington, and Westmoreland Counties, PA, and points in MD within 20 miles of Baltimore: From Pittsburgh over U.S. Hwy 30 via Bedford, PA, to Breezewood, PA, then over PA Hwy 126 to Warfordsburg, PA, then over U.S. Hwy 522 to Hancock, MD, then over U.S. Hwy 40 to Baltimore and return over the same route. From Pittsburgh over U.S. Hwy 22 to Armagh, PA, then over PA Hwy 36 to jct U.S. Hwy 220, then over U.S. Hwy 220 to Bedford, PA, then to Baltimore as specified above, and return over the same route. From Pittsburgh over PA Hwy 51 to Uniontown, PA, then over U.S. Hwy 40 to Baltimore, and return over the same route. Between Baltimore, MD, and Washington, DC, serving all intermediate points: From Baltimore over U.S. Hwy 1 to Washington, and return over the same route. Between Philadelphia, PA, and Washington, DC, serving all intermediate points, and off-route points in the Philadelphia, PA, Commercial Zone, as defined by the Commission 17 M.C.C. 533, and the Washington, DC, Commercial Zone, as defined by the Commission in 3 M.C.C. 243, and those within five miles of Baltimore, MD: From Philadelphia over U.S. Hwy 1 to Washington, and return over the same route. From Philadelphia over U.S. Hwy 13 to jct U.S. Hwy 40, then over U.S. Hwy 40 to Baltimore, MD, and then to Washington as specified above, and return over the same route. Between New York, NY, and Philadelphia, PA, serving all intermediate points on the specified routes, and the off-route points within 10 miles of the specified routes, those in NY within 30 miles of NY, NY, those in PA within 30 miles of City Hall, PA, those in NJ within 30 miles of Newark, and those in NJ within 15 miles of City Hall, Camden, as follows: From New

York over U.S. Hwy 1 to Philadelphia and return over the same route. From New York over U.S. Hwy 1 to Morrisville, PA, then over U.S. Hwy 13 to Philadelphia, and return over the same route. From New York over U.S. Hwy 1 to Elizabeth, NJ, then over NJ Hwy 27 to Princeton, NJ, then over U.S. Hwy 206 to Trenton, NJ, and then over U.S. Hwy 1 to Philadelphia, and return over the same route. From New York over U.S. Hwy 1 to jct U.S. Hwy 130 (formerly NJ Hwy 25), then over U.S. Hwy 130 to Camden, NJ, and then across the Delaware River to Philadelphia, and return over the same route. Irregular routes: Between Chicago, IL, on the one hand, and, on the other, points in Lake, McHenry, Kane, DuPage, and Will Counties, IL, points in the portion of DeKalb County, IL, east of IL Hwy 23, and points in that portion of Kankakee County, IL, north of a line beginning at the jct of the western boundary of Kankakee County and IL Hwy 17, then east on IL Hwy 17 to the jct of IL Hwy 114, then east on IL Hwy 114 to the IL-IN border, for 180 days. An underlying ETA seeks 90 days authority. Applicant intends to tack this authority with its existing authority in MC-87909 and MC-22278, and they intend to interline with other carriers. Supporting Shipper(s): There are approximately 121 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, DC, or copies thereof which may be examined at the field office named below. Send protests to: Johnnie Ratcliffe, 518 Federal Building, 210 Walnut Street, Des Moines, IA 50309. The purpose of this republication is to indicate 121 supporting shippers and where to send protests, as previously omitted.

Note.—Common control may be involved.

MC 84268 (Sub-2TA), filed May 10, 1979, and published in the Federal Register issue of June 26, 1979, and republished as corrected this issue. Applicant: JOHN S. HUGHES CARTAGE CO., 4751 West Lake Street, Chicago, IL 60644. Representative: Daniel O. Hands, Suite 200, 205 West Touhy Avenue, Park Ridge, IL 60068. Contract carrier, irregular routes, Candy (except in bulk), in vehicles equipped with mechanical refrigeration, from Chicago, IL to points in the states of IN, MI, OH and WI, for 180 days for the account of E. J. Brach & Sons. An underlying ETA seeks 90 days authority. Supporting Shipper(s): E. J. Brach & Sons, P.O. Box 802, Chicago, IL 60690. Send protests to: Annie Booker, ICC, 219 South Dearborn Street, Room 1386, Chicago, IL 60604. The purpose of this republication is to show origin and destination points as previously omitted.

MC 121658 (Sub-19TA), filed June 11, 1979, and published in the Federal Register issue of August 6, 1979, and republished as corrected this issue. Applicant: STEVE D. THOMPSON TRUCKING, INC., 1205 Percy Street, (P.O. Drawer 149), Winnsboro, LA 71295. Representative: Donald B. Morrison, 1500 Deposit Guaranty Plaza, (P.O. Box 22628), Jackson, MS 39205. Common carrier, regular routes. General Commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment): (1) Between Memphis, Tenn. and Mer Rouge, La.; From Memphis, Tenn. over U.S. Highway 61 to its junction with U.S. Highway 82 at or near Leland, Miss.; thence over U.S. Highway 82 to its junction with U.S. highway 165 at or near Montrose, Ark.; thence over U.S. Highway 165 to Mer Rouge, La., and return over the same routes, serving no intermediate points except those in Louisiana lying on U.S. Highway 165 between the Arkansas-Louisiana State Line and Mer Rouge, La.; (2) between the junction of U.S. Highway 82 with U.S. Highway 65 south of Lake Village, Ark. and Lake Providence, La.; From the junction of U.S. Highway 82 with U.S. Highway 65; thence over U.S. Highway 65 to Lake Providence, La., and return over the same route, serving no intermediate points except those in Louisiana lying on U.S. Highway 65 between the Arkansas-Louisiana State Line and Lake Providence, La.; (3) between the junction of U.S. Highway 82 with U.S. Highway 65 south of Lake Village, Ark. and Oak Grove, La.; From the junction of U.S. Highway 82 with U.S. Highway 65; thence over U.S. Highway 65 to its junction with Arkansas Highway 159 at Eudora, Ark.; thence over Arkansas Highway 159 and Louisiana Highway 17 to Oak Grove, La. and return over the same route, serving no intermediate points except those in Louisiana lying on Louisiana Highway 17 between the Arkansas-Louisiana State line and Oak Grove, La.; (4) between Winnfield, La. and Natchitoches, La.; From Winnfield, La. over U.S. Highway 84 to Clarence, La., thence over Louisiana Highway 6 to Natchitoches, La. and return over the same route, serving all intermediate points; and (5) between Memphis, Tenn. and Jackson, Miss. over Interstate 55 as an alternate route for operating convenience only, serving no intermediate points and serving Jackson, Miss. as a point of joinder only, restricted against the transportation of shipments moving from, to or through Memphis, Tenn. and its commercial

zone which originates at or are destined to points in Mississippi, for 180 days. An underlying ETA seeks 90 days authority. Supporting Shipper(s): There are approximately 141 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, DC, or copies thereof which may be examined at the field office named below. Send protests to: William H. Land, Jr., 3108 Federal Office Building, 700 West Capitol, Little Rock, AR 72201. The purpose of this republication is to include the territorial description, as previously omitted.

Note.—Applicant intends to tack the authority sought herein with authority in MC-121658 at all common points of joinder. Applicant intends to interline with other carriers at all common points, including Memphis, TN; Monroe and Shreveport, LA and Jackson, MS. Applicant seeks to serve the commercial zones of all cities and towns lying on the above described routes.

MC 135009 (Sub-6TA), filed June 4, 1979, and published in the Federal Register issue of August 6, 1979, and republished as corrected this issue. Applicant: PEAK TRANSFER CO., INC., 57 Hathaway Street, Wallington, N.J. 07866. Representative: Ronald I. Shapss, Esq., 450 Seventh Avenue, New York, N.Y. 10001. Contract carrier, irregular routes. Such commodities as are used, manufactured or dealt in by manufacturers and distributors of sound recordings (except in bulk): From Danbury, CT, New York, NY, and points in their commercial zones, and points in NJ, to Terre Haute, IN, and points in its commercial zone, Carrollton, GA, and to points in CA; From Terre Haute, IN, and points in its commercial zone to points in NJ, Danbury, CT, New York, NY, and points in their commercial zones, Carrollton, GA, and to points in CA; From points in CA, to Terre Haute, IN, and New York, NY, and points in their commercial zones, Carrollton, GA, and points on NJ; From Carrollton, GA, to Danbury, CT, Terre Haute, IN, and points in their commercial zones and to points in CA, and NJ, for 180 days. [Notice No. 122]

Assignment of Hearings

August 16, 1979.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 136511 (Sub-26F), Virginia Appalachian Lumber Corporation, now assigned for hearing on September 11, 1979 at Greensboro, N.C., and will be held at the Superior Court, State Court House, 201 South Eugene Street.

MC 121569 (Sub-3F), Gator Freightways, Inc., now assigned for hearing on September 24, 1979 at Orlando, FL, and will be held in Room No. 455, Federal Building, 80 North Hughey Avenue.

MC 119789 (Sub-524F), Caravan Refrigerated Cargo, Inc., now assigned for hearing on September 5, 1979 in Room 511, Federal Court House, 500 Zack Street.

MC-F-13679, Suddath Van Lines, Inc.—Purchase—(Portion)—Plymouth Van Lines, Inc., No. MC 29904 (Sub-3F), Suddath Van Lines, Inc., now assigned for hearing on September 10, 1979 at Jacksonville, FL, and will be held in Room No. 801, Federal Building, 400 West Bay.

MC 95540 (Sub-1052F), Watkins Motor Lines, Inc., now assigned for hearing on September 17, 1979, at San Francisco, CA is postponed indefinitely.

MC 115841 (Sub-653F), Colonial Refrigerated Transportation, Inc., now assigned for hearing on September 11, 1979 at Chicago, IL will be held in Room 1319-Dirksen Bldg., 219 South Dearborn St., Chicago, IL.

AB 7 (Sub-78F), Stanley E. G. Hillman—Trustee of the property of Chicago, Milwaukee, St. Paul and Pacific Railroad Company—Abandonment—Fairfield to Agawam in Teton County, Montana, now assigned for hearing on August 14, 1979 at Chouteau, MT is postponed indefinitely.

MC 142743 (Sub-7F), Fast Freight Systems, Inc., transferred to Modified Procedure.
MC 145906 (Sub-1F), General Trucking Co., Inc., transferred to Modified Procedure.
MC 116763 (Sub-475F), Carl Subler Trucking, Inc., transferred to Modified Procedure.

MC 129150 (Sub-8F), Ciaccia Trucking Company, Inc., transferred to Modified Procedure.

MC 111496 (Sub-26F), Twin City Freight, Inc., transferred to Modified Procedure.

MC 121777 (Sub-2F), Packard Truck Lines, Inc., now assigned for hearing on September 24, 1979, at Baton Rouge, LA is cancelled and Application Dismissed.

MC 143328 (Sub-15F), Eugene Tripp Trucking, now assigned for hearing on September 11, 1979, at San Francisco, CA will be held in Room 510, 211 Main Street, San Francisco, CA.

MC 120761 (Sub-47F), Newman Bros. Trucking Company, now assigned for hearing on September 24, 1979 at Dallas, TX, will be held in Room 5A15-17, Federal Bldg., 1100 Commerce Street, Dallas, TX.

MC 119700 (Sub-49F), Steel Hauler, Inc., now assigned for hearing on September 19, 1979, at Dallas, TX, will be held in Room 5A15-17, Federal Bldg., 1100 Commerce Street, Dallas, TX.

MC 11207 (Sub-464F), Deaton, Inc., now assigned for hearing on September 18, 1979, at Dallas, TX, will be held in Room 5A15-17, Federal Bldg., 1100 Commerce Street, Dallas, TX.

MC-F-13840, Associated Truck Lines, Inc. Control and Merger the Depenthal Truck & Storage Co., and MC 89833 139F, Associated Truck Lines, Inc., now assigned for hearing on September 24, 1979 at Columbus, Ohio will be held in Neil House, 41 South High Street.

MC 139934 (Sub-4F), All Southern Trucking, Inc., now assigned for hearing on September 17, 1979 at Tampa, FL, will be held in Room 901, Park Trammell Bldg., 1313 Tampa Street, Tampa, FL.

MC 145794 (Sub-1F), ARDS Trucking Company, Inc., now assigned for hearing on October 15, 1979 at Atlanta, GA is cancelled and transferred to Modified Procedure.

MC 113855 (Sub-464F), International Transport, Inc., now assigned for hearing on August 9, 1979, at Washington, DC is transferred to Modified Procedure.

MC 145426 F, Odell Ritter, Inc., now being assigned for hearing on October 31, 1979 (3 Days), at Portland, OR in a hearing room to be designated later.

MC 115904 (Sub-118F), Grover Trucking Company, now being assigned for hearing on November 5, 1979 (1 Week), at Portland, OR in a hearing room to be designated later.

37229, Rates on Coal, Wyoming to Welsh, TX, BN, ET AL., July 1979, now being assigned for Prehearing Conference at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 93186 (Sub-6F), Eudell Watts, III d/b/a Watts Transfer Company, now being assigned for hearing on October 30, 1979 (3 Days), at Chicago, IL in a hearing room to be designated later.

MC 82492 (Sub-221F), Michigan & Nebraska Transit Co., Inc., now being assigned for hearing on November 2, 1979 (1 Day), at Chicago, IL in a hearing room to be designated later.

MC 143088 (Sub-4F), Robert Tarbox DBA Tarbox Trucking, now assigned for hearing

on September 17, 1979 at Philadelphia, PA, and will be held at the New U.S. Courthouse, 601 Market Street.

MC 31389 (Sub-269F), McLean Trucking Company, now assigned for hearing on September 18, 1979 at Atlanta, GA, and will be held at the Radisson Inn, 1-285 at Chamble-Dunwoody Rd. Exit, 1850 Cotillion Drive, N.E.

MC 113158 (Sub-33F), Todd Transport Company, Inc., now assigned for hearing on September 19, 1979 at Philadelphia, PA and will be held at the New U.S. Courthouse, 601 Market Street.

MC-F-13723, Denver-Midwest Motor Freight, Inc.—Control and Merger—Load & Co Truck Line, No. MC 127602 (Sub-17F), Denver-Midwest Motor Freight, Inc., now assigned for hearing on September 10, 1979 at Phoenix, AR, and will be held at the Maricopa County Superior Court Building, 201 West Jefferson.

BILLING CODE 7035-01-M

[Decision No. 37179]

Colorado Intrastate Freight Rates and Charges on the Transportation of Coal—1979

Decided: August 8, 1979.

By petition filed May 4, 1979, The Denver and Rio Grande Western Railroad Company (petitioner), operating in intrastate commerce in Colorado requests that this Commission institute an investigation of its freight rates and charges under 49 U.S.C. 11501. Petitioner seeks an order prescribing rates and charges for the transportation of bituminous slack coal from Empire Junction and Empire, Colorado, through Craig, Colorado to points beyond, in intrastate commerce, the same as that presently in effect for the identical movement in interstate commerce. The Commission declined to suspend or investigate the interstate proportional rate on coal applicable from Empire and Empire Junction, Colorado to Craig, Colorado when the through movement is to a destination in interstate commerce. (Suspension and Fourth Section Board Case No. 88322.)

Petitioner has stated grounds sufficient to warrant instituting an investigation.

It is ordered: The petition is granted. An investigation, under 49 U.S.C. 11501 is instituted to determine whether the Colorado state rail freight rate on the transportation of bituminous slack coal in any respect causes any unjust discrimination against or any burden on interstate or foreign commerce, or causes undue or unreasonable advantage, preference or prejudice as between persons or localities in

intrastate commerce and persons or localities in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increase which are effective for interstate application.

In the investigation we shall also determine if any rates or charges, or maximum or minimum charges or both should be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law found to exist.

All persons who wish to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5356, Interstate Commerce Commission, Washington, DC 20423, on or before 15 days from the Federal Register publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. This Commission desires participation of only those who intend to take an active part in this proceeding.

As soon as possible after the last day possible for indicating a desire to participate in the proceeding, this Commission will serve a list of names and addresses upon all persons upon whom service of all proceedings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this order shall be served upon the petitioner. Colorado shall be notified of the proceeding by sending copies of this decision by certified mail to the Governor of Colorado and the Colorado Public Utilities Commission. Further notice of this proceeding shall be given to the public by depositing a copy of this decision in the office of the Secretary of the Interstate Commerce Commission at Washington, D.C. and by filing a copy with the Director, Office of the Federal Register, for publication in the Federal Register.

This is not a major regulatory action under the Energy Policy and Conservation Act of 1975. Furthermore, this is not a major Federal action significantly affecting the quality of the human environment.

By the Commission, Alan Fitzwater,
Director, Office of Proceedings.
Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 29082]

Green Bay & Western Railroad, Co.—Control—Ahnapee & Western Railway Co.—Exemption Under 49 U.S.C. 10505 From 49 U.S.C. 11343-11347

AGENCY: Interstate Commerce Commission.

SUMMARY: Green Bay and Western Railroad Company (Green Bay), a subsidiary of Itel Corporation (Itel), intends to acquire the stock of the Ahnapee and Western Railway Company (Ahnapee), from the McCloud River Railroad Company (McCloud). Ahnapee's parent Company, McCloud is also a subsidiary of Itel. A petition was filed on June 1, 1979 for exemption, from 49 U.S.C. 11343-11347, which requires prior consideration and approval of the transaction by the Interstate Commerce Commission. Green Bay, Ahnapee and McCloud are seeking exemption from these sections under 49 U.S.C. 10505, on the basis that prior review of the transaction is necessary.

DATES: Comments must be received on or before: September 21, 1979.

ADDRESS: Send comments to: Interstate Commerce Commission, 12th St. and Constitution Ave., NW., Washington, D.C. 20423. All written statements will be available for public inspection during regular business hours at the same address. Comments should make reference to the docket number (F.D. 29082).

FOR FURTHER INFORMATION CONTACT: Michael Erenberg, 202-275-7245.

SUPPLEMENTARY INFORMATION: By letter-petition filed June 1, 1979, Green Bay requests exemption pursuant to 49 U.S.C. 10505 from the provisions of 49 U.S.C. 11343 with respect to the

acquisition of stock of the Ahnapee from McCloud, Ahnapee's parent company.

The Ahnapee is a Wisconsin corporation, and constitutes a small 13.75 mile line of railroad which has been operated as a division of McCloud. Control of McCloud is, in turn, exercised by Itel, pursuant to authority granted by the Commission in Finance Docket No. 28371, *SSI Rail Corporation and Itel Corporation—Control—McCloud River Railroad Company*, (not printed, decided April 1, 1977). McCloud and its division, the Ahnapee, were acquired from U.S. Plywood, Champion Papers, Inc., which in turn, has acquired the Ahnapee a number of years ago pursuant to authorization of the Commission in Finance Docket No. 26329, *U.S. Plywood, Champion Papers, Inc. and McCloud River Railroad Company—Purchase—The Ahnapee & W Ry. Company*, (not printed, decided November 2, 1970). The Ahnapee at all times has operated and has been treated by the Commission, the courts, and other railroads as a common carrier in a distinct and identifiable sense both prior to its 1978 incorporation and subsequent thereto.

By order served January 5, 1979, in Finance Docket No. 28813, *The Ahnapee and Western Railway Company Stock*, the Ahnapee, as newly incorporated in Wisconsin, was authorized by Review Board Number 5 to issue 1000 shares of common stock of \$1 par value. As a stock application indicated, the McCloud owns all of the capital stock of Ahnapee except for five shares which are held by named directors. The Ahnapee is shown for purposes of rates as a separate carrier and it is regarded as such by the appropriate legal authorities. None of these factors will change as a result of the stock purchases.

By decision served October 12, 1978, in Finance Docket No. 28654 (Sub-No. 1), *Itel Corporation—Control—Green Bay and Western Railroad Company*, the Commission approved the application of Itel under 49 U.S.C. 11343 to acquire control of the Green Bay. That decision recognized the control by Itel of the McCloud, the Ahnapee, and the Hartford and Slocumb Railroad Company (which operates in Alabama).

The Exemption

The acquisition of control of a carrier by another carrier, requires the approval and authority of the Commission under 49 U.S.C. 11343. To seek Commission approval, an application must be filed in compliance with the ICC *Railroad Acquisition, Control, Merger, Consolidation, Coordination Project, Trackage Rights and Lease Procedures*.

49 C.F.R. Part 1111 (1978) (Consolidation Procedures). Ahnapee, McCloud and Green Bay have requested an exemption from 49 U.S.C. 11343 to avoid the procedural steps required by 49 U.S.C. 11345, in order to expedite consummation of the transaction. They state that the proposed transaction is the type Congress intended the Commission to exempt from detailed regulation when it enacted 49 U.S.C. 10505 in 1976.

We can exempt a matter related to a rail carriers under 49 U.S.C. 10505. This section provides:

(a) In a manner related to a rail carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under this subchapter, the Commission shall exempt a person, class of persons, or a transaction or service because of the limited scope of the transaction or service, when the Commission finds that the application of a provision of this subtitle—

(1) is not necessary to carry out the transportation policy of section 10101 of this title;

(2) would be an unreasonable burden on a person, class of persons, or interstate and foreign commerce; and

(3) would serve little or no useful public purpose.

(b) The Commission may begin a proceeding under this section on its own initiative or on application by the Secretary of Transportation or an interested party. The Commission may specify the period of time during which the exemption is effective.

(c) The Commission may revoke an exemption, to the extent it specifies, when it finds that application of a provision of this subtitle to the person, class, or transportation is necessary—

(1) to carry out the transportation policy of section 10101 of this title;

(2) to achieve effective regulation by the Commission; and

(3) to serve a useful public purpose.

(d) The Commission may act under this section only after an opportunity for a proceeding.

The parties state that this transaction involves only a legal change in corporate structure and operation. In view of the fact that the Commission has already approved the control by Itel of all of the entities involved, the parties petition that exemption from the above statutes is required.

They point out that the legislative history of the Railroad Revitalization and Regulatory Reform Act of 1976, reflects the purpose of the provision to exempt from regulation those transactions in which regulation would serve little or no useful public purpose, and where expenditure of the

Commission's scarce resources would not be necessary to promote the national transportation policy. H.R. Rep. No. 94-781, 94th Cong., 2d Sess., p. 135 (January 23, 1976). Petitioners believe no useful public purpose will be served by subjecting this proposed transaction to protracted proceedings.

Any exemption, were it granted in this proceeding, would be limited solely to this proceeding; after consummation of control, the Commission would retain full jurisdiction over the carriers involved.

Before granting an exemption, we are required to provide the opportunity for a proceeding. This request for comments on the requested exemption of the proposed transaction is that opportunity. All comments filed in response to this notice, along with the petition of Ahnapee, McCloud and Green Bay will be used to determine whether or not the exemption under 49 U.S.C. 10505 should be granted.

Green Bay's petition for waiver of certain provisions of the Consolidation Procedures, also filed June 1, 1979, will be held in abeyance pending receipt of comments on exemption. The waiver petition will be decided concurrently with the decision on the proposed exemption.

This proceeding is instituted under the authority of 49 U.S.C. 10505 and pursuant to 5 U.S.C. 553, 559.

This proceeding is not a major Federal action significantly affecting energy consumption or the quality of the human environment.

Dated: August 15, 1979.

By the Commission, Chairman O'Neal, Vice Chairman Stafford, Commissioners Gresham, Clapp, Christian, Trantum, and Gaskins.
Agatha L. Mergenovich,
Secretary.

[FR Doc. 79-25924 Filed 8-21-79; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. 37165]

Southern Pacific Transportation Co.— Rates and Classification of Iron Ore Within Texas; Decision

August 10, 1979.

Southern Pacific Transportation Company has requested this Commission to institute an intrastate rate investigation under 49 U.S.C. 11501. The movements in dispute are made for Tex-Iron, Inc., from Cushing and LaRue, TX, to various destinations. Petitioners seek a determination of the proper commodity classification, stating that it believes the proper classification is "iron ore, containing not to exceed 73 percent natural iron content, having no

value for further extraction of any metallic content." Petitioner also seeks to publish the same level of rates for this commodity as charged Tex-Iron for interstate shipments.¹

On May 4, 1978, petitioner filed an application with the Railroad Commission of Texas seeking the establishment of iron ore rates for these movements. The Railroad Commission did not issue a final administrative decision within the statutory 120-day period.

Motions to dismiss have been separately filed by the Railroad Commission of Texas and Tex-Iron, Inc. Both assert that this Commission lacks jurisdiction, or that in the alternative, SP's prosecution of its case before the Railroad Commission of Texas should estop SP from employing the jurisdiction of the Interstate Commerce Commission until the Railroad Commission issues an administratively final decision.

Tex-Iron Inc. argues that no authority is vested in this Commission by Section 11501(b) to make any determination as to the identity of a commodity moving in Texas intrastate commerce or as to which commodity description in the intrastate tariff is applicable to such commodity. Consequently it submits that the main issue the SP seeks to have this Commission rule on does not fall within the terms of Section 11501(b).

The arguments are without merit. Section 11501(b)(1) applies to intrastate rates, or changes in classification, rules, or practices. If State Commissions could independently identify materials differently from interstate classifications, this would in effect nullify section 11501(b). Furthermore, since the 120 day period has elapsed, this Commission has exclusive authority to prescribe intrastate rates.

A legitimate dispute exists as there are different rates now applicable to the intra-versus interstate movement of this commodity.

Petitioner has presented grounds under section 11501 which justify an investigation.

It is ordered: The petitioner to institute an investigation is granted. The Commission shall determine (1) if the existing rate levels are unreasonably discriminatory against or pose an undue burden on interstate or foreign commerce, (2) the proper classification for the commodity, and, if appropriate, (3) prescribe rates.

All persons who wish to participate in this proceeding and file and receive

¹ The dispute concerning the interstate rates is currently being litigated in docket No. 37064, OKC Corporation v. Missouri-Kansas-Texas Railroad Company, et al. (initial decision not yet served).

copies of pleadings shall notify the Office of Proceedings, Room 5356, Interstate Commerce Commission, Washington, D.C. 20423, on or before 15 days from the Federal Register publication date. Persons having common interests should consolidate their presentations to the greatest extent possible. The Commission will take official notice of the record in No. 37064, *supra*, and urges parties to avoid duplication of these two records by adopting evidence in that proceeding.

The Commission will serve a list of names and addresses of all persons upon whom service of pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or modified procedure. The modified procedure appears more appropriate in view of the Railroad Commission's proffer to submit its dockets as part of this proceeding and the availability of the record in No. 37064. However, we note that there are requests for oral hearing. Comments on this request should be filed not later than 20 days from the publication of this decision in the Federal Register by the parties who wish to participate in this proceeding.

A copy of this order shall be served on respondent, and copies shall be sent by certified mail to the Railroad Commission of Texas and the Governor of Texas. Copies shall also be deposited in the Office of the Secretary of the Commission in Washington, D.C. and filed with the Director, Office of the Federal Register, for publication in the Federal Register.

This is not a major Federal action affecting the quality of the human environment and is not a major regulatory action under the Energy Policy and Conservation Act of 1975.

By the Commission, Alan M. Fitzwater,
Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

**Hazardous Waste Guidelines and
Regulations**

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 250]

(FRL 1299-8)

Hazardous Waste Guidelines and Regulations

AGENCY: Environmental Protection Agency.

ACTION: Supplemental proposed rule.

SUMMARY: Under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, (RCRA) the Environmental Protection Agency is required among other things, to publish criteria for listing hazardous waste and a list of hazardous wastes. Hazardous wastes are subject to the requirements of the Solid Waste Disposal Act, as amended by RCRA, which directed the management and control of such wastes from generation to final disposal. EPA today proposes to add approximately forty-five wastes to the proposed list of hazardous waste which the Agency published on December 18, 1978 (43 FR 58943, 58957-58959). The amendments are necessary to respond to comments received during the initial comment period which indicated that certain additional wastes be included on the list and also result from EPA's own continuing review of information on hazardous wastes.

DATES: Comments are due October 12, 1979. A public hearing to receive comments on this supplemental proposal will be held on October 9, 1979, in Washington, D.C.

ADDRESSES: Comments should be addressed to John P. Lehman, Director, Hazardous and Industrial Waste Division, Office of Solid Waste (WH-565), U.S. Environmental Protection Agency, Washington, D.C. 20460. Communications should identify the regulatory docket number "Section 3001".

The official record for this supplemental rulemaking and EPA's other hazardous waste regulations is available at Room 2439K, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460 and is available for viewing from 9:00 a.m. to 4:00 p.m. Monday through Friday, excluding holidays.

A public hearing on this supplemental proposal has been scheduled at the following location: October 9, 1979—HEW Auditorium, 330 Independence Avenue, SW., Washington, D.C., 9:00

a.m.—5:00 p.m. Registration is from 8:30-9:00 a.m.

Anyone wishing to make an oral statement at the hearing should notify, in writing: Mrs. Geraldine Wyer, Public Participation Officer, Office of Solid Waste, (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

Oral and written comments may be submitted at the public hearing. Persons who wish to make oral presentations must restrict their presentations to ten minutes, and are encouraged to have written copies of their complete comments for inclusion in the official record.

FOR FURTHER INFORMATION CONTACT: Technical Information—Mr. Alan S. Corson, 202/755-9187, Office of Solid Waste (WH-565), U.S. Environmental Protection Agency, Washington, D.C. 20460.

Economic, Environmental and Regulatory Impacts—Mr. Michael J. Shannon, 202/755-9190, Office of Solid Waste (WH-565), U.S. Environmental Protection Agency, Washington, D.C. 20460.

Supplementary Information

Section 3001 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, (RCRA), requires EPA among other things, to publish criteria for listing hazardous waste and a list of hazardous wastes. Wastes which are included on the list are then subject to the hazardous waste management requirements of Sections 3002 through 3010 of the Solid Waste Disposal Act, as amended by RCRA.¹

On December 18, 1978, as part of proposed regulations implementing Section 3001, EPA published two proposed criteria for listing hazardous waste and an initial list of hazardous wastes (40 CFR § 250.12 (b) and 250.14, 43 FR 58946, 58955, 58957-58959). The agency is now proposing to expand that list for three reasons:

(1) During the public comment period on EPA's proposed Section 3001 regulations, commenters identified

¹ Hazardous waste management requirements for hazardous waste generators and owners/operators of hazardous waste treatment, storage or disposal facilities were proposed by EPA on December 18, 1978 (43 FR 58944, 58959-59022). Standards for hazardous waste transporters were proposed by EPA on April 28, 1978 (43 FR 18506-18512) and the Department of Transportation on May 25, 1978 (43 FR 22626-22634). Notification requirements for generators, transporters, treaters, storers and disposers of hazardous waste were proposed by EPA on July 11, 1978 (43 FR 29908-29916). Regulations governing the permitting of hazardous waste treatment, storage and disposal facilities and EPA approval of State hazardous waste programs were proposed on June 14, 1979 (43 FR 34214-34392).

approximately 150 additional wastes which they contended met EPA's proposed listing criteria and therefore should be added to the list. After reviewing both the data supplied by commenters to support these additional listings and other information on the potential hazards posed by such wastes, EPA has determined that a number of these wastes meet its proposed listing criteria and therefore should be listed as hazardous. The remaining wastes are not being proposed for listing at this time because they are no longer generated, or because the data supplied by the commenter (and other data currently available to EPA) do not demonstrate that the wastes meet EPA's proposed listing criteria. EPA's reasons for not proposing to list these wastes as hazardous will be discussed in more detail in the preamble (or background documents) to its final Section 3001 regulations, if they are not proposed for listing prior to that time.

(2) During the public comment period for the proposed regulations, a number of commenters also pointed out that EPA had failed to list a number of known carcinogenic chemicals as hazardous if those materials were disposed of as wastes. In response to these comments, EPA is proposing to add to its existing list of hazardous waste those chemicals which are included in the International Agency for Research on Cancer (IARC) list of human carcinogens and potential human carcinogens but which are not already listed in the proposed regulation in Appendices III, IV, and V, if such materials are disposed of as pure materials, spill clean-up residues, off-specification materials or container residues.

(3) Finally, as a result of its own continuing review of available information on hazardous wastes, EPA has identified a number of wastes which it has determined meet its proposed listing criteria and should be added to its December 18, 1978, proposed initial listing. EPA solicits comments on this supplemental listing as well as additional data that may defend or refute the listed wastes.

Included in this proposed supplemental listing are sixteen (16) waste streams generated in the production of chlorinated organic chemicals. These listings do not refer to specific process wastes, but to waste streams generated in the production of chlorinated aliphatic, chlorinated aromatic and chlorinated cyclic aliphatic hydrocarbons (from the chlorination step to final product generation). EPA has listed the waste

streams produced in the production of these chlorinated organic chemicals generically for several reasons: similarities in the composition of the waste streams within each group; the presence of chlorinated organic chemical contaminants in waste generated in the production of each group; the toxicity of chlorinated organic chemicals as a class; and evidence of damage to human health and the environment arising from the improper management of these wastes. Because EPA is considering using a generic format for listing other types of organic production waste, including brominated organics, phenols and aromatic amines and derivatives, the Agency expressly solicits public comment on using this listing approach as well as suggestions as to other generic waste categories that should be investigated.

For further information on the hazardous waste criteria and listing, the reader is referred to EPA's proposed Section 3001 regulation and preamble (43 FR 58949-58968).

Background Document

A background document has been developed in support of this supplemental proposed rule. Copies are available for review in all EPA Regional office libraries and in the EPA headquarters library (Public Information Reference Unit) Room 2404, Waterside Mall, 401 M Street, S.W., Washington, D.C.

Economic, Environmental, and Regulatory Impacts

In accordance with Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107, EPA policy as stipulated in 39 FR 37419, October 21, 1974, and Executive Order 12044, analyses of the economic, environmental, and regulatory impacts are being performed for the entirety of Subtitle C, Hazardous Waste Management. EPA does not believe that this supplemental proposed rule is a major action for the purposes of Executive Order 12044, in part because much of the costs to generators of management of the wastes covered in this supplement have previously been accounted for in the draft Regulatory Analysis prepared for the entirety of Subtitle C, Hazardous Waste Management, and made available for public review on January 8, 1979. However, the cost and economic impact analysis included in the Regulatory Analysis is being revised and expanded to include the waste covered by this supplement, and that revised analysis will be completed and available to the public for review at the time of final

promulgation of the entire Subtitle C regulatory package. EPA requests that any data commenters have on the generation rates of the wastes listed in the proposal, current management costs and practices for these wastes or on the cost or economic impacts of the proposed regulations be addressed, as noted previously, to John P. Lehman.

Dated: August 15, 1979.

Douglas M. Costle,
Administrator.

It is proposed to further amend Title 40 CFR, Part 250, Subpart A, which has been proposed at 43 FR 58946-58968 (December 18, 1978) as follows:

1(a) In § 250.14(a) the material appearing on p. 58958 in the first column, in the second through the fifth paragraphs (Material . . . Spill . . . ; Off-specification . . . ; Containers . . .) is deleted. The following hazardous wastes are added to the list in the order shown below.

(b) In § 250.14(b)(2) add the following waste streams:

§ 250.14 Hazardous waste lists.

* * * * *

(a) *Hazardous waste.*

* * * * *

Reactor clean up wastes from the chlorination, dehydrochlorination or oxychlorination of aliphatic hydrocarbons (O.M.).

Fractionation bottoms from the separation of chlorinated aliphatic hydrocarbons (O.M.).

Distillation bottoms from the separation of chlorinated aliphatic hydrocarbons (O.M.).

Washer wastes from the production of chlorinated aliphatic hydrocarbons (O.M.).

Spent catalyst from the production of chlorinated aliphatic hydrocarbons (O.M.).

Reactor clean up wastes from the chlorination or oxychlorination of cyclic aliphatic hydrocarbons (O.M.).

Fractionation bottoms from the separation of chlorinated cyclic aliphatic hydrocarbons (O.M.).

Distillation bottoms from the separation of chlorinated cyclic aliphatic hydrocarbons (O.M.).

Washer wastes from the production of chlorinated cyclic aliphatic hydrocarbons (O.M.).

Spent catalyst from the production of chlorinated cyclic aliphatic hydrocarbons (O.M.).

Batch residues from the batch production of chlorinated polymers (O.M.).

Solution residues from the production of chlorinated polymers (O.M.).

Reactor clean up wastes from the chlorination of aromatic hydrocarbons (O.M.).

Fractionation bottoms from the separation of chlorinated aromatic hydrocarbons (O.M.).

Distillation bottoms from the separation of chlorinated aromatic hydrocarbons (O.M.).

Washer wastes from the production of chlorinated aromatic hydrocarbons (O.M.).

Washer wastes from the production of chlorinated aromatic hydrocarbons (O.M.).

Washer wastes from the production of chlorinated aromatic hydrocarbons (O.M.).

Material which is within the scope of Section 250.10(b) and is normally shipped using a name listed in Appendix III (Pesticides), Appendix IV (DOT Poison A, Poison B, ORM-A Materials), Appendix V (Priority Pollutants), or Appendix XII, (IARC carcinogens) (T.O.M.).

Spill clean-up residues and debris from spills of materials which appear in Appendix III, IV, V, or XII (T.O.M.).

Off-specification material which is within the scope of Section 250.10(b) and, if met specification would be shipped using a name listed in Appendix III, IV, V, or XII (T.O.M.).

Containers, unless triple rinsed, which have contained materials normally shipped using a name listed in Appendix III, IV, V, or XII (T.O.M.).

(b) *Hazardous waste sources and processes.* (1) * * *

(2) *Processes generating hazardous waste:*

SIC and Process Description

- * * * * *
- 2295—Waste polyvinyl chloride (PVC) from the manufacture of coated fabrics (T.).
- 2491—Bottom sediment sludge from wood-treating process (O.M.B.).
- 2653—Waste from equipment cleaning from flexoprinting in the manufacture of paperboard boxes (T.O.M.B.I.).
- 2711—Waste from press clean-up in newspaper printing (T.O.I.).
- 2822—Polyvinyl chloride sludge from the manufacture of polyvinyl chloride (O.M.).
- 2869—Wastewater treatment sludges from the production of aldrin (O.M.B.).
- 2869—Still bottoms from the production of pentachloronitrobenzene (T.O.M.B.).
- 2869—Waste from the manufacture of dibromochloropropane (DBCP)(O.).
- 2869—Spent catalyst from hydrochlorinator reactor in the production of 1,1,1-trichloroethane (O.M.).
- 2869—Waste from the product steam stripper in the production of 1,1,1-trichloroethane (O.M.).
- 2869—Process clean out sludges from the production of 1,1,1-trichloroethane (O.M.).
- 2869—Waste from the neutralization of spent hydrogen fluoride in the production of fluoromethanes (O.M.).
- 2869—Spent catalyst from the fluorination reactor in the production of fluoromethanes (R.O.M.).
- 2869—Still bottoms from the purification of fluoromethanes in the production of fluoromethanes (O.M.).
- 2869—Waste from caustic scrubbing of fluorocarbon in the production of fluoromethanes (O.M.).
- 2869—Heavy ends and light ends from the production of methyl acrylate (O.).
- 2869—Heavy ends and light ends from the production of ethyl acrylate (O.).
- 2869—Distillation bottoms from the production of acetaldehyde from ethylene (O.).
- 2869—Heavy tars from the production of phenol/acetone from cumene (O.).
- 2869—Distillation residues from the production of phthalic anhydride from naphthalene (O.).
- 2869—Heavy ends from the production of glycerine from allyl chloride (O.M.).

- 2869—Light ends from the distillation of acetaldehyde in the production of acetic anhydride (I)
- 2869—Heavy ends from the distillation of acetic anhydride in the production of acetic anhydride (I)
- 2893—Wash water from printing ink equipment cleaning (T.O.M.B)
- 3322—Lead/phenolic sand-casting waste from malleable iron foundries (T.O)
- 3344—Spent potliners (cathodes) from primary aluminum smelting (R)
- 3573—Waste acid solution from manufacture of electronic computing equipment (T.C)
- 3674-3679—Cleaning, etching and plating waste, tank bottom sediments and metal treatment sludges from the manufacturer of printed circuits (C.T.O)
- 7395—Waste ferricyanide bleach, dichromate bleach, color developer (Agfa), bleach fix (Agfa) and acid solution from photographic processing (C.R.T).

2. By adding at the end of proposed Subpart A the following:

Appendix XII

International Agency for Research on Cancer (IARC)-Reviewed Substances Evaluated as Human Carcinogens Not Included in Appendices III, IV, and V

aflatoxins
4-aminobiphenyl
auramine
chloromethyl methyl ether
cyclophosphamide
diethylstilbestrol
melphalan
2-naphthylamine
N,N-Bis(2-Chloroethyl)-2-naphthylamine
oxymethenolone
phenacetin
phenytoin

IARC Reviewed Substances Evaluated as Potential Human Carcinogens Not Included in Appendices III, IV, and V

benz(c)acridine
benzo(j)fluoranthene
benzo(e)pyrene
dibenz(a,h)acridine
dibenz(a,j)acridine
7H-dibenzo(c,g)carbazole
dibenzo(a,h)pyrene
dibenzo(a,i)pyrene
N-nitrosodi-n-butylamine
N-nitrosodiethanolamine
N-nitrosodiethylamine
N-nitroso-n-ethylurea
N-nitroso-n-methylurea
N-nitrosomethylvinylamine
N-nitrosomorpholine
N-nitrosornicotine
N-nitrosopiperidine
N-nitrososarcosine
polyvinyl pyrrolidone
streptozotocin
N-nitrosopyrrolidine

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

(Release Nos. 33-6106; 34-16112; IC-10842)

Tender Offers By Issuers

AGENCY: Securities and Exchange Commission.

ACTION: Final rule and schedule.

SUMMARY: The Commission announces the adoption of a new Rule and schedule relating to tender and exchange offers by certain issuers for their own securities. The rule defines certain fraudulent, deceptive and manipulative acts or practices in connection with such offers, and prescribes filing, disclosure, dissemination and other requirements as means reasonably designed to prevent such acts and practices.

EFFECTIVE DATE: September 21, 1979.

FOR FURTHER INFORMATION CONTACT: John B. Manning (202-755-1388) or Mary E. Chamberlin (202-755-8747), Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission has announced the adoption of Rule 13e-4 and related Schedule 13E-4 [17 CFR § 240.13e-4 and § 240.13E-101] under the Securities Exchange Act of 1934 (the "Act") [15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)], to regulate certain issuer cash tender and exchange offers ("tender offers"). The Rule requires that, in connection with tender offers for their own equity securities, issuers with a class of equity securities registered under Section 12 of the Act or required to file periodic reports with the Commission pursuant to Section 15(d) of the Act and closed-end investment companies registered under the Investment Company Act of 1940 must comply with disclosure and other provisions governing the manner in which such offers may be made. The Rule defines, and prescribes means reasonably designed to prevent, fraudulent, deceptive or manipulative acts or practices in connection with issuer tender offers.

In addition, the Commission concurrently is adopting Rule 13e-3 and related Schedule 13E-3 which contain disclosure requirements applicable to going private transactions by public companies or their affiliates.¹ Since

¹ Securities Exchange Act Release No. 34-16075 (August 2, 1979), 44 FR 46736.

tender offers subject to Rule 13e-4 may also involve going private transactions, attention is directed to the provisions of that rule and schedule. The requirements of both Rules 13e-3 and 13e-4 are applicable to tender offers which involve going private transactions.²

I. Introduction

Rule 13e-4 ("Rule") and Schedule 13E-4 ("Schedule") were proposed for public comment on December 14, 1977.³ In response to the proposal, the Commission received eighteen letters of comment from interested persons. The Commission has considered these comments, and, where appropriate, has made certain modifications in the Rule and Schedule as proposed. The regulatory approach taken in the Rule, however, is unchanged. As noted in the 1977 Release,⁴ the requirements of the Rule are patterned substantially on the regulatory scheme established by Section 14(d) of the Act and existing rules thereunder which are applicable in the context of third party tender offers. The requirements of the Rule reflect, where appropriate, proposed revisions in the rules under Section 14(d) which the Commission published for comment in 1976 and republished in revised form in February 1979.⁵ The information required to be disclosed in Schedule 13E-4 is substantially the same type of information which is required by Schedule 14D-1.⁶

As noted in the 1977 Release, prior to this time, the Commission has not exercised its rulemaking authority under Sections 13(e) and 14(e) of the Act to regulate directly the manner in which issuer tender offers must be made, although such offers have been and

² It should be noted that General Instruction B to Schedule 13E-4 provides that information required to be disclosed in Schedule 13e-4 may incorporate by reference information disclosed in other filings by the issuer.

³ Securities Exchange Act Release No. 34-14234 (December 14, 1977), 42 FR 63066 ("1977 Release").

⁴ See 1977 Release, 42 FR at 63066.

⁵ Securities Exchange Act Release Nos. 34-12676 (August 2, 1976), 41 FR 33004; 34-15548 (February 5, 1979), 44 FR 9956 (the "February Proposals"). To the extent that certain of the provisions of Rule 13e-4 differ from the requirements of any of the February Proposals which are adopted, the Commission may consider whether to amend Rule 13e-4 or the February Proposals to conform the requirements of both rules.

⁶ Schedule 14D-1 was adopted by the Commission in July 1977. Securities Exchange Act Release No. 34-13787 (July 21, 1977). The Division of Corporation Finance will be responsible for reviewing the filings on Schedule 13E-4 by persons subject to the Rule. Accordingly, inquiries with respect to the disclosure obligations imposed by specific items of Schedule 13e-4 should be directed to that Division. All other interpretative questions with respect to the Rule should be directed to the Division of Market Regulation.

remain subject to the general antifraud and antimanipulative provisions of the Act, such as Section 10(b) and Rule 10b-5 thereunder, and Section 14(e).⁷

II. Statutory Background

The Commission has adopted Rule 13e-4 under seven sections of the Act, including Sections 13(e) and 14(e).⁸ Sections 13(e) and 14(e) expressly grant the Commission authority to adopt rules which define, and prescribe means reasonably designed to prevent, fraudulent, deceptive or manipulative activity in connection with purchases by an issuer of its own securities, and in connection with any tender offer, respectively.

Some commentators raised questions regarding the Commission's authority to adopt a rule which would regulate the manner in which tender offers by issuers must be made. Those commentators suggested that, based upon the legislative history of the sections of the Act under which the Rule has been adopted, particularly Section 13(e), the Commission's authority is limited to promulgating disclosure requirements in connection with such offers. The Commission does not agree.

Sections 13(e) and 14(e) were added to the Act by the Williams Act amendments of 1968.⁹ A primary purpose of the Williams Act was to extend existing federal regulation of contests for corporate control, which
